Mr. Douglas Hogg: Health care staff have received specialised training in the care and support of patients with AIDS and AIDS-related conditions, including in some cases practical experience in a National Health Service AIDS unit. External AIDS counselling courses have been attended by some staff including chaplains. A more general training programme, provided by the establishment's own training staff and intended for all operational staff, provides basic health and safety information and an understanding of the nature of AIDS and HIV infection at a level appropriate to their task of managing infected prisoners with no signs or symptons of illness. All operational staff have received some training of this kind and over 75 per cent. have seen a specially made prison service training film. This is a continuing programme. Prisoners have access to a wide range of educational material including videofilms and leaflets. A new educational package produced by the Department centrally for use throughout the prison service will be brought into use in the near future.

Mr. Corbett: To ask the Secretary of State for the Home Department how many prisoners at Her Majesty's prison Winson Green, identified as HIV positive *(a)* with symptoms and *(b)* without symptoms are being kept in prison hospital or other special accommodation.

Mr. Douglas Hogg: For reasons of medical confidentiality it is not our practice to disclose the number of current cases reported by individual establishments.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for the Home Department what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Hurd: The Home Office spent approximately £3,572,000 on management and computer consultancies in 1988. The following contracts were awarded to management or computer consultancy firms by the Home Office in 1988:

Consultancy	Assignment
Express Computer Consultancy	Software development for Financial Division
Grafton	Benchmark preparation for Police National Computer
Grafton	Software support for Police national computer
Captain Hannant, Captain Stubbs	Study on the application of cir legislation to police operations
Hunterskill	Programming support for Prison Service

Consultancy	Assignment
ICL	Systems analysis for Immigration and Nationality Department
ICL	Bootle Computer Bureau Network Support
ICL	System sizing for Immigration and Nationality Department
IN2	Post Administration programming support
JSB	Database support for computerisation of central records
Kerman Associates	IT Division technical support
Logica	Fire Department Brigade requirements study
Logica	Local Area Network study for Immigration and Nationality Department
Metier	Bootle Computer Bureau project management tool support
Oasis	Intelligency Knowledge Based Systems study
Oracle	Bootle Computer Bureau software support
PA Management Consultants	WARC project management
PA Consulting	Investment Appraisal support for Immigration and Nationality Department
PA Consulting	Police National Computer Office project management support
PA Technology	Proposal Evaluation: Automatic Fingerprint Recognition
P-E Computer Services	Bootle Computer Bureau programming support
Peat Marwick McClintock	Review of laundry service
Peat Marwick McClintock	IND Relocation Study
SIA	Fire Statistics Section hardware sizing trial
Software AG	Police National Computer Office software support (two contracts)
St. George's Medical School	Technical support from Forensic Science Service
Touche Ross	Management systems strategy for prison industries
TSC Ltd.	Police National Computer Office Operating System Support
Thornhill Computer Services	Bootle Computer Bureau programming support
Dr. R. L. Williams	Reviewing fingerprint evidence
Yale Data	IT Division technical support
Aberdeen University	Technical support for Scientific Research and Development Branch
Ampex	Videofile testing
Batalas	Police National Computer Office Quality Assurance support
BBN	Technical support for Scientific Research and Development Branch
BIS	Magistrates Court contingency study
BIS	Financial Systems support
Cooper and Lybrand	Assistance with training seminars in Prison Service
Computer Search and Selection	Immigration programming support
CCTA	IT Division Post Implementation Review
Data Logic	Local Area Networks study
Dataflex	Programming support for Prison Service
Deloitte Haskins and Sells	Improving Clerical Support Services to Her Majesty's Prison forms
Deloitte Haskins and Sells	Study of potential feasibility of private sector involvement in the remand system

Consultancy	*Assignment*
Digitus	IT Division technical support
Eosys	Police Requirements Network study
Ewbank Preece	Microwave study

Mr. Tim Smith: To ask the Secretary of State for the Home Department what was the total amount spent by the Metropolitan police in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Metropolitan police in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that the Metropolitan police spent an estimated £1,220,000 on management and computer consultancies in 1988-89.

The following contracts were awarded in 1988:

Firm	*Contracts*
Geoff Ford	Consultancy on Mechanical and Electrical Branch Control Information Systems.
Digitus	Programming advice on Territorial Operations Systems.
Safe Computing	Setting up software for police payroll.
Chess Valley	Enhancement to G10 crime statistics input system.
Carnell	Consultancy on civil staff payroll.
ICL	Technical support on hardware and software including installation of new system and super-dualling of two ICL 2988 machines.
ICL	Software enhancement.
Gerard Systems	Artemis Consultancy.
Gresham Software Skills Ltd	Operating system conversion from DME to VME.
STS Nescourse	Consultancy advice on Querymaster software package.
Hoskyns	Technical advice on VMS operating system
Prolog	Programming work on cheque reconciliation suites.
Pergamon Infotech	Provision of documentation etc. for Cautions Index project.
Unisys	Software enhancement for police computers at outer London magistrates' courts.
CCTA	Crime Report Information System (CRIS) benefits evaluation.
Deloitte Haskins & Sells	Data modelling consultancy.
Intra Systems	Consultancy to review CRIS training programme.
Scicon Ltd	Production of simulation model of a CID office.
Ernst & Whinney	Data envelope. Study of MP divisions.
Unisys	Manpower services in connection with replacement command and control system.
Peat Marwick McLintock	Re-location of stores.
Peat Marwick McLintock	Review of options for direct supply of goods to users.
Wolff Olins	Corporate Identity consultancy.
D.W.J. Consultants	Procurement consultancy
Touche Ross	Catering consultancy.
Hay Management Consultants Ltd	Alternative civil staff pay arrangements.

Police National Computer (Report)

Mr. Corbett: To ask the Secretary of State for the Home Department whether he will make it his policy to publish the report of the review of the police national computer being carried out by County Nat West when it has been completed.

Mr. Douglas Hogg: This report has only just been received and we have yet to decide how best to carry out consultations on its conclusion.

Fatal Accidents (Police Vehicles)

Mr. Fry: To ask the Secretary of State for the Home Department how many fatal accidents during 1985, 1986, 1987 and 1988 involved motor vehicles driven by suspected criminals who were being chased by the police.

Mr. Douglas Hogg: The information requested is not recorded centrally and could be obtained only at disproportionate cost.

Data Protection Act 1987

Mr. Livingstone: To ask the Secretary of State for the Home Department, pursuant to his answer to the hon. Member for Brent, East of 1 February, *Official Report*, column *254*, what representations he has received concerning amendments to the terms of the Data Protection Act 1987.

Mr. Renton: I have received no other representations on those aspects of the Data Protection Act 1984 to which the hon. Member's earlier question referred.

British Citizens

Mr. Livingstone: To ask the Secretary of State for the Home Department what representations he has received concerning information supplied by Her Majesty's Government to the San Francisco immigration and naturalisation service about Mrs. Nina Hutchinson which formed the basis of the decision to refuse her entry into the United States of America in December 1988; and if he will make a statement;

(2) what representations he has received concerning exchanges of information under the proposed incorporation of the European treaty on mutual assistance into British law; and if he will make a statement;

(3) what information on British citizens is made available by Her Majesty's Government to other countries;

(4) how many complaints have been received from British citizens who have travelled abroad concerning information about them supplied by Her Majesty's Government to other Governments.

Mr. Hurd: Two hon. Members have forwarded representations from the Troops Out movement claiming that one of its members was detained and removed from the United States of America on the basis of information provided by the Government. I am not prepared to comment on particular arrangements for exchanging information with other Governments or on individual cases. Apart from these representations, we are not aware of any other complaints about information supplied to other Governments.

The Troops Out movement also expressed concern about the effect, as regards the exchange of information, of the United Kingdom's ratifying the European convention on mutual assistance in criminal matters. Legislation would be required before the United Kingdom could accede to this convention, the purpose of which is to enable one state to assist another in the investigation and prosecution of criminal offences. It is a precondition of such assistance that criminal proceedings should be pending in the requesting state, or that initial investigations should have begun with a reasonable expectation that such proceedings will ensue.

Category A Committee

Mr. Livingstone: To ask the Secretary of State for the Home Department what is the role and composition of the category A committee.

Mr. Douglas Hogg: The role of the committee is twofold:

(i) to consider whether prisoners recently convicted of very serious crimes should be placed in security category A, which is reserved for those inmates whose escape from prison custody would be highly dangerous to the public or to the police or to the security of the State;

(ii) to review, at least annually, the cases of all those who have been made category A;

and to make recommendations to the Director General of the Prison Service.

The committee comprises senior officials of prison service headquarters, governors of prisons normally holding category A prisoners, and a senior police officer.

Mr. Albert Baker

Mr. Livingstone: To ask the Secretary of State for the Home Department what representations he has received since 1979 concerning the case of Mr. Albert Baker, currently prisoner No. 241254 in Her Majesty's prison Long Lartin.

Mr. Douglas Hogg: Numerous inquiries and letters from hon. Members and noble Lords and members of the public have been received in support of Mr. Baker's requests to be transferred to Northern Ireland, but a detailed enumeration could only be provided at disproportionate cost.

Metropolitan Police (Public Relations)

Mr. Corbyn: To ask the Secretary of State for the Home Department what is the cost to the Metropolitan police of the public relations budget for each year since 1979.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that expenditure by the Metropolitan police on all forms of recruitment and other advertising, and other promotional literature, in each financial year since 1979-80 is as follows:

	£
1979-80	759,000
1980-81	967,000
1981-82	1,062,000
1982-83	1,028,000
1983-84	1,675,000
1984-85	1,747,000
1985-86	1,868,000
1986-87	2,269,000
1987-88	2,836,000
[1]1988-89	3,397,000

[1] Estimate.

Foleshill Information and Advice Centre, Coventry

Mr. Nellist: To ask the Secretary of State for the Home Department what assessment he has made of the

compatibility of that part of his Department's letter of 20 January, reference RDI 88 622/56/5, to Mr. Christopher Farmer, director of education at Coventry city council, which rejected section 11 funding for posts at the Foleshill information and advice centre, on the grounds that they would be assisting all sections of the community, with that part of the letter which rejected section 11 funding for a development work for the Asian sheltered residential accommodation on the grounds that the postholder would be working just for Asian clients; and if he will make a statement.

Mr. John Patten *[holding answer 16 March 1989]:* I am satisfied that the extracts from this Department's letter, which have been taken out of context, as can be seen from the full text which I have placed in the Library, are in no way incompatible. Coventry city council's applications for the posts in question did not identify what special need, particular to the relevant Commonwealth community, the proposed posts would address. Identification of such need is an essential pre-requisite for approval of section 11 grant. If Coventry city council requires further clarification, officials at the Home Office will be pleased to explain the reasons for refusal in greater detail.

EMPLOYMENT

Employment Training

Mr. Leighton: To ask the Secretary of State for Employment what percentage of those referred by the employment service to ET complete their assessment with a training agent; what percentage of those who complete their assessment stay six days with a training manager; and what percentage of those originally referred by the employment service stay six days with a training manager.

Mr. Nicholls: It is estimated that to the end of January 1989 about 55 per cent. of those referred from the Employment Service to training agents agreed action plans. The number of people staying at least six days with a training manager is estimated to be about 80 per cent. of the total number of those who agree action plans. The number of trainees who stay at least six days with training managers is about 45 per cent. of the total of those referred from the Employment Service to training agents.

Mr. Leighton: To ask the Secretary of State for Employment what have been the numbers and percentages of those who started on ET who did not complete their course.

Mr. Nicholls: It is estimated that of the 153,300 unemployed people who had started on employment training between 5 September 1988 and the end of January, about 23,000 or 15 per cent. had left the programme early without completing their planned programme of training. People leave the programme for a number of reasons including starting work.

Mr. Leighton: To ask the Secretary of State for Employment if he will list the qualifications gained by trainees in the ET programme.

Mr. Nicholls: The information requested is available only at disproportionate cost.

Ms. Short: To ask the Secretary of State for Employment what funds his Department has allocated for paying training bonuses to employment training trainees; how much has been paid out to date; and if he will give a breakdown showing how much of that money has been paid out in each of the local areas administered by the Training Agency.

Mr. Nicholls: These arrangements are funded from the overall resources available for employment training and there are no separate area budgets for this purpose. Up to end of February 1989 £84,518 has been paid.

Ms. Short: To ask the Secretary of State for Employment how much has been paid out through the underpinning arrangements to ET managers and agents since the start of employment training; and if he will give a breakdown showing how much of that money was paid out in each of the local areas administered by the Training Agency.

Mr. Nicholls: The underpinning arrangements are funded from the overall resource available for employment training and there are no separate area budgets for this purpose. Up to the end of February 1989 a total of £9,159,751 has been paid out to training managers, and £422,613 to training agents.

Vocational Training

Mr. Paice: To ask the Secretary of State for Employment what were the total numbers of *(a)* adult employees receiving vocational training, *(b)* young persons 18 years and under receiving vocational training and *(c)* all persons of employment age receiving vocational training in each year since 1970 or in those years for which figures are available.

Mr. Cope: Estimates from labour force surveys of persons receiving job-related training, are shown in the table. The labour force survey did not include questions on training which can be used to produce comparable estimates prior to 1984.

Job-related training[1]—Great Britain, spring estimates

thousands

Year	*Employee of working age[2]*	*Persons aged 16 to 18 years*	*Persons of working age[2]*
1984	1,806	461	2,518
1985	2,088	574	2,897
1986	2,176	530	3,003
1987	2,380	530	3,313
[3]1988	2,776	589	3,806

[1] Persons who said that in the four week period prior to interview, they had taken part in any education or training connected with either their current job or a job they might be able to do in the future.
[2] Men aged 16 to 64, women aged 16 to 59.
[3] Preliminary estimates.

Repetitive Strain Injury

Mr. Andrew Smith: To ask the Secretary of State for Employment what plans he has to fund research into the causes and effects of repetitive strain injury, and into preventive measures for it.

Mr. Nicholls: The Health and Safety Executive is currently supporting two projects investigating repetitive strain injury through its extramural biomedical research programme, at the Institute of Occupational Medicine in Edinburgh and the university of Birmingham.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Employment what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Cope: The total amount spent by my Department (excluding the Training Commission/Agency) in 1988 on management and computer consultancy contracts, excluding hardware and software purchases, was £2·3 million.

The following firms were awarded consultancy contracts by the Department of Employment group, excluding the Training Commission/Agency, during 1988:

Firm	*Subject of assignment*
AIMS Systems	Quality Assurance review for major system
AMP	Software support for small firms centres system
Arthur Andersen	Benefit related payments system
Arthur Young	Consultancy for review of anti-fraud measures in selected systems Consultancy for management information systems Work on ES payments manual and testing of market National unemployment benefit system terminal study Glasgow Jobseeker Central processing in London and the South-East (SUPERVACS project)
Colin Minton and Associates	PER privatisation
Coopers and Lybrand	Consultancy and advice on major system
D. E. Barnard Systems	SUPERVACS—Technical assurance co-ordination SUPERVACS—Risk analysis for disaster site
Falkman Communications	Advice on ES internal communications
Datasolve	Computer-based training for the national unemployment benefit system
Ferrari Software	Consultancy for local area network specification
Hoskyns	Management of computer systems Software enhancements to major systems
HUSAT	National unemployment benefit system
ICL	Use of new techniques on major systems IDMS X consultancy Resolution of mainframe loading problems Quickbuild and data specification requirements
ITM Ltd.	Restart
Kennedy Robinson Business Development Ltd.	ES executive board workshop
Learmouth and Burchett Management Systems	PROMPT study
Lloyd Northover	Work on ES corporate identity
Makrotest	A study of the small firms service
Michael Wesley Associates	Production of careers service publicity guide
PA Consultants	A review of Government support for the tourism industry IT strategy for ES SEPACS study Feasibility study on SUPERVACS enhancements
Pannell Kerr Foster Associates	A review of the statistical needs of the tourism sector
Peter Seal	Quantity surveyor for structural surveys
Professor Colin Gallagher (Newcastle University)	Research into the role of small firms in job generation in the United Kingdom
Sphinx Ltd.	Adjudication office automation
Thurrock Computing Services	RESTART study
Yale Data	SSADM consultancy for major personnel project Advice on standards for testing critical systems Adjudication office automation

Mr. Tim Smith: To ask the Secretary of State for Employment what was the total amount spent by the Training Commission in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Training Commission in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Cope: The Training Agency spent a total of £1·1 million during the calendar year 1988 on mangement and computer consultancy contracts, excluding hardware and software purchases. No management consultancy contracts were awarded during 1988. The list of computer consultancy contracts awarded during 1988 is as follows:

Consultants	*Subject of Assignment*
J. Ackroyd	A consultant to enhance the existing database for the YTS expenditure forecasting model
Bacie	A consultant to look after a database of "LCP" information
Butler Cox	A consultancy to assist the Training Commission in evaluating the office technology project
Camtec	To provide assistance with the development of the MSC network
CCTA	To put a business case together (including investment appraisal aspects) for a local area network for the Training Commission at Moorfoot To undertake a scoping study of funding, charging, and management aspects of the MSC network
Codd & Date	To advise the Training Commission on the definition of a relational database
Compact Business Computers LTD	A consultant to develop a database for the employment training underpinning system
Compsoft	A consultant to provide guidance on the most efficient way to design and implement an accident database
Coopers and Lybrand Associates	A consultant to review the commission's corporate financial management strategy Consultant to provide project management support
CMG Information Services	System analysts to assist FSR with their development work
EOYSYS	A consultant to carry out a strategic review of the videoconferencing requirements within the DE Group
GTC Project Ltd.	Creation of a database for the employment training initiative monitoring system
Harwell Computer Power	Consultancy advice on the use of "*STATUS*"
Hunterskill	A consultant to provide SSADM support on the PDP project
I-NET	A consultant to review the Training Commission's network
The Instruction Set	To provide the Training Agency with advice and guidance on the selection of a software environment
The Instruction Set	A consultant to assist in the evaluation of the software environment
National Council for Education	To provide TAP with consultancy in the areas of strategy, planning, R and D projects
The Networking Centre	A consultant to produce a business analysis for the Moorfoot site
Omicron	A consultant to write a purchase order management system, and train staff in its use
PA Computers and Telecommunications	To provide advice and assistance in deciding where, and how, MSC's "MASCOT" system should be replicated in MSC HO A study to look into the office technology input to the infrastructure project
PE Consulting Services	System analyst to assist FSR with their development work
Presenting with Style	A consultant to provide training in the use of "Wordperfect" software for senior officers' secretaries
Sherington Software	A study to evaluate packages for transferring data from "*ALL*" to micros Programmers to assist the Training Agency on the maintenance and development of the TOPS MINIS System
Chrissie Strickland	A consultant to look after a database of "LCP" information

Consultants	Subject of Assignment
R. H. Wilmott	A study into the Training Agency's X.400 profile and messaging requirements taking into account "COSIP" message handling system
M. Wilson	A consultant to carry out changes to the "Supercalc" system for the staff deployment survey
Xentec	Contract programmers for spectrum development work
Yale Data	Systems analyst to assist FSR with their development work Consultant to support in-house technical assurance coordinator
Arthur Young	A study into the information needs of senior management

Training Premiums

Ms. Short: To ask the Secretary of State for Employment whether he has any plans to increase the level of ET premiums in 1989 or 1990.

Mr. Nicholls: My right hon. Friend has no plans to increase the training premium part of trainees' allowances. However trainee allowances on employment training (ET) will increase from April 1989 when benefits are uprated.

Training (Health and Safety)

Ms. Short: To ask the Secretary of State for Employment what steps he will take following the judgement in the Cain case, to ensure that the establishment of training and enterprise councils will not diminish his final responsibility for the health and safety of both YTS and ET trainees; and if he will make a statement.

Mr. Cope: The contract between the Training Agency and training and enterprise councils (TECs) will require each TEC to meet the Government's requirements for the health, safety and welfare of trainees. The TECs will also be required to include conditions and acceptable standards relating to the health, safety and welfare of trainees in their contracts with providers of training. The Department has worked to ensure a high level of health and safety on all its programmes. The TECs will be required through their contract to continue this commitment.

Redundancy Payments

Ms. Short: To ask the Secretary of State for Employment how much money has been reimbursed to *(a)* community programme agents and sponsors; *(b)* new job training scheme providers; and *(c)* ET training managers and agents, for redundancy payments during the period from 1 September 1988, up to the most recently available date.

Mr. Nicholls: The amounts reimbursed for redundancy payments from 1 September 1988 up to and including February 1989, are as follows:

(a) — £1,683,495;
(b) — Nil; and
(c) — £37,250

Political Vetting

Mr. Livingstone: To ask the Secretary of State for Employment, pursuant to his answer to the hon. Member for Brent, East of 1 February, *Official Report*, column *261*, what representations he has received concerning amendments to the terms of the Employment Protection Act 1975 in relation to the political vetting of employees.

Mr. Nicholls: My right hon. Friend has received five such representations in the last 12 months.

Youth Training

Mr. Cryer: To ask the Secretary of State for Employment what was the number of deaths and reportable injuries incurred by young workers on YTS schemes for each year of the scheme since inception; and if he will make a statement.

Mr. Cope: The YTS accident statistics cannot be broken down into employed and non-employed status. Studies of YTS accidents by independent researchers have, however, shown that YTS trainees are not more at risk than young people of equivalent age in employment outside the programme.

Ms. Mowlam: To ask the Secretary of State for Employment how many young people aged 16 and 17 years have been unable to obtain, or to take advantage of, an offer of a youth training scheme; and how many of these have been left without benefits.

Mr. Cope: The guarantee of an offer of a YTS place to all 16 and 17-year-olds not in full-time education or employment means that there is now no need for young people to be unemployed. I am satisfied that the Training Agency has more than sufficient YTS places available in all parts of the country for those who apply for one.

Labour Statistics

Mr. Gordon Brown: To ask the Secretary of State for Employment if he will publish forecasts of *(a)* the numbers unemployed and *(b)* unemployment rates for 1989-90 to 1991-92 for Scotland, Wales and by region in England.

Mr. Lee: The information is not available. The Department does not forecast future levels or rates of unemployment.

Mr. Gordon Brown: To ask the Secretary of State for Employment if he will publish forecasts of the numbers in employment for 1989-90 to 1991-92 for Scotland, Wales and by region in England.

Mr. Lee: The information is not available. The Department does not produce forecasts of employment, either in total or by region.

AGRICULTURE, FISHERIES AND FOOD

Food Colours

Mr. Gordon Brown: To ask the Minister of Agriculture, Fisheries and Food if his Department will provide an estimate of how many food colours at present in use in Britain are not listed in United Kingdom regulations.

Mr. Ryder: No food sold may contain any colouring matter other than a colouring matter permitted by the Colouring Matter in Food Regulations 1973, as amended. Enforcement of the regulations is a matter for local authorities. I am not aware of any reports of non-permitted colouring matter being used in food.

Set-aside

Mr. Pawsey: To ask the Minister of Agriculture, Fisheries and Food what is the total estimated cost of set-aside.

Mr. Ryder: Payments on land in the United Kingdom set aside in the current crop year will total about £11 million. The cost in future years will depend on the extent of further uptake of the scheme.

Mr. Pawsey: To ask the Minister of Agriculture, Fisheries and Food if he has any plans to increase the amount of set-aside for United Kingdom farmers.

Mr. Ryder: I shall be inviting further applications under the scheme later this spring. I have no plans to increase the levels of payment.

Hedgerows

Mr. Andrew F. Bennett: To ask the Minister of Agriculture, Fisheries and Food whether he intends to introduce any legislation in the next parliamentary session which will provide statutory protection for hedgerows in England and Wales.

Mr. Ryder: I have no plans to do so.

Mr. Andrew F. Bennett: To ask the Minister of Agriculture, Fisheries and Food pursuant to the reply to the hon. Member for Denton and Reddish, *Official Report* 16 February, column 370, whether he has seen the research paper entitled, "Hedgerows: Still a cause for concern," published in the Royal Society for the Protection of Birds conservation review, a copy of which has been sent to him; and if he will make a statement on the conclusions contained in that paper.

Mr. Ryder: I was pleased to receive the Royal Society for the Protection of Birds conservation review of 1988, and read with interest the article on hedgerows.

The Royal Society for the Protection of Birds surveys in north Hertfordshire and west Oxfordshire add to the number of recent surveys on hedgerow loss which have produced varying estimates. I am sure the hon. Member is aware that work is being carried out on improving survey methodologies and that my Department is contributing to this work. The Royal Society for the Protection of Birds figures on hedgerow loss are of course related only to a small area, unrepresentative of the country as a whole.

Nevertheless we are concerned that hedgerows should be maintained in good order if they are to retain their value as wildlife habitat, as a landscape feature and as a stock-proof barrier. While this must be a matter for the individual farmers concerned, my Department encourages the maintenance of hedgerows in good condition. Through my agricultural development and advisory service advice is offered to farmers on hedgerow trimming and maintenance and on the time of year when cutting and trimming is best carried out for the benefit of wildlife.

Slaughtering

Sir Richard Body: To ask the Minister of Agriculture, Fisheries and Food how many of the recommendations of the Farm Animal Welfare Council relating to the slaughter of animals have been accepted by him.

Mr. Donald Thompson: The Farm Animal Welfare council has published four reports relating to the slaughter of animals. These contained a total of 185 recommendations on slaughter of which 167 have been accepted, in whole or in part, for implementation by means of legislation, codes of practice, guidance to local authorities or research, as appropriate.

All but one of 45 recommendations in the report on the welfare of poultry at the time of slaughter (1982) were accepted. The report on the welfare of livestock (red meat animals) at the time of slaughter (1984) contained 117 recommendations of which only 13 were rejected in full. Fifteen of 17 recommendations in the report on the religious slaughter of livestock (1985) and four of six recommendations on slaughter in the report on the welfare of farmed deer (1985) have also been accepted.

Small Companies (Payments)

Mr. Campbell-Savours: To ask the Minister of Agriculture, Fisheries and Food (1) what advice has been given to him by the Intervention Board of the EEC on the payment on account of payments that may be due;

(2) whether, in the case of non-annex II products, he intends to accelerate payments to British producers under the terms of regulation 3665/87;

(3) whether he is satisfied that in the case of complex claims by small companies for payments under Commission regulation 3665/87 no delays are currently taking place;

(4) what representations he has received from smaller companies on delays in payments due under the terms of Commission regulation 3665/87.

Mr. Donald Thompson: The Intervention Board is now in general paying claims for export refunds within 60 days of receipt of appropriate documentation. Exceptionally, more complex claims for non-annex II goods and claims for victualling supplies continue to be delayed. The payment position will be restored for the former in coming weeks and for the latter by the autumn. Payment on account would contravene the provision of EC regulations which require that the conformity of claims with the regulations should be verified prior to payment. This view has been confirmed by European Commission services. The board continues however to make compensation payments on all claims whose payment since 1 January 1988 has been unreasonably delayed under the compensation scheme announced to the House last July.

Exporters may apply under article 22 of Commission regulation (EEC) No. 3665/87 for advance payment once an export declaration has been accepted, and providing

that a security is lodged. In practice, the arrangement allows the provisional payment of premium rates of export refund in the same timescale as payments of standard rates. However, the Intervention Board is still required to check conformity with the relevant Community legislation before making the payment. The relative benefit of these different payment procedures is for commercial evaluation.

Lambs

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) what is his Department's response to the practice of using staging posts to facilitate the transport of live exported lambs across Europe.

(2) if he has any plans to limit the length of time permitted for lambs to spend in transit immediately prior to slaughter;

(3) what representations he has received calling for the maximum travelling time for lambs prior to slaughter to be limited to 12 hours.

Mr. Donald Thompson: Over the years my Department has received a number of representations calling for maximum travelling times for live food animals to be limited to 12 hours. However EC legislation requires that animals in international transport, should be offered food and water at suitable intervals and should not be left more than 24 hours without being fed and watered. Staging posts exist to fulfil this requirement, and my Department seeks to ensure that they are used on long journeys. The Commission is expected to propose a new regulation on welfare in transit shortly, and meanwhile I have no plans to introduce new measures.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) what steps he is taking to encourage the slaughter of lambs prior to export to the countries of the southern European Economic Community;

(2) what is his Department's response to the increasing practice of transporting live lambs considerable distances across Europe prior to slaughter;

(3) if he will raise at the next Council of Ministers the increasing practice of transporting live lambs across Europe prior to slaughter;

(4) whether his Department plans to take steps to encourage the slaughter of lambs for export as close to the farm of origin as possible.

Mr. Donald Thompson: Sheep and lambs have been exported to other member states of the Community for slaughter for many years. Provided that United Kingdom and EC welfare legislation is complied with, I see no need to interfere with this trade.

Research Funding

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will list those food and agricultural research programmes and institutes from which funding has been withdrawn during 1987-88, 1988-89 and 1989-90.

Mr. Ryder: Overall funding of agricultural, fisheries and food research and development by the Agriculture departments was reduced by £10 million in 1987-88, as part of the Government's policy to encourage industry to make a greater contribution towards the costs of R and D from which it benefits. Public support remained unchanged in 1988-89, and will be reduced by a further £5 million in 1989-90 under the Government's plans progressively to withdraw funding from near market research. A list of projects indicative of the work considered to be near market in the agriculture and food sectors was deposited in the Library of the House in November 1988. Funding of individual projects within the research programme is under continuous review, and in the natural course of events funding is withdrawn from particular projects as they reach a conclusion. The allocation of available funds for commissioned work to particular institutes is a matter for the Agriculture and Food Research council.

Pesticides

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food how many scientists are currently employed by his Department reviewing pesticides currently in use which were in use prior to the Food and Environmental Protection Act 1986.

Mr. Ryder: I refer the hon. Member to the reply given on 23 March to the hon. Member for South Shields (Dr. Clark) at column *726*.

Deer

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what research his Department is currently sponsoring into the incidence of tuberculosis in deer; and whether he has any programme for the development of vaccine or live-testing techniques; and if he will make a statement.

Mr. Donald Thompson: A survey is being carried out in selected areas of south-west England on culled wild deer to estimate the prevalence of tuberculosis in free living deer. In addition all wildlife material, including that from deer, that comes to the Ministry's notice, is examined for tuberculosis should there be any cause to suspect its presence. All reports of tuberculosis in farmed deer are investigated. More complete information on the prevalence of the disease will become available when it is made notifiable.

There is no programme for the development of a vaccine for deer as vaccination would adversely affect the interpretation of tuberculin tests. Work is being carried out at the central veterinary laboratory on the development of a blood test for tuberculosis in deer.

BST Product Licences

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food which scientific or other committees in the United Kingdom or the European Economic Community will be responsible for assessing any application for a BST product licence.

Mr. Donald Thompson: In the United Kingdom such product licence applications are examined by the veterinary products committee established under section 4 of the Medicines Act. At Community level they are referred to the Committee on Veterinary Medicinal Products for an opinion, in accordance with directive 87/22/EEC on high technology medicinal products, before national licensing authorities reach any decision.

Strychnine

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether his Department's guidance in the use of strychnine compounds includes reference to the use of such poisons for the control of wild rabbits.

Mr. Ryder: My Ministry's guidance makes it clear that strychnine may be used only for the control of moles. We take a very serious view of any abuse of strychnine to poison other creatures.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what criteria have to be met by individuals wishing to obtain permission for the purchase of strychnine compounds for pest control purposes.

Mr. Ryder: Authorities to purchase strychnine are issued under the poisons rules only if the applicant demonstrates a need for strychnine for the destruction of moles, is a competent and suitable person, and does not occupy land on which moles are dealt with by a rabbit clearance society. The authority is limited to the amount of strychnine needed to deal with the infestation.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether strychnine alkaloid has any approved agricultural uses.

Mr. Ryder: Strychnine alkaloid is not approved for agricultural use under the Control of Pesticides Regulations 1986.

Computer Consultants

Mr. Tim Smith: To ask the Minister of Agriculture, Fisheries and Food what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Donald Thompson: The total amount spent by my Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases, was £522,735. Contracts awarded in 1988 are as follows:

Company	*Subject*
Management consultancy contracts awarded by the Ministry of Agriculture, Fisheries and Food in 1988	
Deloitte, Haskins and Sells	Survey on fees to local veterinary inspectors
Deloitte, Haskins and Sells	Relocation of work study
Agro—Economic Services Ltd.	Study of impact of single market on agricultural research and development priorities
Computer consultancy contracts awarded by the Ministry of Agriculture, Fisheries and Food in 1988	
Kerridge Computer Company Ltd.	Transfer of work to new computer
Wootton Jeffreys plc	Transfer of project control system
Learmouth and Burchett Management Systems Touche Ross Management Consultants Deloitte, Haskins and Sells	Farm survey system full study
Asterisk Computer Systems Ltd. Quanta Learning Systems Pergammon Infotech Godfrey Durham	Support to regional administrative data flow pilot project
Logica UK Ltd.	Support to national food survey project
Asterisk Computer Systems	System development for Harpenden laboratory
Asterisk Computer Systems	System development for legal branch
Spicer and Oppenheim	Financial system study for National Institute of Agricultural Botany, Cambridge
Oracle UK Keith London Associates	Transfer of work to new computer
PA Consulting Services Ltd.	Agricultural Development and Advisory Service IT sub-strategy study Fisheries sub-strategy study
Deloitte, Haskins and Sells	Cost awareness information system development
Deloitte, Haskins and Sells Nolan Norton and Co. Software AG of UK	Technical consultancies
Deloitte, Haskins and Sells	IT strategy review

Bovine Tuberculosis

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what controls exist to ensure that live cattle imported into the United Kingdom are free from bovine tuberculosis.

Mr. Donald Thompson: Under European Community rules cattle intended for breeding or production imported from other member states must originate from officially tuberculosis-free herds and they must be tested for bovine tuberculosis with negative results in the 30 days before export. Additionally, such cattle imported from the Republic of Ireland and Northern Ireland must be tested again, with negative results, 60 days after import. Cattle intended for slaughter imported from other member states must either originate from officially tuberculosis-free herds or be tested for bovine tuberculosis with negative results in the 30 days before export.

Cattle imported from third countries are required to originate from premises which have been free from bovine tuberculosis for the previous 12 months and to be tested for bovine tuberculosis with negative results during a period of at least 30 days isolation on their premises of origin. Cattle from Canada are subject to an additional test during pre-export quarantine.

Live Cattle Imports

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what are the numbers of live cattle imported from Ireland for each of the last seven years.

Mr. Donald Thompson: The numbers of cattle imported into the United Kingdom from the Republic of Ireland were as follows:

Head of cattle

	1982	*1983*	*1984*	*1985*	*1986*	*1987*	*1988*
Breeding cattle	489	614	342	229	413	413	2,306
Fats and stores	133,607	187,227	213,253	217,705	231,087	150,573	174,887
Calves	2,394	2,207	1,627	2,625	429	109	510
TOTAL	136,490	190,048	215,222	220,559	231,929	151,095	177,703

Porcine Somatotropin

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what information he has concerning trials of porcine somatotropin.

Mr. Donald Thompson: No field trials of porcine somatotropin are currently authorised in the United Kingdom.

Eggs

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what action he is proposing to take to ensure that imported eggs meet the production standards he has set for British eggs.

Mr. Donald Thompson: Egg imports normally come from other EC member states and for both home produced and imported eggs the EC quality requirements are enforced by the agricultural departments and trading standards officers. Using their powers under the Imported Food Regulations 1984 some port health authorities have tested imported eggs for salmonella recently. A more systematic monitoring of imported eggs for salmonella is being set up in consultation with the port health authorities and the public health laboratory service.

Salmonella should be tackled on an EC-wide basis. Preliminary discussions have already taken place in Brussels on a Commission proposal to deal with a range of zoonoses including salmonella.

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will list in the *Official Report* the number of egg packers receiving money under the egg industry scheme of *(a)* over £200,000, *(b)* £100 to £200,000, *(c)* £75 to £100,000 and *(d)* £50 to £75,000 and less than £50,000.

Mr. Donald Thompson *[holding answer 23 March 1989]:* I am unable to give these details in the form requested as this would lead to the disclosure of information that could be attributed to particular packers. But six egg packers in the United Kingdom received total payments of £50,000 or more; and 657 egg packers received smaller sums.

Bovine Spongiform Encephalopathy

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he has made any assessment of the likely hazard to human health from the consumption of animal production derived from cattle incubating bovine spongiform encephalopathy prior to the onset of clinical signs of bovine spongiform encephalopathy.

Mr. Donald Thompson: The Southwood report concludes that it is most unlikely that bovine spongiform encephalopathy will have any implications for human health.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) whether he has any estimate of the likely future incidence of bovine spongiform encephalopathy;

(2) what evidence he has of the likely incidence of cattle incubation of bovine spongiform encephalopathy but not showing clinical signs.

Mr. Donald Thompson: I refer the hon. Member to the answer given to the hon. Member for Stretford (Mr. Lloyd) on 13 March at column *78*.

Quarantine

Mr. Key: To ask the Minister of Agriculture, Fisheries and Food when he expects to announce revised regulations for animal quarantine premises; and if he will make a statement.

Mr. Donald Thompson: Quarantine premises must meet prescribed standards and be aproved by my Department as

providing appropriate safeguards against the introduction of animal diseases. My Department will shortly be writing to the operators of quarantine kennels about revised conditions for their operation.

Potatoes

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what information he has as to the average price of potatoes per kilo to the domestic consumer in each European Community country in each of the past five years.

Mr. Ryder: I regret that the information requested is not readily available.

Slaughterhouses

Mr. Mullin: To ask the Minister of Agriculture, Fisheries and Food how many prosecutions for breaches of the Slaughterhouse Act 1974 there have been in *(a)* 1987 and *(b)* 1988.

Mr. Donald Thompson: Enforcement of the Slaughterhouses Act 1974 is the responsibility of local authorities. Information on the number of prosecutions is not collected centrally.

Mr. Mullin: To ask the Minister of Agriculture, Fisheries and Food if he is proposing to improve the inspection of slaughterhouses; and if he will make a statement.

Mr. Donald Thompson: Local authorities are responsible for enforcing the legislation and members of the state veterinary service visit abattoirs to monitor standards and give advice.

The Government propose to make it a statutory requirement for local authorities to designate an official to be formally responsible for the supervision and enforcement of welfare requirements in slaughterhouses.

Slaughterhouse Workers

Mr. Mullin: To ask the Minister of Agriculture, Fisheries and Food if he will consider outlawing the piece rate method of paying slaughterhouse workers.

Mr. Donald Thompson: No. It is the responsibility of all involved to ensure that welfare and hygiene requirements are observed irrespective of the methods of payment to workers in abattoirs.

Livestock (Slaughter)

Mr. Mullin: To ask the Minister of Agriculture, Fisheries and Food what research is being carried out into the advantages of high voltage stun and kill systems as recommended by the Farm Animal Welfare Council's 1984 report on the welfare of livestock at the time of slaughter.

Mr. Donald Thompson: The research which the Farm Animal Welfare Council recommended was commissioned by my Department. This has shown that the high current required to induce cardiac arrest in sheep and pigs will always instantaneously render the animals insensible to pain. Work into other aspects of high voltage stunning is continuing.

Mr. Mullin: To ask the Minister of Agriculture, Fisheries and Food when he intends to introduce the legislation and codes referred to in the Government response to the Farm Animal Welfare Council's 1984 report on the welfare of livestock animals at the time of slaughter; and if he will make a statement.

Mr. Donald Thompson: I expect to issue proposals for new regulations on the welfare of all animals at slaughter shortly. The codes of practice will be issued under new enabling powers which is it is proposed to take in primary legislation as soon as parliamentary time permits.

Sole

Mr. Anthony Steen: To ask the Minister of Agriculture, Fisheries and Food what is the total volume of imported sole from Holland landed in the United Kingdom in each of the last three years; and if he will make a statement.

Mr. Donald Thompson: The total tonnage of fresh, chilled and frozen sole imported from the Netherlands into the United Kingdom was as follows:

Year	*Tonnes*
1986	667
1987	589
1988	[1]613

[1] Provisional.
Source: Customs and Excise Overseas Trade Statistics.

Imports are unrestricted, and levels reflect market supply and demand.

Eggs

Mr. Crowther: To ask the Minister of Agriculture, Fisheries and Food if, pursuant to his answer of 16 January, *Official Report*, column 51, he will ensure that all eggs are marked so as to show whether they are produced in a battery, free range or otherwise.

Mr. Donald Thompson: EC regulations on marketing standards for eggs do not permit the method of production to be stamped on the egg although, as I indicated in my previous answer, eggs produced under alternative systems to the battery may be marketed in packs bearing the appropriate designation of the production system.

Consumer interests have indicated that they would not welcome a change in the legislation to require the marking of eggs.

Bovine Tuberculosis (Badgers)

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) what has been the annual cost of the bovine tuberculosis eradication scheme for each of the last seven years;

(2) when he intends to review the progress of the bovine tuberculosis eradication scheme; what is his assessment of the success of the scheme to date; and if he will make a statement;

(3) what research his Department is currently funding into the development of a vaccine against bovine tuberculosis in badgers;

(4) when he proposes to authorise field trials for vaccine against bovine tuberculosis in badgers;

(5) how many badgers were removed in 1988, by parish; and how many were subsequently proved to be tuberculoid in those cases where prior approval of the consultative panel was required;

(6) if he will publish a table showing for each parish in 1988 the number of badgers taken by his Department under his badger control strategy and the number subsequently shown by post-mortem examination to be tuberculoid;

(7) what proportion of those badgers killed in the bovine tuberculosis eradication scheme have subsequently been proven to be infected with tuberculosis;

(8) how many badgers have been killed in the bovine tuberculosis eradication scheme over each of the last seven years;

(9) what information he has on the proportion of badgers infected with tuberculosis that are infective to cattle and other badgers;

(10) what progress his Department is making on the live testing of badgers for tuberculosis; and when he expects the results of field trials to be available;

(11) what is the proportion of cattle slaughtered as suspected cases of bovine tuberculosis which are subsequently discovered not to be suffering from the disease; and what is the number of cattle slaughtered as suspected cases of bovine tuberculosis in each of the last seven years;

(12) what is the total disbursed in each of the last seven years as compensation to farmers whose cattle have been slaughtered as suspected cases of bovine tuberculosis;

(13) whether he intends commissioning a formal review of the badger control element of his bovine tuberculosis eradication programme;

(14) if he willlist the members of his badger panel and indicate for each member his qualification and expertise;

(15) whether he has made any assessment of the effectiveness of the badger including element of his bovine tuberculosis eradication programme;

(16) what evaluation he has made of the cost-effectiveness of the development and possible applications of live-testing techniques for bovine tuberculosis in badgers;

(17) whether he is currently considering any alternatives to budger culling in his programme to eradicate bovine tuberculosis in badger areas.

Mr. Donald Thompson: The annual cost of the bovine tuberculosis eradication scheme (which relates to action taken in respect of tuberculosis in cattle, badgers and latterly deer), including compensation for cattle, and the number of cattle and badgers killed under it during the last seven years are set out in the table.

	Total Cost of the Scheme (£ million)	*Of which Compensation £*	*Cattle*	*Badgers*
1982	n/a	250,782	614	1,005
1983	n/a	295,469	677	1,239
1984	6·3	284,613	746	1,337
1985	7·6	337,806	863	1,115
1986	7·1	310,399	645	782
1987	6·7	525,447	1,173	711
1988	6·5	368,158	782	774

All animals in which disease is confirmed must be considered as potentially infective to other cattle and badgers. Of the cattle slaughtered in 1988, disease was confirmed by laboratory examination in 36 per cent. Disease was confirmed in 29 per cent. of the badgers taken in the same year. It cannot be assumed, in the case of either cattle or badgers, that the remainder were unaffected.

Details, by parish, of the number of badgers killed in 1988 and the number in which tuberculosis was confirmed are given in the table.

* Formed part of Type I operations where adjoining land was involved.

Type I operations are those which are approved departmentally and take place within badger problem areas. These are defined as parishes in which there has been at least one cattle breakdown of apparent badger origin within the previous six years. Type II operations take place in areas outside badger problem areas and require the agreement of the badger panel.

The current membership of the panel is as follows:

Name	
Mr. M. T. Thomasin-Foster	Chairman (Vice-Chairman of the Farming and Wildlife Advisory Group)
	Representing:
Mr. R. J. Badcock	National Farmers' Union
Lady Bolitho	County Landowners' Association
Mr. C. P. Booty	Royal Society for the Prevention of Cruelty to Animals
Mr. R. Ewbank	Universities Federation for Animal Welfare
Dr. D. Jefferies	Nature Conservancy Council
Professor H. E. M. Kay	Royal Society for Nature Conservation
Dr. D. W. MacDonald	Fauna and Flora Preservation Society
Dr. A. McDiarmid	Expert on Diseasesin Wildlife
Mr. R. M. Meyer	National Federation of Badger Groups
Dr. E. Neal	Eminent Authorityon Badgers
Mr. R. Neville	TGWU Agricultural and Allied Workers National Trade Group
Dr. J. L. Stanford	Microbiologist, Middlesex Hospital
Mr. J. Sterry	British Veterinary Association
Mr. E. R. Thomas	Dairy Farmer, Carmarthen
Mr. H. V. Thompson	Mammal Society

Possible alternative methods of badger control are being investigated. Research work to develop a reliable vaccine has been carried out at the Middlesex hospital. Further work will be necessary before field trials to determine the efficacy of such a vaccine can commence. Work is also under way on the development of a test in the live animal. If such a test can be developed it should enable control operations to be targeted more effectively.

The badger panel is responsible for keeping under review the evidence relating to bovine tuberculosis in badgers. This is an ongoing process designed to supplement the formal reviews undertaken by Lord Zuckerman and Professor Dunnet. In his 1986 report, Professor Dunnet recommended that the badger strategy should be considered either three or five years after its adoption if there was evidence of a significant increase in herd breakdowns. It is intended to follow this recommendation in considering future policy.

The scheme has resulted in a significant reduction in the incidence of disease in cattle. Many areas of the country are now virtually free from the disease, although it is proving more difficult in the south-west because of infection in the local badger population.

Sheep Dip

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food, what grants are available for farmers to re-site their sheep-dipping facilities away from the edge of water courses.

Mr. Ryder *[holding answer 23 March 1989]:* Under the farm and conservation grant scheme grant is not available for farm buildings and associated animal husbandry facilities, including those intended for use in the gathering and treatment of livestock. Thus, for example, sheep dips and associated gathering pens are not eligible for grant aid. Where a farmer has an existing plan approved under one of the earlier grant schemes, this may contain sheep

dipping facilities. In these circumstances grant is still payable. The present capital grant scheme continues to aid facilities for the safe disposal of spent sheepdip.

Abattoirs (Statistics)

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will list the number and type of animals which were processed in the United Kingdom in *(a)* European Community approved abattoirs and *(b)* non-European Community approved abattoirs for each of the last eight years.

Mr. Donald Thompson *[holding answer 20 March 1989]:* Figures are available only for the last four years and are based on abattoirs with EC export approval as at the end of 1988. Latest estimates are:

(Million head)

	Adult Cattle and Calves		*Sheep*		*Pigs*		*Total*	
	EC Export Approved	*Non EC Export Approved*	*EC Export Approved*	*Non EC Export Approved*	*EC Export Approved*	*Non EC Export Approved*	*EC Export Approved*	*Non EC Export Approved*
1985	2·4	1·9	6·7	9·2	5·4	9·9	14·5	21·0
1986	2·1	1·8	6·6	8·9	5·7	9·9	14·4	20·6
1987[1]	2·2	1·9	7·1	8·7	5·9	10·0	15·2	20·6
1988	1·8	1·6	8·2	8·9	6·2	9·5	16·2	20·0

Figures of the numbers of horses and goats slaughtered at abattoirs are not collected.
[1] 53 weeks.

Meat Statistics

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food how much meat was consumed in the United Kingdom from the non-European Community approved abattoirs in 1988.

Mr. Donald Thompson *[holding answer 20 March 1989]:* It is provisionally estimated that just over 1·2 million tonnes of carcase meat (cattle, sheep, pigs) was produced in non-EC export-approved abattoirs in the United Kingdom in 1988. Most of this will have been consumed or processed in the United Kingdom.

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food how much meat from European Community approved abattoirs in the United Kingdom was *(a)* exported and *(b)* consumed in the United Kingdom in 1988.

Mr. Donald Thompson *[holding answer 20 March 1989]:* It is provisionally estimated that just over 1·1 million tonnes of carcase meat (cattle, pigs and sheep) was produced in EC export-approved abattoirs in the United Kingdom in 1988. Of this about 23 per cent. will have been exported and 3½ per cent. sold into intervention. The remainder will have been sold for consumption or processing in the United Kingdom.

PRIME MINISTER

Labour Statistics

Q40. **Mr. Ian Bruce:** To ask the Prime Minister what representations she has received regarding the current level of employment.

Q46. **Mr. William Powell:** To ask the Prime Minister what representations she has received regarding the current level of employment.

Q50. **Mr. Alexander:** To ask the Prime Minister what representations she has received regarding the current level of employment.

The Prime Minister: I have received a number of representations about the level of employment. The workforce in employment has been on a rising trend for more than five years and now stands at the highest level ever seen at 25,807,000.

President Gorbachev

Q57. **Mr. Marland:** To ask the Prime Minister what representations she has received regarding the visit of President Gorbachev.

Q140. **Mr. Malins:** To ask the Prime Minister what representations she has received regarding the visit of President Gorbachev.

Q152. **Mr. Cash:** To ask the Prime Minister what representations she has received regarding the visit of President Gorbachev.

The Prime Minister: I have received representations about a wide range of issues, in particular human rights in the Soviet Union. I shall of course be taking up this question with Mr. Gorbachev.

NATO

Q102. **Mr. Neil Thorne:** To ask the Prime Minister what representations she has received regarding the United Kingdom relationship with its allies in the North Atlantic Treaty Organisation.

Q126. **Mr. Iain Mills:** To ask the Prime Minister what representations she has received regarding the United Kingdom relationship with its allies in the North Atlantic Treaty Organisation.

Q142. **Sir Anthony Grant:** To ask the Prime Minister what representations she has received regarding the United Kingdom relationship with its allies in NATO.

The Prime Minister: I have not received any recent representations, although I am regularly involved in a range of matters regarding the United Kingdom's relationship with the Allies in the North Atlantic Treaty Organisation. Today, of course, marks the 40th anniversary of NATO's foundation. During that time, the Alliance has been uniquely successful in preserving peace in Europe and in providing the basis for the prosperity and stability that we all enjoy.

Rain Forests

Q105. **Mr. Dalyell:** To ask the Prime Minister what is the policy of Her Majesty's Government on the

arrangements known as debt-for-nature swap, in relation to helping Governments with substantial areas of rain forest at risk.

The Prime Minister: We welcome debt for nature swaps agreed voluntarily between commercial banks and debtors. Arrangements whereby conservation organisations can benefit from the secondary market discount on commercial bank debt can provide valuable additional resources for the environment. But their role is likely to remain limited.

Kington Magna

Q138. **Mr. Nicholas Baker:** To ask the Prime Minister if she will pay an official visit to Kington Magna.

The Prime Minister: I have at present no plans to do so.

Willoughby

Q143. **Mr. Pawsey:** To ask the Prime Minister if she has any plans to make an official visit to Willoughby near Ruby.

The Prime Minister: I have at present no plans to do so.

Select Committee Reports

Dr. Thomas: To ask the Prime Minister what is the average length of time it has taken each Government Department respectively, to reply to Select Committee reports; what is the shortest time taken to respond; and what is the longest, since May 1979.

The Prime Minister: On the basis of material readily available, the departmental estimates of information requested are as follows:

Department	*Time in days*		
	Average	*Shortest*	*Longest*
Agriculture	94	77	120
Defence	98	23	323
Education	153	15	450
Employment	97	5	209
Energy	65	11	147
Environment	139	12	397
Foreign and Commonwealth Office (including ODA)	87	11	272
Health and Social Security[1]	148	14	365
Home Office	140	26	365
Office of the Minister for the Civil Service	82	63	105
Scottish Office	128	33	392
Trade and Industry	78	14	224
Transport	155	31	351
Treasury	69	28	232
Welsh Office	156	36	360

[1] Became two separate departments in July 1988.

Homelessness

Mrs. Mahon: To ask the Prime Minister whether she intends to take any initiatives to reduce the level of homelessness amongst young people under 21 years of age.

The Prime Minister: The Government are currently reviewing the homelessness legislation. It is too early to comment on any specific initiatives which may follow.

Economy (Press Notice)

Mr. Gordon Brown: To ask the Prime Minister if she will give fixed capital expenditure of the economy at current and 1985 prices for division 0 to 9, both in total and individually for each year 1986, 1987 and 1988 consistent with the figures published by the CSO in the 17 March 1989 press notice (89) 28, "Gross Domestic Product Fourth Quarter and Year 1988".

The Prime Minister: The latest estimates of fixed capital expenditure by the industries classified to divisions 0 to 9 are given in total in the table. An industrial analysis of these figures is not yet available. Some industrial detail will be published, as usual, in the regular "National Income and Expenditure" article in the CSO's *Economic Trends* for April 1989.

Gross domestic fixed capital formation by all industries in divisions 0 to 9, (excluding dwellings and net purchases of land and existing buildings and associated transfer costs).

£ million

	1986	*1987*	*1988*
Current prices	47,258	53,834	62,494
Constant 1985 prices	45,416	49,600	55,880

Mr. Gordon Brown: To ask the Prime Minister if she will give a source, date and reference specifying to which set of earlier figures the upward adjustments given on page 7 of the CSO press notice of 17 March 1989 (89) 28 "Gross Domestic Product Fourth Quarter and Year 1988" refer.

The Prime Minister: The adjustments attach to the latest estimates of gross domestic fixed capital formation derived from CSO's quarterly data collection system, not to previously published estimates. They are designed to anticipate better the final figures when full information is available from annual inquiries.

Mr. Gordon Brown: To ask the Prime Minister when she anticipates the full information of a fixed investment and its sectoral and industrial composition mentioned on page 7 of the LSO press notice of 17 March 1989 will be available.

The Prime Minister: More detailed estimates than those currently available will be published in "UK National Accounts" 1989 edition in September. Estimates for 1988 will as usual still be provisional at that stage. Such additional information as is available before then will be incorporated in the figures in the regular quarterly articles on "national income and expenditure" in the CSO's *Economic Trends*, April and July 1989 issues.

Computer Consultants

Mr. Tim Smith: To ask the Prime Minister what was the total amount spent by the Cabinet Office in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if she will list each management or computer consultancy contract awarded by the Cabinet Office in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

The Prime Minister: The following is the information.

Firm	*Assignment*
Training Development Approaches Ltd.	Design of a manual in support of the young people programme
Industrial Training Service Ltd.	Production of a guide on conducting training needs analyses
Erwin Scheider	Feasibility study for a computerised management information system
WRM Ltd.	Training information and communications study
Arthur Young Management Consultants	Evaluation of future information technology requirements
PA Personnel Services	Analysis of executive officer and fast stream recruitments
Questel Qualitative Studies Ltd.[1]	Audit of recruitment publicity
Anne Hughes Hallett[1]	Research into career attitudes
University of London Institute of Education	Analysis of recruitment competition data
Human Assets Ltd.	Study of information officers recruitment procedures
Equalities Associates	Guidelines for trainers on equal opportunities issues
Fact Index Ltd.	Enhancements to computer network system
Ashbridge Management College	Study of Women's National Commission
Central Legal Systems Ltd.[1]; Yale Data Computer Consultants[1]	User requirement and business case for statute law database

[1] Costs for these studies were shared with other Government Departments.

Security

Mr. Ken Livingstone: To ask the Prime Minister, if she will make a statement on the progress in implementing each of the recommendations contained in the statement on the recommendations of the Security Commission; Cmnd. 8540, May 1982.

The Prime Minister: All the recommendations have been implemented.

Mr. Colin Wallace

Mr. Livingstone: To ask the Prime Minister, if she will publish in the *Official Report* the text of the letter from her to the hon. Member for Brent, East on 13 February about Mr. Colin Wallace and related matters.

The Prime Minister: No. It is not my usual practice to publish exchanges of this kind.

Security Vetting (Indecency)

Mr. Livingstone: To ask the Prime Minister if she will make it her policy that a conviction for indecency shall be grounds for refusing vetting clearance.

The Prime Minister: Each case is considered on its merits.

Life Sentences

Mr. Livingstone: To ask the Prime Minister what is the average length of a life sentence served in *(a)* England and *(b)* Northern Ireland.

The Prime Minister: The average time served under sentence in prison service establishments in England and Wales by those first released on licence from a life sentence in the three years 1985 to 1987 was about 10¾ years. A comparable figure for Northern Ireland is not readily available. The average time spent in custody, including on remand, by those first released from prison service establishments in Northern Ireland from a life sentence in the same three years was just over 11 years. These average figures do not take account of the longest periods being served by some of those given life sentences following abolition of capital punishment who have not yet been released.

Engagements

Mr. Michael: To ask the Prime Minister if she will list her official engagements for Tuesday 4 April.

Mr. Tony Banks: To ask the Prime Minister if she will list her official engagements for Tuesday 4 April.

Mr. Stern: To ask the Prime Minister, if she will list her official engagements for Tuesday 4 April.

Mr. Harry Greenway: To ask the Prime Minister if she will list her official engagements for Tuesday 4 April.

The Prime Minister: This morning I had meetings with ministerial colleagues and others. In addition to my duties in the House I shall be having further meetings later today.

TRANSPORT

Cambridge-King's Lynn Line

Mr. Spearing: To ask the Secretary of State for Transport if he will place in the Library the basis and calculations used to determine the discounted rate of return on the £20 million expenditure in the electrification of the Cambridge-King's Lynn railway line.

Mr. Portillo: The scheme was appraised in the normal way, as described in paragraphs 61 and 62 of the Department of Transport's memorandum to the Select Committee on Transport's examination of the financing of rail services. The board evaluated many options including bus substitution, a DMU shuttle service between Cambridge and King's Lynn, and full electrification. The additional cost of electrification was shown to earn a financial return, at a 7 per cent. discount rate, when compared with all other options, and the project was approved on that basis.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Transport what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Peter Bottomley: The total amount spent by the Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases, was £1·89 million.

Comprehensive records of all contracts with consultancy firms are not at present held centrally. It would be

disproportionately expensive to collect all the information required. The following list identifies those management and computing consultancies which began in 1988 and are valued at 10,000 or more.

Firm	*Subject of Assignment*
AIMS	Structured systems analysis design and methodology
B. T. Marketing Services	Sale of vehicle registration marks
CACI	Data administrator
CACI	Land/property management
CACI	NIS Stage 1+ development
CCTA	H & T security review
Computer Search & Selection	Fishing vessels system developments
Coopers & Lybrand	Advice on the Department's IT strategy
Coopers & Lybrand	Executive Agency (DVL)
D. E. Barnard Systems	QA/technical review
Dunsmore Data & Info	NIS works data site application
EASAMS	NIS works data application
EASAMS	NIS database administration
FORVUS	Advice to statistics on access to DVLC data
Halcrow Fox Association	QUADRO development
Howard Humphries	Bridges database merge
KPMG	NIS design configuration
KPMG	RMMS support/testing
Logsys	RCPI database
Logsys	Highways inquiries system
Logsys	Severn bridge tolls database
Mott Hay & Anderson	HRM enhancement/maintenance
Mott Hay & Anderson	STRAND/GRIDS maintenance
Mott Hay & Anderson	ARCADY/PICADY maintanence
MVA Systematica	COBA10 development
MVA Systematica	CIDEL maintenance
MVA Systematica	OSCADY maintenance
Peat Marwick McLintock	Design of IFCOS accounting system
Peat Marwick McLintock	Vehicle inspectorate accounting system—project control
Perth Crest	Winter fleet stock control
Price Waterhouse	H & T IT strategy development
RTI	INGRES database review
SCICON	Enhancement to chemical and oil spill system
S. G. Bisson	Geotechnical database
S. G. Bisson	NaRIS enhancement
S. G. Bisson	Consultants' performance database
SIA	NISL CHART interface Stage II
Software AG	Drivers 90's harmonisation project
Transport Planning Association	ROADWAY maintenance
Transport Planning Association	ROADWAY enhancement
W. S. Atkins	SCRIM project definition
Wootton Jeffreys	URECA enhancement
Wootton Jeffreys	COBA/QUADRO maintenance

Dangerous Loads

Mr. Cryer: To ask the Secretary of State for Transport if he will introduce regulations to provide training for drivers of motor vehicles carrying dangerous, inflammable and explosive substances, and compulsory notices of the contents of motor vehicles listing the contents with criminal sanctions for failure to comply; and if he will make a statement.

Mr. Peter Bottomley: The Dangerous Substances (Conveyance by Road in Road Tankers and Tank Containers) Regulations 1981 and the Road Traffic (Carriage of Dangerous Substances in Packages etc.) Regulations 1986 require drivers to be trained so that they understand both the nature of the dangers to which the substance(s) being carried may give rise and any emergency action which should be taken as well as their duties under the regulations.

The new Carriage of Explosives by Road Regulations will contain a similar provision.

The national (dangerous substances) driver training scheme, sponsored by industry, provides a network of training centres throughout the United Kingdom which offer courses for drivers on different types of dangerous loads. This system works well.

The road tanker regulations require tank vehicles to display placards indicating by means of known code numbers the substances carried and the appropriate emergency response action. Vehicles carrying more than 500kg of packaged dangerous goods must display the blank orange plate to alert the emergency services, but listing such dangerous goods would not be practicable. As I told the House on 23 March, the new carriage of explosives regulations will require the display of the orange plate, as well as descriptive placards for the most dangerous explosives.

Failure to comply with any United Kingdom legislation in this field is an offence. It is a matter for the courts to decide upon the level of appropriate fines, which can be unlimited upon indictment.

Mr. Harry Greenway: To ask the Secretary of State for Transport if he will take steps to prohibit the transportation of detonators, fuses and explosives together; and if he will make a statement.

Mr. Peter Bottomley: The new regulations to be laid before the House, governing the carriage of explosives by road, are based on the internationally recognised UN system of classification of danger in transport. So are the other United Kingdom road regulations in this field.

Under the UN system, explosives are assigned to compatibility groups by either the Health and Safety Executive or the Ministry of Defence. This allocation into groups depends upon, for example, the sensitivity of the explosive, whether or not it contains its own means of ignition and whether or not it has any independent safety feature.

During drafting of the new regulations careful consideration was given to the question of ensuring safety when mixed loads are carried on the same vehicle. The requirement will be that where detonators, fuses and other explosives are carried together, effective measures must be taken to ensure that such carriage is as safe as if only one type of explosive were being carried.

Sir John Farr: To ask the Secretary of State for Transport what new steps he is taking to ensure that in future local fire chiefs receive advance warning of explosive or dangerous loads travelling through an area by road or rail.

Mr. Peter Bottomley: It would not be practicable for fire or police services to be notified prior to every movement of a dangerous substance.

The new Carriage of Explosives by Road Regulations, which should be laid before the House next week, will contain a requirement for the route to be followed to be agreed with the relevant chief officers of police when a large load of the most dangerous types of explosive is being carried.

Cleaning (Stoke-on-Trent)

Ms. Walley: To ask the Secretary of State for Transport how much extra money will be paid to highway authorities in Stoke-on-Trent, north; and which sites will be covered under his clean-up.

Mr. Peter Bottomley: A £1 million litter clearing campaign on motorways and trunk roads was launched by the Department on 17 March. The A500 and A34/A50 trunk roads in Stoke-on-Trent, north will be cleaned during the next few weeks by Staffordshire county council, acting as our agent. Detailed costs are not available.

Mrs. Edwina Crantham (Heavy Goods Licence)

Mr. Jessel: To ask the Secretary of State for Transport (1) when he intends to reissue a heavy goods vehicle licence to replace licence 14/N/A 008 618 for Mrs. Edwina Crantham;

(2) if he will call for a report from the Metropolitan traffic commissioners as to when they intend to replace heavy goods vehicle licence No. 14/N/A 008 618, class 3 and 3A for Mrs. Edwina Crantham.

Mr. Peter Bottomley: The licence was renewed for three years on 14 March 1989.

Headcorn Aerodrome

Miss Widdecombe: To ask the Secretary of State for Transport what progress he has made in deciding whether to designate Headcorn aerodrome for consultative purposes.

Mr. Peter Bottomley: My right hon. Friend the Secretary of State for Transport is considering the designation of several new aerodromes including Headcorn for consultation purposes. He hopes to make an order shortly.

Mr. Fry: To ask the Secretary of State for Transport (1) how many motor vehicles involved in fatal accidents during 1985, 1986, 1987 and 1988 were driven by disqualified drivers;

(2) how many motor vehicles involved in fatal accidents during 1985, 1986, 1987 and 1988 have been stolen or taken illegally without the owner's consent;

(3) how many motor vehicles involved in fatal accidents during 1985, 1986, 1987 and 1988 were driven by uninsured drivers.

Mr. Peter Bottomley: The information requested is not collected on the STATS19 road accident report form.

Mr. Fry: To ask the Secretary of State for Transport how many motor vehicles involved in fatal accidents in 1985, 1986, 1987 and 1988 were driven by drivers who were under legal age to drive on public roads or who were otherwise driving without legal authority.

Mr. Peter Bottomley: In fatal road accidents in 1985 there were 42 motor vehicles whose driver or rider was under the legal age to drive that vehicle; in 1986 there were 38 such vehicles and in 1987 there were 40. Figures for 1988 are not yet available.

It is not possible to obtain figures for those drivers who were otherwise driving without legal authority.

HOUSE OF COMMONS

Bottles and Papers

Mr. Vaz: To ask the Leader of the House what plans he has to stage collection points for bottles and papers in the House.

Mr. Wakeham: Arrangements already exist in the Palace of Westminster for the collection of bottles and papers. The Property Services Agency has commissioned a study into the effective collection and disposal of all types of waste and have had discussions with the relevant departments of both Houses. Their recommendations will be considered in due course by the relevant sub-committee of the Services Committee.

Recycled Paper

Mr. Vaz: To ask the Leader of the House what percentage of paper used in the House of Commons is recycled paper.

Mr. Wakeham: It is not possible to identify this percentage.

Mr. Vaz: To ask the Lord President of the Council what plans he has to use recycled paper in the House of Commons.

Mr. Wakeham: Her Majesty's Stationery Office already supplies the House with buff envelopes, ruled writing paper, file covers, note books, index books, lavatory paper and waste paper sacks, which all contain at least 50 per cent. recycled material. The Accommodation and

Administration Sub-Committee has instructed the House authorities and HMSO to keep it informed of any significant developments which will enable the use of recycled paper to be extended.

Division Bells

Mr. Redmond: To ask the Lord President of the Council what information he has as to how many authorisations have been granted for the installation of Division bells in research assistants' private flats and homes.

Mr. Wakeham: I refer the hon. Gentleman to the answer I gave to the hon. Member for Workington (Mr. Campbell-Savours) on 23 March at column *696*.

ATTORNEY-GENERAL

Selective Investment Brokers Limited

Sir Charles Morrison: To ask the Attorney-General what advice regarding further inquiries into the affairs of Selective Investment Brokers Limited was recommended by the Wiltshire police to the Director of Public Prosecutions in their report; and what action was taken.

The Attorney-General: In May 1987 the Wiltshire constabulary submitted to the Director of Public Prosecutions a report regarding their inquiries into the affairs of Selective Investment Brokers Limited. That report did not disclose sufficient evidence to justify the institution of criminal proceedings. Subsequently, further evidence became available which has resulted in Mr. Anthony Wheeler, the sole director of Selective Investment Brokers Limited, being charged with theft. Investigations into the matter are continuing.

Computer Consultants

Mr. Tim Smith: To ask the Attorney-General what was the total amount spent by the Land Registry in 1988 on management and computer consultancy contracts excluding hardware and software purchases.

The Attorney-General: The total amount spent by the Land Registry in 1988 on management consultancy contracts was £1,372 and on computer consultancy contracts £13,080, excluding hardware and software purchases.

Mr. Tim Smith: To ask the Attorney-General if he will list each management or computer consultancy contract awarded by the Land Registry in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

The Attorney-General: Management and computer consultancy contracts were awarded by the Land Registry in 1988 as follows:

(i) *Management Consultancy*

Roland Long Limited:

A survey designed to improve staff and management communication at one district land registry.

(ii) *Computer Consultancy*

IBM (UK) Limited:

A system evaluation to investigate and improve the use of the central processing unit of the department's main computer.

Central Computer and Telecommunications Agency:

A Departmental Support Agreement to provide continuing technical advice, support and an information technology procurement service.

Mr. Tim Smith: To ask the Attorney-General what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases.

The Attorney-General: Nil.

Mr. Tim Smith: To ask the Attorney-General if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

The Attorney-General: No management or computer consultancy contract was awarded by the Law Officers' Department in 1988.

Mr. Martin Foran

Mr. Livingstone: To ask the Attorney-General whether he will prosecute for assaulting Martin Foran the four prison officers from Walton prison against whom £750 damages were awarded in favour of Mr. Foran at Newport county court.

The Attorney-General: No. Such proceedings would not be in conformity with the code for Crown prosecutors. I add, in the interests of accuracy, that in the civil proceedings to which the hon. Member refers the action was stayed upon terms that £750 be paid to the plaintiff, with costs. No admission of liability was made.

Middlesex Guildhall Collection

Mr. Tony Banks: To ask the Attorney-General what items from the Middlesex Guildhall collection will be on display in time for the official opening of the refurbished court house on 5 April; and what financial contribution has been made to the London residuary body in respect of the display of such items.

The Attorney-General: The items from the Middlesex Guildhall collection which will be on display for the official opening of the refurbished court house on 5 April are:

Gilt framed oil painting of Sir Montague Sharpe by G. Spencer Watson.

Gilt framed oil painting of Sir Filfred Craig by Harold Knight.

Gilt framed oil painting of Sir Ralph Littler by Beatrice Offor.

Gilt framed oil painting of Thomas Forster by T. C. Dugdale.

Gilt framed oil painting of the Duke of Bedford by John Collier.

Gilt framed oil painting of Francis Const by unknown artist.

Gilt framed oil painting of Sir Baptist Hikes attributed to Paul Van Somer.

Three framed documents commemorating the first authorisation by the British Parliament of the Establishment of Maritime Courts by the Allied and Associated Foreign Powers in the United Kingdom during the Second World War.

The Lord Chancellor's Department has agreed to meet the costs of removing these items from the county hall to Middlesex Guildhall, the hanging of the items in the Middlesex Guildhall and the cost of insuring the items against loss or damage by fire and theft.

HEALTH

Occupational Therapists

Mr. Gow: To ask the Secretary of State for Health how many additional occupational therapists are required by the south east Thames regional health authority; and what steps are being taken to diminish the shortage.

Mr. Freeman: I will write to my hon. Friend.

Food Poisoning

Mr. Redmond: To ask the Secretary of State for Health if he will give a breakdown of figures within the Trent regional health authority for the latest year that he has figures for food poisoning according to numbers and types of cases associated with *(a)* fish, *(b)* meat, *(c)* vegetables, *(d)* eggs and *(e)* other foods; and if he will give figures for each district health authority.

Mr. Kenneth Clarke: The information is not available centrally in precisely the form requested.

The table gives the total number of notifications of food poisoning for Trent regional health authority by county for 1987, the latest year for which figures are available. No information is available centrally on the cause of infection.

	Number
Lincolnshire	227
Leicestershire	327
Nottinghamshire	621
Derbyshire	400
South Yorkshire	674
Total Trent RHA	2,249

Residential Homes

Mr. Grocott: To ask the Secretary of State for Health how many registrations have been cancelled under the provisions of section 30 of the Residential Homes Act 1984 in each year since its implementation.

Mr. Allen: To ask the Secretary of State for Health how many registrations by region have been *(a)* made and *(b)* cancelled under the provision of section 30 of the Residential Homes Act 1984 in each year since its implementation.

Mr. Mellor: The number of cancelled registrations notified to the Department in respect of each region under the provisions of section 30 of the Registered Homes Act 1984 since it came into operation on 1 January 1985 is as follows.

Region	*Year*	*Number*
Trent regional health authority	1985	1
South East Thames regional health authority	1986	1
Wessex regional health authority South East Thames regional health authority	1987	2
Northern regional health authority Yorkshire regional health authority South West Thames regional health authority	1988	3

Registration is a function of district health authorities and local authorities. The number of new reigstrations is not collected centrally.

Mr. Grocott: To ask the Secretary of State for Health (1) how many persons have had applications for registration rejected under the Residential Homes Act 1984 in each year since its implementation;

(2) how many unregistered residential homes have been discovered by registering authorities under the Residential Homes Act 1984 in each year since its implementation;

(3) how many persons, on a full-time equivalent basis, are employed in inspection of residential homes under the Residential Homes Act 1984 in each of the registration authorities.

Mr. Mellor: We do not hold this information centrally.

Mr. Grocott: To ask the Secretary of State for Health (1) how many persons aged 65 yearsand over were in *(a)* local authority, *(b)* voluntary and *(c)* private residential homes in the latest year for which statistics are available;

(2) what was the total cost of maintaining persons aged 65 yearsand over in residential homes run by local authorities in the lates year for which statistics are available; and what was the average cost per person;

(3) what was the total cost to local authorities of maintaining persons aged 65 years and over in private residential homes in the latest year for which statistics are available; and what was the average cost per person.

Mr. Mellor: Information on the number of persons aged 65 years and over in homes for the elderly and younger physically handicapped is published in "Residential Accommodation for Elderly and Younger Physically Handicapped People: All Residents in Local Authority, Voluntary and Private Homes Year Ending 31 March 1986" a copy of which is available in the Library. Provisional information as at 31 March 1987 is given in the table, which also shows the available information about local authorities' gross and net expenditure on residential care homes for elderly and younger physically handicapped people for the financial year 1986-87.

Type of home	*Number of residents as at 31 March 1987 (provisional)*				*Costs to LAs for year 1986-87*	
	under 65 years		*65 years and over*			
	supported by local authority	*Total*	*supported by local authority*	*Total*	*Gross[1] £ million*	*Net[2] £ million*
Local authority	4,234	4,234	100,594	100,594	697·9	415·7
Private	93	[3]3,214	558	[4]84,852	[5]29·1	[5]21·3
Voluntary	2,373	[3]4,848	3,277	[4]25,068		

[1] Excludes expenditure on administration, training and field work.
[2] Of charges paid by residents.
[3] Includes residents whose age is not known in homes for younger physically handicapped people.

[4] Includes residents whose age is not known in homes for elderly people.
[5] Includes costs for both residents fully supported by the local authority and those receiving partial support.
The average annual costs per resident for local authority homes were £6,658 gross and £3,966 net. It is not possible to give average costs for private and voluntary homes as the cost of residents fully supported by local authorities and the cost of partial support cannot be disaggregated.

Mr. Grocott: To ask the Secretary of State for Health how many persons have had registrations cancelled under the Residential Homes Act 1984 in each year since its implementation.

Mr. Mellor: The number of persons notified to the Department whose registrations have been cancelled, under the Registered Homes Act 1984, since it came into operation on 1 January 1985 is as follows:

	Residential Care Homes	*Nursing Homes*	*Dually Registered*
1985	2	3	
1986	16	5	
1987	28	4	
1988	54	15	2

Mr. Grocott: To ask the Secretary of State for Health how much financial provision has been made by each of the registering authorities for the inspection of residential homes under the terms of the Residential Homes Act 1984.

Mr. Mellor: The latest available figures are shown in the table.

Expenditure on the registration and inspection of residental homes under Registered Homes Act 1984 in 1987-88

Note: Figures include certain homes which are exempt from registration under Section 1(5)(i) of the Registered Homes Act, including homes managed by bodies incorporated by royal charter.

Mr. Grocott: To ask the Secretary of State for Health what steps he has taken to ensure that the level of inspection of residential homes provided by registering authorities under the provisions of the Residential Homes Act 1984 is sufficient.

Mr. Mellor: From 1 August 1988 the fees payable in respect of registration and inspection of residential care homes were substantially increased to enable local authorities to carry out their duties effectively. The minimum number of inspections was increased from one to two a year. In addition, the Department, in conjunction with the Welsh Office has commissioned training material for registration and inspection staff of authorities from the centre for environmental and social studies in aging at the polytechnic of north London. This material should be available later this year.

The Department's social services inspectorate has carried out a study of the implementation of the Registered Homes Act 1984 by local authorities. Its report "Certain Standards" was published last year. The Wagner report, "Residential Care: A Positive Choice" which was also published last year, contained recommendations on the regulation of these homes. Both reports are in the Library. We are giving careful consideration to the findings of these reports before deciding whether any change is desirable in the current arrangements.

School Medicine

Mr. Redmond: To ask the Secretary of State for Health if he will list for each of the last five years for the Trent regional health authority, the number of nurses engaged in school medicine and related care of children.

Mr. Mellor: The numbers of staff in post working in school health and special schools are shown in the table.

National Health Service staff in post in Trent regional health authority
Nursing staff in primary health care at 30 September
Whole-time equivalents[1]

	1983	1984	1985	1986	1987
School health	350	360	340	340	320
Special schools	20	20	20	10	20
School health and special schools	370	380	360	350	340

Source: Department of Health (SR7) annual census of National Health Service non-medical manpower.

[1] Figures independently rounded to nearest 10 whole-time equivalents.

Some nursing staff working in hospitals and the community will be engaged in the care of children as part of their general nursing duties. These staff cannot, however, be identified centrally.

Trent Regional Health Authority

Mr. Redmond: To ask the Secretary of State for Health if he will list the services provided by the Trent regional health authority; and what is the catchment area.

Mr. Mellor: Provision of local services is a matter for the health authorities concerned. I am sending the hon. Member a copy of Trent regional health authority's latest annual report which contains the information he seeks.

Sex Change Operations

Mr. Redmond: To ask the Secretary of State for Health if he will list the number of sex change operations performed by the National Health Service in the Trent regional health authority for *(a)* male to female and *(b)* female to male, for the last 20 years; and what has been the cost to public funds in each case.

Mr. Freeman: I refer the hon. Member to my reply to him on 22 February at column *674*.

Electors

Mr. Harry Barnes: To ask the Secretary of State for Health pursuant to his answer to the hon. Member for Derbyshire, North-East 28 February, *Official Report*, column *134*, if he will supply a pre-publication list of the numbers of electors registered for each constituency in England and Wales for 1989-90.

Mr. Freeman: Statistics from the electoral registers for 1989-90 are still being assembled centrally. Figures relating to local government areas will be published in an OPCS Monitor (EL 89/1) at the end of April; those relating to parliamentary constituencies in "Electoral Statistics: 1989" (Series EL No. 16) at the end of May. I do not propose to supply pre-publication lists of numbers of electors.

Glenside Hospital

Mr. Allen: To ask the Secretary of State for Health if, with reference to his answers to the hon. Member for Livingston (Mr. Cook), *Official Report*, 9 June 1988, columns *666-68* and to the hon. Member for Eddisbury (Mr. Goodlad), *Official Report*, 5 December 1988, column *88*, he will now clarify the status of Glenside hospital in the South West regional health authority.

Mr. Freeman: The future role of Glenside hospital together with all other mental health units in Avon is being reviewed in the light of the White Paper "Working for Patients" and an Avon-wide mental health paper. A regional secure unit, Fromeside clinic, was opened in October 1988 on the Glenside site.

Psychogeriatrics

Mr. Tom Clarke: To ask the Secretary of State for Health how many consultants there are working full-time in psychogeriatrics in the United Kingdom; and how many people over the age of 65 years there are per consultant.

Mr. Mellor: We do not hold this information centrally at present. Psychogeriatrics has been established recently as a separate specialty and there are plans to collect manpower figures in the future. In a joint report published in February this year, the Royal Colleges of Psychiatrists and Physicians estimated that there are currently 243 consultants working in old-age psychiatry and that at the end of 1986 about 70 per cent. of the United Kingdom elderly population had a specialist psychogeriatric service available to them. These figures represent a considerable advance in recent years.

Heart Disease

Mr. Tom Clarke: To ask the Secretary of State for Health what information he has on the cost to the National Health Service of health problems due to heart disease; and whether he will take the initiative to develop policy on the prevention of the disease.

Mr. Mellor: The cost to the National Health Service in this country of the treatment of coronary heart disease is estimated to be over £500 million a year.

It was the Government's concern about the high incidence of disease and premature death caused by coronary heart disease that led to the launch in April 1987 of the "Look After Your Heart" campaign, promoted jointly by the Department of Health and the Health Education Authority. This campaign has the long-term objective of contributing to a substantial reduction in the incidence of coronary heart disease in England by the year 2000. The campaign, which adopts a multi-faced approach involving mass media publicity and community and workplace strategies, is, we believe, proving highly successful in raising awareness of risk factors and stimulating widespread activity at national and local level aimed at encouraging and supporting the adoption of healthier lifestyles on smoking, alcohol, nutrition and exercise.

In addition, the Standing Medical Advisory Committee has been asked to look at the cost-effectiveness of cholesterol screening. The primary care White Paper has emphasised the enhanced role of general practitioners in health promotion and prevention. The reports to be produced by the new local and regional directors of public health will provide each district and region with an epidemiological overview of the health of the local population, from which districts will be better able to identify the main health problems (including coronary heart disease) which their policies and programmes need to address.

New Parent-Infant Network Charity

Mr. Tom Clarke: To ask the Secretary of State for Health when his Department expects to complete its study of the New Parent-Infant Network charity.

Mr. Freeman: My hon. and learned Friend the Minister for Health expects to reach a decision on the New Parent-Infant Network's application for grant aid within the next few weeks.

Operating Theatres

Mr. Gordon Brown: To ask the Secretary of State for Health what is the available theatre operating time in the National Health Service in England in each year since 1979.

Mr. Freeman: I regret that the information is not collected centrally.

Mr. Gordon Brown: To ask the Secretary of State for Health what is the number of theatre sessions available for operating in the National Health Service in England in each year since 1979.

Mr. Freeman: Information on the use of operating theatres was not collected centrally prior to 1987-88. In 1987-88 the total number of sessions held in NHS hospitals in England was 692,804.

Ambulances (Emergency Calls)

Mr. Gordon Brown: To ask the Secretary of State for Health if he will give the average response times for emergency ambulance calls in 1979 and the latest year available in *(a)* London, *(b)* Birmingham, *(c)* Liverpool, *(d)* Glasgow, *(e)* Cornwall and *(f)* East Anglia.

Mr. Freeman: The information available on response times is not precisely in the form requested. Data are collected about the times within which *(a)* 50 per cent. and *(b)* 95 per cent. of calls are responded to, rather than the average response times.

The latest figures relate to the financial year 1987-88, and are shown in the table. Figures for 1979 were not collected centrally. Figures relating to the financial years 1983-84 to 1986-87 are included in the package of health service indicators provided by the Department, which is in the Library. Information concerning provision of services in Glasgow is the responsibility of my right hon. and learned Friend, the Secretary of State for Scotland.

Patient Transport Services
Response times within which 50 per cent. and 95 per cent. of calls are responded to

Ambulance authority	*50 per cent. Minutes*	*95 per cent. Minutes*
London	10·00	19·00

Cambridgeshire	8·00	18·00
Norfolk	6·40	17·70
Suffolk	7·50	20·50

Source: DH form KA34

Hospital Closures

Mr. Gordon Brown: To ask the Secretary of State for Health if he will give the number of *(a)* hospitals, *(b)* casualty units and *(c)* ante-natal units that have been closed since 1979 in (i) London, (ii) Birmingham, (iii) Manchester, (iv) Coventry, (v) Derby, (vi) Reading, (vii) Glasgow, (viii) Leicester, (ix) Leeds and (x) Edinburgh.

Mr. Freeman The following table gives the numbers of hospitals or units which we are aware have been approved for total closure from 1979—end 1987, the latest date for which figures are available.

Information on casualty units and ante-natal clinics is not collected centrally.

	Number
London	63
Birmingham	3
Manchester	3
Coventry	1
Derby	8
Reading	1
Leicester	6
Leeds	6

Information on hospitals in Glasgow and Edinburgh is the responsibility of my hon. and learned Friend the Secretary of State for Scotland.

Ms. Harman: To ask the Secretary of State for Health if he will publish a list of all National Health Service hospitals *(a)* closed and *(b)* agreed for closure each year since 1979, for each regional health authority in England.

Mr. Freeman: I have placed in the Library a list of all hospitals or facilities approved for total closure for the period 1979—to the end of 1987. Many of these hospitals were closed in conjunction with the opening of new hospitals or facilities in the area.

Mortality Rates

Mr. Gordon Brown: To ask the Secretary of State for Health if he will provide *(a)* perinatal, *(b)* neonatal and *(c)* infant mortality rates for each year since 1979 in Scotland, England and Wales separately with comparable figures for Germany, Sweden, France and the United States of America.

Mr. Freeman The information for each year for England, Wales and Scotland is shown in the tables, which also give comparable data for the other countries. These latter data have been taken from a number of international publications as indicated[1]. Where no figure is given, this indicates that insufficient data were available from these publications.

(a) Perinatal mortality rate by country 1979 to 1987

Country	*Year*								
	1979	*1980*	*1981*	*1982*	*1983*	*1984*	*1985*	*1986*	*1987*
England	14·6	13·4	11·7	11·2	10·3	10·0	9·8	9·5	8·9

[3] The Statistical Office of the European Community "Eurostat Demographic Statistics".
[4] No rate published in volumes, calculation made from data provided in [1] and [2] above.

National Health Service (Staff Training)

Mr. Gordon Brown: To ask the Secretary of State for Health if he will provide an estimate of the cost of training *(a)* a state registered nurse, *(b)* an operating theatre nurse, *(c)* a speech therapist, *(d)* a consultant and *(e)* a junior hospital doctor.

Mr. Mellor: The estimated cost of training a registered general nurse over a three-year course is £14,000. The figure excludes that part of the cost of the trainee's remuneration and other costs estimated to represent the value of the contribution the trainee makes to patient services. The other costs requested are not held centrally.

National Health Service Reform

Ms. Harman: To ask the Secretary of State for Health which interested parties will be consulted by his Department over the composition of the list of treatments included in budgets for general practitioners.

Mr. Kenneth Clarke: My Department will be discussing the composition of the list of treatments included in practice budgets for general medical practitioners with the profession and with National Health Service managers. Specific invitations to discuss working papers 3 and 4 have been issued to the general medical services committee and the Royal College of General Practitioners.

Ms. Harman: To ask the Secretary of State for Health what is the formula which will determine the weighting element of the capitation allowance payable to general practitioners under the terms of working paper and of the White Paper on the National Health Service.

Mr. Kenneth Clarke: The relative weights to be included in the capitation formula will be determined after the discussions with interested parties, referred to in the working paper on indicative prescribing budgets for general medical practitioners, have taken place.

Ms. Harman: To ask the Secretary of State for Health if it is his intention that where a group practice opts out of the budget-holding scheme for general practitioners the practice income will be preserved at the level of the last year of budget holding.

Mr. Kenneth Clarke: If a practice decides to leave the practice budget scheme, the normal remuneration arrangements for general medical practitioners will apply.

Ms. Harman: To ask the Secretary of State for Health whether he will publish the evidence relating to working paper 3 of the White Paper on the National Health Service, in respect of practice budgets offering general practitioners an opportunity to improve the quality of their services.

Mr. Kenneth Clarke: Practice budgets will offer general medical practitioners an opportunity to improve the quality and standard of service to patients. Those practices with budgets will be able to decide how to make the most effective use of funds in order to provide the best possible service to their patients. The proposed development of

medical audit should ensure the maintenance and indeed raising of standards both generally and in participating practices. Improving the quality of family doctor services is also a major objective of the White Paper "Promoting Better Health". The proposals set out in "General Practice in the NHS: A New Contract", published in February, should achieve that objective by better rewarding those doctors whose standards are high and who provide a wide range of high quality services geared to patients' needs.

Ms. Harman: To ask the Secretary of State for Health what mechanisms will be introduced to ensure impartial judgments are made as to the appropriateness of patient referrals to accident and emergency units in order to meet the requirements of the White Paper on the National Health Service that accident and emergency referral would not be used as a substitute for out-patient referral.

Mr. Kenneth Clarke: Health authorities will be expected to make arrangements at hospital level to monitor attendances to ensure that referrals to accident and emergency units are not used as a substitute for out-patient referrals.

Ms. Harman: To ask the Secretary of State for Health what formulae will be used to measure relative need for services provided by general practitioners who become budget-holders under the terms of the Government's White Paper on the National Health Service.

Mr. Kenneth Clarke: We are now considering the precise method of determining the relative need for services by patients. The practice budget scheme will be structured so that general medical practitioners have no financial incentive to refuse to treat any categories of patients.

Ms. Harman: To ask the Secretary of State for Health what mechanisms exist, or will be established, within regional health authorities, to enable them to adjudicate in disputes arising over the treatments to be included within general practitioner's budgets, as proposed in working paper 3 of the White Paper on the National Health Service.

Mr. Kenneth Clarke: Regional health authorities already have medical advice available to them which could be used for this purpose.

Ms. Harman: To ask the Secretary of State for Health what evidence he has collected on whether doctors will seek to remove patients from their lists on budgetary grounds where the costs of investigation and treatment are borne by general practitioner's practices.

Mr. Kenneth Clarke: Practice budgets will be set at a level which will reflect the relative need for services by patients registered with the practice. The elderly will attract a higher contribution to the budget than the young, and in exceptional cases adjustments will be made in respect of individual patients who need more costly treatment.

The Government do not believe that doctors will seek to remove patients from their lists on budgetary grounds nor be slow to accept patients. If, however, a practice did adopt a policy of selective registration, it could have its budget withdrawn by the RHA.

Ms. Harman: To ask the Secretary of State for Health how he proposes to adjust indicative budgets for general practitioners to accommodate practices which initially have below average prescribing costs but rapidly increase their diagnosis and treatment rates for common conditions.

Mr. Kenneth Clarke: We accept that the properly planned introduction of improved patient services, such as screening for certain conditions, may lead to an increase in prescribing of particular drugs. Practices intending to introduce such services will need to discuss their plans in advance with the family practitioner committee so that the financial implications can be fully considered when allocating prescribing budgets to practices.

As set out in working paper 4, "Indicative Prescribing Budgets for General Medical Practitioners", the FPC will be expected to compare expenditure with its budget profile and also information on what is prescribed and dispensed. They will be expected to investigate any significant diversions of actual and planned expenditure and take early and effective action. The FPC will be expected to accept and accommodate reasonable explanations for the variation.

Preventive Services

Ms. Harman: To ask the Secretary of State for Health what research has been conducted to establish the effect of attaching a financial cost to preventive services provided by general practitioners on uptake of these services.

Mr. Kenneth Clarke: Health promotion and illness prevention are central to the Government's objectives for general practitioner services. As made clear in "General Practice in the NHS: A New Contract", published in February, the Government will make the provision of health promotion a specific requirement in general practitioners' terms of service, and will introduce a health promotion sessional payment.

As working paper 3, "Practice Budgets for General Medical Practitioners", makes clear, the Department will discuss with the medical profession whether budgets should be set at a level which includes the cost of diagnostic investigations associated with health prevention and screening or whether they should be excluded from the scope of the scheme and charged to the patient's DHA.

Plastic Surgery

Sir John Farr: To ask the Secretary of State for Health what is the average waiting time for plastic surgery patients who have not yet been admitted to hospital *(a)* in the Leicestershire health authority, *(b)* in the Trent region and *(c)* nationally.

Mr. Mellor: Average waiting times for those awaiting admission to hospital are not available centrally. The numbers on the waiting list are analysed by time waited and a percentage distribution based on this information is given in the table.

Percentage distribution of cases on the in-patient waiting list by time waited, as at 30 September 1988, Plastic surgery specialty

	Months waited				
	0 to 2	*3 to 5*	*6 to 8*	*9 to 11*	*12+*
Leicestershire District Health Authority	18	10	10	9	53
Trent Regional Health Authority	12	12	10	10	57
England	14	12	9	7	58

Smoking

Mr. Simon Coombs: To ask the Secretary of State for Health what has been the level of expenditure by the Health Education Authority and the Health Education Council, in the last five years for which figures are available, on publicity and other materials designed to discourage smoking.

Mr. Mellor: The figures (actual expenditure) are as follows:

Health Education Council

	Campaigns/ associated expenditure £
1983-84	2,629,708
1984-85	1,624,221
1985-86	2,345,704
1986-87	1,118,025

Health Education Authority

	1987-88 £
Campaigns/Promotion	562,635
Publications	170,776

These figures do not reflect total spending, since smoking health education is included in many other authority programmes, such as "Look After Your Heart", cancer, and the young people's programme.

On 25 January 1989 my right hon. Friend the Prime Minister announced a new £2 million a year campaign over the next four years, to be run jointly by the Department of Health and the Health Education Authority, aimed at halving the proportion of teenagers who smoke.

Lipid-lowering Drugs

Mr. Simon Coombs: To ask the Secretary of State for Health what information he has on the level and cost of prescribing lipid-lowering drugs for the last 12 month period for which figures are available; and what were the comparable figures for the corresponding periods over the previous five years.

Mr. Mellor: The number of prescriptions for and net ingredient cost of lipid-lowering drugs dispensed by community pharmacists in England in each of the last six years was as follows:

	Number of Prescriptions (thousand)	*Net Ingredient Cost (£ million)*
1987	261	4·7
1986	241	3·4
1985	238	2·8
1984	239	2·4
1983	240	2·2
1982	264	2·1

Private Hospitals

Mr. Allen: To ask the Secretary of State for Health what provision there is for the inspection of private hospitals.

Mr. Mellor: District health authorities are required to inspect each private hospital at least twice a year. Inspections may be unannounced and "out of hours".

Mr. Allen: To ask the Secretary of State for Health if he will list the names and ownership by company of private hospitals operating in each of the English health regions.

Mr. Mellor: This information is not collected centrally. However, "Laing's Review of Private Health Care 1988," a copy of which is in the Library, gives details of private hospitals.

Water Supplies

Mr. Allen: To ask the Secretary of State for Health how many hospitals or other National Health Service units receive water from *(a)* boreholes and *(b)* non-mains sources.

Mr. Freeman: Information on the number of hospitals or other NHS units receiving water from boreholes or other non-mains sources is not available. Health authorities are, however, required to comply with the water byelaws in force and comprehensive advice on water supply and quality was issued to them most recently in the DH code of practice, the control of legionellae in health care premises.

Mr. Allen: To ask the Secretary of State for Health what inspection is undertaken of water supplies used *(a)* in the Queen's medical centre, Nottingham and *(b)* in National Health Service hospitals as standard procedure.

Mr. Freeman: In general, responsibility for the quality of water, from whatever source, rests with the appropriate water authority. The quality of water stored and distributed within all health care premises is mainly governed by inspection and maintenance of plant and equipment in those premises and I refer to my other reply to him today.

Operation Statistics

Mr. Allen: To ask the Secretary of State for Health how many operations were contracted out to private hospitals in the Trent regional health authority; and at what cost during 1988.

Mr. Mellor: The information is not available in the form requested. The latest available figures for Trent are for the 1986 calendar year and show a total of 816 discharges and deaths of patients receiving treatment under contractual arrangements with institutions outside the NHS. Expenditure in the Trent region on contractual

arrangements for patient treatment with non-NHS hospitals and homes was about £1,189,000 in 1986-87. This is a total figure and so includes sums incurred under contracts with voluntary and other organisations as well as private hospitals as such.

Whitley Council Negotiating Machinery

Mr. Galbraith: To ask the Secretary of State for Health if he has any plans to review the Whitley council negotiating machinery.

Mr. Kenneth Clarke: Not at the moment. The White Paper "Working for Patients" records our objective progressively to introduce greater local flexibility into the determination of NHS pay and conditions of service. This will require changes in the nature and scope of national agreements but not necessarily in the present central negotiating machinery.

Wakefield District Health Authority

Mr. Hinchliffe: To ask the Secretary of State for Health on how many occasions since its inception Wakefield district health authority has amended a policy decision in respect of a proposed closure or change of use of health buildings following public consultation in accordance with his Department's circular HSC(15)207.

Mr. Freeman: Such information is not collected centrally. The hon. Member may wish to contact the chairman of Wakefield health authority in the event that such detail is held locally.

Spina Bifida

Mr. Thurnham: To ask the Secretary of State for Health how many patients were treated for spina bifida during each of the last three years; what was the cost per patient; and if he will make a statement.

Mr. Freeman: The information requested for the last three years for which data are available centrally is given in the following table.

Estimated number of in-patients with main diagnosis of spina bifida (ICD 741)[1], discharged from National Health Service non-psychiatric hospitals, England

	Number
1983	2,390
1984	1,960
1985	2,070

[1] ICD—International Classification of Diseases: 9th revision.

The cost of hospital treatment is estimated at £1,500 per in-patient stay at 1987-88 prices. Expenditure on care of patients in the community cannot reliably be estimated from data held centrally.

Mr. Thurnham: To ask the Secretary of State for Health (1) what percentage of pregnant woman were screened for spina bifida during the last three years, listed by regions;

(2) how many pregnant mothers were screened for spina bifida during the last three years; what was the cost per patient; and if he will make a statement.

Mr. Freeman: This information is not collected centrally. However, I understand that it is common clinical practice to offer screening for spina bifida to pregnant women.

Neural Tube Defects

Mr. Thurnham: To ask the Secretary of State for Health (1) how many pregnancies were terminated because of neural tube defects during each of the last three years; and if he will make a statement;

(2) what percentage of pregnant women had terminations for neural tube defects during each of the last three years, listed by regions.

Mr. Freeman: The information is shown in the table.

Number of (a) conceptions, (b) terminations with central nervous system malformation in foetus[1] as principal medical condition, England and Wales, Regional Health Authority of usual residence, 1985 to 1987

[1] International classification of diseases (9th revision) 655·0

Nursing Home Owners (Payments)

Ms. Harman: To ask the Secretary of State for Health what payments are made by nursing home owners to general practitioners to facilitate their provision of primary care and other services.

Mr. Mellor: Under his terms of service a general practitioner, except in certain specified circumstances which are not relevant here, may not accept a fee or any other remuneration for any treatment which he gives to a person for whom he is responsible to provide general medical service.

Nurses (Regrading)

Dr. Godman: To ask the Secretary of State for Health if nurses who commenced post-registration training on or after 1 April 1988 have the right of appeal concerning their recent clinical grading; and if he will make a statement.

Mr. Mellor: Yes. All nursing and midwifery staff whose posts were regraded have the right of appeal under the general Whitley council appeals procedure.

Skin and Hair Cream

Mr. Fearn: To ask the Secretary of State for Health what information he has on the levels of chlorinated biphenyls and organophosphates found in lanolin-based skin and hair creams with particular reference to nipple and breast creams.

Mr. Freeman: None. Chlorinated biphenyls are not used for animal treatment and organophosphates are used in a way that should leave minimal residues in the lanolin used for manufacturing these creams. The main supplies provide very tight specifications for lanolin used in cosmetics.

Child Care

Mr. Paice: To ask the Secretary of State for Health what was the total public expenditure on *(a)* local authority day nurseries, *(b)* local authority playgroups and *(c)* other day care facilities for each year from 1975 to 1988 in (i) cash and (ii) real terms; and what was the total number of children participating in each type of provision for each year, together with the percentage that total was of all children in the three to four years age group.

Mr. Mellor: Information is not collected centrally on the exact age of children participating in each type of day care.

Table 1 gives the net current expenditure by local authorities for the years 1975-76 to 1986-87 inclusive. Data for 1987-88 are not yet available.

The information available centrally on the numbers of children participating in local authority provision for children under five is published annually in "Children's day care facilities, at 31 March, England" (A/F/6), copies of which are available in the Library.

Table 2 gives these figures, expressed as a percentage of all children aged three and four years.

Information for 1988 is not yet available.

Table 1
Net current expenditure by local authorities (i) Cash

£ thousands

1985	2·76	0·13	0·27	0·81	0·10	0·25
1986	2·95	0·15	0·27	0·97	0·13	0·33
1987	2·93	0·15	0·28	1·03	0·15	0·42

[1] Information on the exact age of children using each type of provision is not collected centrally; some children using day care provision are aged under three
[2] Data not available
[3] Data available, but not reliable

Notes:
Information about the number of children attending family centres is not collected.

General Practitioners

Ms. Harman: To ask the Secretary of State for Health (1) how many general practitioner practices there are in each family practitioner area; and what is the average list size in each family practitioner area to England;

(2) how many general practitioner practices there are with 11,000 or more patients for each family practitioner committee area in England.

Mr. Mellor: A table giving the information requested as at 1 October 1987 (the latest date for which figures are available) has been placed in the Library.

Hospital Trusts

Ms. Harman: To ask the Secretary of State for Health whether the level of remuneration proposed for chairs and non-executive directors of National Health Service hospital trusts will be in line with the existing payments made to chairs of health authorities.

Mr. Kenneth Clarke: I am considering the question of remuneration for the chairmen and non-executive members of National Health Service hospital trusts.

Community Health Councils

Ms. Harman: To ask the Secretary of State for Health what will be the rights of community health councils in relation to non-National Health Service agencies providing hospital services under contract to health authorities as proposed by the National Health Service White Paper; and how they will be resourced to meet the additional work load arising.

Mr. Kenneth Clarke: Rights of community health councils will not change as a result of the White Paper proposals. I do not therefore foresee that they will experience any problem over carrying out their statutory duty to represent the interests of National Health Service patients in their districts. They receive adequate resources for that purpose and the White Paper does not impose any additional duties or burdens upon them.

Ambulances (Costs)

Mr. Flynn: To ask the Secretary of State for Health if he will list the current average cost of purchase of an ambulance.

Mr. Freeman: Based on annual returns from all regional health authorities the average overall cost of purchase of first line ambulances in 1988-89, including VAT, was £21,568 for glass reinforced plastic vehicles and £20,291 for van conversions.

Eyes and Teeth (Tests)

Mr. Flynn: To ask the Secretary of State for Health if he will give the cost in 1988 of providing free tests for eyes and teeth.

Mr. Mellor: Information on costs is available only by financial year. The estimated cost in England of sight tests provided under the general ophthalmic service in 1988-89, the final 12 months before withdrawal of the universal entitlement to National Health Service sight tests is £114 million. The cost to the general dental service of National Health Service dental examinations in 1987-88, the last full year in which no patient charges were levied for examinations, was £113 million.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Health what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Mellor: The estimated total expenditure in 1988 on health-related consultancy contracts was £2·413 million.

Expenditure was from a joint health and social security budget and has had to be apportioned where consultants were engaged on projects covering both health and social security matters.

A list giving details of each health-related management or computer consultancy awarded in 1988 has been placed in the Library.

Blood Transfusion Service (West Midlands)

Ms. Walley: To ask the Secretary of State for Health how much blood has *(a)* been at the disposal of *(b)* been provided to private hospitals by the West Midlands regional blood transfusion service for each of the years; 1988-89, 1987-88 and 1986-87.

Mr. Freeman: The latest information held centrally for the West Midlands regional blood transfusion service is as follows:

	Number of useable blood donations collected	*Number of units of blood supplied to non-NHS hospitals*
1986	192,599	10,154
1987[1]	192,468	9,086

[1] Provisional figures.

Operating Department Assistants

Mr. Hoyle: To ask the Secretary of State for Health, pursuant to his answer to the hon. Member for Warrington, North of Friday, 17 March, *Official Report*, column *388*, when the working group of the management side of the professional and technical staff B Whitley council examining the pay and grade structures of operating department assistants will make its report.

Mr. Mellor: I understand that the PTB management side's working group expects to report back in time for its conclusions to influence pay negotiations this year.

Hon. Member for Derbyshire, South

Mr. Hoyle: To ask the Secretary of State for Health, pursuant to the answer to the hon. Member for Warrington North, of 20 February, *Official Report*, column *525*, who will pay the £170 for the administrative officer who is managing and safeguarding papers which are being consulted by the former Parliamentary Under-Secretary of State at his Department.

Mr. Kenneth Clarke: The cost of £170 for managing and safeguarding the papers being consulted by the former Parliamentary Under-Secretary of State will be met by my Department in accordance with long standing practice in these matters.

Chemotherapy

Mr. Cryer: To ask the Secretary of State for Health if he will list all the centres of research into chemotherapy to treat cancer, the means of financing such centres and research papers published arising from the research.

Mr. Freeman: This information is not held centrally.

Children Bill *[Lords]*

Mr. Cryer: To ask the Secretary of State for Health what is the estimated amount of extra grant aid needed by local authorities to implement the provisions of the Children Bill *[Lords]*; and if he will make a statement.

Mr. Mellor: Discussions have taken place with the local authority associations about the additional costs to local authorities of the provisions of the Children Bill, and the estimates are set out in the financial memorandum to the Bill. The estimates and any further comments by the associations will be taken into account in determining the level of central Government support to local authorities at the appropriate time.

Mr. Cryer: To ask the Secretary of State for Health if he will make a statement on the proposed timetable for the introduction of any Act resulting from the Children Bill *[Lords]*; and if he will make a statement.

Mr. Mellor: I refer the hon. Member to the statement made by my noble and learned Friend the Lord Chancellor at Second Reading in the other place on 6 December at column 535.

Guardians ad Litem

Mr. Cryer: To ask the Secretary of State for Health if he will list the four panels of guardians ad litem currently being surveyed by the social services inspectorate; if he will give the terms of reference for this survey; and if he will place a copy of the report of the survey in the Library.

Mr. Mellor: The social services inspectorate is conducting *(a)* a postal survey of all panels of guardians ad litem and reporting officers in England and *(b)* more detailed inspections of panels administered singly by Dorset and Cumbria local authorities and in consortia by Wigan, Salford and Bolton and Leeds, Bradford and Calderdale authorities.

The inspectorate will study demand for the services of panel members and how this is being met including the resources utilised, the skills required and the workloads of individual panel members; examine how individual members fulfil their role and arrangements for monitoring; and report with recommendations of national relevance.

I expect to be able to publish the report later this year.

Pharmaceutical Prices

Mr. Michael Morris: To ask the Secretary of State for Health how many pharmaceutical companies have not applied for any price increases in the last two, three and five years.

Mr. Mellor: For companies who have provided full financial returns under the pharmaceutical price regulation scheme for each year since 1984, the numbers of companies not applying for any price increase from the date shown to 31 December 1988 is as follows:

	Number
1 January 1987	17
1 January 1986	15
1 January 1984	10

Sight Testing

Mr. Haselhurst: To ask the Secretary of State for Health (1) if he will publish the report of his Department's optical adviser on the accuracy and reliability of autorefraction and auto optitesters for testing sight;

(2) if he will permit the lower tier sight test proposed in his recent consultative letter to be conducted by staff who are not qualified opticians using an autorefractor and an auto optitester.

Mr. Mellor *[holding answer 23 March 1989]:* The Opticians Act 1958 provides that sight tests may only be conducted by a registered medical practitioner or registered ophthalmic optician. We have no plans at present to change this requirement. I am not aware of any report on autorefractors or auto optitesters but I understand that autorefractors and auto optitesters offer a reasonably accurate method of testing sight although they cannot provide a test for binocular vision.

Sheep Dips

Dr. David Clark: To ask the Secretary of State for Health what discussions he has had with the Medical Research Council on the link between sheep dip and cot deaths.

Mr. Freeman *[holding answer 23 March 1989]:* There have been no discussions between the Secretary of State and the Medical Research Council (MRC) on the possibility of a link between sheep dip and cot deaths.

The MRC, which is the main agency through which the Government supports medical research, receives a grant-in-aid from the Department of Education and Science. Over the years, the MRC has funded a wide range of research related to cot deaths. Officials will be discussing with the MRC what further avenues can be fruitfully pursued.

TRADE AND INDUSTRY

Production and Employment

Mr. Cousins: To ask the Chancellor of the Duchy of Lancaster what has been the growth in production, employment and productivity for *(a)* manufacturing industry and *(b)* pharmaceuticals over the period 1979 to the present; and if he will in each case estimate what part (i) changes in employment and (ii) changes in production have had on productivity changes.

Mr. Maude: The official data series on productivity are published by the Department of Employment in the *Employment Gazette* but these do not include separately identifiable figures for the pharmaceutical industry. The following data from the annual census of production provide the required information for manufacturing industry and the pharmaceutical industry. These figures may show different movements from the official series which are derived from other sources. Full data for years after 1986 are not yet available.

Year	*Production (Gross value added) (1985 prices)* £ *billion*	*Employment* *thousands*	*Productivity (Gross value added per head) (1985 prices)* £ *thousands*
Manufacturing industry			
1979	85·4	6,910	12·4
1980	75·9	6,495	11·7
1981	70·3	5,778	12·2
1982	68·2	5,360	12·7
1983	72·7	5,070	14·3
1984	76·0	5,059	15·0
1985	76·5	4,976	15·4
1986	75·9	4,878	15·6
Pharmaceutical products[1]			
1979	1·67	74·4	22·4
1980	1·58	73·3	21·6
1981	1·52	69·8	21·8
1982	1·69	68·6	24·6
1983	1·75	67·9	25·7
1984	1·92	67·6	28·5
1985	1·95	66·9	29·1
1986	2·06	68·4	30·1

[1] The pharmaceutical products industry comprises Group 257 of the Standard Industrial Classification (Revised 1980).

Source: Annual Census of Production.

Bicycle Imports

Mr. Brandon-Bravo: To ask the Chancellor of the Duchy of Lancaster (1) what consideration he has given to the Bicycle Association's official report for the year ended 1988, and if, in the light of the increase in cycle imports from 600,000 in 1986 to 1,305,000 in 1988, he will seek a review of the European Economic Community duty-free provisions for underdeveloped or developing nations;

(2) if he will review China's developing nation status in view of changes in its industrial output.

Mr. Alan Clark: The Bicycle Association's annual report does not refer to the developing country imports nor have I received representations. The European Community's generalised system of preference for developing countries is reviewed each year. The competitiveness of products is one of the factors taken into account in the decision to renew the arrangements.

Mr. Brandon-Bravo: To ask the Chancellor of the Duchy of Lancaster if he will review the duties on Taiwanese and Singapore components which can be imported free of duty as components of cycles imported from underdeveloped countries, but become subject to duty if imported for use in British cycle manufacture.

Mr. Alan Clark: There is no tariff concession for imports of bicycles and components from Taiwan. Both bicycles and components from Singapore are covered by the EC's generalised system of preferences.

EFTA

Mr. Greg Knight: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on Her Majesty's Government's relations with the EFTA countries.

Mr. Maude: United Kingdom relations with the EFTA countries are already very close—both bilaterally and through EC/EFTA co-operation. We are firmly committed to strengthening these relations still further. The EFTA countries are a major trading partner and all have free trade agreements with the EC. Close co-operation continues under the framework of the Luxembourg declaration agreed by EC and EFTA Ministers in 1984. This has already resulted in worthwhile practical achievements in reducing and eliminating remaining barriers to trade. At an informal EC/EFTA ministerial meeting on 20 March, ways of broadening and deepening the relationship were discussed. There will be a further ministerial meeting before the end of the year. The United Kingdom welcomes this intensification of activities and will play a full role in it.

Link Scheme

Mr. Gordon Brown: To ask the Chancellor of the Duchy of Lancaster if he will give the Government funds committed in 1987 and 1988 under the link scheme.

Mr. Forth: The first five link programmes were announced on 3 February 1988 and subsequently another five programmes were announced during the year. Total Government funding authorised under the 10 link programmes announced in 1988 amounted to £59·3 million.

Regional Assistance

Mr. Gordon Brown: To ask the Chancellor of the Duchy of Lancaster if he will provide figures for spending on *(a)* regional assistance and *(b)* regional development grants for England, by region, for each year from 1978-79 to 1988-89 and plans for 1989-90 to 1991-92, in cash and at 1987-88 prices.

Mr. Atkins: Gross annual expenditure on regional development grants and regional selective assistance by English region from 1978-79 to 1987-88 at current and constant (1987-88 = 100) prices was as follows:

Expenditure at current prices

£ millions

	1978-79	*1979-80*	*1980-81*	*1981-82*	*1982-83*	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*

Notes:

[1] RDG figures cover expenditure under the original and revised schemes.

[2] Totals do not always equal component parts due to rounding.

[3] At the regional level RSA figures include only industrial and training grants: England figures include some unallocated project grants and expenditure under the business improvement services and exchange risk guarantee schemes. Expenditure under these two schemes cannot be broken down to the regional level.

The provisional gross outturn for RDG for England as a whole in 1988-89 is £155 million at current prices, £144 million at constant 1987-88 prices; and for RSA £135 million (current), £126 million (constant).

The planned provision (net of domestic receipts) for RDG and RSA in the period 1989-90 to 1991-92 is as follows:

	1989-90[1] *£ million*	*1990-91*[2] *£ million*	*1991-92*[2] *£ million*
Planned provision at current prices			
Regional development grants	125	110	55
Regional selective assistance[3]	145	150	160
Planned provision at constant prices			
Regional development grants	111	93	45
Regional selective assistance[3]	128	127	132

[1] Supply estimates.
[2] As underlying the 1989 public expenditure White Paper.
[3] Includes expenditure on industrial and training grants, and the business improvement services and exchange risk guarantee schemes.

Petrol Sales

Mr. John Marshall: To ask the Chancellor of the Duchy of Lancaster whether, in the light of the absence of a breakdown of United Kingdom petrol sales by company type, he will refer the industry to the Monopolies and Mergers Commission.

Mr. Maude: The Director General of Fair Trading referred the wholesale supply of petrol in the United Kingdom to the Monopolies and Mergers Commission on 9 November 1988. The commission was given 12 months in which to report.

Rating Reform (Royal Mail)

Dr. Cunningham: To ask the Chancellor of the Duchy of Lancaster what restrictions are there on the use of the words "Royal Mail" in marketing services in relation to the implementation of the community charge.

Mr. Forth: Only standard services currently offered by the Post Office to any of its customers are being offered to local authorities to assist them in the implementation of the community charge. Royal Mail Letters, like Royal Mail Parcels, uses the words Royal Mail in marketing these standard services.

Mr. Anthony Wheeler and Mr. Richard Savill

Sir Charles Morrison: To ask the Chancellor of the Duchy of Lancaster, whether any of his Department's officials were in communication with *(a)* the police or *(b)* any statutory or regulatory body, prior to December 1986, with respect to the business affairs of Mr. Anthony Wheeler and Mr. Richard Savill in respect of *(a)* the Wessex Trust, *(b)* Selective Investment Brokers and *(c)* any other companies of which they were directors; what information his officials received concerning any of those individuals or brokers; and what action was taken in respect of them, and on what dates.

Mr. Maude: Selective Investment Brokers was a trading name used as part of the operation of the Wessex Trust, an unincorporated body. It is not the same entity as Selective Investment Brokers Ltd.

Before December 1986 my Department was in communication with the Director of Public Prosecutions about Wessex Trust and companies concerned in the affairs of the trust which included companies of which Mr. Wheeler was a director. It is not the practice to comment on the affairs of individual companies.

Persons concerned with the Wessex Trust are at present subject to criminal proceedings brought by the Director of Public Prosecutions.

Manufacturing Statistics

Mr. Henderson: To ask the Chancellor of the Duchy of Lancaster if he will publish import figures and import penetration figures from 1973 to date for manufacturing industries at SIC two-digit level.

Mr. Alan Clark: Data are available only for the years 1978 to 1987 inclusive. The information is given in the following tables:

n.a. Not available.

Waste Paper Imports

Mr. Crowther: To ask the Chancellor of the Duchy of Lancaster what information he has as to whether waste paper subsidised by Government funds, collected in the United States of America, is being imported into the United Kingdom.

Mr. Atkins: I understand that mandatory collection of waste paper and other recyclable materials is now in operation in several states of the United States of America. It is not possible separately to identify the volumes of waste paper obtained by this route and subsequently exported to the United Kingdom. However, there is currently no evidence that imports of waste paper from the United States of America into the United Kingdom are having an adverse effect on our domestic market.

Pittard Garnar plc

Mr. Fatchett: To ask the Chancellor of the Duchy of Lancaster when he expects to receive the report from the Monopolies and Mergers Commission on the proposed takeover of Pittard Garnar plc by *(a)* Strong and Fisher (Holdings) plc. and *(b)* Hillsdown Holdings plc.

Mr. Maude: The Monopolies and Mergers Commission submitted its separate reports on the respective proposed acquisition of Pittard Garnar plc, by Strong and Fisher

(Holdings) plc and Hillsdown Holdings plc to my right hon. and noble Friend the Secretary of State for Trade and Industry on 10 March 1989.

Companies Registration Office

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster, since computerisation of search facilities at Companies Registration Office *(a)* how many times the computers have gone down, *(b)* what is the average time the computers have been down and *(c)* what is the longest and shortest time the computers have been down.

Mr. Maude: The chief executive of Companies Ho[illegible] tells me that, since the computerised search facilities were established on 19 September 1988, there have been four instances when the computer has gone down. However, other factors such as failure in data communications links have also, from time to time, resulted in the loss of the search service.

Altogether there have been 35 incidents which have resulted in some or all of the search room computer terminals being inoperable. The average duration of each incident has been 49 minutes. The longest interruption, lasting 6½ hours and caused by a simultaneous failure in a primary and standby communications link, affected only the terminals in the London search room. The shortest recorded incident lasted 10 minutes.

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster whether there are any plans to provide back up computer facilities for when the Companies Registration Office computer search system goes down.

Mr. Maude: The chief executive attaches great importance to maximising the availability of computerised services and ways of reducing the risk of failure of all elements of the service are kept constantly under review. Currently, steps being taken to provide increased protection against computer failure include the installation of a second mainframe processor to provide back-up for the primary machine. Plans are also being prepared to enable the agency's computerised systems to be transferred to my Department's computer installation in Middlesex in the event of a major disaster at the agency's own computer installation.

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster what is the average delay before documents received at Companies Registration Office are available on microfiche; and what steps are being taken by the Companies Registration Office to reduce the delay.

Mr. Maude: The chief executive of Companies House tells me that the average delay for making documents available for public inspection on microfiche over the 51 weeks of 1988-89 to the 24 March has been 25 working days. My right hon. Friend the Secretary of State for Trade and Industry announced on 23 March 1989 targets for Companies House including one for an improvement in the time taken to process documents to an average 18 working days during 1990-91. Under the new agency arrangements, it is for the chief executive to take steps to meet this target.

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster when he expects the BAA shareholder register received by the Companies Registration Office on 30 September 1988, to be available for public inspection on microfiche.

Mr. Maude: The chief executive tells me that this register was received by him in computer output microfilm form from which it was not possible to take good quality microfiche copies in the usual way. However, it has been available for inspection in Cardiff from 30 September. If a London searcher had wished to inspect it I understand that arrangements could have been made. The chief executive's staff has, as a result of the hon. Member's interest, been experimenting with a number of alternative ways of providing a copy to the London office and I am pleased to say that they have now found a technique that will enable them to do so. This shareholders register is now therefore available for inspection on request at the London search room.

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster how much it costs to produce the average company microfiche at Companies Registration Office.

Mr. Maude: The chief executive of Companies House tells me that, on a memorandum trading account basis, the estimated average cost of producing a company record on microfiche in 1988-89 was £2·46.

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster what were the staffing levels at *(a)* Companies Registration Office, Cardiff and *(b)* Companies Registration Office, London, for the period 1979 to 1988.

Mr. Maude: The chief executive Companies House tells me that at 1 April each year the numbers of permanent staff in post were as follows:

	Cardiff	*London*
1979	866·5	224
1980	828·5	204·5
1981	770·5	213
1982	772	196
1983	766	193
1984	768·5	181·5
1985	853	180·5
1986	857	181·5
1987	851·5	189
1988	795	178

Company Documents

Mr. John Hughes: To ask the Chancellor of the Duchy of Lancaster what charges are made by the United Kingdom and each EEC country to the public for inspecting documents relating to companies and what they obtain for their money.

Mr. Maude: The chief executive of Companies House tells me that, in Great Britain, a searcher receives for the £2·50 statutory inspection fee, a microfiche copy of the filmed contents of one company record held by the registrar. Historical documents not filmed may be inspected by arrangement at one of the search rooms within the same search fee.

Under the provisions of the first council directive dated 9 March 1968, European Community member states are required to make available for inspection company information for a fee which does not exceed the administrative cost of providing it.

The system of company searches throughout EC member states varies considerably and complete up-to-date information about all search facilities is not currently held. The chief executive has in hand a project to consider

closer working links with providers of company registration and search facilities throughout the European Community. Meantime, if the hon. Member has any particular point in mind, the chief executive would be pleased to consider what he might do to help.

Unsecured Loans

Mr. Tim Smith: To ask the Chancellor of the Duchy of Lancaster what proportion of the respondents to the Office of Fair Trading survey published last autumn understood unprompted that an unsecured loan could result in the loss of the borrower's home.

Mr. Forth *[holding answer 23 March 1989]:* The Office of Fair Trading, following the survey "Consumers' Use of Credit", has not published the proportion of respondents who, unprompted, understood that an unsecured loan could result in the loss of the borrower's home. However the survey did show that 44 per cent. of respondents claimed to have no idea of the difference between a secured loan and an unsecured loan.

Mr. Tim Smith: To ask the Chancellor of the Duchy of Lancaster why he does not propose to include unsecured loans in regulations under the Consumer Credit Act 1974, requiring advertisements for loans to carry a health warning.

Mr. Forth *[holding answer 23 March 1989]:* Evidence suggests that many consumers do not understand the difference between a secured loan and an unsecured loan. The report of the review body on civil justice (Cm. 394), concluded that sales of property following the granting of a charging order very rarely took place. I do not believe therefore that there is any justification for extending a "health" warning to cover unsecured loans.

Loans

Mr. Tim Smith: To ask the Chancellor of the Duchy of Lancaster (1) what proportion of loans secured against a second mortgage resulted in repossession of the borrower's home in the last year for which figures are available;

(2) what proportion of unsecured loans resulted in repossession of the borrower's home in the last year for which figures are available;

(3) how many charging orders for unsecured loans were issued in the last year for which figures are available.

Mr. Forth *[holding answer 23 March 1989]:* The collection of statistics on court proceedings is a matter for the Lord Chancellor's Department, but I understand that information is not available in the form requested.

WALES

House Grants

Mr. Michael: To ask the Secretary of State for Wales what income level it is his policy to set as the figure below which a house owner will receive a 100 per cent. grant for renovations or repairs, and what percentage grant will be received by those with incomes over the threshold.

Mr. Grist: Our recent consultation paper on the test of resources proposed that households with weekly net incomes below a threshold figure would qualify for 100 per cent. assistance. Grant would be progressively reduced for households with incomes above the threshold.

The test of resources we have proposed suggests that the threshold should be set at housing benefit level plus a premium of £20 per week. For those with incomes above that level we have proposed a sliding scale of grant entitlement determined by the cost of works and applicant's financial resources.

Forestry Commission Holdings (Wales)

Mr. Ron Davies: To ask the Secretary of State for Wales what information his office holds on the location and extent of the Forestry Commission's holdings in Wales.

Mr. Peter Walker: Information on the land managed by the Forestry Commission in Wales, set out by forest districts, is contained in table 16 of the commission's annual reports.

Copies of these reports are in the Library of the House.

Housing and Development Agencies

Mr. Murphy: To ask the Secretary of State for Wales if he will list the chairman and members of *(a)* the Land Authority for Wales, *(b)* Housing for Wales, *(c)* the Welsh Development Agency and *(d)* Cardiff Bay development corporation, together with their salaries and expenses.

Mr. Wyn Roberts: The list of names and current salaries is given in the table. Expenses are paid in accordance with Treasury guidelines on payments to members of public bodies.

(a) Land authority for Wales

Membership		*Salaries* £
Chairman:	Mr. G. D. Inkin	[1]24,008
Deputy Chairman:	Mr. J. D. Allen CBE	[2]6,816
Members:	Mr. R. P. V. Rees	[3]4,790
	Mr. G. Jones	
	Mr. R. F. Watkiss CBE	
	Mr. W. Rhys Webb	
	Mr. R. G. Owen	
	Mr. A. Edmunds

[2] Based on 1 day per week.
[3] Based on 3 days per month.

(b) Housing for Wales

Membership		*Salaries* £
Chairman:	Mr. J. Allen CBE	[1]22,135
Deputy Chairman:	Mr. J. Evans	[2]6,851
Members:	Mr. G. Lloyd	[3]3,000
	Professor P. Williams	
	Mr. J. Proctor	
	Mrs. A. Mainwaring	
	Mr. A. E. Peat	[4]—

[1] Based on 2·5 days per week.
[2] Based on 1 day per week.
[3] Based on 2 days per month.
[4] Salary paid as Chief Executive.

(c) Welsh Development Agency

Members		*Salaries* £
Chairman:	Dr. Gwyn Jones	[1]32,990
Deputy Chairman:	Sir Donald Walters	[2]17,046
Members:	Mr. David Waterstone	[4]—
	Cllr. E. Glyn Davies	[5]—
	Mr. Idwal Symonds JP	[3]4,825
	Mr. Colin Ivor Cooke	
	Mr. Ralph Phillip Vinon Rees	
	Mr. David Griffiths Roberts OBE	
	Mr. David Claude Neville Cole CBE	
	Mr. B. Hugh R. Hudson-Davies	
	Mr. John Foley MBE	

[1] Based on 2·5 days per week.
[2] Based on 2 days per week.
[3] Based on 2 days per month.
[4] Salary paid as Chief Executive of Agency.
[5] As Chairman of Development Board of Rural Wales receives no emoluments in his capacity as an ex officio board member of the Agency.

(d) Cardiff Bay Development Corporation

Members		*Salaries* £
Chairman:	Geoffrey Inkin OBE	[1]24,290
Deputy Chairman:	Cllr. Lord Brooks of Tremorfa	[2]13,702
Members:	Mrs. Mair Barnes	[3]3,866
	Mrs. Honor Chapman	
	Cllor. Percy Chappel	
	Mr. Alan Cox CBE	
	Sir Alex Gordon	
	Mr. B. Hugh R. Hudson-Davies	
	Cllr. Paddy Kitson	
	Mr. Patrick de Pelet	
	Cllr. John Reynolds	
	Cllr. Ron Watkiss	

[1] Based on 2·5 days per week.
[2] Based on 2 days per week.
[3] Based on 0·5 day per week.

Cefn Coed Hospital (Psychiatric Unit)

Mr. Gareth Wardell: To ask the Secretary of State for Wales when a medium-secure psychiatic unit at Cefn Coed hospital, Swansea will be established in the light of the undertaking given by the Parliamentary Under-Secretary on 25 April 1988, *Official Report*, column 1.

Mr. Grist: The provision of a medium secure psychiatric service for south-west Wales is under consideration by the Welsh Office in the light of the comments of the three health authorities most concerned.

Housing for Wales

Mr. Murphy: To ask the Secretary of State for Wales if he has appointed any members of Housing for Wales who possess a local government background.

Mr. Grist: No.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Wales what was the total amount spent by his Department in

1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Wyn Roberts: The total amount spent on management and computer consultancies in 1988 was £195,280. Details of those consultancies awarded in that year are as follows:

Firm	*Subject of assignment*
BIS Ltd.	To assist with the performance of the Department's mainframe computer.
HMSO	To review the layout of the Department's reprographic unit.
Ernst and Whinney Ltd.	To advise on the implementation of the Department's computerised financial systems.
Frank Griffiths Associates	Review of purchasing
Touche Ross	Review of the NHS directorate

Mr. Tim Smith: To ask the Secretary of State for Wales what was the total amount spent by the Welsh Development Agency in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Welsh Development Agency in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Wyn Roberts: The Welsh Development Agency has spent £99,000 on the following consultancy contracts:

Company	*Assignment*
Grant Thornton	Evaluation and testing of new computer systems
Ernst Whinney	Documentation for users of new computer systems and advice on implementing new systems
P. Sullivan	Development of integrated data bases from existing computer systems
Touche Ross	Corporate planning advice
Numbers Research Ltd.	Monitoring effectiveness of agency marketing campaign outside of Wales
Henry Zarb of Holder & Co.	
Beaufort Research Ltd.	Monitoring effectiveness of agency marketing campaign within Wales
Taylor Nelson Research	Monitoring effectiveness of agency food initiative marketing campaign

Tree Preservation Orders

Mr. Brazier: To ask the Secretary of State for Wales how many tree preservation orders have been made in each county of Wales *(a)* for individual trees and *(b)* for groups of trees or woods; and what area is covered by the latter case.

Mr. Wyn Roberts: Local planning authorities are responsible for making and confirming tree preservation orders and the information requested is not held centrally.

All-Wales Strategy

Mr. Martyn Jones: To ask the Secretary of State for Wales (1) what is the number and designation of staff employed through all-Wales strategy funding in Clwyd since the inception of the strategy, on a year-by-year basis;

(2) how much all-Wales strategy funding Clwyd county council has allocated to its education service.

Mr. Grist: The responsibility for planning and developing services under the all-Wales mental handicap strategy lies with county joint planning teams. These teams consist of representatives of local and health authorities, voluntary organisations and representatives of service users in each county, and are co-ordinated by local authority social services departments. In addition to the resources of the local and health authorities, special Welsh Office grants are made available to counties to assist in the development of new patterns of services. Detailed information on individual services, including staffing, in Clwyd is available from the county council.

Mr. Martyn Jones: To ask the Secretary of State for Wales what voluntary sector initiatives are funded by the all-Wales strategy county by county; and what percentage of the counties allocations this represents on a year-by-year basis.

Mr. Grist: The allocation of funds under the all-Wales mental handicap strategy for the voluntary sector within each county is primarily a matter for the social services and health authorities, and detailed information is not held centrally. The Department funds directly a limited number of voluntary bodies for them to provide or pilot services relevant to more than one county area. Information in respect of these is as follows:

	1983-84	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*
(a) Welsh Office direct funding of voluntary organisations	231,043	413,938	601,796	465,335	260,110	140,231
(b) Total Welsh Office payment under the mental handicap strategy	0·75 million	2·41 million	4·02 million	6·88 million	10·06 million	[1]13·80 million
Proportion of *(a)* to *(b)*	28·4 per cent.	17·2 per cent.	15·0 per cent.	6·8 per cent.	2·6 per cent.	1·0 per cent.

[1] Provisional.

The declining proportion of direct central funding reflects the development of effective county planning, which provides the basis for the social services and health authorities to support directly relevant voluntary sector activity.

Local Authority Housing

Mr. Anderson: To ask the Secretary of State for Wales what, at the latest available date, was the average selling price before discount of a local authority unit of accommodation; and what is the average cost of building a new local authority unit of accommodation.

Mr. Grist: The average selling price before discount of local authority dwellings sold during 1988 was £20,115. The average cost of building a new local authority unit of accommodation during the same period is estimated to have been £35,450.

Water Standards

Dr. Cunningham: To ask the Secretary of State for Wales (1) if he will provide details of the Welsh water authority's funding allocated to improvements in standards of *(a)* drinking water quality, *(b)* sewage treatment and disposal and *(c)* bathing water quality through its existing capital programme for each of the next 10 years;

(2) what percentage of the projected necessary funding for improvements in standards of *(a)* drinking water quality, *(b)* sewage treatment and disposal and *(c)* bathing water quality is contained within the existing capital programme of the Welsh water authority.

Mr. Grist: The information requested by the hon. Gentleman is not available.

ENERGY

Nuclear Power (Report)

Mr. Redmond: To ask the Secretary of State for Energy, pursuant to his reply of 13 February, *Official Report*, column *40*, what analysis has been made of the report, "Greenhouse Warming: A Rationale for Nuclear Power"; what action he proposes to take as a result; and if he will make a statement.

Mr. Michael Spicer: The paper "Greenhouse Warming: Comparative Analysis of Two Abatement Strategies" has been examined by my Department. The paper is United States oriented. The scope for cost-effective energy efficiency measures and the means by which they might be implemented are not sufficiently addressed.

Nuclear power has a positive role to play in helping to curtail future CO2 emissions, but is not going to solve the threat of global warming on its own. Cost-effective energy efficiency measures will also have an important role and the Energy Efficiency Office will continue to promote them vigorously.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Energy what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Parkinson: My Department spent £217,000 on management and computer consultancy contracts, excluding hardware and software purchases, in the financial year 1988-89.

Contracts placed with private sector firms and companies for management or computer consultancies during 1988 were:

Consultants	*Subject*
Price Waterhouse	Offshore supplies office: computerisation project
Dataserv	Computerisation of petroleum licence records
BIS	Cabling design for new HQ building
Price Waterhouse	Feasibility Study of computerisation of offshore drilling applications and approvals
IML	Assistance in setting up computer system for technical investigation into Piper Alpha disaster
Price Waterhouse	Reporting instructions for United Kingdom oil and gas production statistics
Data Solve Ltd.	Computer training
Stuart McKechnie Ltd.	Management training
Training and Development Approaches Ltd.	Advice on management training and appraisal
Kleinwort Benson	Financial advice including computer modelling
Russell Reynolds	Recruitment consultants for chairman of North Eastern electricity board

Security Firms

Mr. Livingstone: To ask the Secretary of State for Energy what is his policy towards his Department's involvement with private security firms.

Mr. Peter Morrison: The policy of my Department is to use the services of private security firms where it is to the public advantage to do so, within the limits set by Government policy and after consulting other Departments as appropriate.

EDUCATION AND SCIENCE

Parent Governors

10. **Mr. Hind:** To ask the Secretary of State for Education and Science how many schools have set up governing bodies containing elected parent governors; and if he will make a statement.

Mrs. Rumbold: A recent survey for the Department suggests that about 99 per cent. of parent-governor places at county and maintained special schools have been filled, almost all of these through election or nomination. This is a tremendous achievement.

Student Loans

16. **Mr. Macdonald:** To ask the Secretary of State for Education and Science if he will estimate at what date the Government will recover its spending outlay on the student loans scheme proposed in the White Paper "Top-up Loans for Students".

Mr. Jackson: On the basis of the assumptions outlined in annex E of the White Paper and measured in terms of the cumulative net PSBR effect, the spending outlay will be recovered by 2013. If the cost of the access funds are included, the outlay will be recovered by 2015.

25. **Mr. Andrew F. Bennett:** To ask the Secretary of State for Education and Science if he will make a statement about the number of representations he has received for and against the Government's students loan plans.

Mr. Jackson: I refer the hon. Member to the answer given by my hon. Friend on 22 March 1989 to the hon. Member for Bolsover (Mr. Skinner) at column *605*.

Mr. Simon Hughes: To ask the Secretary of State for Education and Science what effect his proposals laid down in "Top-Up Loans for Students" (Cm. 520) will have in relation to *(a)* nursing students pursuing degree courses in nursing in colleges of higher education and *(b)* nursing students pursuing nursing education courses under the Project 2000 proposals, in receipt of a bursary; and if he will make a statement.

Mr. Jackson: The precise arrangements for bursaries for student nurses have not yet been decided.

Education Statistics

17. **Mr. Barry Field:** To ask the Secretary of State for Education and Science what analysis he has carried out of the 10 local education authorities with the lowest record of (i) examination results and (ii) expenditure per pupil.

Mrs. Rumbold: Three of the 10 highest spending authorities in 1986-87 were among the 10 authorities with the lowest proportions of school leavers achieving five or more higher grades. None of the 10 lowest spending authorities were in this category.

Drugs

18. **Mr. Rathbone:** To ask the Secretary of State for Education and Science what plans he has for Government funding of drugs education co-ordinators.

Mr. Butcher: Drugs education co-ordinators are employed by local education authorities; they have been funded jointly by LEAs and the DES since 1986 under the education support grants programme. Consideration is currently being given to the nature of the ESG programme in 1990-91. A decision on this will be announced shortly.

Japanese Language Training

19. **Mr. Cran:** To ask the Secretary of state for Education and Science what progress is being made in expanding the demand for the network of language export training centres' Japanese services; and what other steps he is taking to enhance Japanese language training for exporters.

Mr. Jackson: The network of language export centres is planning to produce an audio briefing package which will enhance its Japanese services. The package will include Japanese language training as well as advice on business practice in Japan. It will be aimed at businesses wishing to penetrate the Japanese market and should be available from all the centres in the early summer.

Classroom Behaviour

20. **Mr. David Evans:** To ask the Secretary of State for Education and Science what steps his Department is taking to assist schools in securing a more orderly atmosphere in the classroom.

Mr. Butcher: My Department is currently taking action on a number of key recommendations made in the recent report from the committee of inquiry into discipline in schools. This includes measures to improve teacher training; financial support for projects to tackle the problems of difficult pupils and truancy; and close monitoring of the procedures for excluding pupils from school. Fuller details were given to the House on 13 March by my right hon. Friend.

Grant Maintained Schools

21. **Mr. Pawsey:** To ask the Secretary of State for Education and Science what is the number of schools which have so far applied for grant-maintained status; and what action he intends to take to encourage further applications.

Mrs. Rumbold: A total of 22 schools have so far published statutory proposals to become grant-maintained; many more are on the way. My right hon. Friend will continue to do all he can to encourage the development of a healthy grant-maintained sector and greater choice for parents.

Schools Outreach Programme

22. **Mr. Nicholas Baker:** To ask the Secretary of State for Education and Science if he will make a statement about the funding of the schools outreach programme.

Mr. Butcher: My right hon. Friend has offered funding for a three-year pilot project to be conducted by schools outreach. This is dependent upon funding also being provided by a local education authority. In the long term, funding for schools outreach must be a matter for local determination.

Student Loans

23. **Mr. John Evans:** To ask the Secretary of State for Education and Science if he has received any representations from banking institutions in the last month in regard to the proposed introduction of student loans; and if he will make a statement.

Mr. Jackson: Yes. Constructive discussions are being held with a range of financial institutions about their possible participation in the administration of top-up loans.

Parent Governors

24. **Mr. Sumberg:** To ask the Secretary of State for Education and Science what are the latest figures for the number of parents who have become school governors.

Mrs. Rumbold: I refer my hon. Friend to the reply I gave earlier today to my hon. Friend the Member for Lancashire, West (Mr. Hind).

Essex Education Committee

26. **Mr. Amess:** To ask the Secretary of State for Education and Science when he last met the chairman of Essex county council education committee; and what matters were discussed.

Mr. Butcher: My right hon. Friend last met the chairman of the Essex county council education committee on official business at the golden jubilee celebrations of St. Helena school on 28 January 1988.

Engineering (A-level Syllabus)

27. **Mr. Evennett:** To ask the Secretary of State for Education and Science what information he has as to how many examination boards provide an A-level examination syllabus for engineering.

Mrs. Rumbold: I understand that seven of the eight GCE examining boards offer A-level syllabuses in engineering subjects.

Capital Allocations

28. **Mr. Pike:** To ask the Secretary of State for Education and Science how many local education authorities have made representations to his Department since the 1989-90 capital allocations were announced.

Mr. Butcher: A total of 17 local education authorities have made representations about their 1989-90 capital allocations. Four of these relate to the allocations for voluntary aided and special agreement schools only.

Lecturers (Dispute)

Mr. Alton: To ask the Secretary of State for Education and Science what provisions are being made for Liverpool students whose exams are in danger because of the Association of University Teachers' dispute.

Mr. Jackson: That is a matter for the authorities at the university.

Lecturers (Pay and Conditions)

Mr. David Alton: To ask the Secretary of State for Education and Science what representations he has received about university lecturers' pay and conditions; and if he will make a statement.

Mr. Jackson: My right hon. Friend has received representations from the Committee of Vice-Chancellors and Principals and the Association of University Teachers seeking additional funding for pay increases for university staff. He has also had many letters both about salary levels in universities and in criticism of the boycott of examination work by lecturers.

Student Maintenance

Mr. Andrew Smith: To ask the Secretary of State for Education and Science if he will give figures for total Government spending on student maintenance for each of the last 10 years in *(a)* cash terms and *(b)* in real terms, indexed so that 1979-80 = 100.

Mr. Jackson: Expenditure on the maintenance element of mandatory awards has been as follows:

Academic year	*(a) Expenditure in cash terms £m*	*(b) Expenditure in real terms £m (1979-80 prices)*
1979-80	332	332
1980-81	398	349
1981-82	443	355
1982-83	472	359
1983-84	502	362

Polytechnics and Colleges

Mr. Andrew Smith: To ask the Secretary of State for Education and Science (1), pursuant to his reply to the hon. Member for Oxford, East, *Official Report*, 15 March, column *219*, if he will list the separate figures for the total capital allocations from the advanced further education pool and capital expenditure by local authorities on polytechnics and colleges in each year since 1979-80 *(a)* in cash terms and *(b)* indexed in real terms with 1979-80 = 100;

(2) pursuant to his reply to the hon. Member for Oxford East, *Official Report*, 15 March, column *220*, if he will list capital expenditure *(a)* funded by the University Grants Committee, and *(b)* the same figures for capital expenditure on polytechnics and other colleges for each of the last 10 years in cash terms, as well as indexed in real terms with 1979-80 = 100.

Mr. Jackson: The following information takes account of the gross domestic product deflator updated as at 15 March and also corrects an error in the earlier answer, for which I apologise, in the index for polytechnics and colleges in 1987-88.

Capital Expenditure on Financial years	*Universities (Great Britain)*		*Polytechnics and other Colleges (England)*	
	£ million	*Index*	*£ million*	*Index*
1979-80	87·8	100	78·0	100
1980-81	97·9	94	100·7	109
1981-82	103·1	90	99·9	98
1982-83	106·8	87	125·5	115
1983-84	103·1	81	125·5	110
1984-85	106·7	79	137·4	115
1985-86	118·2	83	145·5	116
1986-87	130·2	89	159·5	123
1987-88	128·8	84	[1]124·9	[1]91
1988-89	140·1	85	n/a	n/a

[1] Estimated.
n/a Not available.

The figures for polytechnics and colleges are gross capital expenditure on all further and higher education by local authorities as returned by them together with capital grants to voluntary and direct grant colleges. The advanced further education pool is for recurrent expenditure only. There is a separate pool for elements of capital-related expenditure on AFE as laid down by regulations.

Teacher Conversion Courses

Mr. Fatchett: To ask the Secretary of State for Education and Science for what reasons the allocation of funds to the University Grants Committee and National Advisory Board for teacher conversion courses has been discontinued.

Mrs. Rumbold: The allocation of funds has not been discontinued.

Mr. Fatchett: To ask the Secretary of State for Education and Science how many places were allocated for teacher conversion courses in 1987-88 and 1988-89; and how many of these places were taken up.

Mrs. Rumbold: This information is not available.

Grant-maintained Schools

Mr. Fatchett: To ask the Secretary of State for Education and Science when he or Ministers in his Department have held a meeting of the trustees of the grant-maintained schools trust.

Mrs. Rumbold: Neither I nor my Ministerial colleagues have held any such meeting. From time to time my right hon. Friend and I have had discussions with the chairman and director of the grant-maintained schools trust.

Mr. Fatchett: To ask the Secretary of State for Education and Science when he first learnt that the grant-maintained schools trust had described itself in its literature as a registered charity; and if his Department took any action to point out the error.

Mrs. Rumbold: The point was brought to my right hon. Friend's attention some weeks after the issue of the document, when he was also informed that the grant-maintained schools trust was itself taking steps to correct the error.

Information Technology

Mr. Shersby: To ask the Secretary of State for Education and Science if he will seek to amend the education support grant guidelines governing information technology in schools to permit local education authorities freedom to purchase information technology equipment of their choice without restriction on the country of origin of the manufacturers.

Mr. Butcher: The guidelines contain no such restriction.

Badgers

Mr. Ron Davies: To ask the Secretary of State for Education and Science what research his Department is currently funding into the development of a vaccine against bovine tuberculosis in badgers.

Mr. Jackson: This Department is not currently funding any such research.

Child Sexual Abuse

Mr. Allen: To ask the Secretary of State for Education and Science what Government-funded research by the Economic and Social Research Council into the sexual abuse of children *(a)* has taken place since 1979, *(b)* is currently taking place and *(c)* is under consideration, giving the cost of each project listed.

Mr. Jackson: Since 1979 the Economic and Social Research Council has provided funds from its grant-in-aid in support of the following research projects relating to child sexual abuse:

1 January 1982 to 31 December 1983: £23,130 for a project entitled "The Social Sensitivity of Abused Children and Their Mothers", under the direction of Dr. C. E. Davies and Miss R. M. Calam, department of psychology, Manchester university.

1 April 1985 to 31 March 1987: £11,620 for a project entitled "A Social Anthropological Study of Cases of Child Sex Abuse in Britain", under the direction of Professor J. S. La fontaine, institute of child health, London university.

1 December 1988 to 30 November 1990: £49,490 for a project entitled "Child Sex Abuse", under the direction of Dr. N. G. Fielding and Ms. J. Tunstall, department of sociology, university of Surrey. [In progress].

1 January 1989 to 31 December 1990: £44,842 for a project entitled "The Effect of Social Worker/Family Relationships on Child Abuse Case Outcomes", under the direction of Dr. T. K. Pitcairn, department of social policy and social work, Edinburgh university. [In progress].

A further grant of £43,000 has recently been awarded to Dr. L. Kelly, polytechnic of north London, for a 20-month project to begin later this year, entitled "The Prevalence of Child Abuse in the UK". The council is giving consideration to the possibility of a new research initiative in this area.

Teachers (Statistics)

Sir Michael McNair-Wilson: To ask the Secretary of State for Education and Science how many teachers are employed in schools in the state sector; and if he will break the figures down according to age and sex.

Mr. Butcher: The total number of teachers and instructors employed in the maintained nursery, primary and secondary schools sector in England in January 1988 (the latest date for which figues are available) was 425·5 thousand, including those employed part-time or on an occasional basis. Their total full-time equivalent was 401·5 thousand.

More detailed information by age and sex on the breakdown of teachers is available only in relation to qualified teachers in full-time regular service and at an earlier date (March 1986). The figures (in thousands) are:

	Men	*Women*	*Men and women*
Under 30	17·0	41·8	58·7
30-34	27·9	35·6	63·5
35-39	37·3	39·6	76·9
40-44	23·7	33·5	57·2
45-49	18·4	32·9	51·3
50-54	14·0	26·8	40·8
55 or over	11·7	16·8	28·6
All ages	150·0	226·9	376·9

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Education and Science what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Butcher: This Department spent £438,127 on computer and management consultancies in 1988. Contracts awarded in that year were as follows:

Consultant	*Assignment*
Logica Ltd.	Technical study in connection with the Department's education information strategy
Logica Ltd.	Review of teacher information needs
Peat, Marwick McLintock	Study of requirements for an integrated vote and management accounting system
CMG	Specification of needs for the Department's core resource information system
BIS Applied Systems	Communications strategy for HMI
FI Group	Study of ORACLE implementation
Ernst Whinney	Management system for HMI travelling and subsistence
ITS Ltd.	Training review
Coopers and Lybrand	Study of holding board models for the ABRC
Coopers and Lybrand	Management framework for the control of information systems projects
Deloitte Haskins and Sells	Advice on computer accounting systems for the Department
Deloitte Haskins and Sells	Financial management advice and assistance to the University Grants Committee (UGC)
Loughborough Consultants Ltd.	Research selectivity project for the UGC
City University	Financial services for the UGC
Royal Society	Analysis of the earth science review for the UGC

Over-16s

Mr. Steinberg: To ask the Secretary of State for Education and Science what percentage of young persons in *(a)* the United Kingdom and *(b)* Durham continue in formal education beyond their 16th year.

Mr. Jackson: The available information is given in the table.

Participation in education, 1986-87

	Percentage of population			
	Age 16		*Age 17*	
	full-time	*part-time day*	*full-time*	*part-time day*
United Kingdom[1]	50	15	32	12
Durham[2]	39	15	26	14

[1] Home students only.
[2] Excludes independent schools and private further education establishments.

Higher Education

Mr. Steinberg: To ask the Secretary of State for Education and Science what percentage of young persons in *(a)* the United Kingdom and *(b)* Durham attend full-time higher education.

Mr. Jackson: The available data are listed below. The percentages are based on the numbers of students in 1986-87 who received a new full-value award from an LEA. Comparable figures are not available for the United Kingdom.

New full-value awards[1] to students as a percentage[2] of 18 to 19-year-old population: 1986-87

	Per cent.
Durham LEA	14·9
English and Welsh LEAs	21·3

[1] Includes awards made to students attending universities, polytechnics and other colleges.
[2] The percentage is based on the number of new award holders as a proportion of the relevant single year age group; this was calculated by adding half of all 18-year-olds to half of all 19-year-olds.

Mr. Steinberg: To ask the Secretary of State for Education and Science what plans he has to encourage more students to enter full-time higher education.

Mr. Jackson: We already have record participation in all forms of higher education. The Government's policies for better schools and greater flexibility in further and higher education will build on this, helping to offset the effects of the substantial decline in the young entrant age group.

Students and Academic Staff

Mr. Galbraith: To ask the Secretary of State for Education and Science (1) how many full-time students, undergraduates and post-graduates there were at universities studying *(a)* arts, *(b)* business, *(c)* science and *(d)* engineering for the years 1975, 1980, 1985 and 1988;

(2) how many full-time academic staff were employed by universities for art, business, science and engineering for the years 1975, 1980, 1985 and 1988.

Mr. Jackson: The information is shown in the table:

Full-time equivalent student load and full-time academic staff, in universities
Great Britain

	Academic year beginning in			
	1975[1,2]	*1980*[1]	*1985*	*1987*[3]
Full-time equivalent student load				
Total of which	272,865	311,985	307,741	318,496
Arts	128,897	146,367	129,669	135,569
Business	6,051	7,720	14,237	15,715
Science	91,376	102,224	106,110	108,083
Engineering	28,072	34,267	35,949	37,379
Other[5]	18,469	21,407	21,776	21,750
Full-time academic staff[4]				
Total of which	31,094	42,478	43,435	45,348
Arts	12,199	14,620	12,702	12,633
Business	576	852	1,275	1,395
Science	11,495	15,964	16,642	17,447
Engineering	3,480	5,042	5,731	6,058
Other[5]	3,344	6,000	7,085	7,815

[1] Information for 1975 and 1980 is based on subject group of academic department that for later years is based on cost centres.
[2] Information for academic staff in 1975 are full-time staff paid directly from university funds.
[3] Provisional.
[4] Excluding a small number of staff in adult education departments, libraries and museums. In 1987-88 these numbered 530.
[5] Clinical medicine, dentistry and veterinary science.

Licensed Teachers

Mr. Simon Hughes: To ask the Secretary of State for Education and Science (1) if he will make a statement on his policy on providing financial support to local education authorities in *(a)* 1989-90 and *(b)* 1990-91 in connection with his proposals to introduce licensed teachers; whether he has yet held any discussions about financial support arrangements for these proposals; and if he will make a statement;

(2) if he will describe the expenditure consequences of his present proposals to introduce licensed teachers, including an illustrative cost of training for one such teacher; and if he will make a statement.

Mrs. Rumbold: The cost of providing training for licensed teachers will vary considerably according to the previous experience and training needs of the individual concerned. The costs of such training will be eligible for support under the local education authority training grants scheme.

Pensions (Abatement Provisions)

Mr. Win Griffiths: To ask the Secretary of State for Education and Science, pursuant to his answer to the hon. Member for Bridgend of 15 March, *Official Report*, column *223*, what was the total number of notifications from teachers received by the Paymaster General's Office in the year ended 31 March 1988 concerning re-employment after retirement; in what circumstances individual cases among this total number were considered under the abatement provisions; and if he will make a statement.

Mr. Butcher: The Paymaster General's Office does not keep the detailed information requested but I understand that inquiries are received from some 2,000 teachers each year about re-employment after retirement. Individual cases are considered under the abatement provisions when the employment is of the kind to which the abatement provisions can apply and the income from it approaches the earnings margin.

Mr. Win Griffiths: To ask the Secretary of State for Education and Science, pursuant to his answer to the hon. Member for Bridgend of 15 March, *Official Report*, column *223*, whether the current review of the policy of abatement is taking account of the problems of teacher shortages identified by his Department; when he expects this review to reach a conclusion in relation to teachers; and if he will make a statement.

Mr. Butcher: The review will take account of factors relating to recruitment and retention in all of the main public services including education. The review is expected to be completed this summer.

Voluntary Youth Workers

Ms. Walley: To ask the Secretary of State for Education and Science if he will reinstate eligibility for voluntary youth workers under the local authority training grant scheme.

Mr. Butcher: The eligibility of these workers is under review.

London Residuary Body

Mr. Tony Banks: To ask the Secretary of State for Education and Science what representations he has received from the London residuary body in respect of the draft Education (Reorganisation in Inner London) (Compensation) Regulations 1989; and if he will make a statement.

Mrs. Rumbold: Letters have been received from the chairman of the board of the London residuary body and from the LRB's director of personnel. These acknowledge that the terms proposed under the draft regulations are very similar to those available under the Local Government Reorganisation (Compensation) Regulations 1986, but make a number of suggestions for the most part reflecting the experience of the board in operating the 1986 regulations.

DEFENCE

Military Equipment (Export)

Mr. Nellist: To ask the Secretary of State for Defence what provision is made by his Department for measuring and regulating the export of military equipment from the

United Kingdom through collaborative projects; what provision is made for measuring and regulating the re-export of this equipment to third countries; and if he will make a statement.

Mr. Sainsbury: Exports from the United Kingdom of goods controlled under the Exports of Goods (Control) Order 1987, as amended, are subject to export licensing in accordance with procedures operated by the Department of Trade and Industry.

There are no special provisions for collaborative projects; the same export requirements and procedures apply to them as to any other export of defence equipment.

In general, the export or re-export of collaborative equipment to third countries calls for the agreement of all the collaborative partners although each project has its own memorandum of understanding and procedures differ slightly between them.

Headquarters Contracts

Mr. Nellist: To ask the Secretary of State for Defence if he will list in the *Official Report* the precise amounts paid to each of the 10 contractors which received the largest shares of headquarters contracts awarded by his Department in each of the five years to 31 March 1988.

Mr. Sainsbury: The 10 contractors receiving the most payment in respect of headquarters contracts in the five years to 31 March 1988 were as follows:

	£ million
1983-84	
1. The General Electric Co plc	690
2. British Aerospace plc (Dynamics)	615
3. Rolls Royce Ltd	485
4. British Shipbuilders	400
5. The Plessey Co plc	365
6. Royal Ordnance Factories	340
7. British Aerospace plc (Aircraft)	340
8. Ferranti plc	180
9. The British Petroleum Co plc	170
10. Westland plc	155
1984-85	
1. The General Electric Co plc	805
2. British Aerospace plc (Dynamics)	685
3. British Shipbuilders	535
4. The Plessey Co plc	415
5. Royal Ordnance plc	410
6. Rolls Royce Ltd	410
7. British Aerospace plc (Aircraft)	320
8. Ferranti plc	215
9. Esso UK plc	205
10. British Petroleum Co plc	175
1985-86	
1. The General Electric Co plc	800
2. British Aerospace plc (Dynamics)	715
3. British Shipbuilders	590
4. The Plessey Co plc	440
5. Rolls Royce Ltd	435
6. Royal Ordnance plc	370
7. British Aerospace plc (Aircraft)	300
8. Ferranti plc	225
9. Westland plc	180
10. Hunting Associated Industries plc	160
1986-87	
1. The General Electric Co plc	850
2. British Aerospace plc (Dynamics)	610
3. Rolls Royce Ltd	425
4. The Plessey Co plc	365
5. Vickers Shipbuilders and Engineering	345
6. British Aerospace plc (Aircraft)	320
7. Royal Ordnance plc	245
8. Hunting Associated Industries plc	205
9. Ferranti plc	200
10. Thorn EMI plc	155
1987-88	
1. The General Electric Co plc	1,035
2. British Aerospace plc (Dynamics)	545
3. Vickers Shipbuilders and Engineering Ltd	465
4. Rolls Royce plc	420
5. British Aerospace plc (Aircraft)	330
6. The Plessey Co plc	305
7. Royal Ordnance plc	225
8. Devonport Management Ltd	225
9. Ferranti plc	200
10. Hunting Associated Industries plc	195

Contractors

Mr. Nellist: To ask the Secretary of State for Defence if he will list in the *Official Report* the precise amounts paid to each of the following contractors by his Department in the year ended 31 March 1988: *(a)* J. S. Chinn & Co. Ltd., *(b)* Abbey Panels Ltd., *(c)* Self Changing Gears Ltd., *(d)* Noel Penny Turbines Ltd. *(e)* National Plastics Ltd., *(f)* Commercial Hydraulics Keelavite Ltd., *(g)* Coventry Motor & Sundries Ltd. and *(h)* Armstrong Equipment plc.

Mr. Sainsbury: The payments made to each of these companies in the year ended 31 March 1988 in respect of headquarters contracts were as follows:

1987	£ million
J. S. Chinn & Co. Ltd.	0·06
Self Changing Gears Ltd.	0.40
Noel Penny Turbines Ltd.	0·04
National Plastics Ltd.	5·71
Commercial Hydraulics Keelavite	2·03
Coventry Motor & Sundries Ltd.	0·16

We have no record of any headquarters contracts having been placed with either Abbey Panels Ltd. or Armstrong Equipment plc.

Missiles

Mrs. Mahon: To ask the Secretary of State for Defence if he will list the current purchase costs of *(a)* one Exocet MM38 missile and *(b)* one Trident 2D5 missile.

Mr. Sainsbury: It is no longer our practice to publish unit production costs for equipment purchased by the Ministry of Defence.

Submarines

Mr. Foulkes: To ask the Secretary of State for Defence what claims for damages caused to boats by submarines are currently being considered; what total sum is involved; and what sums have been paid for damages in each year since 1979 and for the current year to date.

Mr. Archie Hamilton: The Ministry of Defence deals on a legal liability basis with claims for compensation arising from incidents involving Royal Navy submarines. In each of the last 10 years, the following sums have been paid out as compensation:

Year	£
1979	750
1980	Nil
1981	Nil
1982	Nil
1983	2,800
1984	157,850
1985	236,100
1986	15,000
1987	100,400
1988	Nil

Four claims are currently being considered, the details of which are regarded as private between the claimants and the Department.

Vehicles

Mr. Flynn: To ask the Secretary of State for Defence if he will list the current purchase costs of *(a)* one FV432 armoured personnel carrier and *(b)* one FV18067 ambulance (Rover ·75 tonne).

Mr. Sainsbury: It is no longer our practice to publish unit production costs. No recent purchases have, however, been made of either of these vehicles.

Multiple-launch Rocket System

Mr. Flynn: To ask the Secretary of State for Defence if he will list the current purchase cost of one M270 multiple-launch rocket system.

Mr. Sainsbury: It is no longer our practice to publish unit production costs for equipment purchased by the Ministry of Defence.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Defence what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Sainsbury: The Ministry of Defence is estimated to spend £8·5 million in the financial year 1988-89 on management and computer consultancy contracts. Details of the management consultancy contracts are listed. Contractual responsibility for computer consultancy contracts has been transferred from the Ministry of Defence to the Central Computer and Telecommunications Agency. CCTA does not currently maintain separate details of consultancy contracts, which, in many cases, form part of wider computer procurement and support contracts. Details of individual contracts could therefore be provided only at disproportionate cost.

Management consultancy contracts

Firm	Subject of assignment
Arthur Anderson & Co	Support to the RAF TOPMIS Team
W. S. Atkins & Partners	Support to the PE TOPMIS Team
W. S. Atkins & Partners	Assistance for the Defence Works Planning Team
Charles Barker plc	Implementation of the Internal Communications Strategy for DGA(N)
Deloitte Haskins & Sells	Study into Spares Procurement
Deloitte Haskins & Sells	Study into Spares Procurement
Deloitte Haskins & Sells	Support to the Army TOPMIS Team
Deloitte Haskins & Sells	Follow on Study into Initial Provisioning

United States Competitive Strategies Doctrine

Mr. Martyn Jones: To ask the Secretary of State for Defence what discussions he has had with his United States counterparts regarding the new United States competitive strategies doctrine.

Mr. Archie Hamilton: My right hon. Friend has not recently discussed the subject of competitive strategies with his US counterparts.

Private Security Firms

Mr. Livingstone: To ask the Secretary of State for Defence pursuant to the answer to the Member for Brent, East of 7 March, *Official Report*, column *517* *(a)* which private security firms have been used by his Department, *(b)* where they have been deployed and *(c)* at what cost to his Department in each year from 1979 to the current date.

Mr. Sainsbury: The following private companies have been employed by the Department to provide security guarding services:

Airwork Ltd
Burns International Security Services (UK) Ltd
Care Security Services Ltd.
Centuryan Security Ltd
Chubb Wardens Ltd
Custodian Security Guards Ltd
Medway (Chatham) Dock Co Ltd
Shorrock Guards Ltd (Formerly Pritchard Security Services Ltd)
RCO Contract Services Ltd
Reliance Security Services Ltd
Royal British Legion Attendants Co Ltd
Securiguard Services Ltd
Securi-Guard (SW)
Securicor Ltd
SERCO Ltd
Thorn EMI Electronics Ltd
UK Security Ltd

These firms have been employed at more than 30 establishments but it would not be in the interests of security to reveal their locations.

In addition, I refer the hon. Member to the answer that I gave to the hon. Member for Knowsley, South (Mr. Hughes) on 23 March at column *761*.

Northern Ireland (Border Crossings)

Mr. Livingstone: To ask the Secretary of State for Defence pursuant to his answer to the hon. Member for Brent, East of 10 January, *Official Report*, column *541*, how many service personnel have *(a)* breached regulations governing off-duty soldiers crossing into the Republic of Ireland and *(b)* been dealt with by the service authorities, in each year from 1972 to the current date.

Mr. Archie Hamilton: The information is not available in the form requested, and could be provided only at disproportionate cost.

Contractors

Mr. Livingstone: To ask the Secretary of State for Defence, pursuant to his answer to the hon. Member for Brent, East of 1 February, *Official Report*, column *244*, how the prior agreement of his Department is sought by contractors wishing to employ persons with access to classified information.

Mr. Sainsbury: It would not be appropriate to give details.

Economic League

Mr. Livingstone: To ask the Secretary of State for Defence, pursuant to his answer to the hon. Member for Brent, East of 1 February, *Official Report*, column *244*, whether any speakers have been provided by the Economic League for training courses for military personnel in each year from 1979 to the current date.

Mr. Neubert: No record of guest speakers is held centrally and there is no requirement for permanent records to be maintained locally. However, inquiries have been made at staff colleges and other training establishments where guest speakers are regularly invited. The staff of those colleges and establishments have been unable to identify any invitations to the Economic League to provide speakers for their courses.

Army Operations (Forged Materials)

Mr. Livingstone: To ask the Secretary of State for Defence what is his policy towards the use of forged materials in Army operations at home and abroad.

Mr. Archie Hamilton: It is not the practice to comment on operational matters.

Keenie Meenie Services

Mr. Livingstone: To ask the Secretary of State for Defence if he will publish in the *Official Report* the text of the letter from the Parliamentary Under-Secretary of State, the hon. Member for Hove (Mr. Sainsbury) to the hon. Member for Brent, East on 9 February about Keenie Meenie Services and related matters.

Mr. Sainsbury: The letter was sent openly and is therefore in the public domain; the text is as follows:

Thank you for your letter of 23 January concerning my written reply to you of 15 December (Col. 684 of the Official Record).

In that reply I stated that I was not aware of any advertisements having been procured or placed in the Ministry of Defence publications by KMS and that remains the case.

The extracts you provided with your letter were from a brochure which was produced as a commercial venture by International Military Services Ltd. (IMS) in 1985. Although wholly owned by MOD, IMS is a private Limited company incorporated under the Companies Act and is a distinct and separate entity from MOD. In contracting for Defence Exports it adheres to Government policies and to guidelines issued by the MOD. But within these limitations it is free to pursue business and to take initiatives in exactly the same way as any other commercial company. It can be engaged by other private companies and on occasions by HMG in connection with contracts for the export of British defence equipment and associated services in the commercial environment.

The brochure concerned was entitled 'Internal Security —Counter Insurgency'. Entries were paid for by various advertisers as a means of publicising the services they offered. Presumably IMS at the time regarded the publication as a viable commercial venture but I understand that it was not a regular publication and has not reappeared since 1985. This was a matter for the commercial judgment of IMS and there is no suggestion that they in any way transgressed the guidelines under which they operate.

You also asked about the nature of the services provided by IMS to overseas armed forces and paramilitary organisations. This can and does cover a wide range of activities but it can be defined in general terms and in the

words of the pamphlet itself as the supply of military equipment and the provision of "associated support such as the installation, commissioning and maintenance of equipment and the training of personnel". I must emphasise that IMS works within the constraints of Government policies which in this field, as you know, take account of a wide range of political, security and humanitarian conditions.

MOD was not and did not expect to be involved in either the publication of the brochure by IMS or the placing of the KMS advertisement and there is therefore no question of correcting or amending the Official Record of my answer of 15 December 1988.

Guns

Mr. Corbyn: To ask the Secretary of State for Defence if he will list the current purchase costs of *(a)* one 9mm L34A1 sub machine gun and 34 round magazine, *(b)* one 5·56mm individual weapon L85 (Endeavour) and 30-round magazine and *(c)* one 12 bore, L32A1 automatic shotgun and five rounds.

Mr. Sainsbury: It is no longer our practice to publish unit production costs.

ENVIRONMENT

Government Cars

Mr. Vaz: To ask the Secretary of State for the Environment how many gallons of petrol were consumed for 1987 and 1988 by cars in the Government car pool.

Mr. Chope: Figures for the number of gallons of fuel consumed are not readily available and could be obtained only at disproportionate cost. But in 1987 the Government car service spent £190,317 on petrol. In 1988 that figure was £183,008 (both figures are exclusive of VAT).

Mr. Vaz: To ask the Secretary of State for the Environment how many cars there are in the Government car pool; and how many of those use unleaded petrol.

Mr. Chope: The Government car service operate 181 vehicles. By the middle of this year we intend to have 128 vehicles capable of using unleaded petrol. At present 39 have this capability.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for the Environment what was the total amount spent by the Property Services Agency in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Property Services Agency in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Ridley: Expenditure by the Property Services Agency, on management and computer consultancy contracts in 1988, excluding hardware and software purchases, was £6,462,582.

The list of each management or computer consultancy contract awarded by the Property Services Agency in 1988, giving the name of each consultancy firm and the subject of the assignment, is as follows:

Consultancy Firm	*Subject of Assignment*
Management consultancy	
P A Computers and Telecommunications Ltd	To carry out an analysis of PSA financial and management accounting processes as they would be performed under a full commercial accounting regime.
P A Computers and Telecommunications Ltd	To examine the impact of existing IT systems relating to Directly Employed Labour (DEL) performance
Price Waterhouse	Business and Finance Development
Samuel Montagu and Co Ltd	Advice on effecting the sale of the Crown Suppliers
Write Solutions Ltd	Assistance with development of the marketing strategy for QEII Conference Centre
Michael Rines Associates	Public Relations Support for QEII Conference Centre
MCP Management Consultants	Software support
Farnfield Marketing Consultants Ltd	Establishing the sales potential of publications produced by PSA's Director General of Design Services
Duffy, Eley Giffone and Worthington	Impact of New Technology on Accommodation Standards
Peat Marwick McLintock	Assessment of tenders for contracting out management of maintenance and minor works activities
BIS Applied Systems Ltd	Support in the development of a Quality Support Framework
BIS Applied Systems Ltd	Support in the production of a statement of requirement for PSA's Regional Computing Standards
BIS Applied Systems Ltd	Support in the development of a Configuration Management Framework
Dialatron Business Systems Ltd	Evaluation, implementation and development of facilities on text processing equipment
Systems Designers plc	Software support
Oracle Corporation UK Ltd	Software support
Peat Marwick McLintock	Introduction of Low Cost 2-dimensional computer aided draughting (CAD) system
Dr Stanley Port	Support for General Draughting Management Study
ICL (UK) Ltd	Support for computer communications
Norbec (Microfilm) Ltd	Support for installation of microfilming system
BIS Applied Systems Ltd	Assistance in the review, development and evaluation of IT standards
ICL (UK) Ltd	Software support
ICL (UK) Ltd	Technical support to link computer operating systems
Computer Consultancy	
Applied Network Technology Ltd	Transfer of priority data from an Apple microcomputer to an IBM PC
P A Computers and Telecommunications Ltd	Evaluation of PC-based software for project management requirements
Peter Downes Ltd	To develop proposals for a comprehensive register of computing, telecoms and office machinery held by PSA

Consultancy Firm	Subject of Assignment
John Evans & Associates Ltd	Implementation of revised methods for planning and control of Directly Employed Labour
CAP Industry Ltd (SEMA Group)	Public Health Engineering Computerisation
Prime Computer (UK) Ltd	Software support
P A Computers and Telecommunications Ltd	Support to the planning of the Infrastructure Computer Services Project
BIS Applied Systems Ltd	Support in the evaluation of security requirements of PSA's Strategic Infrastructure
BIS Applied Systems Ltd	Support in the evaluation of the security requirements of PSA's Interim Systems and Central Hastings Processes
K P G Computer Support Services Ltd	Software support
Peat Marwick McLintock	Professional Computing Strategy Study
Metascybe Systems Ltd	Enhancement to financial control computer system
Digital Equipment Co. Ltd	Technical support to link computer operating systems
Digital Equipment Co. Ltd	Assistance in the procurement of IT equipment
ICL (UK) Ltd	Audit of accounting systems
P A Computers and Telecommunications Ltd	Evaluation of short-listed suppliers for computing equipment
ICL (UK) Ltd	Specialist support for accounting (LAFIS) software package

Sports Clubs

Dr. Cunningham: To ask the Secretary of State for the Environment what consultations he has had with sporting associations and local authorities relating to mandatory and discretionary relief from non-domestic rates to sports clubs; and what guidance he has issued.

Mr. Ridley: My Department is issuing today a consultation letter on the content of proposed regulations about the period for which discretionary rate relief may be granted and the notice which must be given if relief is varied or terminated. I am placing a copy of the letter in the Library.

Also the Department has discussed with the local authority associations and with the Sports Council what guidance should be given to local authorities on the use of their powers to grant discretionary relief. We plan to consult separately on this subject.

Rating Reform

Dr. Cunningham: To ask the Secretary of State for the Environment what were the initial one-off costs of art-work and creative design of "You and the Community Charge: Exemptions" published on 22 March; what further subsidiary leaflets are planned on aspects of the community charge; when these will be published; and what is the total budgetary provision in his Department's estimates for these publications.

Mr. Ridley: The initial design and art-work costs of the exemptions leaflet were £2,200.

Further leaflets are in preparation on rebates—"The Collective Community Charge", "Students and the Community Charge," "Appeals and Second Homes." These will be published variously over the next few weeks. The total estimated cost of all these publications, including that on exemptions, is approximately £113,100.

Water

Dr. Cunningham: To ask the Secretary of State for the Environment if he will state for each water authority what percentage of the projected necessary funding for improvements in standards of *(a)* drinking water quality, *(b)* sewage treatment and disposal and *(c)* bathing water quality is contained within existing capital programmes.

Mr. Ridley: The information requested by the hon. Member is not available. I refer the hon. Member to the answer given to the hon. Member for Dunfermline, East (Mr. Brown) by the Parliamentary Under-Secretary of State, my hon. Friend the Member for Lewisham, East (Mr. Moynihan) on 25 January 1989.

Dr. Cunningham: To ask the Secretary of State for the Environment if he will provide details for each water authority of the funding allocated to improvements in *(a)* drinking water quality, *(b)* sewage treatment and disposal and *(c)* bathing water quality standards through existing capital programmes for each of the next 10 years.

Mr. Ridley: The information requested by the hon. Member is not available.

Concierge Systems (Tower Blocks)

Mr. Soley: To ask the Secretary of State for the Environment whether he will make funds available for a concierge system on the two remaining tower blocks on Edward Woods estate in Shepherds Bush.

Mr. Trippier *[holding answer 23 March 1989]:* The estate action programme has already provided resources for a pilot scheme at Stebbing house involving a concierge system. The council's outline bid for further resources for similar facilities at the two other tower blocks on the estate is under consideration.

Mr. Soley: To ask the Secretary of State for Environment what assessment he has made of the extent to which the existence of concierge systems on tower blocks is a useful deterrent to crime.

Mr. Trippier *[holding answer 23 March 1989]:* The report "A Better Reception", published by the Department of the Environment in March last year pointed to evidence that concierge schemes do deter crime as well as making blocks of flats more pleasant places in which to live. A further study of concierge and other schemes in local authority high rise blocks of flats is in progress.

Housing (Transfers)

Mr. Corbyn: To ask the Secretary of State for the Environment what advice be given to the London borough of Redbridge concerning the choice to be given to tenants in relation to estate transfers.

Mr. Trippier *[holding answer 23 March 1989]:* It is for the council to decide what proposal it wishes to put before its tenants.

Mr. Corbyn: To ask the Secretary of State for Environment whether he has had any meetings with the London borough of Redbridge to discuss its proposed transfer of housing.

Mr. Trippier *[holding answer 23 March 1989]:* Council officers had a meeting with officials of the Department on 3317 January 1989 to discuss in general terms the Department's guidelines on voluntary transfers. There have been no meetings since the Department was sent on 9 March a copy of the report approved by the council's housing services committee on 1 March.

London Docklands

Mr. Leighton: To ask the Secretary of State for the Environment how much money the London Docklands development corporation has spent on social regeneration in each year of its existence; and what projects it has initiated or supported.

Mr. Trippier: The information is as follows:

All London Docklands development corporation's expenditure on regeneration should improve local social conditions directly or indirectly. It is not practicable to identify a clear "social" category or to list the projects. Subject to that the following table gives a indication of expenditure in this area.

£ thousands

	1981-82 1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*

TOTALS	2,915	6,362	4,456	3,815	5,785	6,112

Air Pollution

Mr. Alan Meale: To ask the Secretary of State for the Environment what action he intends to take to control air pollution from *(a)* National Health Service incinerators and boiler plants and *(b)* other Crown properties.

Mrs. Virginia Bottomley: The Clean Air Acts already provide statutory contols over atmospheric emissions from National Health Service incinerators and boilers and other combustion processes on Crown premises. Where there is potential for significant air pollution Crown premises are controlled like any other industrial site by the national pollution inspectorates. Regulations due to come into force on 31 March will bring National Health Service incinerators with an hourly capacity of more than one tonne under their control. A consultation paper in December 1988 proposed further amendment to the schedule of processes subject to prior approval by the national inspectorates and the introduction of a parallel schedule for local authority control. A copy is in the Library of the House.

Waste Management '89

Dr. Thomas: To ask the Secretary of State for the Environment what departmental representation was made, and what papers from the United Kingdom were presented, at the Waste Management '89 conference held in Tuscon, Arizona, the United States of America, between 26 February and 2 March.

Mrs. Virginia Bottomley: The Department was not represented at this conference.

Hinckley C (Inquiry)

Dr. Thomas: To ask the Secretary of State for the Environment what departmental resources have been committed to the Hinckley C public inquiry in terms of official presence, the monitoring of evidence and the production of evidence.

Mrs. Virginia Bottomley: Departmental officials gave evidence at the Hinckley Point C public inquiry on 9 and 10 February under topic 2 and expect to give evidence under topics 3 and 4. The Department has submitted three proofs of evidence to the inquiry. All evidence submitted to the inquiry is monitored by Her Majesty's inspectorate of pollution.

Radioactive Waste

Dr. Thomas: To ask the Secretary of State for the Environment when he received the proposals from the Nuclear Industry Radioactive Waste Executive for low and intermediate level radioactive waste disposal repositories; and when he expects to make an announcement on the issue.

Mrs. Virginia Bottomley: The Government received Nirex's report and recommendations on 28 February. My right hon. Friend the Secretary of State announced the Government's response in the answer he gave on 21 March to my hon. Friend the Member for Banbury (Mr. Baldry) at column *506*.

Urban Development Grants

Mr. George Howarth: To ask the Secretary of State for the Environment what was the value of urban development grants by metropolitan district council area in the north-west of England for each year since 1979 at constant prices.

Mr. Trippier: Urban development grant was launched in 1982. The table shows the amount of grant in schemes approved in each year in each metropolitan district council area, adjusted to 1988-89 prices.

Value of approved urban development grant at 1988-89 prices in £ millions

	1983-84	1984-85	1985-86	1986-87	1987-88	1988-89	Total

Water Quality

Mr. Redmond: To ask the Secretary of State for the Environment if he will give since 1979, and by division within the Severn-Trent water authority, the number of breaches of European directives for mercury and cadmium in river sediment, in addition to breaches for the pesticide lindane; and what action he has taken to rectify this.

Mr. Moynihan: There have been no known breaches of the European directives for mercury, cadmium and lindane within the Severn-Trent water authority since the relevant directives came into effect in 1986. Nevertheless, steps are being taken to reduce further inputs of these substances in line with the undertakings given at the 1987 North sea conference.

Mr. Redmond: To ask the Secretary of State for the Environment if he will list information available to him, by division, within the Severn-Trent water authority, as to the number of miles of prime, game and course fishing rivers which have been unsuitable for fishing since 1979.

Mr. Moynihan: Since 1980, the Severn-Trent water authority has designated around 2000 km of rivers and canals for the purposes of EEC Directive 78/659/EEC on the quality of freshwater needed to support fish life. These waters are classified as either salmonoid (game fisheries) or cyprinid (coarse fisheries).

I understand that no stretches have become unsuitable for fishing since 1979.

Rivers (Grading)

Mr. Redmond: To ask the Secretary of State for the Environment if he will list by rivers the classification grades of rivers by each division within the Severn-Trent water authority.

Mr. Moynihan: The latest available information is in the form of maps showing the classification of all rivers included in the 1985 river quality survey of England and Wales. This has been published for each water authority, including Severn-Trent. Copies are available in the Library of the House.

Water Authorities (Performance Targets)

Mr. Redmond: To ask the Secretary of State for t Environment if he will make a statement on the criteria the performance targets set for each chairman of t national water authorities.

Mr. Moynihan: Targets set and achievement again them, are published each year in water authority's annu report and accounts. Copies are available in the Library the House. In setting these targets the Government tal account of past performance, the characteristics of t region within which the authority operates, and a assessment of the scope for improvement in performanc

Severn-Trent Water Authority (Chairman)

Mr. Redmond: To ask the Secretary of State for th Environment if he will list for the past five years for th chairman of Severn-Trent water authority *(a)* the annu bonus he received based on the performance targets s him and *(b)* his basic salary.

Mr. Moynihan: In response to the first part of the hon Member's question, I refer him to the answer I gave to th hon. Member for Derbyshire, North-East (Mr. Barnes) o 28 February at columns *109-110*.

The basic salary of the chairman of the Severn-Tren water authority in each of the past five years has been a follows:

Year (1 July to 30 June)	Salary (£)
1984-85	33,600
1985-86	35,480
1986-87	37,608
1987-88	41,604
1988-89	45,600

Drought

Mr. Redmond: To ask the Secretary of State for the Environment what are the present levels of water reserves in the Severn-Trent water authority; have they applied for any drought orders; what are the risks of drought conditions arising during the coming months of 1989; and if he will list by location and area division the areas most susceptible to drought conditions.

Mr. Moynihan: Reservoir storage levels are now generally satisfactory throughout the Severn-Trent water authority area. Groundwater resources are also adequate except for some spring sources in Gloucestershire. The authority has not applied for any drought orders and foresees no difficulty in meeting demand unless a dry summer occurs. In that event, the east midlands will continue to be vulnerable pending completion of Carsington reservoir due in 1933. Water supplies in limited areas of Gloucestershire could also be affected by drought conditions this summer.

South Yorkshire (Strategic Guidance)

Mr. Redmond: To ask the Secretary of State for the Environment what strategic guidance exists for South Yorkshire; to whom this has been made available; and if he will make a statement.

Mr. Chope: No strategic guidance exists for South Yorkshire at the present time. I shall be issuing draft strategic guidance in the near future and will welcome the views of the general public, local authorities and other interested organisations.

Labour Statistics

Mr. Goodlad: To ask the Secretary of State for the Environment what has been the change in the level of employment in each of the enterprise zones in the north-west in each of the past three years.

Mr. Trippier: The table below shows how employment levels changed between May 1983 and December 1986, the latest date for which information is available. Information on employment at October 1987 will be published shortly.

	Employment at May 1983 (a)	*Employment at September 1984 (b)*	*Employment at December 1985 (c)*	*Employment at December 1986 (c)*
Allerdale	—	600	1,400	2,000
North-East Lancashire	—	740	1,900	2,400
Salford/Trafford	3,306	3,100	4,200	5,200
Speke	1,018	800	700	1,200

Sources: (a) Roger Tym and Partners, 1984, monitoring enterprise zones year three report.
(b) Enterprise zone information 1983-84, DOE July 1985.
(c) Department of Employment.

Raleigh Site (Nottingham)

Mr. Brandon-Bravo: To ask the Secretary of State for the Environment (1) if he will list those with whom he has considered the benefits of providing a city grant to assist the redevelopment of the Raleigh site in the inner city area of Nottingham; and whether the case for facilitating an export-led expansion of the company's activities has been taken into account;

(2) if, when considering the city grant application from Raleigh Industries, Nottingham, he will make it his policy to take into account both the normal employment criteria and its overall impact on the relocation and development of this site.

Mr. Trippier: The Department has not received an application in respect of the Raleigh site. If an application is received it will be fully appraised in the usual way, taking into account both the direct employment implications and the wider urban regenerative impact on inner Nottingham.

Sewage Works

Mr. Redmond: To ask the Secretary of State for the Environment (1) if he will list the sewage works by division within the Severn-Trent water authority which are to be allowed relaxation in breaching the legal limits on effluent set by him; and what is the time scale for this relaxation;

(2) if he will list the water authorities who have replied to his document dated 1 February, asking them to speed up applications for relaxation of pollution controls on discharges from sewage works; if he will list the locations of each application so far received; and if he will make a statement.

Mr. Moynihan: The Severn-Trent water authority, and the other water authorities have been invited to apply for time-limited variations to discharge consents for those sewage treatment works where they plan to complete improvement schemes designed to bring these works up to standard by March 1992.

In addition, water authorities may also apply for longer-term variations in respect of a limited number of minor works, where it can be demonstrated that investment to meet current consent requirements would produce negligible environmental benefits.

In all cases, Her Majesty's inspectorate of pollution will consider applications on their merits before deciding whether to grant revised consent conditions. Time limits on these temporary variations will normally be imposed to run from approval of the authority's application to the expected commissioning date of the improved works.

The Department and Her Majesty's inspectorate of pollution are in discussion with the water authorities about these applications. When applications are made and consents given, details are entered on the authority's register which may be inspected, free of charge, by anyone at all reasonable hours. Responses to the Department's letter of 1 February were obtained from all water authorities by telephone.

Gipsies

Mr. Redmond: To ask the Secretary of State for the Environment if he will state for the latest date for which he has figures, the numbers of travellers' children of school age within the Doncaster metropolitan borough council area, as detailed in the statistics gathered by his Department's gipsy sites branch; and what were the figures for *(a)* 10 and *(b)* five years ago.

Mr. Trippier: Providing these statistics is a voluntary exercise, and I regret to say that Doncaster has not

provided information on the numbers of travellers' children of school age in its borough since the bi-annual count began in 1979.

Government Buildings (Drinking Water)

Mr. Redmond: To ask the Secretary of State for the Environment if he will list by location all Government buildings where the drinking water supply from the mains is unsuitable for drinking and alternative sources have to be used; what are those sources; and if he will make a statement.

Mr. Chope: I have no information which indicates any cases where the water supplied to Government buildings from water undertakers mains is unsuitable for drinking and alternative sources have to be used.

Sites of Special Scientific Interest

Mr. Redmond: To ask the Secretary of State for the Environment (1) what advice and information, in the form of a code of guidance, is currently available to owners and occupiers of sites of special scientific interest under the provision of section 33 of the Wildlife and Countryside Act 1981; what price is charged for such a code; whether the Nature Conservancy Council issues the code to all owners and occupiers of sites of special scientific interest notified after the passing of the Wildlife and Countryside Act of 1985; and if he will make a statement;

(2), pursuant to his reply of 10 February, to the hon. Member for Don Valley, *Official Report*, column *816*, on how many occasions a revised code of guidance on sites of special scientific interest has been laid before Parliament since the passing of the Wildlife and Countryside Act of 1985; what was the reason for withdrawal of the previous code in each case; and if he will make a statement;

(3), pursuant to his answer of 10 February to the hon. Member for Don Valley, *Official Report*, column *816*, how many items in the current code of guidance on sites of special scientific interest have been superseded by the Wildlife and Countryside Act of 1985; and whether contravention of the current code constitutes a breach of the amended codes.

Mrs. Virginia Bottomley: Section 33 of the Wildlife and Countryside Act 1981 provides for the preparation and issue, subject to parliamentary approval, of a code of guidance for sites of special scientific interest to interested parties and the general public. The original version of the code was published in 1982 and the Nature Conservancy Council supplied copies free of charge to all owners and occupiers notified of SSSIs under the Act.

Amendments to the notification procedures were introduced by the Wildlife and Countryside (Amendment) Act 1985 and the Wildlife and Countryside (Service of Notices) Act 1985. The code of guidance has not been reprinted. A revised version incorporating appropriate amendments is in preparation and will be submitted for approval by Parliament later this year. In the meantime NCC has provided advice to owners and occupiers on initial notifications of an SSSI in the form of its own publication "Sites of Special Scientific Interest".

The code of guidance is advisory; its provisions carry no legal force.

Hadrian's Wall

Mr. Redmond: To ask the Secretary of State for the Environment what plans he has to preserve and restore Hadrian's wall.

Mrs. Virginia Bottomley: Responsibility for Hadrian's wall rests with a number of public and private owners. English Heritage acts on behalf of the Government to ensure that those sections of the wall which it owns are properly conserved. It has also provided grants for conservation work on those stretches of the wall owned by others, including the National Trust. The known parts of the wall are scheduled as ancient monuments so that the Secretary of State decides whether to grant consent on all work affecting the wall. In this he is advised by English Heritage.

Microlight Aircraft

Mr. Colin Shepherd: To ask the Secretary of State for the Environment if it is his intention to bring the use of land for the purpose of taking off and landing of microlight aircraft within the scope of the general development order.

Mr. Chope: The use of land for this purpose is already permitted for up to 28 days in any calendar year by class B of part 4 of schedule 2 to the Town and Country Planning General Development Order 1988.

Churston Golf Club

Mr. Steen: To ask the Secretary of State for the Environment, pursuant to his reply to the hon. Member for South Hams, *Official Report*, 21 March, what further information on the planning appeal with regard to Churston golf club, Torbay, he is waiting for; what are the reasons for his delay in reaching a decision on the appeal; and what factors are required to bring him to a decision.

Mr. Chope: Although pressure of planning business has meant that this appeal has taken longer than I would wish, it is also necessary to consider highway amendments proposed by the developer after the appeal had been lodged. The appeal cannot be determined until interested parties have had an opportunity to comment in writing on the proposed amendments. A decision on the appeal will be issued as quickly as possible when this process has been completed.

Housing Investment Programme

Mr. Patnick: To ask the Secretary of State for the Environment whether he has decided on the additional housing investment programme resources to be made available to local authorities with substantial housing defects obligations.

Mr. Trippier: We have decided to allocate the £15 million of HIP resources to 75 local authorities, which are today being notified individually by my Department's regional controllers. The authorities receiving such allocations are as follows:

Region	*Amount (£)*
Northern	
Newcastle-upon Tyne	100,000

Empty Dwellings

Mr. Allan Roberts: To ask the secretary of state for the environment if he will list each scheme to bring empty housing association dwellings into use for homeless households, where these dwellings were developed with local authority funding but the local authority is unable to fund the necessary major repairs, financed by the Housing Corporation under the initiative announced on 24 March 1988, *Official Report*, columns *191-92;* and if he will state for each scheme *(a)* the number of units of accommodation provided, *(b)* the housing association involved, *(c)* the local authorities with nomination rights to these units, *(d)* the scheme's date of completion and *(e)* the scheme's capital cost.

Mr. Trippier: This information is not held centrally. I have asked the Housing Corporation to supply so much of it as it can provide without disproportionate cost, to the hon. Member direct.

Housing Investment

Mr. Rogers: To ask the Secretary of State for the Environment if he will list at 1989-90 prices his Department's gross provision for local authority housing capital investment for each year since 1980-81, together with an estimate for 1989-90.

Mr. Trippier: The public expenditure surveys have made the following gross provision for local authority housing capital investment.

1989-90 prices[1]

Year	*£ million*
1980-81	[2]3,690
1981-82	[2]3,350
1982-83	3,515
1983-84	3,383
1984-85	3,230
1985-86	2,851
1986-87	3,009
1987-88	3,306
1988-89	[3]3,216
1989-90	[3]3,303

[1] Revalued using the GDP deflator.
[2] The White Paper figures have been converted from survey prices to outturn prices and then converted to 1989-90 outturn prices using the GDP deflator.
[3] Includes local authority lending to housing associations shown under "Central Government" in Cm 288 and 609.

Unused Sites (Thamesdown)

Mr. Simon Coombs: To ask the Secretary of State for the environment if he will list all the unused sites owned by public bodies within the borough of Thamesdown, together with their owners and sizes in hectares as detailed in the land register.

Mr. Trippier: The information about all the sites, grouped by owner, is listed below:

Site name	*Size in hectares*
Thamesdown Borough Council	
Land at Groundwell Farm, Cricklade Road, Swindon	70·82
Land on West Side of Swindon to Highworth Road	44·52
Land South West of Akers Way/South East of Purton Road, Swindon	41·68
Land at Sparcells, Roughmoor and Lower Shaw Farm, Shaw, Swindon	41·58
Land at Home Farm, Highworth	33·19
Land at Wick Farm, Lydiard and Upper Shaw Farm, Shaw, Swindon	12·91
Land at Broome Farm, Swindon	11·74
Land on North East Side of Kite Hill, Wanborough	4·86
Land on South West Side of Kite Hill, Wanborough	2·05
Land at Elm Grove, Shaw, Swindon	1·52
Wiltshire County Council	
Former Moredon Railway Line	15·38
Land at Kingshill, Swindon (Rushey Platt)	9·63
Land at Hughes Street, Swindon	9·51
Land at Dorcan School Swindon	8·22
Land South of Church Street, Stratton St. Margaret	7·49
Land at Haydon Wick	2·21
Land at the Rear of Beatrice Street, Swindon	1·86
Land at Belmont Farm, Codrington, Near Wroughton	1·82
Land at Ruskin Junior School Annexe, Stratton St. Margaret	1·62
Land at Kingsdown High School, Stratton St. Margaret	1·62
Land at Meadway/Stonehill Green, Westlea Down, Swindon	1·60
Land at Baker's Field, Lower Wanborough	1·47
Land adjoining Attlee Crescent, Stratton St. Margaret	1·38
Park Farm, Moredon, Swindon	1·32
Land at Scarborough Road, Swindon	0·66
Former Queenstown Infants School/6-10 Turl Street/ 15-17 Oriel Street, Swindon	0·43
Swindon Health Authority	
Land at Cricklade Road, Gorse Hill, Swindon	2·16
Department of Transport	
Land at Stratton St. Margaret, Swindon	5·16
British Rail	
Land Rear of Dean Street, Swindon	5·46

Tree Preservation Orders

Mr. Brazier: To ask the Secretary of State for the Environment how many tree preservation orders have been made in each county in England *(a)* for individual trees and *(b)* for groups of trees or woods; and what area is covered by the latter case.

Mrs. Virginia Bottomley: This information is not held centrally. A recent sample survey of 31 districts and boroughs in England found that more than 90 per cent. of tree preservation orders related to trees in or on the fringe of urban areas, and that a large number were on single trees in front gardens. The consultants who carried out the survey for the Department concluded that a typical authority in their sample had over 5,000 trees protected by over 200 orders.

Insulation

Sir Michael McNair-Wilson: To ask the Secretary of State for the Environment whether he will include the inspection of loft roof, cavity wall and under floor insulation in the statutory requirements for which local authority buildings inspectors are responsible.

Mr. Trippier: The Building Regulations 1985 include requirements relating to the conservation of fuel and power which can be met in a variety of ways, including loft roof, cavity wall and under floor insulation. There are also specific requirements relating to the way in which cavity wall insulation is undertaken. Local authority building control officers are already responsible for ensuring that building work to which the regulations apply complies with these requirements.

Development Corporations

Mr. Frank Field: To ask the Secretary of State for the Environment (1) whether, following the National Audit Office's report, the Merseyside development corporation has introduced a greater price competition for any contracts going out to consultants;

(2) whether the Merseyside development corporation has changed its marketing strategy following the National Audit Office report on urban development corporations;

(3) if, following the National Audit Office's report, the Merseyside development corporation has changed its tendering policy for works contracts;

(4) if any changes have taken place in the monitoring of the developer of the Albert dock following the report of the National Audit Office; and if he will make a statement.

Mr. Trippier: The work of all UDCs is continuously monitored and the NAO findings are taken into account in that process. The report of the Public Accounts Committee is awaited. In the meantime the Merseyside development corporation has:

(i) reviewed its procedures for the competitive selection of consultants to place greater emphasis on price competition in addition to the factors such as relevant experience and past performance. Commissions are

awarded on the basis of best value for money and with rare exception firms submitting the lowest fees and expenses receive the commission;
(ii) strengthened its marketing team and activities, including the new appointment of a marketing manager. The MDC is taking a much more active role in promoting Merseyside, as part of Merseyside integrated development operations, the business opportunities on Merseyside initiative and north-west promotions such as INWARD and Fast Forward, as well as continuing its support for the Merseyside tourism board;
(iii) continued to place all of its work contracts by competitive tender to suitable firms with proven contract performance. Tender lists are now compiled to ensure that at least one firm is included which has not had a recent tendering opportunity;
(iv) met regularly the Albert dock company at both chairman and director level to plan and to monitor the property management and service arrangements and to review charges and income.

Merseyside Development Corporation

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list the current members of the Merseyside development corporation; and if he intends to make any new appointments.

Mr. Trippier: The members of the Merseyside development corporation board are:

Mr. Philip Carter CBE—Chairman
Mr. John Smith CBE—Deputy Chairman
Professor Graham Ashworth CBE
Mr. Brian Thaxter
Professor Patrick Minford
Mr. Clive Lewis, FRICS, FSVA
Councillor Thomas Glover
Councillor John Hale
Dr. John Ritchie MBE

New appointments will be announced shortly.

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list for each year since its establishment the amount of private investment attracted into the Merseyside development corporation area; and if he will give the investment in *(a)* Liverpool and *(b)* the Wirral.

Mr. Trippier: Private investment in Merseyside development corporation's area is as follows:

	Liverpool (including Bootle) (£ million)	*Wirral (£ million)*	*Total (£ million)*
1981-82	—	—	—
1982-83	—	—	—
1983-84	2·535	—	2·535
1984-85	4·995	—	4·995
1985-86	4·138	—	4·138
1986-87	6·413	—	6·413
1987-88	7·600	0·500	8·100
1988-89	10·200	4·500	14·700

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list for each year since its establishment the amount of commercial or industrial floor space owned by the Merseyside development corporation which was *(a)* let *(b)* under refurbishment *(c)* awaiting refurbishment, and *(d)* awaiting demolition.

Mr. Trippier: The information is as follows. Figures are not readily available for years prior to 1987.

Industrial/Commercial Floorspace owned by Merseyside Development Corporation

	March 1987 (000s sq ft)	*March 1988 (000s sq ft)*	*March 1989 (000s sq ft)*
Let	1,074	1,193	1,477
Awaiting/under Refurbishment[1]	1327	1,431	805
Awaiting Demolition	791	78	610
Total	3,192	2,702	2,892

[1] These two categories cannot be disaggregated.

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list the projected number of new jobs which will be created in the next two years by the Merseyside development corporation; and if he will divide this figure between *(a)* construction and *(b)* the longer term jobs.

Mr. Trippier: The Merseyside development corporation's programme is expected to provide an estimated 3,500 man years of construction work and 3,200 longer-term jobs over the next two years.

Mr. Frank Field: To ask the Secretary of State for the Environment how many construction jobs will be created by the work of the Merseyside development corporation; and how many will go to local workers.

Mr. Trippier: Investment by the Merseyside development corporation has led to on-site construction jobs providing between 800-1000 man years' work annually since 1981. This is expected to grow to 1,400-1,600 jobs a year during further phases of the redevelopment programme. Merseyside contractors win competitively over 90 per cent. of MDC contracts by value and the vast majority of employees are Merseyside residents.

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list the sums of money spent in each year since its inception by the Merseyside development corporation; and if he will give the sums for *(a)* Liverpool and *(b)* Wirral.

Mr. Trippier: The information is as follows:

Expenditure (£ million)

	1981-82	*1982-83*	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*
Liverpool (including Bootle)	2·875	18·043	28·309	23·783	24·115	19·896	20·710	11·939
Wirral	1·072	0·118	0·643	1·105	0·839	0·854	2·597	3·685
TOTAL PROJECTS	3·947	18·161	28·952	24·888	24·954	20·750	23·307	15·624
Administration, estate management and contributions to voluntary organisations	1·086	2·597	3·048	4·353	3·039	4·147	4·968	5·376
TOTAL MDC EXPENDITURE	5·033	20·758	32·000	29·241	27·993	24·897	28·275	21·000

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list the numbers of jobs created each year of its existence by the Merseyside development corporation; and if he will give separate figures for *(a)* Liverpool and *(b)* Wirral.

Mr. Trippier: The promotion and marketing budget for the Merseyside development corporation is shown below. The figures can be broken down only from 1984-84 onwards.

£ thousands

	1981-82	*1982-83*	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*

TOTAL	31	423	603	720	604	816	649	971

Housing Statistics

Mr. Hoyle: To ask the Secretary of State for the Environment how many local authority houses were built in *(a)* Warrington, *(b)* Macclesfield, *(c)* Congleton, *(d)* Crewe and Nantwich, *(e)* Vale Royal and *(f)* Staffordshire Moorlands in (i) 1978 and (ii) 1988; and how many it is estimated will be built in these areas in 1989.

Mr. Trippier Local authority housebuilding completions reported as taking place in these housing authorities in 1978 appear in "Local Housing Statistics", issue 49, a copy of which is available in the Library. Figures reported for 1988 are as follows:

	Number of local authority housebuilding completions
Staffordshire Moorlands	15
Congleton	8
Crewe and Nantwich	8
Macclesfield	26
Vale Royal	57
Warrington	[1]64

[1] January to November only

The Department does not have estimates of 1989 housebuilding activity by local authorities.

Mr. Harry Greenway: To ask the Secretary of State for the Environment how many *(a)* private sector houses and *(b)* public sector housing units there are currently on (i) Notting Hill housing trust-owned estates and (ii) other housing association estates; how many such units are proposed by these bodies in the next year; and if he will make a statement.

Mr. Trippier This information is not held by the Department, the Housing Corporation is responsible for monitoring, supervising and distributing funds to registered housing associations in England. I have, therefore, asked the Housing Corporation to supply to my hon. Friend direct information about existing and planned developments in his constituency involving the Notting Hill housing trust and other housing associations.

Council House Building

Mr. Allen: To ask the Secretary of State for the Environment how many local authorities currently have a council house building programme.

Mr. Trippier A total of 355 local authorities indicated on their housing investment programme returns (HIP2), completed in April 1988, that they expected to incur expenditure on new housebuilding construction in 1988-89.

Housing Shortages

Mr. David Porter: To ask the Secretary of State for the Environment if he will assess the extent to which Waveney district council can benefit from recent Government initiatives of policy on the co-operation between local authorities and the private and housing association sectors to reduce housing shortages.

Mr. Trippier Waveney district council, along with all other housing authorities, will benefit from our policies designed to promote authorities' enabling role in ensuring an adequate supply of houses for sale and rent in urban and rural areas.

Lindane Container (Loss)

Mr. Allen: To ask the Secretary of State for the Environment if he will make a statement on the policy implications of the loss of the lindane container in the Channel.

Mrs. Virginia Bottomley: Lindane is a pesticide with wood preservative and agricultural uses. As such it is subject to control as a pesticide under the Food and Environment Protection Act 1985. It has been identified among the group of substances known as organochlorines which are considered most hazardous to the aquatic environment in view of their toxicity, persistence and capacity for bio-accumulation. Lindane is included in the provisional priority list of dangerous substances (the Red List) whose release to United Kingdom coastal and inland waters should be minimised and which will be the subject of new and tighter controls.

A major accidental discharge of the substance would be of serious environmental concern. There are national and international requirements for the loss or likely loss of this substance to be reported without delay by the fastest telecommunication channels available and with the highest possible priority to the nearest coastal state. If a marine accident occurs which threatens United Kingdom interests, the responsibility for combating a potential pollution hazard at sea rests with the marine pollution control unit of the Department of Transport, which takes account of advice from the fisheries Departments and others concerned with protection of the marine environment.

Development (Islington)

Mr. Chris Smith: To ask the Secretary of State for the Environment if he will indicate, for all housing associations and co-operatives carrying out approved development work within the London borough of Islington, what block 2 tender approvals have been issued and for which schemes for financial year 1989-90, and for how many units of accommodation in each case; and what criteria have been used in reaching decisions about which projects to select for such tender approval.

Mr. Trippier: This information is not held by the Department. The Housing Corporation is responsible for allocating its capital programme to individual housing associations and schemes within the broad framework agreed annually by my right hon. Friend. I have, therefore, asked the Housing Corporation to reply to the hon. Member direct.

Gloucester District Council

Mr. Corbyn: To ask the Secretary of State for the Environment on what authority officials in his Department recently phoned Gloucester district council with consent for a proposed voluntary transfer; and on what grounds the valuation of the sale was changed.

Mr. Trippier: Gloucester city council has not applied for consent to dispose of its housing nor could it do so before consulting tenants as required by schedule 3A to the Housing Act 1985.

On the instructions of my right hon. Friend the Secretary of State, officials informed the council that he continued to take the view that sales of tenanted council housing should be at tenanted market value; but that he would expect to be willing in this particular case to consider sympathetically any application from the city council for consent under section of the Local Government Act 1988 to assist a purchaser of its housing where the assistance was in respect of specified works on the property being transferred, firm arrangements were in place to ensure that it was used only in connection with those works and the amount of any assistance did not exceed £1,500 in respect of each dwelling.

London Docklands

Mr. Spearing: To ask the Secretary of State for the Environment if he will state the numbers of jobs within the area of the London docklands development corporation from 1981 to the latest convenient date which *(a)* have ceased to exist within the area, *(b)* have been transferred into the area from elsewhere, *(c)* have been originated in the area as new employment and *(d)* now exist in the area, and the number in *(c)* above expressed as a percentage of *(d)*.

Mr. Trippier: The LDDC/RISU employment survey, conducted in 1987, showed that 36,385 jobs existed in the LDDC area in companies responding to the survey. Of this total, 15,724 jobs were in companies which had moved to London Docklands since 1981; 4,593 jobs were in companies originating in the area since 1981; and 16,068 were in companies present throughout the period. Jobs in companies originating in the area since 1981 therefore accounted for 12·6 per cent. of the total number of jobs at the time of the survey.

The 1981 annual census of employment counted 27,123 jobs in London Docklands. There was therefore a net increase of 9,172 jobs in the area between 1981 and 1987. By 1987 companies which were not present in 1981 accounted for 20,318 jobs.

The survey report deduces that 11,145 jobs were lost in companies present throughout the period and in companies which ceased trading in the area.

All figures from the 1987 survey relate to jobs recorded in "employment establishments" only. In addition, there were 5,668 people employed in "other employments". The estimated response rate to the survey was 93 per cent.

Areas of Outstanding Natural Beauty

Sir John Farr: To ask the Secretary of State for the Environment what plans he has to protect areas of outstanding natural beauty from untoward development *(a)* by strengthening controls or *(b)* by adding certain of them to national parks.

Mrs. Virginia Bottomley: Controls over development in areas of outstanding natural beauty are already the same as those in national parks. Permitted development rights are restricted in those areas, and planning policy guidance note 7 (Rural Enterprise and Development), a copy of which is in the Library, recognises that the location, design and external appearance of development in these areas should be subject to special scrutiny, and that major industrial or commercial development would generally be inconsistent with their designation.

There are no plans to designate any AONB as a national park.

Norfolk Broads

Sir John Farr: To ask the Secretary of State for the Environment if he has any plans to extend the number of national parks by including the Norfolk Broads.

Mrs. Virginia Bottomley: The new Broads Authority established under the Norfolk and Suffolk Broads Act 1988 exercises the same range of powers and functions as those conferred on national park authorities and will receive the same rate of Government grant.

Ivory

Mr. Ron Davies: To ask the Secretary of State for the Environment whether he takes any measures to ensure that imported ivory products do not originate from illegally taken ivory.

Mrs. Virginia Bottomley: The United Kingdom strictly implements controls on trade in ivory in accordance with the convention on international trade in endangered species which is applied in the European Community under EC Regulations 3626/82 and 3418/83.

Office of Water Supply and National Rivers Authority

Sir Neil Macfarlane: To ask the Secretary of State for the Environment what is the estimated cost for the Office of Water Supply and the National Rivers Authority in 1990; how many staff will be required; and how many offices will be required.

Mr. Howard *[holding answer 23 March 1989]:* The current estimated costs of the water services office and the

customer services committees will be about £3·7 million in the year 1990-91; the staff will number about 80. The number of offices required is a matter for the Director General of Water Services to decide in due course.

The estimated cost of the National Rivers Authority in 1990-91 is £290 million. It is expected to employ some 6,500 staff. The vast majority of the NRA's staff will be based in the regions, mainly in accommodation which will transfer to it from the water authorities but a central policy unit of about 60 will be located in London in the offices currently occupied by the National Rivers Authority advisory committee.

Archaeological Sites

Mr. Maclennan: To ask the Secretary of State for the Evironment if he will take steps to ensure that unscheduled archaeological sites of importance discovered in the course of site clearance following the granting of planning permission for redevelopment can be excavated and recorded prior to redevelopment.

Mrs. Virginia Bottomley *[pursuant to her answer 22 March 1989 c. 643]:* The desirability of preserving an ancient monument and its setting is a material consideration for the determination of planning applications, whether or not that monument is scheduled. Local planning authorities may also wish to impose conditions requiring developers to allow access for archaeologists to observe work and record items of interest, when granting planning permission affecting unscheduled sites of archaeological interest.

It remains open to my right hon. Friend the Secretary of State, after consultation with English Heritage, to schedule monuments which he considers to be of national importance even after planning permission for redevelopment has been granted. In such cases scheduled monument consent would then be needed before either archaeological or development work could proceed. Where significant finds are made before or during the course of development, it is usually preferable to resolve the situation by non-statutory means. We commend the growing practice of voluntary agreements between developers and archaeologists to enable archaeological evaluations to be carried out before redevelopment.

Director General of Water Services

Mr. Bevan: To ask the Secretary of State for the Environment where the Office of the Director General of Water Services will be located.

Mr. Ridley *[pursuant to the reply, 23 March 1989, c. 782]:* I am pleased to announce that the first Director General of Water Services will be Ian Byatt, currently deputy chief economic adviser at the Treasury.

The establishment of a new independent regulator for the water industry is a key component of our plans for the industry. The new water plcs will be regional monopolies and the regulator's function will be to ensure that neither the newly privatised nor the existing water companies can unfairly exploit this. The Director General of Water Services will protect consumers of all the companies, compare the performance of the different companies and ensure that each company has clear incentives to improve its efficiency.

The director general will ensure that the companies carry out their functions effectively and that they can raise the finance they need to do so. He will be responsible for ensuring that companies comply with the conditions of their appointments.

Consumer protection will be a central part of the new director general's functions. His responsibilities will include:

—regulation of charges by setting a ceiling for price increases;

—monitoring of service standards, and enforcement of higher standards where necessary;

—establishment of customer service committees to investigate complaints and provide a forum for consumers to make known their views; and

—encouraging greater efficiency by promoting competition within the industry so that all may aspire to the standards of service delivery and cost-effectiveness of the best.

The director general will take up these duties once companies have been appointed as water and sewerage undertakers in September, under the proposals in the Water Bill currently being considered by Parliament. In the meantime Ian Byatt will be preparing for his new responsibilities. We shall be liaising closely with him to ensure a smooth transition to the new regime, and he will be a source of advice to me in setting up the regulatory framework for the companies on their appointment in September.

SCOTLAND

Hill Livestock Compensatory Allowances

Mr. Home Robertson: To ask the Secretary of State for Scotland what was the total amount of hill livestock compensatory allowances paid in 1988; what was the total number of claimants; and how many individuals claimed more than £6,750.

Mr. Michael Forsyth: Hill livestock compensatory allowances amounting to just over £43·5 million were paid in 1988 to 18,365 applicants. Of these, 1,793 received payments of more than £6,750.

Farm Sizes

Mr. Home Robertson: To ask the Secretary of State for Scotland what is the total number of farming units in Scotland; and how many are between *(a)* four and eight British size units, *(b)* eight and 12 British size units and *(c)* 12 and 16 British size units.

Mr. Michael Forsyth: The number of farms included in the June 1988 agricultural census in Scotland was 26,239. Within this total the numbers of farms in the ranges for which information is sought are as follows:

British size units	*Number of farms*
4 to 8	3,170
8 to 12	2,354
12 to 16	1,967

Public Defender System

Mr. Austin Mitchell: To ask the Secretary of State for Scotland what progress has been made in implementing a public defender in Scotland as recommended by the Hughes royal commission.

Lord James Douglas-Hamilton: Provision has been made in the Legal Aid (Scotland) Act 1986 for the

employment by the Scottish Legal Aid Board of solicitors to act for clients. My right hon. and learned Friend intends to undertake full consultations before bringing the provision into force.

Operations (Private Hospitals)

Mr. Dunnachie: To ask the Secretary of State for Scotland how many operations were contracted out to private hospitals in Scotland, region by region; and at what cost during 1988.

Mr. Michael Forsyth: The information requested is not collected centrally. However, the health boards which are making use of private sector facilities with support from the funds allocated to reduce waiting lists in 1988-89, the number of patients to be treated and the costs, are as follows:

Health Board	*Specialty*	*Patients*	*Cost (£)*
Greater Glasgow	Urology	30	20,000
	Orthopaedics	113	154,781
Highland	Orthopaedics	12	45,324
Lanarkshire	Urology	10	15,000
Lothian	Orthopaedics	14	57,282
	Ophthalmology	8	20,000
Dumfries and Galloway	Gynaecology	39	17,300

Health boards which make use of private sector facilities do so if they are cost-effective or if there are constraints which prevent a board from increasing the number of patients they can treat in-house.

Prisoners

Mr. Moss: To ask the Secretary of State for Scotland what is the breakdown of category A prisoners in Scotland under the groupings *(a)* convicted Irish Republican Army terrorists, *(b)* international terrorists, *(c)* murderers, *(d)* armed robbers, *(e)* rapists, *(f)* drug dealers, and *(g)* others (i) in total and (ii) listed by each prison.

Lord James Douglas-Hamilton: The information as at 30 March 1989 is as follows:

Grouping	*Total*	*Peterhead*	*Prison Aberdeen*	*Perth*
Murderers	12	10	1	1
Armed Robbers	3	2	0	1
Drug Dealers	1	1	0	0
Others	8	7	1	0

There are no category A prisoners in Scotland in the groupings *(a)*, *(b)* or *(e)*. The figures exclude one untried category A prisoner.

Mr. Moss: To ask the Secretary of State for Scotland what are the numbers of category A, B and other prisoners in each prison in Scotland, listed by prison and by county address.

Lord James Douglas-Hamilton: The numbers of prisoners in Scottish prisons listed by category, prison and region as at 24 March 1989 are:

Establishment	*Region*	*A*	*B*	*C*	*D*	*Total*
Aberdeen	Grampian	2	91	57	2	152
Barlinnie	Strathclyde	—	840	6	—	846
Castle Huntly	Tayside	—	—	—	118	118
Cornton Vale	Central	—	36	102	13	151
Dumfries	Dumfries and Galloway	—	96	16	—	112
Dungavel	Strathclyde	—	—	28	84	112
Edinburgh	Lothians	1	311	265	31	608

Highland Regional Council (Structure Plan)

Mr. Dunnachie: To ask the Secretary of State for Scotland if he will make it his policy to reject policy No. 53 of the Highland regional council's structure plan.

Lord James Douglas-Hamilton: As Highland regional council's structure plan review is only at the consultative draft stage this proposed policy concerning skiing at Cairngorm has not yet been submitted to my right hon. and learned Friend for his approval. Only when the council has considered the representations submitted to it in response to its consultative draft will it formally submit the structure plan to my right hon. and learned Friend for his approval. There is then a statutory period during which objections to the plan can be made. In view of the role which my right hon. and learned Friend will have to play in the future consideration of the plan he cannot at this stage comment on policy No. 53 in the consultative draft.

Nurse Grading

Dr. Godman: To ask the Secretary of State for Scotland if nurses who commenced post-registration training on or after 1 April 1988 have the right of appeal over their recent clinical grading; and if he will make a statement.

Mr. Michael Forsyth: All nurses assimilated to the new clinical grading structure last year—including post-registration students—have the right to appeal under the agreed Whitley procedures.

Porcine Somatotropin

Mr. Ron Davies: To ask the Secretary of State for Scotland what information he has concerning the use of porcine somatotropin in Scotland.

Mr. Michael Forsyth: Limited trials on the use of porcine somatotropin were carried out in Scotland up to 1988 under an animal test certificate (ATC) issued by MAFF. This ATC has now expired and, as no product licence has subsequently been issued, it would be illegal to sell or supply porcine somatotropin in Scotland, as it would be elsewhere in the United Kingdom.

Child Abuse

Mr. Allen: To ask the Secretary of State for Scotland what Government-funded research into the sexual abuse of children *(a)* has taken place since 1979, *(b)* is currently taking place and *(c)* is under consideration, giving the cost of each project listed.

Mr. Michael Forsyth: In recent years the Scottish Office has funded or contributed to the funding of three research projects on the subject of child abuse, two of which included aspects of child sexual abuse and a third which focused specifically on that problem. Details of the projects and their costs, and of further research currently under consideration, are as follows:

Research undertaken since 1979

1. Dr. A. Boddy and Mr. D. Gough: University of Glasgow, "Child abuse interventions: a review of the research literature". Total cost £23,000. (Funded by the Department of Health and Social Security with a Scottish Office contribution; project completed.)

2. Dr. A. Boddy and Mr. D. Gough: University of Glasgow, "A longitudinal study of child abuse in Glasgow". Total cost £80,000. (Research completed; final report awaited.)

Research currently taking place

3. Mrs. L. Waterhouse: University of Edinburgh, "Management of intra-familial child sexual abuse". Total cost £69,400.

4. A research brief inviting bids to undertake research into child sexual abuse, issued on 28 February 1989, has resulted in four proposals which are under consideration. Estimated cost £100,000.

Sand Eels

Dr. Godman: To ask the Secretary of State for Scotland if, pursuant to his reply of 6 February, *Official Report*, columns 561-562, he will state the critical level of spawning stock size for Shetland sand eels, below which recruitment will be affected by the abundance of spawning fish; and how this is estimated.

Mr. Michael Forsyth: It is not possible to state precisely the critical size of spawning stock required to protect recruitment from stock-related effects. However it seems unlikely that it is higher than the lowest recorded level that has produced average recruitment or better. For the Shetland stocks, that suggests a spawning stock biomass of around 20,000 tonnes.

Dr. Godman: To ask the Secretary of State for Scotland what assessment his Department has made as to whether the voluntary measures taken by Shetland fishermen to reduce catches of young sand eels are likely to conserve stocks of O group and 1 group sand eels; and if he will make a statement.

Mr. Michael Forsyth: Estimates of the abundance of young O group sand eels are based on the accumulated catches of the respective year class in successive years, and it will therefore be two or three years before a full assessment of the effects of the voluntary measures is possible. Landing samples have revealed a very low incidence of very small sand eels in 1987 and 1988 catches but this could be due to the effects of the voluntary restrictions, or to low levels of recruitment of young sand eels, or to both.

Recent scientific data support the earlier view that the decline in stocks is likely to be due primarily to recent low levels of recruitment rather than the effects of the fishery. However, given current concern about the health of the stocks, the Department of Agriculture and Fisheries for Scotland has today announced proposals to introduce statutory controls on sand eel fisheries in Scottish inshore waters. Comments on the proposals are being invited from interested parties.

Mr. Macdonald: To ask the Secretary of State for Scotland if he will state the total catch by weight, fishing effort and proportions of both O group and 1 group fish, by weight, for the Minch sand eel fishery since 1980.

Mr. Michael Forsyth: The information requested for ICES division VIa (West of Scotland including the Minch) is as follows:

	Total catch (*tonnes*)	*Fishing effort* (*Days fishing*)	*Percentage* (*by weight*) *O group*	*1 Group*
1980	180	26	30	46
1981	5,972	303	21	33
1982	10,786	588	15	13
1983	13,051	447	34	20
1984	14,166	446	13	28
1985	18,586	475	22	3
1986	24,469	530	21	33
1987	14,479	290	11	52
1988	24,465	455	3	4

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Scotland what was the total amount spent by the Scottish Development Agency in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Scottish Development Agency in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Lang: Expenditure by the Scottish Development Agency on management and computer consultancy contracts in the year to 31 March 1989 amounted to £5,925,311. This includes fees for research and development, advisory services, appraisal and administration, such as tax and accounting advice, pension and legal consultancies, as well as management and computer consultancies.

A detailed breakdown comprising the names of companies which have been successfully tendered for contracts and the subject of these assignments cannot be provided without incurring disproportionate expense.

"Working for Patients"

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give the total cost for the launch of the White Paper "Working for Patients", itemising as far as possible the cost in respect of each specific part.

Mr. Michael Forsyth: I refer the hon. Member to the reply that I gave to the hon. Member for Orkney and Shetland (Mr. Wallace) on 16 February 1989.

Ambulance Services

Mr. Robin Cook: To ask the Secretary of State for Scotland if he has given any directive to the Common Services Agency in respect of competitive tendering for non-emergency ambulance services in Scotland; and what is his policy as to whether such services should be put out to private tender.

Mr. Michael Forsyth: I refer the hon. Member to the reply that I gave to the hon. Member for Glasgow, Hillhead (Mr. Galbraith) on 20 July 1988 at column *509*.

Mr. Macdonald: To ask the Secretary of State for Scotland what change there has been in the demands upon the ambulance service in the Highlands and Islands following the recent changes in the Highland and Islands hospital patients travel scheme.

Mr. Michael Forsyth: The demand for ambulance transport in the Highland and Western Isles area has shown a decline since the changes to the patients' travel expenses scheme, which came into effect on 11 April 1988.

Woodland Grants

Mr. Macdonald: To ask the Secretary of State for Scotland on how many occasions the Forestry Commission awarded grants under the broadleaved woodland grant scheme in Scotland, between the inception in 1985 and closure in 1988; and on how many occasions the grant of £100 was for obtaining professional advice in the preparation of a plan of operations under the broadleaved woodland grant scheme awarded.

Lord James Douglas-Hamilton: To date, the Forestry Commission has approved 1,257 applications for grant under the broadleaved woodland grant scheme in Scotland. The grant of £100 has been paid on 158 of these applications.

New Towns

Mr. Ingram: To ask the Secretary of State for Scotland if he will list the organisations and bodies which have responded to the consultation document, "The Scottish New Towns—Maintaining the Momentum."

Mr. Lang: The following are the organisations and bodies which have responded to the consultation document:

Abron Community Council (Cumbernauld)
Ardrossan, Saltcoats, Stevenston Enterprise Trust
Ayrshire and Arran Health Board
Ayrshire Chamber of Industries

West Lothian District Council
Whinneyknowe and Balgeddie Meadows Residents Association (Glenrothes)

Local Health Councils

Mr. Malcolm Bruce: To ask the Secretary of State for Scotland when he intends to publish his proposals on the future of local health councils.

Mr. Michael Forsyth: I shall make an announcement about the representation of consumer views in the NHS when consideration of the management consultants' report and other proposals and comments which have been received has been completed.

Pupil-Teacher Ratios

Mr. McLeish: To ask the Secretary of State for Scotland what were *(a)* pupil-teacher ratios and *(b)* university staff-student ratios in Scotland in 1978-79 and 1987-88.

Mr. Michael Forsyth *[holding answer 23 March 1989]:* The pupil-teacher ratios in education authority schools (nursery, primary, secondary and special) were 17·7 in 1978-79 and 16·1 in 1987-88. Universities throughout Great Britain are the responsibility of my right hon. Friend the Secretary of State for Education and Science.

Teaching Posts

Mr. McLeish: To ask the Secretary of State for Scotland what was the total number of teaching posts in *(a)* Scottish schools and *(b)* Scottish higher education in 1978, 1979, 1987 and 1988.

Mr. Michael Forsyth *[holding answer 23 March 1989]:* Comprehensive information about the numbers of teaching posts is not available centrally.

SOCIAL SECURITY

Single Mothers (Income Support)

Mr. Hinchliffe: To ask the Secretary of State for Social Security what guidance is given to social security officers as to the age at which it is deemed appropriate for pre-school children of single mothers to be placed with child minders when assessing the mothers' eligibility for income support.

Mr. Peter Lloyd: None. There is no requirement for children of any age to be placed with child minders as a condition of receiving income support.

Mr. George Metters

Mr. Steen: To ask the Secretary of State for Social Security when he hopes to reply to letters dated 27 January and 7 February from the hon. Member for South Hams, in relation to his constituent Mr. George Metters of Marians' Maples, Stoke Gabriel, Totnes, Devon, and his claim for attendance allowance.

Mr. Scott: A reply was sent on 22 March.

Housing Benefit

Mr. Battle: To ask the Secretary of State for Social Security (1) for the week starting 10 April, and each ensuing week, how many people currently in receipt of housing benefit transitional payments in the Leeds, West constituency will cease to become eligible; and what this is as a percentage of the total number of those claiming transitional payments in the constituency;

(2) for the week starting 10 April, and each ensuing week, how many people currently in receipt of housing benefit transitional payments will cease to become eligible; and what this is as a percentage of the total number of those claiming transitional payments.

Mr. Peter Lloyd: Until the closing date of 30 June 1989 is reached and all applications for housing benefit transitional payments have been received and assessed, it will not be possible to state how many people will no longer receive transitional payments from 10 April 1989 because of the £2 flat rate reduction, but we estimate that around 40 per cent. will no longer qualify for payments. The information requested is not available by constituency area.

Mr. Corbyn : To ask the Secretary of State for Social Security how many people have been paid housing benefit transitional payments; of these, how many will lose their transitional protection after 9 April because they have capital in excess of £8,000; and how many others will lose their transitional protection because the amount of their payments is less than £2 per week.

Mr. Peter Lloyd: Up to 24 March 188,095 people had been awarded housing benefit transitional payments and payments have been made in 180,874 cases. Until the closing date of 30 June 1989 is reached and all applications have been received and assessed it will not be possible to state how many people will no longer receive transitional protection from 10 April because of the £2 flat rate reduction, but we estimate that around 40 per cent. will no longer qualify for payments. It will not be possible to say how many people will no longer qualify for transitional

protection because their capital has risen above £8,000 since April 1988 until all renewal application forms have been returned to the transitional payments unit.

Family Credit

Mr. Battle: To ask the Secretary of State for Social Security if he will publish a table showing how many people were *(a)* eligible for and *(b)* in receipt of family credit in 1988-89, broken down into (i) employees and (ii) self-employed, using the first assumption of eligibility and take-up made in October 1987 and the second assumption as described in his answer to the hon. Member for Bolton North-East (Mr. Thurnham), 17 March, *Official Report*, column 392.

Mr. Peter Lloyd: The available information is shown in the table. Reliable estimates cannot be made of the numbers of self-employed people eligible for family credit.

	Employees		*Self-employed*	*Total*
	Eligible	*Receiving*	*Receiving*	*Receiving*
October 1987				
Forecast for 1988-89[1]	[2]675,000	405,000	45,000	450,000
March 1989				
Estimate for 1988	500,000	253,000 (actual)	24,000 (actual)	277,000 (actual)

Notes:
[1] As revised to take account of the March 1988 Budget.
[2] No direct estimate of the eligible population was made in October 1987, when a projection of the 1988-89 caseload was made on the assumption that the take up rate would be one fifth higher than the FIS take up rate. However, an eligible employee population of 675,000 would follow from the assumption of a FIS take up rate of 50 per cent.

Ms. Richardson: To ask the Secretary of State for Social Security what is the latest estimate of the number of people receiving family credit; and how much he expects to spend on family credit in the financial year 1988-89.

Mr. Peter Lloyd: At the end of March 253,500 families were receiving family credit, and a further 47,000 claims were awaiting determination. The outturn of expenditure for 1988-89 is now expected to be slightly less than forecast in Cm. 615.

Mr. Simon Hughes: To ask the Secretary of State for Social Security how many people would be entitled to family credit in 1989 if there was no compensation for free school meals or welfare milk in the child credit rates.

Mr. Peter Lloyd *[holding answer 20 March 1989]*: A specific amount in respect of compensation for free school meals and free welfare milk and vitamins was included on a once-and-for-all basis in the child credit rates set at the start of the family credit scheme in April 1988 but, following the uprating, this element is no longer separately identifiable within the April 1989 rates. The information requested is therefore not available.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Social Security what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Peter Lloyd: The estimated total amount spent by the Department in 1988 on social security-related management and computer consultancy was £35·391 million. The expenditure came partly from the combined DHSS budgets for the financial years 1987-88 and 1988-89. Where appropriate the cost of projects has been apportioned when the work involved both social security and health aspects.

Details of each consultancy awarded by the Department on social security-related matters are as follows:

Community Care

Mr. Livingstone: To ask the Secretary of State for Social Security (1) what percentage of total budget of the Neasden integrated local office has been spent on community care grants;

(2) how many community care grant applications have been made and refused at the Neasden integrated local office;

(3) how much has been allocated for the 1989-90 budget from the social fund for community care grants at the Neasden integrated local office;

(4) how many social fund loans applications have been made and refused at the Neasden integrated local office.

Mr. Peter Lloyd: Information on the numbers of applications for social fund loans and grants processed and awarded, listed by local office, including information on budget allocations and expenditure, may be obtained from the details held in the Library.

Ms. Mowlam: To ask the Secretary of State for Social Security if he will publish the assumptions and bases on which the social fund community care grants budgets for the Department of Social Security ILOs of Redcar, Eston, Middlesbrough, Hartlepool and Stockton were set for the year 1989-90; and if he will give the reasons why four of these offices have received a lower budget than for the current financial year.

Mr. Peter Lloyd: The note that I placed in the Library on 22 February in response to the question from my hon. Friend the Member for Bury, North (Mr. Burt) at column *682* explains the basis on which the social fund allocations for 1988-89 were made.

The combined effect of the three components in the allocation formula ((i) 1988-89 allocations; (ii) income support caseload; (iii) value of awards and the estimated value of refusals for budgetary reasons) means that some offices will gain in 1989-90 in comparison with their 1988-89 allocations and some will lose.

The allocation formula was applied in the same way to all local offices.

Ms. Mowlam: To ask the Secretary of State for Social Security if he will consider reducing the minimum award of social fund community care grant and budgeting loan payments in respect of fuel reconnection charges, in order to bring the minimum social fund awards into line with the typical reconnection charge.

Mr. Peter Lloyd: No, we believe that the existing arrangements already provide the necessary help.

People on income support are provided with a sum of money within which to budget for their everyday needs, in the same way as others on low incomes. Budgeting loans and community care grants are intended to help with larger items of expenditure. We consider £30 a reasonable sum for a person to accumulate from their benefit.

If a person runs into difficulties in meeting his fuel bills the Department can arrange to pay a certain amount of his income support direct to the fuel board so as to avoid disconnection. Where, however, a disconnection has taken place help is available in the form of a crisis loan which may be made if it is the only means of avoiding a risk to health and safety.

Claim Forms

Mr. Livingstone: To ask the Secretary of State for Social Security what arrangements have been made for local authorities and advice groups to receive bulk copies of his Department's claim forms.

Mr. Peter Lloyd: There are no arrangements for local authorities and advice groups to receive bulk copies of the Department's claim forms. All claim forms are readily available from the Department's local offices. Additionally, those for family credit and income support can be obtained from Post Offices. Social fund application form SF100, (maternity payment) is available from ante-natal clinics, and SF200 (funeral payment) is available from registrars.

Kidney Failure (Benefits)

Sir Michael McNair-Wilson: To ask the Secretary of State for Social Security what benefits a person who suffers kidney failure and is forced to give up work will currently receive; what level of benefits applied to a person in a similar situation before April 1988; what special allowances existed for items, including food, heating, laundry and baths for such people before April 1988; and what equivalent benefits are now available.

Mr. Scott: People who become incapable of work due to kidney failure whose contract of service with their employer continues would usually be entitled to statutory sick pay from the fourth consecutive day of incapacity. Where the employment terminates, the person is self-employed, or statutory sick pay is not payable for any reason, sickness benefit would be payable instead, provided that the usual contribution conditions were satisfied. After 28 weeks of incapacity, invalidity benefit replaces sickness benefit automatically. It would also replace statutory sick pay in cases where the contribution conditions for sickness benefit would have been satisfied at the beginning of the incapacity. In addition to these benefits, people suffering with renal failure who require help dialysing for at least two occasions a week, either at home, as an in-patient in a private hospital or in a self-care unit may qualify for lower rate attendance allowance. There has been no change in the level of any of these benefits since April 1988 other than the usual uprating.

Depending on their circumstances people with renal failure may also receive income support, which replaced supplementary benefit in April 1988. The level of supplementary benefit paid reflected the individual's circumstances such as size of family, if any, housing costs, special needs, and other income. There was no fixed level of benefit for any claimant. The only special allowance particular to people with renal failure was a dietary addition. All other special allowances, for example, for heating, laundry and baths were available to all claimants on the same terms. The system of special allowances has been replaced by one of flat rate premiums. The disability premium is available to people receiving attendance allowance, mobility allowance or supplement, invalidity benefit or severe disablement benefit. It is also available to people with an invalid carriage, those registered blind and those incapable of work for 28 weeks or more. In addition attendance allowance recipients who live alone qualify for the severe disability premium, providing no-one is receiving invalid care allowance for their care.

Young People (Benefits)

Ms. Mowlam: To ask the Secretary of State for Social Security (1) what effects of the changes to young people's benefits, introduced in April and September 1988, his Department is monitoring;

(2) how his Department is monitoring the effects of the 1988 benefits changes on young people aged 16 and 17 years and 18 to 24 years.

Mr. Peter Lloyd: The Department is monitoring all the effects of the 1988 benefit changes on young people through the usual statistical sources, and through representations made by local authorities, voluntary organisations and other groups concerned with young people. As a result of his monitoring a package of measures to assist those of this group identified as having particular difficulties was announced in my hon. Friend's reply to my hon. Friend the Member for Broxtowe (Mr. Lester) on 13 March at columns *27-28*.

Ms. Mowlam: To ask the Secretary of State for Social Security if he will give the latest estimates of *(a)* how many young people aged 16 and 17 years have applied for discretionary payments of income support in order to avoid severe hardship, *(b)* how many young people have been awarded such payments, *(c)* what is the average time taken from the point of application to the point of payment of such awards and *(d)* what is the average duration of such awards.

Mr. Peter Lloyd: During the period 12 September 1988, when general entitlement to income support was withdrawn from 16 and 17-year-olds, to 23 March 1989 a total of 6,027 decisions were made under the Secretary of State's discretionary power to avoid severe hardship. A direction to enable income support to be paid was given in 3,908 instances. These figures relate to the number of decisions made, not to the number of young people involved. Some young people have made more than one application. Processing times are not available for these cases separately from other income support claims, but the

commitment to make decisions within 24 hours of the full details of the case being referred to headquarters has been met. The length of direction given in each case is normally linked to an estimate of when a YTS place is likely to be available for the young person concerned. Information to calculate the average durations of directions is not collected.

Income Support

Ms. Short: To ask the Secretary of State for Social Security in what circumstances single parents in receipt of income support have to make themselves available for work; and whether he has any plans to require that single parents in receipt of income support whose youngest child reaches the age of 12 years will have to make themselves available for work.

Mr. Peter Lloyd: Single parents claiming income support have to be available for work only if there is no child under 16 living as a member of the household. We have no plans to change that.

AIDS

Mr. Chris Smith: To ask the Secretary of State for Social Security (1) whether people with HIV on income support qualify for any specific benefits related to the needs caused by their HIV antibody status;

(2) if he is intending to review the six month qualification period necessary to receive the disability premium for people with HIV infection on income support.

Mr. Scott: People whose HIV antibody status renders them incapable of work can qualify for the income support disability premiums on the same basis as all other sick and disabled people. There are no benefits specifically for people with HIV. But those who receive payments from the Macfarlane trust receive the full benefit of such payments, which are disregarded in the calculation of their income support entitlement. We have given a commitment to review the qualifying conditions for the disability, and other, premiums in the light of our continued monitoring of the scheme and the results of the OPCS surveys into disabilities.

Nursing Homes (Elderly People)

Mr. Lord: To ask the Secretary of State for Social Security what measures he is taking to reduce the gap between Government funds provided for elderly residents of nursing homes and the cost of their accommodation.

Mr. Peter Lloyd *[holding answer 21 March 1989]:* Under income support, payments can be made to people in nursing homes to help them meet the fees, subject to maximum limits.

From 10 April the limits are being increased. Elderly people in nursing homes will be able to claim up to £190 per week, or up to £213 in London, plus a personal expenses allowance of £10·05.

NORTHERN IRELAND

Water Privatisation

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland what proposals he has for the privatisation of water supplies; and if he will make a statement.

Mr. Needham: The Government have no present plans to privatise water supplies in Northern Ireland.

Queen's University

Mr. William Ross: To ask the Secretary of State for Northern Ireland how many part-time courses are available at Queen's university, Belfast.

Dr. Mawhinney: A total of 590 part-time courses were available during the 1987-88 academic year.

Goat Milk

Mr. Mallon: To ask the Secretary of State for Northern Ireland what plans he has to introduce measures to control the standard of hygiene of goat milk production.

Mr. Viggers: The Department of Agriculture for Northern Ireland will shortly be issuing an agreed code of practice on the hygienic production of goats' milk.

Life Imprisonment

Ms. Short: To ask the Secretary of State for Northern Ireland how many *(a)* republican and *(b)* loyalist prisoners serving sentences of life imprisonment or at the Secretary of State's pleasure have been reviewed since January 1988; and how many have been released.

Mr. Ian Stewart: The information requested is set out in the following table.

Indeterminate sentence prisoners reviewed, recommended for release and released since January 1988 by believed paramilitary affiliation at the time of their offence

	Number
'Loyalist' cases reviewed	106
Number recommended for release	52
'Republican' cases reviewed	86
Number recommended for release	40
'Loyalist' prisoners released	19
'Republican' prisoners released	8

Ms. Short: To ask the Secretary of State for Northern Ireland how many *(a)* republican and *(b)* loyalist prisoners serving sentences of life imprisonment or at the Secretary of State's pleasure who have been reviewed and put back for further review are to be reconsidered in (i) one, (ii) two, (iii) three, (iv) four and (v) five years.

Mr. Ian Stewart: The information requested is set out in the following table.

Indeterminate sentence prisoners who have been reviewed by the life sentence review board and deferred to be reconsidered in 1-5 years from the time of the last review. By believed paramilitary affiliation at time of offence

	0–1 Year	1–2 Years	2–3 Years	3–4 Years	4–5 Years
Republican	13	15	14	14	32
Loyalist	4	18	14	18	10

Wildlife Poisoning

Mr. Ron Davies: To ask the Secretary of State for Northern Ireland if he will list for each of the last five years the number of cases of wildlife poisoning in Northern Ireland caused by the illegal use of pesticides or poisons; and if he will identify the species involved and if possible the poison or pesticide involved.

Mr. Needham: The Department of the Environment for Northern Ireland is not aware of any cases of wildlife poisoning where the illegal use of pesticides or poisons has been proven.

However, in 1986 the death of one peregrine falcon was probably caused by high levels of the pesticides DDT and DDE. In 1986 another peregrine falcon and a sparrowhawk died, possibly through ingesting pesticides, and in 1987 a further sparrowhawk died from what may have been the same cause. In these cases it is not possible to state how or where the birds ingested these substances.

Neither DDT nor DDE were illegal prior to 1 January 1988 when the Control of Pesticides Regulations (NI) 1987 came into operation.

A case earlier this year of about 100 feral pigeons dying through ingesting alpha-chloralose (a stupefying bait) is being investigated. The deliberate use of alpha-chloralose against wild birds is illegal except under licence.

Social Security Payments

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many families in Northern Ireland were in receipt of family income supplement in the last year for which figures are available.

Mr. Needham: The number was 14,415 families at 1 March 1988.

Elderly People (Residential Homes)

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland if he will call for a report from the Department of Health and Social Services for Northern Ireland on the extent to which social security payments and state pensions are adequate to meet the costs of elderly people in private residential homes; and as to the extent of the practice of using residents' pocket money to meet the extra costs of staying in such homes.

Mr. Needham: Information is not held centrally about the numbers of residents in private homes for persons in need whose charges exceed the amounts of their benefits and who may use their personal expenses allowance towards the excess. From 10 April 1989, the relevant income support limits will range from £140 to £200 a week.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what information he has as to the average income of an elderly person in a residential home in Northern Ireland, excluding any private source of income.

Mr. Needham: None.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what is the latest available information that he has as to the costs of maintaining a resident in *(a)* a private residential home for the elderly in Northern Ireland, *(b)* a residential home for the elderly run by a social services board and *(c)* a private nursing home in Northern Ireland.

Mr. Needham: Information is available only on *(b)* the average cost, excluding capital and central administration costs, being some £162 a week in the year ended 31 March 1988.

Rates

Mr. Beggs: To ask the Secretary of State for Northern Ireland what is the average percentage increase in the regional rates levied by the Department of Environment for Northern Ireland in each of the last three years.

Mr. Needham: The regional rate, which is struck by the Department of Finance and Personnel each February, has increased as follows in each of the last three years.

	Per cent.
1987-88	2·9
1988-89	7·98
1989-90	12·63

Mr. Beggs: To ask the Secretary of State for Northern Ireland what is the average percentage increase in rates struck by district councils in Northern Ireland in each of the last three years.

Mr. Needham: The average percentage increase in rates struck by district councils in Northern Ireland over the last three years is as follows:

	Per cent.
1987-88	4·98
1988-89	4·26
1989-90	2·36

Married Teachers

Mr. Beggs: To ask the Secretary of State for Northern Ireland for how long married women teachers have been paying exactly the same contributions from salary as married male teachers for pension and benefit purposes.

Dr. Mawhinney: All teachers, whether male or female, married or single, have paid similar basic percentage contributions since the introduction of the teachers' superannuation scheme in the 1920s.

Mr. Beggs: To ask the Secretary of State for Northern Ireland whether contributions for pensions and benefits already paid by married women teachers prior to 6 April 1988 require to be supplemented by buying back all or part of previous service to provide equality of pension and benefit provision for a widower with that to which the widow of a teacher is entitled.

Dr. Mawhinney: Married women teachers may, by making the appropriate payments, have all or part of their service prior to 6 April 1988 counted for widowers' pension purposes.

Firearms

Mr. William Ross: To ask the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* to show for each year from 1976 to 1988, the number of *(a)* shotguns, *(b)* rifles, *(c)* handguns, *(d)* air and gas-powered weapons held on firearms certificates in Northern Ireland or as much of such information as is available to him.

Mr. Ian Stewart *[holding answer 23 March 1989]:* The information requested is as follows:

Year	*(a) Shotguns*	*(b) Rifles*	*(c) Handguns*	*(d) Air Weapons*
1976	67,148	13,877	10,189	11,830
1977	69,525	13,914	10,322	12,112
1978	71,119	13,834	9,978	12,491
1979	72,843	13,839	9,946	13,362
1980	74,836	13,550	10,257	14,450
1981	76,087	13,765	10,184	15,103
1982	77,392	13,691	10,288	15,635
1983	78,587	13,691	10,246	16,071
1984	79,845	13,654	10,188	16,659
1985	81,247	13,642	10,238	17,240
1986	82,601	13,596	10,427	17,701
1987	82,554	13,414	10,566	17,858
1988	82,913	13,321	10,752	18,114

Mr. William Ross: To ask the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* to show how many *(a)* police officers by rank and *(b)* civilian staff by grade have been engaged at police headquarters in processing firearms certificates for each year since 1976 to the latest available date; what has been the total costs of remunerating such staff in each year; in each year how many firearms certificates were (i) issued, (ii) renewed, and (iii) varied; how many applications were refused for *(a)* issues of a new certificate, *(b)* renewals and *(c)* variation; and how many certificates were withdrawn.

Mr. Ian Stewart *[holding answer 23 March 1989]:* The information requested is as follows:

(a) Police officers and ranks

	Superintendent	*Chief Inspector*	*Inspector*	*Sergeant*	*Constable*
1976	—	—	—	—	—
1977	—	—	—	—	—
1978	1	1	1	1	1
1979	1	1	1	1	1
1980	1	1	1	1	1
1981	1	1	1	1	1
1982	1	1	1	1	1
1983	1	1	1	1	1
1984	1	1	1	1	1
1985	1	1	1	1	1
1986	1	1	1	1	1
1987	1	1	1	1	1
1988	1	1	1	1	1

Note: Figures are not available for 1976 and 1977.

Pay

Year[1]	*Salaries (£'000s)*	*Overtime and Allowances (£'000s)*	*Superannuation and ERNI (£'000s)*	*Total Cost of Remuneration (£'000s)*
1976-77	64·3	19·8	21·5	105·6
1977-78	72·3	15·3	24·6	112·2

1987	3,743	29,296	8,903
1988	3,672	22,164	8,800

Year	(a) Refused to grant new firearm certificate	(b) Refused to renew firearm certificate	(c) Refused to vary firearm certificate	Firearm certificate revoked
1976	281	49	510	192
1977	293	58	504	23
1978	229	48	428	100
1979	267	92	331	101
1980	294	79	387	123
1981	360	79	390	103
1982	377	78	439	124
1983	336	79	389	157
1984	313	88	465	154
1985	326	61	374	178
1986	308	43	320	147
1987	308	53	420	146
1988	262	62	471	148

Mr. William Ross: To ask the Secretary of State for Northern Ireland how many rifles held on firearms certificates in Northern Ireland are of ·22 calibre; and how many are of larger calibre; and how many in each category are held under the condition, possession only.

Mr. Ian Stewart *[holding answer 23 March 1989]:* The information requested is as follows:

	Total Numbers	Possession only
Rifles of ·22 calibre	12,146	974
Rifles of larger calibre	1,175	786

Note: Figures refer to 31 December 1988.

Special Category Prisoners

Mr. Hume: To ask the Secretary of State for Northern Ireland what information is available to indicate how many prisoners gave up special category status in each of the past four years; for how many of these prisoners the case went to the life sentence review board within a year of giving up their status; how many reviews these prisoners have had; how many in each year *(a)* were given release dates, *(b)* had their cases referred to the judiciary, and *(c)* had their cases referred back for further review after one year, two years or three years; and how many have been released.

Mr. Ian Stewart *[holding answer 23 March 1989]:* No fixed sentence prisoners have relinquished their special category status in the last four years. Fifty indeterminate sentence prisoners have relinquished their special category status since March 1985, of whom 28 have been released and 15 either have provisional release dates or are at consultation with the judiciary with a view to setting dates. The remaining seven prisoners all transferred to segregated "Republican" or "Loyalist" wings after relinquishing their special category status and have remained in segregated accommodation. The detailed information requested is set out in the following table.

Year	Numbers relinquishing special category status	Numbers who went to LSRB within 1 year	Number of reviews since relinquishing special category status	Release dates set	Referred to judiciary	Deferred (by number of years) 0–1	1–2	2–3	Numbers released
1985	19	9	6 and 1 review 7 and 2 reviews 1 had 3 reviews 1 had 4 reviews 4 had NIL reviews —see note below	2	12	—	—	—	—
1986	23	6	5 had 1 review 5 had 2 reviews 13 had no reviews —see note below	15	11	5	—	1	3
1987	5	1	1 had 2 reviews 4 had no reviews —see note below	8	10	6	3	—	16
1988-89	3	NIL	None have had a review	8	10	2	3	—	9

Note: The 24 prisoners who relinquished Special Category status in the four years 23 March 1985-22 March 1989 and have not since been reviewed were all recommended for consultation with the judiciary prior to their decision to relinquish Special Category status.

Statistical Staff

Mr. Dobson: To ask the Secretary of State for Northern Ireland if he will give the latest figures for the number of staff presently employed, and the full complement of staff including vacant posts, by grade, in the statistical divisions in the Northern Ireland Office; if he will differentiate between staff in statistical posts and staff in administrative posts; and if he will give the staffing complements by grade, and differentiated between statistical and administrative posts, proposed for 1989-90.

Mr. Ian Stewart *[holding answer 13 March 1989]:* The Northern Ireland Office has one statistical division which is located in Belfast. The division has a complement of nine, which consists of three specialist grades (one principal economist, one deputy economist, one senior assistant economist) and six administrative grades (two executive officers, two administrative officers, two administrative assistants), a programmer is also attached to the division on loan.

The division is fully up to strength and the complement is not expected to change in the foreseeable future.

Management Consultants

Mr. Dobson: To ask the Secretary of State for Northern Ireland what were the total fees paid out by his Department to management consultants in 1979-80 and each year to date; and what is the estimate for the current year.

Mr. Ian Stewart *[holding answer 13 March 1989]:* The information for 1979-80 to 1983-84 is available throughout Northern Ireland Departments only at disproportionate cost. Information for the year 1984-85 to date is as follows:

	£
1984-85	2,352,311
1985-86	2,427,200
1986-87	2,742,192
1987-88	3,363,213
1988-89	[1]3,273,430

[1] Estimate.

In addition, the Northern Ireland Office and the Department of Finance and Personnel jointly shared the cost of a review of the Northern Ireland information services carried out in 1988. The review cost approximately £8,000.

Wages Councils

Mr. Meacher: To ask the Secretary of State for Northern Ireland if he will publish in the *Official Report* *(a)* the number and percentage of establishments and services covered by wages councils in 1979 and 1988, (i) by wages council and (ii) nationally, *(b)* the number, and percentage of register, of establishments and workers (i) checked by all methods and (ii) visited and the number and percentage in (i) and (ii) found to be illegally underpaying, nationally and by wages council, *(c)* the number and percentage of registers of establishments found to be illegally underpaying and prosecuted in each year from 1979 to 1988, and *(d)* the number of inspectors employed by wages council and nationally, in each year from 1979 to 1988.

Mr. Viggers *[holding answer 22 March 1989]:* The information requested is:

(a) The number and percentage of establishments covered by wages councils in Northern Ireland in 1979 and 1988 are as follows:

Wages Council	*1979*	*Per cent.*	*1988*	*Per cent.*
Baking	255	4·0	341	4·4
Boot and Shoe Repairing	29	0·5	100	1·3
Catering	3,825	60·6	4,469	57·9

Northern Ireland Totals	39	0·7	34	0·7	52	1·0	45	0·9	64	0·9	104	1·3	112	1·4

Notes:
These Wages Councils were abolished in 1982 and one new Wages Council (Clothing Manufacturing Wages Council) was established in their place.
Figures are not available for the period prior to 1982. There have been no prosecutions in this period.

(d) Since 1979 there have been two wages inspectors employed to enforce wages councils orders in Northern Ireland.

Royal Ulster Constabulary-Gardai Meetings

Sir Michael McNair-Wilson: To ask the Secretary of State for Northern Ireland whether meetings between officers of the Royal Ulster Constabulary and Gardai about border security take place, turn about, at rendezvous north and south of the Border; and how many meetings have taken place since the Anglo-Irish Agreement was signed.

Mr. Ian Stewart: Meetings take place frequently both in Northern Ireland and in the Republic of Ireland, but no record is kept of the number of meetings which have taken place.

Election Expenses

Mr. William Ross: To ask the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* showing how much a candidate may expend for election purposes in the local government elections this year for each district electoral area in each council area in Northern Ireland.

Mr. Ian Stewart: No. As in the rest of the United Kingdom it is for individual candidates to satisfy themselves that their expenses are kept within the limits prescribed.

ATTORNEY-GENERAL

Immigration Appeals

Mr. Darling: To ask the Attorney-General if he will list for each regional appeal adjudicator the number of immigration appeals lodged and awaiting hearing as at 28 February and at the latest available date; and in each case if he will indicate the average length by time between the lodging of the appeal and its being heard.

The Attorney-General: Appeals to the immigration appellate authorities are not assigned to individual adjudicators at the regional centres. The table indicates the number of appeals lodged and awaiting hearing listing at each regional centre, including Thanet house, on 29 March 1989. The IAAs do not record the number of appeals awaiting hearing on a daily basis and it is not possible to give figures for 28 February 1989.

Appeals against decisions of Immigration Officers and the Secretary of State
Lodged and Awaiting Hearing (29 March 1989)

	Number
Birmingham	60
Harmondsworth	116
Leeds	47
Manchester	29
Thanet House	783

Appeals against decisions of Entry Clearance Officers
Lodged and Awaiting Hearing (29 March 1989)

	Number
Birmingham	245
Harmondsworth	396
Leeds	192
Manchester	259
Thanet House	500

Note: The figures above refer to the number of cases rather than appeals because related appeals are often dealt with together.

The average length of time between the lodging and hearing of an appeal, which is the same for all IAA centres, is as follows:

(a) From receipt of the notice of appeal to despatch to the IAA:—
  (i) For appeals against ECO decisions—3 to 6 months;
  (ii) For appeals against Immigration Officer decisions—6 weeks;
  (iii) For appeals against Secretary of State decisions—5 to 6 months.

(b) From receipt of the notice of appeal by the IAA to (i) registration in Immigration Officer and Secretary of State cases—up to 4 weeks; (ii) despatch of the appeal papers in other cases to both parties' representatives in the UK—4 to 8 weeks.

(c) From receipt of papers by both parties' representatives (in appeals against ECO decisions) to the issue by each party of a certificate of readiness to proceed: this is the hands of the parties and times vary from a few weeks to several months and, if no response is received within nine months, the appeal is automatically listed for hearing.

(d) From certificate of readiness to proceed to the hearing date: up to 6 weeks, but longer where the parties request adjournment.

Mr. Darling: To ask the Attorney-General, if the Lord Chancellor has any proposals to amend the rules governing the operation of immigration appeal tribunals; and what consultations he has held in that regard.

The Attorney-General: The Lord Chancellor has no proposals at present to amend the rules governing the operation of the immigration appellate authorities. Officials of his Department regularly consult, and are consulted by, officials of the Home Office and Foreign and Commonwealth Office on the operation of the IAAs. These consultations will continue.

Mr. Darling: To ask the Attorney-General how many immigration appeals are currently awaiting hearing; and what is the average time between lodging an appeal and its being heard.

The Attorney-General: The information requested is as follows:

(i) Number of cases waiting to be listed in appeals to the adjudicators against immigration officer/Secretary of State decisions.—48
(ii) Number of cases already listed in appeals to the adjudicators against immigration officer and Secretary of State decisions.—987
(iii) Number of cases awaiting to be listed in appeals to the adjudicators against ECO decisions.—175
(iv) Number of cases already listed in appeals to the adjudicators against ECO decisions.—1,417
(v) Number of cases waiting to be listed in appeals to the immigration appeal tribunal (at the end of February 1989).—150
(vi) Number of cases already listed in appeals to the IAT (at the end of February 1989).—100

The figures above refer to the number of cases rather than appeals because related appeals are often dealt with together.

For the average time between lodging an appeal and it being heard, I refer the hon. Member to my answer to his question on the average time between the lodging and hearing of appeals by adjudicators in the regions.

Child Criminals

Mr. Thurnham: To ask the Attorney-General how many cases of victims suing the parents of child criminals were brought to court during each of the last five years; and if he will make a statement.

The Attorney-General: The data requested are not available.

NATIONAL FINANCE

National Debt

Mr. Robert Banks: To ask the Chancellor of the Exchequer (1) if he will give the total of borrowings as an addition to the national debt by each Government since 1959;

(2) if he will give the total net repayments of national debt for each Government since 1959.

Mr. Lilley: Figures for public sector borrowing and net repayment for each Government since 1959 are given below:

£ billion

Period	Total	Annual Average
1959-63	3·4	0·7
1964-65 to 1969-70	4·8	0·8
1970-71 to 1973-74	8·5	2·1
1974-75 to 1978-79	41·1	8·2
1979-80 to 1988-89	51·5	5·1

Note:

Borrowing is shown as positive, however there were net repayments in 1969-70, 1987-88 and 1988-89.

Civil Service Staff

Mr. Couchman: To ask the Chancellor of the Exchequer what was the number of staff in post in central Government Departments at 1 January.

Mr. Major: On 1 January 1989 there were 571,649½ staff in post in central Government Departments. Of these 500,981½ were non-industrials and 70,668 were industrials.

Paris Club

Mr. Moss: To ask the Chancellor of the Exchequer what is the amount of debt which has been rescheduled by creditor Governments in the Paris Club; and what is the extent of rescheduling by the United Kingdom.

Mr. Lawson: The Paris Club brings together official creditors and debtors, to agree terms for the rescheduling of payments due on officially supported export credits and development loans. During the period 1982-88, the club estimates that it has rescheduled a total of US$83 billion (£48 billion at the current exchange rate). Of this, $56 billion was principal and $27 billion was interest. The United Kingdom share was about £5 billion. In addition, the United Kingdom cancelled £79 million of old aid loans, about £890 million having already been written off in 1978-81.

Investment

Mr. Boswell: To ask the Chancellor of the Exchequer if he will make a statement on the rate of return required on new investment in the nationalised industries and the discount rate used for appraising investment in other parts of the public sector.

Mr. Major: The Government have reviewed the level and use of discount rates in the public sector. These were last reviewed in 1978. Since then the rate of return in the private sector has risen to around 11 per cent.

In the light of this, the Government have decided to raise the required rate of return for nationalised industries and public sector trading organisations from 5 per cent. to 8 per cent. in real terms before tax. The new required rate of return of 8 per cent. will be an important factor in setting new financial targets, but there will be no impact on pricing during the life of existing financial targets.

As at present, the choice of the discount rate to appraise individual projects is a matter for individual nationalised industries or trading bodies to decide in consultation with sponsor Departments and the Treasury. The Government's main concern will continue to be that the industries' approach should be compatible with achieving the required rate of return on the programme as a whole. In appraising whether or not new capital investment projects should be undertaken, proper attention will need to be paid to risk. The effect of full allowance for risk will often be implicitly equivalent to requiring a higher internal rate of return on riskier projects.

The Government have decided that the discount rate to be used in the non-trading part of the public sector should be based on the cost of capital for low-risk purposes in the private sector. In current conditions this indicates a rate not less than 6 per cent. in real terms. Risk will be analysed separately and projects (and options) which are more risky will be required to demonstrate correspondingly lower costs or higher benefits.

These proposals will ensure that the appraisal of public projects will be no less demanding in the non-trading sector than in the trading sector, both public and private. In particular, they will provide a comparable basis for the consideration of private participation in public sector activities by taking account of the full economic cost of the public sector option.

TRADE AND INDUSTRY

Quangos

Sir Neil Macfarlane: To ask the Chancellor of the Duchy of Lancaster how many departmental agencies or authorities have been created since 1979; if he will list organisations abolished since 1979; and how many personnel his Department appoints to quasi-autonomous non-governmental organisations.

Mr. Forth: Since 1979 the following executive non-departmental public bodies have been abolished within the field of the Secretary of State for Trade and Industry's present responsibilities:

British Film Fund Agency
Cotton Industry War Memorial Trust
Furniture Development Council
Metrication Board
National Film Finance Corporation
Price Commission

Additionally, the number of nationalised industry consumer councils has fallen from 43 to 33 in consequence of privatisation. Apart from a restructuring of some of these, no new executive bodies have been created. The particulars of members appointed by the Secretary of State to all non-departmental public bodies for which he is responsible are shown in the Cabinet Office publication "Public Bodies 1988." The staff of executive bodies are appointed by the bodies themselves.

Company Accounts

Mr. Gerald Howarth: To ask the Chancellor of the Duchy of Lancaster what is his policy towards the draft EEC fourth directive and the proposal to exempt small and medium-sized companies from having to lodge their annual accounts with a central registry.

Mr. Maude *[holding answer 4 April 1989]:* The Department has issued a consultative document on the draft directive amending the fourth company law directive. A copy was placed in the Library of this House in February. We have specifically invited comments on the proposal to permit small companies to make their accounts available at their registered offices rather than having to file them at a central registry. Policy will be determined in the light of responses received.

TRANSPORT

Quangos

Sir Neil Macfarlane: To ask the Secretary of State for Transport how many quasi-autonomous non-governmental organisations were abolished by his Department between 1984 and 1987.

Mr. Peter Bottomley: Three: the disciplinary inquiry under section 471 of the Merchant Shipping Act, 1984; the honorary medical advisory panel for driving and disorders of the nervous system; and the air travel reserve fund agency.

Aircraft Safety

Mr. McCrindle: To ask the Secretary of State for Transport (1) if he has any plans to require evacuation tests from aircraft to be conducted under conditions where smoke has entered the cabin for all types of aircraft; and if he will make a statement;

(2) if it is his intention to make the installation of a water spray fire suppression system for aircraft, mandatory for all new and existing passenger transport aircraft registered in the United Kingdom as soon as such equipment has been approved by the Civil Aviation Authority; and if he will make a statement;

(3) when he expects the review of British civil airworthiness requirements concerning unobstructed access of exits on Boeing 737 aircraft will be completed; if the report will be published; and if he will make a statement;

(4) if he has any plans to require airlines to remove all passenger seats blocking emergency exits; and if he will make a statement.

Mr. Peter Bottomley: These civil aviation safety regulation issues are wholly the responsibility of the Civil Aviation Authority. The authority's current position on them is set out in its follow-up action on accident reports (FACTAR) issued on 13 March 1989 in response to the AAIB report on the B737 accident at Manchester, 22 August 1985. I have arranged for a copy of the FACTAR to be sent to my hon. Friend. I understand that the authority will shortly publish the initial report on the research it has undertaken into evacuation requirements.

Bus Safety

Miss Widdecombe: To ask the Secretary of State for Transport if he will make a statement on progress on improving bus safety and to reduce the dangers of bus doors to elderly people.

Mr. Peter Bottomley: We are distributing for comment draft regulations which would require all power-operated doors in new buses and coaches to be provided with safety devices to prevent people being trapped in the doors as the bus moves off. If the doors close on to a passenger they will be required to re-open, or release the passenger. A warning light would be required to be fitted to inform the driver whenever the doors were not fully closed.

We hope that these measures will lead to further improvements in the very good safety record of buses and coaches.

The draft regulations also contain amendments to remove unnecessary restrictions on the provision of facilities for passengers in wheelchairs.

We are also proposing to allow more time for coach manufacturers to bring their designs up to the requirements of ECE regulation 66, the United Nations standard for strength of superstructure. We have already made regulations to adopt this standard as a national requirement with effect from April 1990.

Coach manufacturers have made conspicuous improvements in this area. There has not been a reported death due to roof collapse in Great Britain during the last five years.

Discussions with other member states have shown that it is still uncertain what form the European Community requirements for coach construction will take in the new single market, particularly in this area. In the circumstances we think it is right to postpone our national requirement for three years to give time for the future European Community requirements to become settled.

M1-A1 Link

Mr. Tredinnick: To ask the Secretary of State for Transport what are the consequences for the road user and others affected by the M1-A1 link road scheme of the delay which resulted from the challenges in the High Court and the Appeal Court to the orders for the Catthorpe to Rothwell section of the scheme.

Mr. Peter Bottomley: The unsuccessful challenge by the Society for the Preservation of the Battlefield of Naseby has delayed progress by about a year. As a result the cost will increase. Benefits to road users, principally journey time savings, valued at about £7 million, will be lost.

The delay has meant that safety benefits have been forgone, of the order of three fatalities and 100 personal injury accidents. Relief from traffic for communities on nearby roads has been postponed.

PRIME MINISTER

Economic Statistics

Mr. Higgins: To ask the Prime Minister if she will publish the report of the review on Government economic statistics; and if she will make a statement.

The Prime Minister: Following the Treasury and Civil Service Select Committee's report on the 1988 Budget, the Government set up an efficiency scrutiny in the Cabinet Office last June to examine the present interdepartmental arrangements for the production of Government economic statistics, and to make recommendations for achieving cost-effective improvements where necessary. The report of this scrutiny is being published today, and copies have been placed in the Library of the House.

The scrutiny report recommends a large number of specific ways of improving the quality of Government economic statistics, the great bulk of which have been accepted. They will be implemented over the next year under the supervision of the director of the Central Statistical Office. Copies of the action plan relating to these recommendations have been placed in the Library of the House.

The report also makes a number of recommendations for changes to the present interdepartmental arrangements for producing economic statistics. In accordance with these, I have decided that from July responsibility for the business statistics office and for all the statistical series for which the Department of Trade and Industry is now

responsible, and for the retail prices index and family expenditure survey, for which the Department of Employment is currently responsible, should transfer to the Central Statistical Office. The enlarged Central Statistical Office will have greater direct responsibility for the compilation of the national accounts and for the associated data collection from businesses.

As recommended by the scrutiny report, the enlarged Central Statistical Office will become a separate Government Department, responsible to the Chancellor of the Exchequer, and in due course will also become an executive agency. The director of the Central Statistical Office, as head of the Government statistical service, will continue to have access to me on matters concerning the validity and integrity of Government statistics.

The Government remain committed to reducing the burdens on business involved in the collection of economic statistics. The Secretary of State for Trade and Industry, who has lead responsibility for deregulation policy, will therefore agree with the enlarged Central Statistical Office specific objectives to ensure that the burdens on business are minimised.

These decisions amount to a very substantial programme of work over the period ahead, designed to achieve a significant improvement in the quality and relevance of Government economic statistics.

DEFENCE

Colombia

Mr. Rathbone: To ask the Secretary of State for Defence when next he plans to meet his counterpart from Colombia; and what matters will be discussed.

Mr. Sainsbury: My right hon. Friend has no plans to meet the Colombian Minister of Defence.

Meteorological Office (Computer)

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Defence if he will make a statement on problems encountered by the Meteorological Office computer bought from Control Data Corporation of Minneapolis.

Mr. Sainsbury: There have been some delays in commissioning the ETA-10 super-computer, caused by difficulties in the performance of its data packages. However, recent demonstrations show a satisfactory improvement, and the current intention is to phase the new computer into service starting in May 1989.

St. George's Barracks, Sutton Coldfield

Mr. Corbett: To ask the Secretary of State for Defence when it is planned for military use of St. George's barracks, Sutton Coldfield, west midlands, to cease; and what present plans he has for its disposal.

Mr. Neubert: The major occupant of St. George's barracks, Sutton Coldfield is the Army personnel selection centre, which is to close in April 1990. There is, however, a continuing requirement to accommodate military units in this area and we are examining the need to retain most of St. George's barracks for this purpose.

WALES

General Practitioners

Mr. Nicholas Bennett: To ask the Secretary of State for Wales if he will give for general practitioner practices in Wales the following information: *(a)* the difference between the highest and lowest referral rate to hospital, *(b)* the highest and lowest cost per patient for prescribed drugs and *(c)* the highest and lowest percentage of general practitioner prescribed drugs which are tranquillisers.

Mr. Peter Walker: The information is not readily available in the form requested. I shall write to my hon. Friend and place a copy of my reply in the Library of the House.

Potato Marketing Board

Mr. Nicholas Bennett: To ask the Secretary of State for Wales how many representations he has received from residents of Pembrokeshire in response to his review of the future of the Potato Marketing Board.

Mr. Peter Walker: Two.

Milk Quota

Mr. Nicholas Bennett: To ask the Secretary of State for Wales what movement into and out of Wales of milk quota has taken place in each of the past five years in both litres and percentage terms.

Mr. Peter Walker: Movement of quota in and out of Wales as recorded by the Milk Marketing Board in each of the past five years has been as follows:

Year	*In*	*Out*	*Net gain or loss*	*Gain or loss as percentage of total quota in Wales*
1984-85	+0·4m litres	−0·1m litres	+0·3m litres	+0·02
1985-86	+2·4m litres	−4·5m litres	−2·1m litres	−0·1
1986-87	+7·0m litres	−23·1m litres	−16·1m litres	−1·1
1987-88	+10·6m litres	−18·9m litres	−8·3m litres	−0·5
1988-89 (to 16 March)	+7·0m litres	−11·1m litres	−4·1m litres	−0·3

HEALTH

Geriatric Beds

Mr. Redmond: To ask the Secretary of State for Health if he will list the hospitals with long-stay geriatric beds, and the numbers of such beds provided by each district health authority within the Trent regional health authority; if the scale of provision is under review; and if he will make a statement.

Mr. Freeman: The information on bed numbers is not available in the form requested and for that reason the

table relates to beds in general wards for elderly patients. I understand the region is currently reviewing its strategy for the provision of services for the elderly.

Average daily available beds, general wards[1] for elderly patients, Trent Regional Health Authority, 1987-88

District Health Authority and Hospital	*Average daily available beds*
North Derbyshire

[1] Excluding wards open during day only.

Trent RHA

Mr. Redmond: To ask the Secretary of State for Health if he will list the average times for the following operations in the Trent regional health authority *(a)* hip replacements, *(b)* knee replacements, *(c)* hernias, *(d)* cataracts, *(e)* ear, nose and throat, *(f)* varicose veins and *(g)* gynaecological; what were the figures for five and 10 years ago; if he will also list the average waiting times for *(a)* to *(g)* above for the initial out-patient consultation after a general practitioner referral and the comparative figures for five and 10 years ago; and if he will make a statement.

Mr. Mellor: Such information as can be provided without incurring disproportionate cost is given in the table. Information on waiting times of out-patient referrals is not available centrally, and the hon. Member may wish to contact the chairman of the Trent regional health authority, who may be able to help further.

Estimated median interval in weeks between the time a patient[1] was placed on the waiting list and admission for treatment to an NHS hospital in the Trent RHA area, 1979-87/88.

Specialty	*1979*	*1984*	*[2]1978-88*
Ear, Nose and Throat	18	15	8
Gynaecology	8	6	5

Operation	1979	1984	1985
Total hip replacement and other arthroplasty of hip	42	35	25
Inguinal hernia operation	19	8	11
Operations on eye lens (mainly for cataracts)	19	18	16
Operations on veins (mainly for varicose veins)	26	19	20

[1] Ordinary admission—waiting list cases only.
[2] Latest available year.

AIDS

Mr. Chris Smith: To ask the Secretary of State for Health what steps he intends to take in the light of the minute, "Diet and HIV infection", of 23 February 1988, sent by Dr. P. Dewis to all regional senior medical officers.

Mr. Mellor: Claims for help with the costs of special diets are a matter for my right hon. Friend the Secretary of State for Social Security.

Mr. Chris Smith: To ask the Secretary of State for Health if he has any evidence that the routine needs of people with ARC are any greater on the first day of their diagnosis than six months into their infection.

Mr. Mellor: There is no precise and generally agreed definition of the so-called AIDS-related complex (ARC). The natural history of HIV infection includes clinical signs and symptoms which tend to relapse and remit. The needs of people who have the virus will vary from individual to individual over time.

HIV

Mr. Chris Smith: To ask the Secretary of State for Health what steps his Department recommends to those people with HIV in order that they protect their immune system.

Mr. Mellor: People who know themselves to have HIV antibodies should seek advice from their doctors, on an individual basis, on the steps they can take to maintain their health.

FOREIGN AND COMMONWEALTH AFFAIRS

Vietnam

Mr. Frank Field: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he will undertake to help strengthen trading links and improved aid flows between the European Community and Vietnam, in the event of a major withdrawal of troops by Vietnam from Kampuchea in 1989.

Mrs. Chalker: Complete withdrawal by Vietnam from its illegal occupation of Cambodia is a crucial prerequisite for considering these questions.

South-West Africa

Mr. Robert G. Hughes: To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to make representations to the South African Government on their policy towards south-west Africa.

Mrs. Chalker: The Prime Minister discussed Namibia when she met the South African Foreign Minister in Windhoek on 1 April. Namibia is regularly raised in our contacts with the South African Government including the meeting between my right hon. and learned Friend and the South African Foreign Minister on 15 March.

Hong Kong

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of China regarding the future of Hong Kong.

Mr. Eggar: The implementation of the Sino-British joint declaration on the future of Hong Kong was one of the subjects covered in the discussion which my right hon. and learned Friend the Secretary of State had with the Chinese Minister of Foreign Affairs during his visit to Tokyo in February this year and in the discussion which my noble Friend the Minister of State had with the Chinese Vice-Minister of Foreign Affairs in London on 29 March. We also hold regular discussions with the Chinese authorities on implementation of the joint declaration in the Sino-British joint liaison group, which most recently met in Peking between 14 and 17 March this year.

Namibia

Mr. David Nicholson: To ask the Secretary of State for Foreign and Commonwealth Affairs what contribution the United Kingdom will make to the United Nations transition assistance group in Namibia.

Mrs. Chalker: I refer the hon. Member to the reply I gave to my hon. Friend the Member for Dover (Mr. Shaw) on 21 December 1988 at column *274*. In addition, we have since then further agreed to contribute a seven-man reception assistance team to UNTAG.

Brazilian Debt

Mr. Battle: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has on the arrangements for repayment of the Brazilian debt to United Kingdom banks, at what rate of interest, and over what period of time.

Mrs. Chalker: I understand that the repayment of Brazil's debt to United Kingdom banks is largely determined by the financing agreement they signed in September 1988; under which the majority of Brazil's debt was rescheduled over 20 years with seven years' grace. The interest rate charged will be LIBOR + 13/16 per cent.

Mr. Battle: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the total debt of the Brazilian economy to United Kingdom banks.

Mrs. Chalker: Consolidated claims of United Kingdom-registered monetary sector institutions on Brazil are shown in table 15 of the Bank of England quarterly bulletin. The exposure of individual banks is not a matter for the Government.

Mr. Battle: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has on the Brazilian debt owed to each United Kingdom bank both actual and as a percentage of the total debt.

Mrs. Chalker: Consolidated claims of United Kingdom-registered monetary sector institutions on Brazil are shown in table 15 of the Bank of England quarterly bulletin. The exposure of individual banks is not a matter for the Government.

Turkey

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the Government of Turkey in respect of human rights abuses; and if he will make a statement.

Mrs. Chalker: As I told the House on 8 February, my right hon. and learned Friend the Secretary of State and I discussed Turkey's human rights record with the Turkish ambassador on 1 and 2 February. We impressed upon him the need for his Government to abide by the terms and conditions of the human rights conventions to which Turkey is a party. He readily accepted this point and reaffirmed the determination of the Turkish Government to secure further human rights improvements in Turkey.

Ethiopia

Mr. Faulds: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will obtain for his Department's library a copy of the State Department of the United States' report on Ethiopia as presented by Mr. Richard Schifter at a Congressional hearing in February.

Mrs. Chalker: A copy of the United States State Department's "Country Reports Human Rights Practices for 1988" has already been obtained by the Foreign and Commonwealth Office.

Romania

Mr. Temple-Morris: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has on the fate of six Romanian citizens who recently signed an open letter to President Ceausescu; and whether he will make a statement.

Mr. Waldegrave: The Romanian Government have reacted with characteristic severity to this latest open letter, which calls upon the Romanian President to renounce his "systematisation" programme; to restore constitutional guarantees regarding the rights of citizens; and to put an end to food exports.

These are legitimate requests which merit a proper response. At least three of the six co-signatories, all of whom have held prominent positions in Romanian Government and party circles, have been interrogated by the Romanian authorities. They remain under close surveillance.

We are profoundly disturbed by the Romanian authorities' ever-increasing use of intimidatory tactics to stifle freedom of expression, at a time when other Eastern European countries are moving in the opposite direction. We urge the Romanian authorities to fulfil their commitments under the Vienna CSCE agreement and to respect the human rights of the Romanian people.

Structural Adjustment Programmes

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Malawian sectoral import programme for industrial product imports and the Sudanese sectoral import programme for the irrigated sub-sector were conditional on the acceptance of IBRD and IMF structural adjustment programmes.

Mr. Chris Patten: Approval of the European Community's Malawian sectoral import programme for industrial products was subject to the conditions negotiated by the Malawi Government and the World Bank for the World Bank's industry and trade policy adjustment credit. Approval of the Community's Sudanese sectoral import programme for the irrigated sub-sector was not explicitly conditional on the IBRD-IMF-backed structural adjustment programme which the Sudanese Government were then pursuing.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the remarks, relating to IMF, IBRD and EEC policies towards structural adjustment, made by Lorenzo Natali, EEC Commissioner for Development, to the ACP-EEC joint assembly in Madrid on 15 September 1988.

Mr. Chris Patten: We welcomed a number of the comments made by Señor Natali at the joint assembly, in particular his rejection of the view that the years of adjustment by ACP countries are wasted years for development. However, we continue to take the view that support for economic reform through the provision of programme aid and support for new investments are complementary and both indispensable. No useful purpose is served by establishing a rigid division between the two forms of aid.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs how many sectoral import programmes have been agreed and with which countries and how many of these agreements and with which countries have been conditional of those countries' acceptance and implementation of IMF or IBRD structural adjustment programmes.

Mr. Chris Patten: Under the third Lomé convention, the European Community has agreed 25 sectoral import programmes. The list of recipients is as follows: Angola, Cameroon, Ethiopia the Gambia, Ghana, Kenya, Madagascar (2), Malawi (2), Mali, Mozambique (2), Niger, Sao Tomé and Principe, Senegal, Somalia, Sudan (2), Tanzania (2), Togo, Uganda (2) and Zambia. Seven of these programmes have been explicitly linked to the implementation of IMF-IBRD-backed structural adjustment programmes; the countries in question are Malawi, Mali, Mozambique, Sao Tomé and Principe, Senegal, Tanzania and Uganda. Many of the other programmes have been in support of adjustment backed by the IMF and IBRD although there has been no explicit linkage.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs what is his Department's view as to what forms of structural adjustment should be included under the fourth ACP-EEC convention (Lomé IV).

Mr. Chris Patten: In line with the development council resolution of 31 May 1988 we believe that under the fourth

ACP-EEC convention fast disbursing aid should be provided to support programmes of both macro-economic and sectoral reform.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs what is his Department's view as to how central the issue of structural adjustment should be under the terms of the fourth African, Caribbean and Pacific-European Economic Community convention, Lomé IV.

Mr. Chris Patten: The extent and depth of the adjustment needed varies considerably among the ACP countries. It is accordingly important to ensure that the Community retains sufficient flexibility to enable it to provide the type of assistance best suited to each country's individual needs.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs if it is the view of his Department that all European development fund aid subventions should be made conditional on the adoption of structural adjustment policies.

Mr. Chris Patten: No. However we believe that the economic policies being pursued by recipients should be taken fully into account in considering the form of assistance to be provided. In particular, we believe that programme aid should be made available in order to support sustainable economic policies.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the renegotiation of the fourth African, Caribbean and Pacific-European Economic Community convention, Lomé IV, with specific reference to the European Council resolution on structural adjustment policies, adopted on 31 May 1988.

Mr. Chris Patten: The Community has agreed that in the current renegotiation of the Lomé convention its approach towards support for structural adjustment measures will be on the basis of the principles set out in the development council resolution of 31 May 1988.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy in negotiations for the fourth African, Caribbean and Pacific-European Economic Community convention, Lomé IV, to remain committed to a gradualist form of structural adjustment rather than a shock approach.

Mr. Chris Patten: Economic reform is a necessary pre-condition for the recovery of economic growth in many ACP countries. It is important that it should move ahead as quickly as possible. However we recognise the need to take account of the situation in individual countries.

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement as to his Department's attitude to the atachment of structural adjustment conditionalities to fast disbursing facilities, such as sectoral import programmes and general import programmes proposed under the negotiations for the fourth African, Caribbean and Pacific-European Community convention, Lomé IV.

Mr. Chris Patten: We believe that under the next Lomé convention there should be scope for providing the forms of aid best suited to the needs of individual ACP countries, including various forms of relatively fast disbursing programme aid. If such aid is to be effective, it needs to be provided in support of sustainable economic policies and in close co-ordination with other major donors.

Import Programmes

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs what is his Department's attitude to the creation of a new fund, under a renegotiated fourth African, Caribbean and Pacific-European Economic Community convention, to finance sectoral import programmes and general import programmes.

Mr. Chris Patten: The Community is still considering the mechanisms under which it will provide aid under the next convention. Our concern is that sufficient flexibility should be maintained to enable each ACP country to receive the type of aid most suited to its individual needs.

Rain Forests

Mr. Wray: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Her Majesty's Government will call for the United Nations to hold an urgent debate to discuss how to put a stop to the destruction of the rain forests with a package of economic and technical help specifically designed to help all the inhabitants of the rain forests to protect their way of life and their environment.

Mr. Chris Patten: Her Majesty's Government are not planning to initiate a debate in the United Nations General Assembly on this important issue as it already forms part of the United Nations systemwide medium-term environment programme for 1990-95. This programme sets out a plan for the sustainable development of tropical forests and woodland ecosystems. It includes implementation of the tropical forestry action plan, involving close co-operation with the International Tropical Timber Organisation.

Central African Federation Pensioners

Mr. Stanbrook: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to help Central African Federation pensioners who elected to have their pensions paid in Zambian kwacha and who now suffer hardship as a result of the devaluation of that currency.

Mr. Chris Patten: At the recent intergovernmental meeting in Harare the four guarantor Governments agreed that all Central African Federation pensioners should be allowed to receive payment in Zimbabwe dollars with effect from 1 April 1989. At current exchange rates this will produce increases of about 500 per cent. for pensioners currently paid in Zambia kwacha, and also significant increases for those currently paid in Malawi kwacha and those paid in a basket of the three currencies. The British Government have agreed to finance this change in currency of payment at an estimated cost of £1·5 million.

Mozambique and Zimbabwe

Mr. David Davis: To ask the Secretary of State for Foreign and Commonwealth Affairs what subjects were

discussed at the recent meeting between the Prime Minister and the President of Mozambique and the Prime Minister of Zimbabwe.

Mrs. Chalker: The Prime Minister had a trilateral meeting with Presidents Mugabe and Chissano followed by a bilateral meeting with President Chissano at Nyanga in Zimbabwe on 29 March. They discussed the internal situation in Mozambique, and British aid and military assistance to the region.

ENVIRONMENT

Urban Programme

Mr. George Howarth: To ask the Secretary of State for the Environment what was the value of urban programme moneys for each year since 1979 for each of the metropolitan districts in the north-west of England at constant prices.

Mr. Trippier: The urban programme resources for each district are noted in the table.

Urban programme resources in real terms (base year 1988-89)

£ million

[1] Are partnership authorities.

Quangos

Sir Neil Macfarlane: To ask the Secretary of State for the Environement if he will list the quasi-autonomous non-governmental organisations abolished since 1979 within his department; what is the cost of all these organisations for which he is currently responsible; and how many personnel he appoints.

Mr. Ridley: The information requested is listed below:

The quasi-autonomous non-governmental organisations for which my Department has been responsible and which have been abolished since 1979, are listed as follows:

Name of body	*Date abolished*
Construction and Housing Research Advisory Council	September 1979
Ordnance Survey Review Committee	September 1979
Planning and Transport Research Advisory Council (PATRAC)	September 1979
Economic Planning Councils (England) (8)	1 September 1979
Ancient Monuments Board Committee for Rescue Archaeology	17 September 1979
Area Archaeological Advisory Committees (13)	17 September 1979
Advisory Committee on Trees in the Royal Parks	17 September 1979
Committee on Bird Sanctuaries in the Royal Parks	17 September 1979
Detergents and Allied Products—Voluntary Notification Scheme, Scrutiny Group	17 September 1979
Environmental Board	17 September 1979
Hadrian's Wall Advisory Committee	17 September 1979
Housing Corporation Advisory Committee on Co-operatives	17 September 1979
Standing Technical Committee on Synthetic Detergents	17 September 1979
Advisory Committee on the Purchase of Works of Art[1]	1 November 1979
Advisory Committee on Works of Art in the House of Commons[1] (transferred to DES (OAL)	1 November 1979
Committee on Sculptures in the Royal Parks[1]	1 November 1979
National Consultative Council for the Building and Civil Engineering Industries	2 April 1980
Location of Offices Bureau	1 May 1980
Committee to Examine Standards of Lawn Tennis in Great Britain	10 June 1980
Corby Development Corporation	30 June 1980
Construction Industry Manpower Board	8 August 1980
Housing Association Registration Advisory Committee	8 August 1980
Stevenage Development Corporation	30 September 1980
Clean Air Council	13 November 1980
Housing Services Advisory Group	27 November 1980
Advisory Panel on Institutional Finance in New Towns	30 November 1980
Centre for Environmental Studies	30 November 1980
Harlow Development Corporation	28 December 1980
Waste Management Advisory Council	January 1981
Noise Advisory Council	12 February 1981
Scientific Authority for Animals	10 March 1981
Runcorn Development Corporation (merged with Warrington)	1 April 1981
National Building Agency	19 February 1982
Advisory Committee on Local Government Audit	31 March 1982
Hydraulics Research Station Advisory Committee	1 April 1982
Bracknell Development Corporation	30 June 1982
Advisory Committee on the Protection of Birds for England and Wales	28 September 1982
Advisory Committee on Rent Rebates and Rent Allowances	31 March 1983
Committee on Recreation Management Training	31 March 1983
Building Research Establishment Advisory Committee	24 August 1983
Water Space Amenity Commission	1 December 1983
National Water Council	1 January 1984
Commission on Energy and the Environment (appointments made jointly with the Secretary of State for Energy)	13 December 1984
Ancient Monuments Board for England[2] / Historic Buildings Council for England[2]	31 March 1984
Committee on the Management of Privately Owned Blocks of Flats	November 1985
Central Lancashire Development Corporation	31 March 1986
Basildon Development Corporation	30 June 1985
Northampton Development Corporation	30 June 1985
Redditch Development Corporation	30 June 1985
Skelmersdale Development Corporation	30 June 1985
PSA Advisory Board	6 February 1986
London Housing Staff Commission	30 June 1986
Council for Small Industries in Rural Areas (CoSIRA)[3]	31 March 1988
Aycliffe and Peterlee Development Corporation	March 1988
Washington Development Corporation	March 1988
Peterborough Development Corporation	September 1988
Tyne and Wear Residuary Body	31 December 1988

[1] Not now classified as non-departmental public bodies.
[2] Wound up upon setting up the Historic Building and Monuments Commission for England under the National Heritage Act 1983.
[3] Merged with Development Commission to form Rural Development Commission.

The costs of the non-departmental public bodies for which my Department was responsible as at 1 July 1988 are shown in the HMSO publication "Public Bodies 1988", which also gives the number of appointments to those bodies.

Since 1 July 1988, four new urban development corporations have been established by my Department. The costs of these bodies and the number of appointments as at 31 March 1989 to them are as follows:

	Grant-in-aid: 1988-89	
	£ million	*Appointments*
Bristol Development Corporation	0·2	10
Central Manchester Development Corporation	2·5	10
Leeds Development Corporation	2·7	10

	£ million	*Appointments*
Sheffield Development Corporation	7·9	10

American Box Turtles

Mr. Corbett: To ask the Secretary of State for the Environment what guidance his Department issues to importers and pet shop owners about the particular problems of keeping American box turtles in captivity.

Mrs. Virginia Bottomley: None. The Department's responsibilities lie principally with the conservation status of species and the extent to which commercial exploitation might harm the survival of a species in the wild.

Water Quality (Oxford)

Mr. Andrew Smith: To ask the Secretary of State for the Environment how many cryptosporidia there have been in an average pint of water supplied by the Thames water authority to the Oxford area in each week since the present water contamination was first detected.

Mr. Howard: Current analytical techniques for monitoring cryptosporidia in water are capable of indicating whether organisms are present in a sample but are not able to provide accurate quantitative results. Techniques for quantification and determination of viability are being developed.

The following results of monitoring have been provided by the Thames water authority. In the three weeks 19 February to 11 March 1989 cryptosporidia were identified in 11 of 38 samples taken at the outlet of treatment works supplying the Oxford area, and in 46 out of 139 samples taken from the distribution system. In the two weeks 12 to 25 March 1989 cryptosporidia were not detected in any of the 25 samples at the treatment works but were detected in six out of 90 samples taken from the distribution system.

Planning Control (Enforcement)

Mr. Heddle: To ask the Secretary of State for the Environment when he expects to publish the report by Mr. Robert Carnwath, QC, on his examination of the scope and effectiveness of the Town and Country Planning Act 1971, relating to the enforcement of the planning control.

Mr. Ridley Mr. Robert Carnwath QC has recently submitted his report on the review I announced last July of local authorities' planning enforcement powers. Mr. Carnwath's report is being published today and a copy will be placed in the Libraries of both Houses.

I generally welcome the report's recommendations as a constructive contribution to strengthening the present provisions, in the Town and Country Planning Act 1971 for planning enforcement. Before deciding whether to implement the recommendations, I intend to consult widely amongst organisations with a responsibility for, or interest in, planning control. My Department is inviting comments on the report's recommendations by the end of May.

Council Tenant (Landlords)

Mr. Patnick: To ask the Secretary of State for the Environment when he will give council tenants the opportunity to choose a new landlord.

Mr. Trippier: The provisions of part IV of the Housing Act 1988, and their associated secondary legislation, come into force today. They will broaden the choices open to secure tenants of local housing authorities and other public sector landlords by giving them an effective right to seek an alternative landlord of their choosing for their existing homes. They will offer tenants better services, whether through a change in landlord or through the effect of competition on existing public sector landlords. They will open up the stocks of rented housing held by local housing authorities and others to diversity, competition and the influence of the best housing management practices. In England, the Housing Corporation, through its network of regional offices, is available to provide advice, information and assistance to tenants wishing to know more about how they can exercise choice under the scheme. Any tenant (or potential landlord) wishing to know more about these opportunities should contact the Housing Corporation. They can do this either by returning one of the coupons currently appearing in the press, or by contacting the corporation direct by telephone at its headquarters or one of its regional offices.

World Heritage List

Mr. David Porter: To ask the Secretary of State for the Environment whether any of the sites nominated in 1988 for inclusion in the World Heritage list have been accepted.

Mrs. Virginia Bottomley: At its meeting last December in Brasilia, the World Heritage committee agreed that the following three sites should be inscribed in the list:

Henderson Island, South Pacific ocean
The Tower of London
Canterbury cathedral, St. Augustine's abbey and St. Martin's church

For consideration by the committee in 1989, the sites we have nominated are:

Cambridge colleges and the Backs
Navan Fort, Northern Ireland
Maes Howe and Brogar, Orkney Islands

Electric and Magnetic Radiation

Mr. Andrew F. Bennett: To ask the Secretary of State for the Environment, pursuant to the answer of 14 March to the hon. Member for Denton and Reddish, in the light of the answer from the Secretary of State for Scotland of 15 March to the hon. Member for Denton and Reddish, on what date he expects to receive the report of the National Radiological Protection Board on the effects of very low frequency electric and magnetic radiation.

Mr. Freeman: I have been asked to reply.

I am advised that the board expects to publish its guidance on exposures to electromagnetic fields shortly. In addition, the board intends later this year to publish reviews of the existing biological and epidemiological evidence for the effects on health of electromagnetic radiation.

Parish Councils

Mr. Blunkett: To ask the Secretary of State for the Environment if he will publish his estimates of parish council precepts in 1987-88.

Mr. Gummer *[holding answer 23 March 1989]:* Parish community precepts in England amounted to £61·3 million in 1987-88.

Mr. Blunkett: To ask the Secretary of State for the Environment if he will publish his best estimates of the average level of community charge in 1990-91 in parish councils with *(a)* a population of more than 10,000 and *(b)* a population of less than 10,000.

Mr. Gummer *[holding answer 23 March 1989]:* I have made no estimates of the average level of community charge in 1990-91 in parish councils.

Mr. Blunkett: To ask the Secretary of State for the Environment if he will publish his best estimates of the average level of precepts in 1988-89 and 1989-90 for parish councils with *(a)* a population of more than 10,000 and *(b)* a population of less than 10,000.

Mr. Gummer *[holding answer 23 March 1989]:* Estimates of the average level of parish/community precepts for 1988-89 are published by the Chartered Institute of Public Finance and Accountancy in "Finance and General Statistics". Information for 1989-90 is not yet available. I have made no estimates of the average level of precepts for parish councils broken down by size of population.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for the Environment what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Ridley *[holding answer 4 April 1989]:* Central records are collated annually after the end of the financial year. The latest readily available information therefore covers 1987-88.

The total amount spent was £5·0 milllion and the contracts awarded to management or computing consultants by the Department of the Environment (excluding PSA) in the financial year 1987-88 were as follows:

Firm	*Subject of Assignment*
Admiral Management Services Ltd	DOE's method ofprocessing European Regional Development Fund Infrastructure Grants
Arthur Young	LGFP Office Automation Project quality assurance; OA guidelines.
B.I.S. Applied Systems	Strategic review of data communications and networking options
B.I.S. Applied Systems	Distributed processing
Civil Civil Service Catering Organisatiom	Monitoring of PPC Catering Outlets
Coley Porter Bell	Shop refit design
Coopers and Lybrand Associates Ltd	Local authorities' interests in companies
Coopers and Lybrand Associates Ltd	Planning Appeals Management Information System
Dames and Moore	Hazard Assessment of Ladfill Operations
Davis, Langdon and Everest Consultancy	Improving UK overseas trade data in building materials
D. E. Barnard Systems Ltd	BRE Fire Research Station Library Study
D. E. Barnard Systems Ltd	BESMIS staff management sub-system
Deloitte Haskins and Sells	Policy Review of Commission for New Towns
Ecotec Research and Consulting Ltd	Bristol/Manchester UDC Study
Ecotec Research and Consulting Ltd	Study of proposed extension of Black Country Development Corporation into Wolverhampton
Electrowatt Engineering (UK) Services Ltd	Evaluation and radiological assessment of Environmental Monitoring Data
Ernst and Whinney	Review of staffing and procedures of local valuation panel offices
Ernst and Whinney	Review of Housing Corporation monitoring procedures
EXTEL	Hinet Station, teleprinter, VDU's (hardware) maintenance for PSU, South Ruislip
The Grant Leisure Group	Tower of London retailing and visitor management
Healey and Baker	Advice on disposal of New Town assets
ICI plc (Billingham)	Monitoring of environmental radioactivity levels around nuclear installations
KPMG Peat Marwick McLintock	Policy review of the Royal commissions on Ancient and Historical Monuments in England, Scotland and Wales
KPMG Peat Marwick McLintock	Future development of London Zoo and Whipsnade Zoo
Land Use Consultants	Brompton Cemetery

Firm	Subject of Assignment
Lawrence Gould Consultants (and Clyde Surveys)	Land-use change: quality control of statistical system
Ludhouse Computing Ltd.	Sales order processing system, software maintenance; PSU South Ruislip
The Mindworks Partnership	ADP career development in BES
Ove Arup and Partners	Regents Park/Hanover Gate-pedestrian traffic survey
PA Computers and Telecommunications	BRE Publications Study
PA Consulting Group	Consultancy to develop a five-year marketing plan for BRE's private sector activities
PA Personnel Services	Search for UDC Chief Executives—Bristol, Central Manchester, Leeds and Sheffield
PE/Inbucon	Management Review of Council for Environmental Education
PE/Inbucon and Land Use Consultants	Kensington Gardens study
Peter Peregrinus Ltd	Processing research information for ENREP + ERIB databases
PIEDA Planning Economic Development Consultants	Leeds UDC Study
Price Waterhouse Ltd	Costs of Community Charge
Scicon	Corals maintenance and support
Scicon	Corals enhancement
Signal	Support for SOLIS 3
Spicer Consulting Group	Review of finance and accounts system
Roger Tym and Partners	DLG study
Russell Reynolds Associates	British Waterways Board—executive search for new chairman
Russell Reynolds Associates	Wessex Water Authority—executive search for new chairman
Schlackmans	Market research at the royal palaces
Shaftesbury Health and Safety Consultants Ltd	Hyde Park Workshops—health and safety inspection
Stoy Hayward Associates	Grant appraisal ad-hoc accountancy advice
Touche Ross and Co.	Efficiency review of Wessex and South West Water Authorities
Travers Morgan Planning	Woodland Maintenance Costs
Ventures Consultancy	Hampton Court Business Plan
Sir Owen Williams and Partners	Assistance with consideration of reclamation schemes submitted for derelict land grants.

United Nations Environment Programme

Dr. Cunningham: To ask the Secretary of State for the Environment who represented Her Majesty's Government at the latest United Nations environment programme conference in Basle on the international trade and regulation of hazardous and toxic wastes; what proposals were made at the conference by Her Majesty's Government; and if he will make a statement about the outcome of the conference.

Mr. Ridley *[pursuant to his reply, 22 March 1989, c. 651]:* I undertook to make a statement about the outcome of the diplomatic conference in Basle on 20 to 22 March to draw up a convention on the control of transboundary movements of hazardous wastes and their disposal. Over 100 countries participated in the conference: 34 signed the convention at the conference but the majority (including the United Kingdom) did not. The Government welcome the thrust of the convention, but the final text did not emerge until the last day of the conference. The convention is still open for signature, and the Government are now studying the final text.

Redbridge (Housing Stock)

Mr. Corbyn: To ask the Secretary of State for the Environment what percentage of tenants under the London borough of Redbridge proposals for a transfer of housing stock to a housing association need to consent to the transfer for it to go ahead.

Mr. Trippier *[holding answer 23 March 1989]:* In accordance with schedule 3A to the Housing Act 1985 the Secretary of State would be required to withhold his consent to the transfer if it appeared to him that the

majority of the tenants affected did not wish the transfer to proceed. The Secretary of State may have regard to any information available to him, including any ballot arranged by the council. I understand that the transfer proposals, which the council approved on 23 March include the principle that a 50 per cent. turnout and a simple majority of those voting should be required.

EMPLOYMENT

Wages

42. **Mr. Dunnachie:** To ask the Secretary of State for Employment how many workplaces were visited, and how many of them were found to be illegally underpaying, for the latest available year by the wages inspectorate divisions covering Scotland.

Mr. Nicholls: Information on the number of workplaces in Scotland visited in 1988 for the purpose of checking pay and the number where underpayments were found was included in the reply given on 1 March to the hon. Member for Birmingham, Ladywood (Ms. Short) at columns *201-6*. Information on the number of workplaces visited in Scotland in 1988 for advisory purposes was included in the reply given on 14 March to the hon. Member for Manchester, Blackley (Mr. Eastham) at columns *178-79*.

Training Premiums

Ms. Short: To ask the Secretary of State for Employment what level of weekly premiums will be paid to *(a)* under 25-year-olds, *(b)* a childless married person and *(c)* other trainees after income support levels are uprated in April 1989.

Mr. Nicholls: The weekly rates of training premium at the time of the benefit uprating will be:

(a) £11·95 for single people aged under 25 and in receipt of the standard rate of income support;
(b) £11·25 for couples without children and in receipt of the standard rate of income support;
(c) £10 for all others.

Trade Union Members (Rights)

Mr. Meacher: To ask the Secretary of State for Employment if he has yet appointed a commissioner for the rights of trade union members under the terms of the Employment Act 1988; and how many persons he has approached and offered the post to in the last year.

Mr. Nicholls: I refer the hon. Member to the reply to my hon. Friend the Member for Maidstone (Miss Widdecombe) on 24 November 1988. In accordance with the guidance published by the Cabinet Office and Her Majesty's Treasury about such appointments, several possible candidates were identified, including Mrs. Gill Rowlands.

Skills Training Programme

Mr. Meacher: To ask the Secretary of State for Employment what has been the annual operating surplus of the Skills Training Agency since it was established.

Mr. Cope: The Skills Training Agency has operated on a trading account basis since 1984-85. No financial results are available prior to that year. Operating surplus/deficits from 1984-85 are as follows:

	£000
1984-85 (Deficit)	15,157
1985-86 (Deficit)	17,539
1986-87 Surplus	220
1987-88 (Deficit)	2,896

Employment Training

Mr. Meacher: To ask the Secretary of State for Employment if he will list all the companies, out of the 100 largest companies, who have declined to co-operate with the employment training scheme; of the remainder, how many places each of them has contracted with the employment training scheme and how many have been so far filled; and what percentage that is in each case.

Mr. Nicholls *[holding answer 4 April 1989]:* The Training Agency's records only show which large companies have contracted directly as training managers. It is not, therefore, possible to provide the information in the form requested.

ENERGY

Distribution Boards

Mr. Thurnham: To ask the Secretary of State for Energy when he will next be meeting the chairmen of distribution boards, and if he will make a statement.

Mr. Michael Spicer: My right hon. Friend and I meet the area board chairmen regularly to discuss various matters of mutual interest.

AGRICULTURE, FISHERIES AND FOOD

Potato Yields

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what information he has as to changes in potato yields per acre in the United Kingdom, other European Community countries, Egypt and Cyprus over the past ten years.

Mr. Ryder: Potato yields over the past 10 years are given in the following table:

Tonnes per hectare

	1978-79	*1979-80*	*1980-81*	*1981-82*	*1982-83*	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*
Belgium	35·6	32·4	30·0	31·9	35·8	27·1	36·8	37·4	35·4	36·4
Denmark	27·1	26·6	24·8	29·1	35·5	28·7	32·0	36·2	37·6	32·0

Potato Market

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the potato market.

Mr. Ryder: United Kingdom production in the current July/June crop year was 6,899,000 tonnes compared with 6,760,000 tonnes in 1987-88. On the other hand, wastage has been higher as a result of storage problems in a mild winter and stocks are correspondingly low. In Great Britain the most recent weekly average producer price is £61·08 per tonne compared with £73·45 at the corresponding time last year. As a result of these low prices the Potato Marketing Board has intervened in the market and has so far purchased some 97,000 tonnes.

Cereal Sector

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the cereal sector.

Mr. Ryder: The 1988 cereals harvest in the United Kingdom was, at 20·9 million tonnes, the lowest since 1981. Nevertheless, the surplus of wheat and barley in 1988-89, including stocks in intervention stores, is estimated at over 5·5 million tonnes. It is expected that most of this surplus will be exported before the end of the season, substantially reducing intervention stocks. Prices have generally remained firm. In the European Community production was estimated by the Commission in November at 162·5 million tonnes, 1·6 per cent. above the stabiliser of 160 million tonnes. As a result intervention prices will be reduced by 3 per cent. For the 1989-90 marketing year, and the definitive rate of the additional co-responsibility levy for 1988-89 has been set at 1·6 per cent. of the wheat intervention price; additional levy paid at a higher rate is being partially repaid.

Arable Sector

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the arable sector.

Mr. Ryder: In 1988-89, United Kingdom beet sugar production exceeded 1·3 million tonnes, one of the highest levels on record. Returns to United Kingdom sugar beet producers have been broadly in line with those in the previous year, the EC sugar price for 1988-89 having been maintained at the 1987-88 level. For oilseeds and protein crops, returns in 1988-89 have been affected by the operation of the EC stabiliser mechanism for these crops. United Kingdom production of oilseed rape in 1988-89 is estimated at about 1 million tonnes, with prices reduced by 7·65 per cent. below the institutional price level because Community production has exceeded the maximum guaranteed quantity (in effect a small price increase over 1987-88 when prices were reduced by 10 per cent.). United Kingdom production of protein crops is estimated to have reached a record level of about 892,000 tonnes this year. Prices have been reduced by about 10 per cent. in this sector as a result of the stabiliser mechanism.

Sheep Sector

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the sheep sector.

Mr. Donald Thompson: The sheep sector remains in a satisfactory condition. The latest statistics on production, consumption and exports all show increases.

Beef Sector

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the beef sector.

Mr. Donald Thompson: Throughout 1988 prices for finished beef were above those in the previous year. Prices fell at the end of 1988 and are now very similar to those at the same time last year. Prices for other stock, including stores and calves, remain above the levels last year, while the numbers of suckler cows and heifers in calf for beef production continue to grow, reflecting producers' expectations for the beef market.

Dairy Sector

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the dairy sector.

Mr. Donald Thompson: Net income from dairy farming in 1988-89 is estimated to have risen in real terms to its highest level since 1982-83. Improvements in profitability have resulted in recent years from increases in the ex-farm price of milk, reduced usage of feed concentrates and improved returns from calf sales. In addition, the dairy sector as a whole is benefiting from the recovery in markets brought about by the restriction of supply through quotas and the disposal of old intervention stocks of milk products.

Monetary Compensatory Amounts

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what progress is being made by the European Community towards the abolition of monetary compensatory amounts by 1992.

Mr. MacGregor: Following pressure from the United Kingdom Government, the Council and the Commission have agreed that the completion of the internal market requires the abolition of monetary gaps, and therefore of monetary compensatory amounts.

The devaluations which took place on 1 January this year included an agreed first step in dismantling United Kingdom monetary gaps, and the Commission's price proposals for 1989-90 envisage the next step being taken in the current price negotiations.

The Commission is to report later this year on how the process of dismantlement should be completed.

Ware Potatoes

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what has been the total tonnage of imports of ware potatoes in each of the past 10 years, what percentage this tonnage represents as a percentage of *(a)* total potato yield and *(b)* total potato sales in each year; and what was the total purchase by the Potato Marketing Board of surplus potatoes in each of the last 10 years.

Mr. Ryder: This information can be derived from the final table in "Potato Statistics in Great Britain 1983-87", published by the Potato Marketing Board. A copy has been placed in the Library of the House.

Eggs

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current position regarding sales of eggs, egg production and numbers of laying hens.

Mr. Donald Thompson: Contact with major packers indicates considerable variations in sales of shell eggs on to the United Kingdom market but it is thought that these are around 20 to 25 per cent. below the levels experienced in November. Throughput at packing stations is now about 11 per cent. down on November. The balance of throughput is going for export and into egg products. At the agricultural census taken on 1 December 1988 the number of egg-laying fowls in the United Kingdom was 36·6 million.

Potato Quota

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what movement into and out of Wales of potato quota has taken place in each of the past five years in both tonnage and percentage terms.

Mr. Ryder: I have asked the Potato Marketing Board to send this information to my hon. Friend.

Early Potatoes

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food whether he will take into account in his decisions on the future of the Potato Marketing Board the representations of growers of early potatoes regarding the impact that the removal of the direct intervention buying system will have on the early potato market.

Mr. Ryder: Yes.

Adult Diets (Survey)

Mr. McLoughlin: To ask the Minister for Agriculture, Fisheries and Food when he expects to publish the national nutritional survey of adults diets, conducted during 1988; and if he will make a statement.

Mr. Ryder: The extensive results of this survey are still being analysed. I expect to publish a preliminary report before the end of the year.

Whales

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food (1) what discussions he has had with European Community Ministers about preventing the Japanese from killing whales; and if he will make a statement;

(2) what discussions he has had with European Community Ministers about imposing economic sanctions on Japan because of that country's continuation of killing whales.

Mr. Donald Thompson *[holding answer 23 March 1989]:* We have made clear our serious concerns about the current Japanese feasibility programme of whaling for scientific purposes both directly to the Japanese Government on several occasions and through the International Whaling Commission. The European Community does not have competence on whaling matters as such but those member states with an interest in whaling are members of the IWC and we consult with them in that forum.

HOME DEPARTMENT

Old-Age Pensioners (TV Licence)

Mr. Skinner: To ask the Secretary of State for the Home Department if he will now introduce free television licences for all old-age pensioners; and if he will make a statement.

Mr. Renton: I refer the hon. Member to the reply I gave him on 15 December 1988 at column *710*.

Stocken Prison

Mr. Latham: To ask the Secretary of State for the Home Department what action has been taken to deal with underground electric cables at Stocken prison discovered to be waterlogged following the flooding of ducts; and what has been the effect of these difficulties on electricity supplies to married quarters.

Mr. Douglas Hogg: No such difficulty has been brought to our attention and there has been no effect on electricity supplies to married quarters at Stocken prison. The cables are well insulated, but any problems caused by flooding of ducts would be dealt with the prison's works department.

Mr. Latham: To ask the Secretary of State for the Home Department what work is currently in progress at Stocken prison to replace defective heating pipes; what is the age of the pipes in question; and what will be the cost of this work.

Mr. Douglas Hogg: A survey of the heating system is under way. To date, defective heating pipes have been

found in one wing and in the central administration block. Twenty metres of pipe, which was five years old, has been replaced at a cost of £600.

Mr. Latham: To ask the Secretary of State for the Home Department how many cells in Stocken prison are experiencing unpleasant smells linked with the plumbing system; and what action is being taken to rectify these problems.

Mr. Douglas Hogg: No complaints have been received about unpleasant smells from the plumbing system.

Mr. Latham: To ask the Secretary of State for the Home Department whether, following the closure of a cell in A wing at Stocken prison because of building problems, action is being taken to undertake the necessary structural repairs; and what liability exists for paying for this work under the contract conditions.

Mr. Douglas Hogg: The action to take following the closure of a cell in E wing, not A wing, at Stocken prison because of building problems is under consideration by the Home Office directorate of works. Liability, under the contract conditions, for paying for the work which will be required, has yet to be established.

Mr. Latham: To ask the Secretary of State for the Home Department what action has been taken since the ministerial letter from the hon. Member for Grantham (Mr. Hogg) dated 5 September 1988 to obtain the advice of an architect regarding the sloping ceilings in the quarters at Stocken prison; and when further action will be taken to implement the advice.

Mr. Douglas Hogg: Following a vist by a Home Office architect, it has been confirmed that the provision of suspended ceilings would improve the heating of these quarters. A pilot study will be undertaken shortly to see whether this would provide an acceptable solution.

Mr. Latham: To ask the Secretary of State for the Home Department whether he will list the action which has been taken since the ministerial letter from the hon. Member for Grantham (Mr. Hogg) of 5 September 1988, to eliminate the nuisance from dust in the married quarters at Stocken prison; and whether the measures have been successful.

Mr. Douglas Hogg: Insulation materials have been examined but do not appear to have caused the problem of dust in the married quarters at Stocken prison, which has now been referred to the local environmental health department. Its report is expected shortly.

Mr. Latham: To ask the Secretary of State for the Home Department what action has been taken, since the ministerial letter of 20 September 1988 by the hon. Member for Grantham (Mr. Hogg), to improve the quality of central heating at the married quarters at Stocken prison; how many claims are outstanding for compensation for excessive heating bills; and when they will be settled.

Mr. Douglas Hogg: The question of the quality of heating in the married quarters at Stocken prison has been referred to the building advisory branch of the Property Services Agency, whose report is awaited. One claim has been received for compensation for excessive heating bills, but liability has yet to be established.

Mr. Latham: To ask the Secretary of State for the Home Department what action has been taken since the visit to Stocken prison on 28 November 1988 by a representative of the building advisory board to deal with dampness in married quarters, following the ministerial letter of 8 December 1988 by the hon. Member for Grantham (Mr. Hogg); how many claims for compensation for damage to clothing through dampness are outstanding; and when they will be settled.

Mr. Douglas Hogg: The question of dampness in married quarters was referred to the building advisory branch of the Property Services Agency, whose report is awaited. Two claims for compensation for damage to clothing are outstanding, but the question of liability has yet to be established.

Mr. Latham: To ask the Secretary of State for the Home Department what action has been taken to improve the street lighting in the married quarters of prison officers at Stocken prison since the ministerial letter of the hon. Member for Grantham (Mr. Hogg) dated 5 September 1988.

Mr. Douglas Hogg: A contract has been let to improve the street lighting in the vicinity of the married quarters of prison officers at Stocken prison. Work started on 21 March.

Mr. Latham: To ask the Secretary of State for the Home Department what is the current number of basic grade prison officers in post at Stocken prison; and what arrangements have been made to increase staffing to cover for officers on long-term sick leave.

Mr. Douglas Hogg: On 13 March 1989 there were 77 basic grade officers at HMP Stocken. Staffing levels at all prison establishments make allowance for about one fifth of staff to be absent at any one time on sick leave, annual leave or training courses.

Mr. Latham: To ask the Secretary of State for the Home Department whether two extra prison officers will be allocated to Stocken prison during April in accordance with the reduction of hours proposals in the fresh start agreement.

Mr. Douglas Hogg: We have recruited sufficient staff nationally for the additional officers required under the fresh start framework agreement to be in post before the reduction of hours on 1 April. The uniformed complement at HMP Stocken has been increase by two with effect from 1 April. The prison already has more staff in post than the new complement figure.

Mr. Latham: To ask the Secretary of State for the Home Department when the new wing at Stocken prison will be completed; how many additional inmates will be accommodated in it; and how many additional prison officers will be allocated to the prison to cope with this expansion in inmate numbers.

Mr. Douglas Hogg: The new house block being built at HMP Stocken will provide 96 single cells and is programmed for completion by the end of 1989. The present intention is to post an additional 19 officers and two night patrols to the prison as a result.

Mr. Latham: To ask the Secretary of State for the Home Department what discussions have taken place with

the Anglian water authority to ensure that the local sewage disposal system can cope effectively with the forthcoming expansion of Stocken prison; and whether he will make a statement.

Mr. Douglas Hogg: No discussions have taken place, but in correspondence in May 1988 Anglian Water confirmed that the additional sewage caused by the expansion to Stocken prison would not exceed the capacity of the pumping station.

Immigration

Mr. McCrindle: To ask the Secretary of State for the Home Department how many Commonwealth immigrants have been allowed to settle in Britain in each of the last five years; what were the comparable figures for the previous five years; and if he will make a statement.

Mr. Renton: The number of Commonwealth citizens accepted for settlement in the United Kingdom in each of the years 1979-88 is published in table 22 of "Control of Immigration: Statistics United Kingdom 1987" (Cm. 415) and in table 1 of Home Office statistical bulletin issue 10/89, "Control of Immigration: Statistics—Fourth Quarter and Year 1988", copies of which are in the Library.

Mr. Darling: To ask the Secretary of State for the Home Department how many individuals left the United Kingdom under the supervised departure procedure without having been served with a notice of intention to deport in each month of 1988 and 1989.

Mr. Renton: Supervised departure may be authorised, as an alternative to deportation, either under section 3(6) of the Immigration Act 1971 if a court makes a recommendation for deportation, or under section 3(5) following the issue of a notice of intention to deport. The latest available information on the use of supervised departure is contained in table 14 of Home Office statistical bulletin 10/89 "Control of Immigration: Statistics—Fourth Quarter and Year 1988", a copy of which is in the Library.

Mr. Darling: To ask the Secretary of State for the Home Department if he has any proposals to amend the immigration rules: and what consultations he has held in that regard.

Mr. Renton: We have it in mind to make some changes to the immigration rules in the next few months. We have not launched formal consultations, but there has been some discussion of possible changes to the rules with the Joint Council for the Welfare of Immigrants and the Immigration Law Practitioners' Association.

DNA Testing

Mr. Darling: To ask the Secretary of State for the Home Department if he will list all owners and operators of laboratories licensed by him to carry out DNA testing.

Mr. Douglas Hogg: The Home Office does not license laboratories to carry out DNA testing.

Latchmere House

Mr. Darling: To ask the Secretary of State for the Home Department what consultations he has had with regard to his proposal to transfer detainees from Latchmere house to Haslar, Gosport; and if he will list those organisations which have indicated support for his proposal.

Mr. Douglas Hogg: On 22 March I met a delegation led by my hon. Friend the Member for Richmond and Barnes (Mr. Hanley), which included representatives from Richmond borough council, local residents and the Richmond citizens advice bureau. On 17 March officials met representatives of advisory agencies which specialise in immigration matters. We have so far received representations only from organisations which are opposed to the proposal.

Satellite Television

Mr. Corbett: To ask the Secretary of State for the Home Department what proposals he has to amend section 92 of the Representation of the People Act 1981 to require satellite television organisations broadcasting to the United Kingdom to report on parliamentary by-elections and general elections on the same basis and under the same conditions regarding balance and impartiality as apply to the BBC and ITV companies.

Mr. Renton: Our White Paper on broadcasting proposes that satellite services uplinked from the United Kingdom should be subject to various consumer protection requirements, including that news should be impartial and accurate and that due impartiality should be preserved in dealing with matters of political or industrial controversy or relating to current public policy. There is also a provision in the Council of Europe convention on transfrontier television which requires broadcasters to ensure that news fairly presents facts and events and encourages the free formation of opinions. Those countries which adopt the convention will be required to ensure that their broadcasting services, including satellite channels, comply with its provisions.

Entry Applications

Mr. Darling: To ask the Secretary of State for the Home Department if he will list for each country the number of *(a)* applications and *(b)* refusals of applications to enter the United Kingdom for (i) settlement and (ii) temporary purposes in (1) 1987 and (2) 1988.

Mr. Renton *[holding answer 14 March 1989]:* The information requested is available centrally only for countries in the Indian sub-continent and Hong Kong. This information, and that for other countries on all applications for entry clearance granted and refused, is given in the following tables.

Table 1
Applications for entry clearance to the United Kingdom

Number of persons

n/a Not available.

[1] Including applications for a certificate of entitlement to, or a confirmation of, the right of abode in the United Kingdom (except in Ghana, Hong Kong and Sir Lanka).

[2] Because of rounding, the figures in this table may be slightly different from those implied by Table 1.

[3] Granted initially or on appeal.

[4] These applications may have been received in an earlier period.

[5] Five of fewer.

Prisoners (Escape Attempts)

Mr. Bermingham: To ask the Secretary of State for the Home Department how many prisoners escaped from prisons in England and Wales in each of the years since 1979; and if he will list the prisons from which the escapes were made.

Mr. Douglas Hogg *[holding answer 20 March 1989]:* The following tables show escapes by prisoners from closed prisons. The information in relation to the years from 1979 to 1985-86 has largely been derived from published annual reports on the work of the prison department, the most convenient source. The information for 1984-85 covers the 15-month period from 1 January 1984—31 March 1985. Thereafter, information relates to the financial year, until the final period which covers from 1 April to 31 December 1988:

Steel-Cored Bullets

Mr. William Ross: To ask the Secretary of State for the Home Department if he will place in the Library a copy of the article by Thomas Alfred Warlow of his Department's forensic laboratory on the properties of steel-cored bullets published in the British journal of accident surgery.

Mr. Douglas Hogg *[holding answer 23 March 1989]:* Mr. Warlow contributed four technical paragraphs on the firearms used in the Hungerford shooting incident to an article in *Injury*, the British journal of accident surgery, describing the management of the 14 patients admitted to Princess Margaret hospital, Swindon after the Hungerford shooting incident.

A copy of the article has been placed in the Library.

SCOTLAND

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Scotland what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Rifkind *[holding answer 4 April 1989]:* In 1988 my Department spent £406,970 on management consultancy and £70,066 on computer consultancy.

The contracts awarded by my Department in 1988 were as follows:

	Subject of assignment
Recovery Operation Centres Ltd.	To review existing computer data security and prepare a computer contingency plan.
PIEDA	Impact of the rundown of Dounreay Nuclear Establishment and alternative economic opportunities for Caithness (jointly with Highlands and Islands Development Board). Study development proposals for Stirling Old Town put to HBMD by the LIR Leisure Group in conjunction with Stirling District Council.
Deloitte, Haskins and Sells	To produce work programmes for the computer audit of Health Boards. Financial and Management Information System for Scottish Homes.
Coopers and Lybrand Associates	Organisational Structure of Scottish Homes. Review of Information Systems for Scottish Homes. Human Resource Strategy for Scottish Homes. HAG and Loan Accounting Project for Scottish Homes. To assess the future debt servicing capability of the 5 Scottish New Towns industrial and commercial assets, and to advise on the consequential calculation of the amount of National Loans Fund debt to be written off.
Gilpin Black Associates	Management Audit for Scottish Homes.
Edinburgh University Computer Services	Advice on implementation of Scottish Office digital mapping system.
Firn, Crichton Roberts Ltd.	Strathclyde Integrated Development Operation (jointly with Strathclyde Regional Council).
Open College	Consultancy on Open Learning.
University of Warwick	Determination of performance measurements in Further Education.
Dr. S. Clarke	Evaluation and quality of learning and teaching in Further Education.
BIS Applied Systems Ltd.	Consultancy Services for HMI Office Automation Project.
Scottish Examination Board	Systems analysis and computer programming work undertaken in development of procedures for the HMI national task for the use of SCE results.
Dundee College of Technology	Investigation of the administrative arrangements in Jordanhill School.

Coal

18. **Mr. Hood:** To ask the Secretary of State for Scotland what steps he has taken to try to ensure a long-term supply contract for Scottish coal between British Coal and the South of Scotland electricity board.

Mr. Lang: Following discussions with my right hon. and learned Friend and my right hon. Friend the Secretary of State for Energy, the chairmen of the South of Scotland electricity board and British Coal have now agreed to negotiate on the basis of a five-year contract under which the Scottish electricity industry would purchase 2 million tonnes of coal per annum subject, in respect of the fourth and fifth years, to the conclusion of a satisfactory contract with the electricity supply industry in England and Wales for exports of electricity over the interconnector amounting to 600 MW per annum.

Self-Governing Schools

19. **Mr. McFall:** To ask the Secretary of State for Scotland what representations he has received concerning the Government's proposals for self-governing schools in Scotland.

Mr. Michael Forsyth: I refer the hon. Member to the answer my right hon. and learned Friend gave earlier to the hon. Member for Western Isles (Mr. Macdonald).

SCOTLAND

Community Charge

13. **Mr. Ron Brown:** To ask the Secretary of State for Scotland if he will make a statement on arrangements for paying the community charge in respect of official ministerial residences in Scotland.

Mr. Rifkind: The only residence available for Ministers in Scotland is Bute house in Edinburgh. I understand that Lothian region's community charges registration officer has determined that, with the exception of the caretaker's flat in the basement, the property is non-domestic in nature and will therefore be subject to non-domestic rates. Bute house will be considered as a Crown property for this purpose.

20. **Mr. Douglas:** To ask the Secretary of State for Scotland if he will make a statement on the criteria which are being used by community charge registration officers to remove individuals from their register for limited periods.

Mr. Lang: Community charge registration officers will remove the name of an individual from the register in a particular local authority area only if he is no longer liable to pay the community charge there. In addition, a registration officer may exclude an individual's register entry from the publicly available parts of the register if that individual has applied for anonymous registration. In every case, registration officers will base their decisions on all the relevant circumstances.

23. **Mr. Strang:** To ask the Secretary of State for Scotland what are the latest estimates for the costs of administration of the poll tax in the coming year.

Mr. Lang: The latest estimate by regional and islands councils of the cost of administering the community charge in 1989-90, including costs of registration and collection, but excluding the cost of the rebate scheme, is £31·73 million.

27. **Mr. Sillars:** To ask the Secretary of State for Scotland what discussions he has had since the 1 April with poll tax levying authorities.

Mr. Lang: None.

Mr. Barry Field: To ask the Secretary of State for Scotland when he expects to be able to report on the levels of payment of the community charge.

Mr. Lang: Although I expect it to be some time before reliable information becomes available, I would expect the level of payment to be broadly the same as it has been for domestic rates.

"Priorities for Patients"

21. **Mr. McKelvey:** To ask the Secretary of State for Scotland how many representations he has had from interested bodies in Ayrshire in response to the White Paper "Priorities for Patients".

Mr. Michael Forsyth: Some 65 letters have been received from the Ayrshire area offering observations on the White Paper "Working for Patients", most being from general practitioners.

Constitutional Convention

22. **Sir Russell Johnston:** To ask the Secretary of State for Scotland what representations he has received as a result of the first meeting of the Scottish constitutional convention.

Mr. Rifkind: None.

29. **Mr. Galloway:** To ask the Secretary of State for Scotland if he has received an invitation to attend the next meeting of the Scottish constitutional convention; and if he will make a statement.

Mr. Rifkind: I have received no specific invitation to the next meeting of the convention. It would be quite wrong to participate in a convention designed to achieve change which the Government believe would be harmful to Scotland.

Health Care

24. **Mr. Steel:** To ask the Secretary of State for Scotland if he will make a statement on his future plans for the provision of health care in rural areas in Scotland.

Mr. Rifkind: The proposals in the White Paper "Working for Patients" are designed to improve health care for patients in rural areas as in other parts of Scotland. They include an undertaking to safeguard the position of doctors in the less-populated areas of Scotland and who offer a good standard of service to their patients.

Highlands (Financial Assistance)

25. **Mr. Kennedy:** To ask the Secretary of State for Scotland if he will announce the total additional financial assistance which he will make available to the Highlands in the light of the current year's adverse weather conditions; and if he will make a statement.

Mr. Lang: My right hon. and learned Friend the Secretary of State for Scotland wrote to Highland regional council and Inverness district council on 10 February requesting detailed reports of flood damage and extra costs incurred. He received a reply from Highland region dated 6 March which reports costs without full supporting details, and has just received a report from the district council. Ross and Cromarty and Lochaber district councils have reported additional costs in dealing with storm damage to housing estates. I am assessing this and other information and will make a statement as soon as possible.

COSLA

26. **Mr. Salmond:** To ask the Secretary of State for Scotland when he next intends to meet representatives of the Convention of Scottish Local Authorities; and what matters he proposes to discuss.

Mr. Ian Lang: I refer the hon. Member to the reply I gave earlier today to the hon. Member for Dundee, East (McAllion).

Waste Dumping

28. **Mr. Malcolm Bruce:** To ask the Secretary of State for Scotland what further measures are proposed to deter waste dumping in Scotland.

Lord James Douglas-Hamilton: I refer the hon. Member to the answer which I gave to the hon. Member for Argyll and Bute (Mrs. Michie) on 22 March at columns *653-54*.

Water (EC Directives)

30. **Mr. Thomas Graham:** To ask the Secretary of State for Scotland which Scottish water suppliers will not be able to comply with the deadline set by the EEC to bring water supplies up to EEC directives; and if he will make a statement.

Lord James Douglas-Hamilton: Drinking water supplies which do not comply with the EC standards are the subject of improvement programmes submitted to the European Commission. The Commission does not normally set deadlines and has not expressed dissatisfaction with the programmes submitted, but has asked for those for reducing lead in tap water to be completed by the end of 1989. Only a small number of areas in Lothian and Strathclyde regions will not comply with that date.

Additional capital provisions have already been made and the allocations for water and sewerage have been increased by 14 per cent. for 1989-90. This should enable water authorities to make faster progress on bringing drinking water supplies up to the EC standards.

General Practitioners

31. **Mr. Kirkwood:** To ask the Secretary of State for Scotland how many general practitioners in Scotland earn over £55,000 per year; and if he will make a statement.

Mr. Michael Forsyth: This information is not held centrally.

Scottish Development Agency

32. **Mr. Foulkes:** To ask the Secretary of State for Scotland when he last met the chairman of the Scottish Development Agency; and what matters were discussed.

33. **Dr. Godman:** To ask the Secretary of State for Scotland when he last met the chairman of the Scottish Development Agency; and what subjects were discussed.

Mr. Lang: My right hon. and learned Friend met the chairman, Sir David Nickson, on 7 March to discuss the Government's White Paper on Scottish enterprise.

"Working for Patients"

34. **Mr. Robert Hughes:** To ask the Secretary of State for Scotland what representations he has had from the medical profession on the White Paper "Working for Patients".

35. **Mr. Robertson:** To ask the Secretary of State for Scotland what representations he has had from the Royal College of Nursing about the Government's plans to restructure the National Health Service.

Mr. Michael Forsyth: We are inviting comments from the medical and nursing professions, as well as from a range of other bodies, on the arrangements for implementation of the White Paper proposals, as set out in detail in six Scottish working papers, published last month.

Law Reform

36. **Mr. Menzies Campbell:** To ask the Secretary of State for Scotland how many representations he has received regarding his proposals for law reform in Scotland; and if he will make a statement.

Lord James Douglas-Hamilton: Four responses have been received so far to my right hon. and learned Friend's consultation paper on the legal profession in Scotland. The consultation period continues until 13 June.

Electricity Boards

37. **Mr. Norman Hogg:** To ask the Secretary of State for Scotland when he last met the chairmen of the South of Scotland electricity board and the North of Scotland Hydro Electricity Board; and what subjects were discussed.

Mr. Lang: I met both chairmen on 31 March when they endorsed agreements which will formally replace the joint generating agreement with contractual commitments reflecting the restructuring of the industry for privatisation. A range of relevant matters was discussed.

GPs (Rural Areas)

38. **Mr. Wallace:** To ask the Secretary of State for Scotland what steps are being taken to protect the income of general practitioners in rural areas; and if he will make a statement.

Mr. Michael Forsyth: In the White Paper "Working for Patients" we said that we would safeguard the position of doctors in the less-populated areas of Scotland. I wrote to all general practitioners in Scotland on 16 March to make it clear that a Scottish doctor who cannot increase his practice size and who offers a good standard of service to his patients will not suffer a reduction in his income through no fault of his own. I am now receiving the views of GPs which my letter requested and will announce the Government's proposals shortly.

Women's Refuges

39. **Mrs. Margaret Ewing:** To ask the Secretary of State for Scotland what recent representations he has received from women's aid organisations regarding the levying of the poll tax on residents of women's refuges.

Mr. Lang: I have received a number of representations from Members of Parliament and others on behalf of women's aid groups about the application of the collective community charge to refuges.

Legislative Assembly

40. **Mr. Gow:** To ask the Secretary of State for Scotland what representations he has received against the setting up of a legislative assembly in Scotland.

Mr. Rifkind: Since the last general election I have received 32 letters against devolution.

CBI

41. **Sir Hector Monro:** To ask the Secretary of State for Scotland when he last discussed unemployment in Scotland with the Confederation of British Industry.

Mr. Rifkind: I have frequent discussions with the Confederation of British Industry on a range of issues affecting the Scottish economy. I am sure that the CBI shares my satisfaction that seasonally adjusted unemployment in Scotland has fallen by 43,400 over the past 12 months and is now at its lowest level since July 1981.

Torness Power Station and Shotts Prison (Documents)

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will make a statement on the discovery of documents concerning the design of Torness power station and Shotts prison in a public place close to Torness.

Lord James Douglas-Hamilton: I am advised by the South of Scotland electricity board that the fragments of charred papers, apparently from a contractor's bonfire, found near the Torness site, did not disclose any information of a security or other nature which would cause concern to the board.

The Scottish Home and Health Department has investigated the matter in relation to the design of Shotts prison. Expert examination of the documents reveals that what was alleged to have been found were copies of drawings issued to four construction firms invited by a management contractor to tender for a small sub-contract during the construction of Shotts prison in 1986. All the firms concerned have been asked to declare the whereabouts of the original copies sent to them.

The original drawings were not classified and there are no details of security systems shown on the material found. What has been revealed does not appear to constitute a serious breach of security. Nevertheless the Scottish Home and Health Department is reviewing the procedures for handling drawings of prison-related buildings and installations, and will report the result to me.

Tropical Timber

Mr. Dalyell: To ask the Secretary of State for Scotland what research is being undertaken into the cultivation of native woods suitable for the substitution of tropical timber and mahogany imports.

Lord James Douglas-Hamilton: The Forestry Commission has an active programme of research into the cultivation of native trees which are capable of producing wood that can be used in place of mahogany and other tropical timbers. Topics covered by the research include the selection of provenances, the techniques of establishing, managing and protecting the trees, and the alternative uses of the timber.

European Community (Assistance)

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will list in the *Official Report* those areas of Scotland he has nominated to the European Community Commission as being eligible for assistance under objective 5b, along with details of geographical boundaries, reasons for inclusions and the date of submission.

Mr. Lang: We already have an assurance from the Commission that the Highlands and Islands (the Highlands and Islands Development Board area) will qualify under objective 5b. We have put forward a case for Dumfries and Galloway (West) (the travel-to-work areas of Stranraer, Wigton and Stewartry) on 19 October 1988. In addition, following discussion with the Commission, cases were submitted on 17 March 1989 for Borders region (travel-to-work areas of Berwickshire, Galashiels, Hawick, Kelso and Jedburgh, and Peebles), Southern Highlands (travel-to-work areas of Aberdeen (less city of Aberdeen), Banff, Blairgowrie and Pitlochry, Brechin and Montrose, Buckie, Crieff, Elgin (part), Forfar, Fraserburgh, Huntly, Keith, Perth, Peterhead and Stirling (part), and eastern Dumfries and Galloway (travel-to-work areas of Annan, Dumfries and Lockerbie). All these areas score well on a number of the criteria for eligibility under objective 5b set out in Council regulation (EEC) No. 4255/88.

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland what negotiations he has held during 1989 with the Highlands and Islands Development Board in relation to any plan to be submitted to the European Community Commission for structural fund assistance to the Highlands and Islands under objective 5b; and when he anticipates a full plan will be published.

Mr. Lang: Scottish Office officials have discussed with the Highlands and Islands Development Board the draft plan for the Highlands and Islands to be submitted to the Commission under objective 5b. The reformed structural fund regulations provide for consultation on draft plans with partnership authorities (bodies with a direct interest in measures to be funded under the structural funds such as local authorities). They are then submitted to the Commission. In response to the plans, the Commission will draw up a community support framework. It is too early to be certain how long it will be before this is finalised.

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland what plans he has to meet organisations such as the Scottish National Farmers Union, the Scottish Trades Union Congress, enterprise trusts and regional councils on the content of Scottish 5b programmes prior to the submission of plans to the European Community Commission.

Mr. Lang: My right hon. and learned Friend has no such plans. My noble Friend the Minister of State met yesterday representatives of Highland, Grampian and Strathclyde regional councils and the National Farmers Union of Scotland to hear their proposals for a FEOGA operational programme for the Highland mainland under objective 5b of the European structural funds.

Sand Eels

Dr. Godman: To ask the Secretary of State for Scotland if he will publish in the *Official Report* the size of the total Shetland sand eel catch, including the proportion of O group and 1 group fish, for each of the past five years.

Mr. Michael Forsyth: The information requested is as follows:

	Size of Total Catch (Tonnes)	*Percentage by Weight*	
		O-Group	*1-Group*
1984	32,578	29·7	29·1
1985	17,169	21·4	31·9
1986	11,961	18·5	20·2
1987	7,227	20·2	50·3
1988	4,710	18·0	4·3

Dr. Godman: To ask the Secretary of State for Scotland if he will publish in the *Official Report* the number of O group sand eels taken by the Shetland fishery in each of the past 15 years.

Mr. Michael Forsyth: The information requested is as follows:—

	Number in millions
1974	929
1975	4,309
1976	4,268
1977	5,970
1978	5,453
1979	1,403
1980	6,432
1981	13,243
1982	16,851
1983	5,604
1984	6,773
1985	2,192
1986	1,785
1987	419
1988	530

Labour Statistics

Mr. Michael J. Martin: To ask the Secretary of State for Scotland if he will give the latest unemployment figures for the Glasgow, Springburn constituency; and if he will make a statement.

Mr. Lang: On 9 February 1989 there were 6,851 unemployed claimants in the Glasgow, Springburn parliamentary constituency. The constituency has shared in the general improvement in the Scottish unemployment situation with a reduction of over 2,000 in the number of unemployed claimants since the beginning of 1987. By continuing with our successful policies we aim to reduce unemployment even further.

Written Answers to Questions

Thursday 6 April 1989

HOME DEPARTMENT

Mr. Albert Baker

Mr. Livingstone: To ask the Secretary of State for the Home Department if he will make a further statement on the case of Mr. Albert Baker of Her Majesty's prison, Long Lartin.

Mr Douglas Hogg: We are considering a number of petitions from Mr. Baker about his request for transfer to a prison in Northern Ireland and related matters, and we await the outcome of his application for leave to move for judicial review of the Government's decision last year not to transfer him to Northern Ireland. I understand that a hearing has been fixed for 15 May.

Fatal Accidents (Police Vehicles)

Mr. Fry: To ask the Secretary of State for the Home Department how many fatal accidents during 1985, 1986, 1987 and 1988 involved motor vehicles driven by the police in the course of their duties.

Mr. Douglas Hogg: The available information in respect of fatal accidents involving police vehicles in 1987 is contained in the report of Her Majesty's chief inspector of constabulary for that year, a copy of which is in the Library.

The information requested for earlier years is not recorded centrally and could be obtained only at disproportionate cost. Figures for 1988 are not yet available.

Fire Service

Mr. Win Griffiths: To ask the Secretary of State for the Home Department if he has any plans to change the consultative structure of the fire service as laid down in the Fire Services Act 1947; and if he will make a statement.

Mr. John Patten: My right hon. Friend has no present plans to seek changes to the statutory basis of the Central Fire Brigades Advisory Council constituted under section 29 of the Fire Services Act 1947 or of the arrangements under section 17 of the Act, as amended by the Fire Services Act 1959, relating to disciplinary matters.

Prison Wages

Mr. Thurnham: To ask the Secretary of State for the Home Department what is the annual wage bill for prisoners at the present time; what the net cost is after administration charges are taken into account; and if he will make a statement.

Mr. Douglas Hogg: Expenditure on the earnings of inmates in prison service establishments in England and Wales is forecast to be approximately £6·25 million in the financial year 1988-89. The cost of administering the earnings schemes is not separately identified in the operating costs of establisments. As my right hon. Friend explained in response to a question from my hon. Friend the Member for Wimbledon (Dr. Goodson-Wickes) on 8 March, at columns *541-42*, the current earnings arrangements are to be reviewed.

Immigration Control (Irish Republic)

Mr. Nicholas Bennett: To ask the Secretary of State for the Home Department what discussions he has had with the Irish Government concerning their immigration controls for visitors from non-European Community countries; and whether he will make a statement.

Mr. Hurd: I regularly attend meetings with the responsible Ministers of all the member states of the European Community, including the Irish Republic, at which matters relating to immigration control are discussed.

Management Consultants

Mr. Dobson: To ask the Secretary of State for the Home Department what were the total fees paid out by his Department to management consultants in 1979-80 and each year to date; and what is the estimate for the current year.

Mr. Douglas Hogg *[holding answer 13 March 1989]:* The 1988-89 estimate of payments by the Home Office to management consultants is £1,257,000. Equivalent estimates of payments made in the financial years from 1984-85 were as follows:

	£
1984-85	454,000
1985-86	367,000
1986-87	1,174,000
1987-88	784,000

Information for the years prior to 1984-85 is not readily available, and could be obtained only at disproportionate cost.

Privatisation

Mr. Dobson: To ask the Secretary of State for the Home Department what was the total sum paid out in fees to outside organisations in the furtherance of privatisation by his Department in 1979-80 and each year to date; and what is the estimate for 1989-90.

Mr. Douglas Hogg *[holding answer 13 March 1989]:* Since 1979-80, the Home Office has made payments of approximately £72,000 to outside organisations in the furtherance of privatisation. No expenditure is planned for 1989-90.

Self-mutilation

Mr. Maclennan: To ask the Secretary of State for the Home Department if he will publish in the *Official Report* a table showing the number of those in custody who have committed acts of self-mutilation, by age and sex, together with the names of the establishments in which they were held and the dates of the incidents, since 1979.

Mr. Douglas Hogg *[holding answer 8 March 1989]:* The number of inmates of each prison service establishment who are recorded as having inflicted non-fatal injury on themselves between 1979 and April 1988 is set out in the table. Information on the age of the inmates and the dates of the incidents is not available.

Note on the table

Figures for 1979 to 1983 are recorded by calendar year. Figures for 1985-86 to 1987-88 are recorded by financial year. Figures for 1984-85 include incidents recorded as having occurred between 1 January 1984 and 31 March 1985.

Number of Inmates Recorded as having Inflicted Non-fatal Injury on themselves

Thames Tidal Flood Warning System

Mr. Tony Banks: To ask the Secretary of State for the Home Department what discussions have taken place between his Department and the London residuary body in respect of the Thames tidal flood warning system; and what will be the arrangements after 30 April.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* I have been asked to reply.

I refer the hon. Member to the answer I gave him earlier today.

NATIONAL FINANCE

Economic Growth

13. **Mr. Wilshire:** To ask the Chancellor of the Exchequer when he next intends to forecast the rate of economic growth in 1989-90.

80. **Mr. Knapman:** To ask the Chancellor of the Exchequer when he next intends to forecast the rate of economic growth in 1989-90.

106. **Mr. Leigh:** To ask the Chancellor of the Exchequer if he will make a statement on the expected rate of growth this year of the United Kingdom economy.

120. **Mr. Goodlad:** To ask the Chancellor of the Exchequer when he next intends to forecast the rate of economic growth in 1989-90.

Mr. Major: In my right hon. Friend's Autumn Statement.

96. **Dr. Michael Clark:** To ask the Chancellor of the Exchequer what has been the average annual rate of growth over the last seven years for which figures are available.

105. **Mr. Aspinwall:** To ask the Chancellor of the Exchequer what has been the average annual rate of growth over the last seven years for which figures are available.

112. **Mr. Burt:** To ask the Chancellor of the Exchequer what has been the average annual rate of growth over the last seven years for which figures are available.

140. **Mr. Roger King:** To ask the Chancellor of the Exchequer what has been the average annual rate of growth over the last seven years for which figures are available.

Mr. Major: In the seven years to 1988, the average annual rate of growth of GDP was 3·3 per cent. This was the steadiest seven-year period of growth averaging above 3 per cent. since the war.

Indirect Taxes

16. **Mr. Ernie Ross:** To ask the Chancellor of the Exchequer if he will estimate the total amount of indirect taxes paid by a family on three quarters of average earnings.

Mr. Norman Lamont: It is estimated that in 1988-89, a married man on three quarters of average male earnings with two children will pay £25 per week in indirect taxes (excluding rates).

Medical Insurance

17. **Mr. Nigel Griffiths:** To ask the Chancellor of the Exchequer how much his proposal for private medical insurance tax relief will cost in a full year.

Mr. Norman Lamont: About £40 million in 1990-91.

49. **Mr. Rooker:** To ask the Chancellor of the Exchequer how much his proposal for private medical insurance tax relief will cost in a full year.

97. **Mr. Steinberg:** To ask the Chancellor of the Exchequer how much his proposal for private medical insurance tax relief will cost in a full year.

130. **Mr. Snape:** To ask the Chancellor of the Exchequer how much his proposal for private medical insurance tax relief will cost in a full year.

Mr. Norman Lamont: About £40 million in 1990-91. In subsequent years the cost is likely to rise as more over-60s are encouraged by the relief to take out medical insurance.

Asset Sales

18. **Mr. Matthew Taylor:** To ask the Chancellor of the Exchequer how much of the Budget surplus is attributable to asset sales.

Mr. Lawson: The PSDR in 1988-89 is expected to be £14 billion, or 3 per cent. of GDP. Even excluding privatisation proceeds, the PSDR would have been £7 billion, equivalent to 1½ per cent. of GDP, only the second net repayment on this basis in any year since the beginning of the 1950s—the earliest date for which comparable figures are available.

Inflation

19. **Mr. Coleman:** To ask the Chancellor of the Exchequer what are the current inflation rates in *(a)* Britain and *(b)* other members of the Group of Seven.

40. **Mr. Corbett:** To ask the Chancellor of the Exchequer what are the current inflation rates in *(a)* Britain and *(b)* other members of the Group of Seven.

Mr. Lilley: The current 12-month inflation rates for the United Kingdom and the other members of the Group of Seven are given in the weekly OECD publication, "Current Economic Indicators", a copy of which is available in the House of Commons Library.

25. **Ms. Armstrong:** To ask the Chancellor of the Exchequer when he expects the inflation rate to fall below 5 per cent.

41. **Mr. Barron:** To ask the Chancellor of the Exchequer when he expects the inflation rate to fall below 5 per cent.

113. **Mr. Graham:** To ask the Chancellor of the Exchequer when he expects the inflation rate to fall below 5 per cent.

170. **Mr. Dunnachie:** To ask the Chancellor of the Exchequer when he expects the inflation rate to fall below 5 per cent.

Mr. Lilley: In the Financial Statement and Budget Report the annual rate of RPI inflation is forecast to moderate to 5½ per cent. by the final quarter of this year, and to fall further to 4½ per cent. by the second quarter of 1990.

33. **Mr. Darling:** To ask the Chancellor of the Exchequer if he will estimate what the impact of his Budget measures will be on the retail prices index.

53. **Mr. Cox:** To ask the Chancellor of the Exchequer if he will estimate what the impact of his Budget measures on the retail prices index will be.

63. **Mr. Beith:** To ask the Chancellor of the Exchequer if he will make a statement about the estimated effect of the Budget proposals on inflation.

94. **Mr. Doran:** To ask the Chancellor of the Exchequer if he will estimate what will be the impact of his Budget measures on the retail prices index.

153. **Mr. Ron Davies:** To ask the Chancellor of the Exchequer if he will estimate what the impact of his Budget measures on the retail prices index will be.

Mr. Lilley: Prudent monetary and fiscal policies will continue to bear down on inflation. The direct impact of the Budget proposals on the retail prices index will be negligible.

43. **Mr. Boyes:** To ask the Chancellor of the Exchequer how many members of the European Economic Community have inflation rates lower than that in the United Kingdom.

117. **Mr. Cohen:** To ask the Chancellor of the Exchequer how many members of the European Economic Community have inflation rates lower than that in the United Kingdom.

Mr. Lilley: I refer the hon. Members to the reply that my right hon. Friend the Chancellor gave earlier today to the hon. Member for Hemsworth, South (Mr. Buckley).

65. **Mr. Ronnie Campbell:** To ask the Chancellor of the Exchequer if he will now revise the rate of inflation predicted in his Budget statement.

76. **Mr. Battle:** To ask the Chancellor of the Exchequer when he next intends to revise his Budget forecast for inflation for 1989-90.

85. **Mr. Cummings:** To ask the Chancellor of the Exchequer if he will now revise the rate of inflation predicted in his Budget statement.

154. **Mr. Cunliffe:** To ask the Chancellor of the Exchequer if he will now revise the rate of inflation predicted in his Budget statement.

159. **Mr. Adams:** To ask the Chancellor of the Exchequer if he will now revise the rate of inflation predicted in his Budget statement.

Mr. Lilley: It is much too soon to revise the forecast in the FSBR. My right hon. Friend will next update his published inflation forecast in the Autumn Statement.

99. **Mr. Bell:** To ask the Chancellor of the Exchequer what representations he has received in the light of his Budget statement of future forecasts for inflation.

Mr. Lilley: None.

103. **Mr. Cohen:** To ask the Chancellor of the Exchequer when he now expects to achieve his target for inflation of zero per cent.

116. **Mr. Tom Clarke:** To ask the Chancellor of the Exchequer when he expects to achieve his target for inflation of zero per cent.

142. **Mrs. Clwyd:** To ask the Chancellor of the Exchequer when he now expects to achieve his target for inflation of zero per cent.

179. **Mr. Callaghan:** To ask the Chancellor of the Exchequer when he now expects to achieve his target for inflation of zero per cent.

Mr. Lilley: The medium-term financial strategy set out in the Financial Statement and Budget Report on 14 March assumed the annual rate of inflation in the GDP deflator would be down to 2½ per cent. by 1992-93. The ultimate objective remains zero inflation.

131. **Mr. Ron Brown:** To ask the Chancellor of the Exchequer if he has received recent representations from the Confederation of British Industry about inflation; and if he will make a statement.

Mr. Lilley: No. But my right hon. Friend receives copies of CBI publications. In his Budget speech the Chancellor noted that inflation was expected to fall to 5½ per cent. by the end of this year, and to 4½ per cent. in the second quarter of 1990.

135. **Mr. Richard Shepherd:** To ask the Chancellor of the Exchequer if he will make a statement on the rates of inflation for the United Kingdom from 1986 to 1989 and on the Organisation for Economic Co-operation and Development average for 1986 to 1989.

Mr. Lilley: The OECD "Economic Outlook" published in December 1988 gives the average rates of inflation in the OECD countries for the years in question with estimates and forecasts for 1988 and 1989. The Financial Statement and Budget Report contains a forecast for the United Kingdom inflation rate in the year to 1989 fourth quarter. United Kingdom inflation rates for earlier years can be calculated from figures contained in the monthly Department of Employment publication, *Employment Gazette*.

Budget (Representations)

20. **Mr. Sumberg:** To ask the Chancellor of the Exchequer what representations he has received from industrial organisations in connection with his recent Budget statement.

Mr. Major: The proposals in my right hon. Friend's Budget have been widely welcomed.

24. **Mr. Watts:** To ask the Chancellor of the Exchequer what representations he has received on his Budget.

35. **Mr. Quentin Davies:** To ask the Chancellor of the Exchequer what representations he has received on his Budget.

145. **Mr. Marlow:** To ask the Chancellor of the Exchequer what representations he has received on his Budget.

168. **Mr. David Martin:** To ask the Chancellor of the Exchequer what representations he has received on his Budget.

174. **Mr. Cash:** To ask the Chancellor of the Exchequer what representations he has received on his Budget.

Mr. Norman Lamont: The proposals in my right hon. Friend's Budget have been widely welcomed.

Low Pay

21. **Mr. Kirkwood:** To ask the Chancellor of the Exchequer what plans he has to further reduce the tax burden on the low paid.

Mr. Norman Lamont: My right hon. Friend outlined in his Budget statement on 14 March his proposals to increase the main allowances in line with statutory provisions and to reform the system of employees' national insurance contributions. When it is prudent and sensible to do so we intend to reduce the basic rate of income tax further to a target of 20p in the pound.

127. **Mr. Nicholas Baker:** To ask the Chancellor of the Exchequer what will be the effect of his Budget proposals upon those on lower incomes.

Mr. Norman Lamont: Those on lower incomes will benefit from the reduction and reform of national

insurance contributions, the abolition of the pensioners' earnings rule and the extension of the over-80s age allowance to those aged 75 and over.

Balance of Payments

22. **Mr. George Howarth:** To ask the Chancellor of the Exchequer which countries in the European Economic Community have a larger balance of payments deficit as a percentage of gross domestic product than the United Kingdom.

88. **Mr. Robert Hughes:** To ask the Chancellor of the Exchequer which countries in the EEC have a larger balance of payments deficit as a percentage of gross domestic product than the United Kingdom.

95. **Mr. Hoyle:** To ask the Chancellor of the Exchequer which countries in the EEC have a larger balance of payments deficit as a percentage of gross domestic product than the United Kingdom.

Mr. Major: On the basis of published figures, none.

23. **Mr. Frank Field:** To ask the Chancellor of the Exchequer if he will estimate when the balance of payments will return to surplus.

32. **Mr. Flynn:** To ask the Chancellor of the Exchequer if he will estimate when the balance of payments will return to surplus.

77. **Mr. Fisher:** To ask the Chancellor of the Exchequer if he will estimate when the balance of payments will return to surplus.

175. **Mr. Flannery:** To ask the Chancellor of the Exchequer if he will estimate when the balance of payments will return to surplus.

Mr. Major: The Financial Statement and Budget Report for 1989-90 published on 14 March provided forecasts of the balance of payments for 1989 and the first half of 1990. The balance of payments on current account is expected to remain in deficit over this period. Forecasts for later years are not published.

52. **Ms. Harman:** To ask the Chancellor of the Exchequer if he will make a statement on the current balance of payments deficit.

83. **Mr. Win Griffiths:** To ask the Chancellor of the Exchequer if he will make a statement on the current balance of payments deficit.

111. **Mr. Grocott:** To ask the Chancellor of the Exchequer if he will make a statement on the current balance of payments deficit.

114. **Ms. Gordon:** To ask the Chancellor of the Exchequer if he will make a statement on the current balance of payments deficit.

Mr. Major: I refer the hon. Members to the recently published Financial Statement and Budget Report.

37. **Mr. Galloway:** To ask the Chancellor of the Exchequer when he expects the balance of payments deficit will begin to fall as a percentage of gross domestic product.

90. **Mr. Foulkes:** To ask the Chancellor of the Exchequer when he expects the balance of payments deficit will begin to fall as a percentage of gross domestic product.

Mr. Major: I refer the hon. Members to the reply that my right hon. Friend the Chancellor of the Exchequer gave earlier today to the hon. Member for Norwich, South (Mr. Garrett).

Share Ownership

26. **Mr. Knowles:** To ask the Chancellor of the Exchequer what is his latest estimate of the extent of share ownership in Britain.

172. **Mr. Squire:** To ask the Chancellor of the Exchequer what is his latest estimate of the extent of share ownership in Britain.

Mr. Norman Lamont: The joint Treasury and stock exchange survey carried out in January and February 1989 estimated that approximately 9 million people own shares, 20 per cent. of the adult population. This represents a threefold increase since 1979.

Savings

27. **Mr. Hanley:** To ask the Chancellor of the Exchequer what representations he has received about the level of savings in the British economy.

125. **Mrs. Gorman:** To ask the Chancellor of the Exchequer what representations he has received about the level of savings in the British economy.

167. **Mr. Carrington:** To ask the Chancellor of the Exchequer what representations he has received about the level of savings in the British economy.

Mr. Jack: To ask the Chancellor of the Exchequer what representations he has received about the level of savings in the British economy.

Mr. Lilley: My right hon. Friend has received a number of representations about savings.

Earnings

28. **Mr. Evennett:** To ask the Chancellor of the Exchequer what has been the percentage increase in the real take-home pay of a married man, with two children, on average male earnings from 1978-79 to 1988-89.

108. **Mr. David Nicholson:** To ask the Chancellor of the Exchequer what has been the percentage increase in the real take-home pay of a married man, with two children, on average male earnings from 1978-79 to 1988-89.

171. **Mr. David Shaw:** To ask the Chancellor of the Exchequer what has been the percentage increase in the real take-home pay of a married man with two children on average male earnings from 1978-79 to 1988-89.

173. **Mr. Mans:** To ask the Chancellor of the Exchequer what has been the percentage increase in the real take-home pay of a married man with two children on average male earnings from 1978-79 to 1988-89.

Mr. Norman Lamont: Real take-home pay for a married man with two children on average male earnings is 29 per cent. higher in 1988-89 than in 1978-79.

115. **Mr. Janman:** To ask the Chancellor of the Exchequer what has been the percentage increase in the real take-home pay of a married man, with two children, on half average male earnings from 1978-79 to 1988-89.

Mr. Norman Lamont: I refer my hon. Friend to my reply to my hon. Friend the Member for Lancashire, West (Mr. Hind) on 22 March at column *585*.

Government Expenditure

29. **Mr. Baldry:** To ask the Chancellor of the Exchequer what has been the fall in general Government expenditure, excluding privatisation proceeds, as a percentage of gross domestic product since 1982-83.

139. **Mr. Hayes:** To ask the Chancellor of the Exchequer what has been the fall in general Government expenditure, excluding privatisation proceeds, as a percentage of gross domestic product since 1982-83.

149. **Mr. Hague:** To ask the Chancellor of the Exchequer what has been the fall in general Government expenditure, excluding privatisation proceeds, as a percentage of gross domestic product since 1982-83.

Mr. Major: The Financial Statement and Budget Report gave a figure of 39½ per cent. for the ratio of general Government expenditure (excluding privatisation proceeds) to gross domestic product in 1988-89. The corresponding figure for 1982-83 was 46¾ per cent.

Independent Taxation

30. **Mr. Butterfill:** To ask the Chancellor of the Exchequer what representations he has received about the introduction of independent taxation for husband and wife in April 1990.

123. **Mr. Andy Stewart:** To ask the Chancellor of the Exchequer what representations he has received about the introduction of independent taxation for husband and wife in April 1990.

152. **Mr. Rowe:** To ask the Chancellor of the Exchequer what representations he has received about the introduction of independent taxation for a husband and wife in April 1990.

Mr. Thurnham: To ask the Chancellor of the Exchequer what representations he has received about the introduction of independent taxation for husband and wife in April 1990.

Mr. Norman Lamont: My right hon. Friend has received a number of letters on this subject.

Productivity

31. **Mr. Wood:** To ask the Chancellor of the Exchequer what has been the percentage increase in British manufacturing productivity since 1979.

81. **Mr. William Powell:** To ask the Chancellor of the Exchequer what has been the percentage increase in British manufacturing productivity since 1979.

93. **Dr. Twinn:** To ask the Chancellor of the Exchequer what has been the percentage increase in British manufacturing productivity since 1979.

107. **Mr. Stevens:** To ask the Chancellor of the Exchequer what has been the percentage increase in British manufacturing productivity since 1979.

Mr. Major: Output per head in United Kingdom manufacturing industry in the three months up to January 1989 was 48·8 per cent. higher than its average level in 1979, an average annual growth rate of 4·3 per cent.

72. **Mr. John Marshall:** To ask the Chancellor of the Exchequer if he will make a statement about the trends in productivity in British industry.

Mr. Major: Output per head in the manufacturing sector in the three months up to January 1989 was 55 per cent. higher than its average level in 1980. This is equivalent to an annual average growth rate of 5·3 per cent. significantly higher than the 1·6 per cent. growth achieved in the 1970s and 3 per cent. a year in the 1960s. Since 1980, United Kingdom manufacturing productivity growth has been higher than in any other major industrialised country.

Imports

34. **Mr. Martyn Jones:** To ask the Chancellor of the Exchequer what is his latest estimate of the value of imports in the current financial year.

60. **Mr. Illsley:** To ask the Chancellor of the Exchequer what is his latest estimate of the value of imports in the current financial year.

164. **Mr. Lambie:** To ask the Chancellor of the Exchequer what is his latest estimate of the value of imports in the current financial year.

Mr. Major: Estimates for the value of imports for the whole of the financial year 1988-89 have yet to be published. The Financial Statement and Budget Report does not provide a forecast of the value of imports.

Income Tax

36. **Mr. Hardy:** To ask the Chancellor of the Exchequer what is his estimate of the number of people who will pay income tax in 1989-90.

Mr. Norman Lamont: It is estimated that about 21·3 million single people and married couples (24.9 million individuals) will be liable to income tax in 1989-90. These estimates are based on a projection of the 1986-87 survey of personal incomes and are provisional.

Manufactured Goods

38. **Mr. Norman Hogg:** To ask the Chancellor of the Exchequer, what is his latest estimate of the balance of trade payments with respect to manufactured goods for the current financial year.

44. **Mr. Henderson:** To ask the Chancellor of the Exchequer what is his latest estimate of the balance of trade payments with respect to manufactured goods for the current financial year.

55. **Mr. Hinchliffe:** To ask the Chancellor of the Exchequer what is his latest estimate of the balance of trade payments with respect to manufactured goods for the current financial year.

92. **Mr. Home Robertson:** To ask the Chancellor of the Exchequer what is his latest estimate of the balance of trade payments with respect to manufactured goods for the current financial year.

Mr. Major: Estimates for the balance of trade in manufactured goods for the whole of the financial year 1988-89 have yet to be published. The Financial Statement and Budget Report provides a forecast only for calendar year 1989.

Interest Rates

39. **Mr. Jack Thompson:** To ask the Chancellor of the Exchequer what are interest rates in *(a)* Britain and *(b)* United States of America.

58. **Mr. Stott:** To ask the Chancellor of the Exchequer what are the interest rates in *(a)* Britain and *(b)* Japan.

91. **Ms. Walley:** To ask the Chancellor of the Exchequer, what are the interest rates in *(a)* Britain and *(b)* Japan.

118. **Mr. Vaz:** To ask the Chancellor of the Exchequer what are the interest rates in *(a)* Britain and *(b)* Japan.

166. **Mrs. Fyfe:** To ask the Chancellor of the Exchequer what are interest rates in *(a)* Britain and *(b)* the United States of America.

Mr. Lilley: I refer the hon. Members to the reply that I gave earlier today to the hon. Member for Wolverhampton, South-East (Mr. Turner).

45. **Mr. Robertson:** To ask the Chancellor of the Exchequer if he will make a statement on interest rates.

100. **Mr. Rogers:** To ask the Chancellor of the Exchequer if he will make a statement on interest rates.

124. **Mr. McLeish:** To ask the Chancellor of the Exchequer if he will make a statement on interest rates.

126. **Mr. Roy Hughes:** To ask the Chancellor of the Exchequer if he will make a statement on interest rates.

Mr. Lilley: Bank base rates are 13 per cent.

67. **Mr. Wilson:** To ask the Chancellor of the Exchequer what are the interest rates in *(a)* Britain and *(b)* Germany.

102. **Mr. Gareth Wardell:** To ask the Chancellor of the Exchequer what are the interest rates in *(a)* Britain and *(b)* Germany.

Mr. Lilley: Three month interbank rates on 4 April were 13 per cent. in the United Kingdom and 6·5 per cent. in Germany.

89. **Mr. Latham:** To ask the Chancellor of the Exchequer if he will make a statement on the level of interest rates since the Budget.

Mr. Lilley: Bank base rates have remained at 13 per cent. since the Budget.

New Businesses

42. **Mr. Lord:** To ask the Chancellor of the Exchequer what are the latest figures for the weekly rate of net business start-ups in 1988.

68. **Mr. Charles Wardle:** To ask the Chancellor of the Exchequer what are the latest figures for the weekly rate of net business start-ups in 1988.

160. **Dame Pegger Fenner:** To ask the Chancellor of the Exchequer what are the latest figures for the weekly rate of net business start-ups in 1988.

Mr. Major: In 1987, the latest year for which figures have been published by the Department of Employment, the net increase in the number of businesses registered for VAT was 45,000, an average of approaching 900 a week. Indications are that the rate of increase in 1988 is even faster. The number of VAT registrations and de-registrations processed by Customs and Excise during 1988 indicate a net increase of over 1,200 a week. Department of Employment figures for 1988 will be available in the summer.

Taxation

46. **Mr. Leighton:** To ask the Chancellor of the Exchequer what proportion of their income people on three quarters of average earnings were paying in total taxation *(a)* in 1978-79 and *(b)* in 1988-89.

56. **Mr. Loyden:** To ask the Chancellor of the Exchequer what proportion of their income people on three quarters of average earnings were paying in total taxation *(a)* in 1978-79 and *(b)* in 1988-89.

109. **Mr. Livingstone:** To ask the Chancellor of the Exchequer what proportion of their income people on three quarters of average earnings were paying in total taxation *(a)* in 1978-79 and *(b)* in 1988-89.

146. **Mr. Leadbitter:** To ask the Chancellor of the Exchequer what proportion of their income people on three quarters of average earnings were paying in total taxation in *(a)* 1978-79 and *(b)* 1988-89.

Mr. Norman Lamont: A single person on three quarters of average earnings is estimated to have paid 40·4 per cent. of their income in income tax, national insurance contributions and indirect taxes (excluding local authority rates) in 1978-79 and 40 per cent. in 1988-89. The figure is forecast to fall to 39·2 per cent. in 1989-90.

47. **Mr. McAvoy:** To ask the Chancellor of the Exchequer what proportion of their income the average earner was paying in direct and indirect taxes in *(a)* 1978-79 and *(b)* 1988-89.

57. **Mr. McAllion:** To ask the Chancellor of the Exchequer what proportion of their income the average earner was paying in direct and indirect taxes in *(a)* 1978-79 and *(b)* 1988-89.

66. **Mr. McCartney:** To ask the Chancellor of the Exchequer what proportion of his income was the average earner paying in direct and indirect taxes in *(a)* 1978-79 and *(b)* 1988-89.

Mr. Norman Lamont: A single person on average male earnings is estimated to have paid 42·3 per cent. of their income in income tax, national insurance contributions and indirect taxes (excluding local authority rates) in 1978-79 and 41·3 per cent. in 1988-89. The figure is forecast to fall to 40·6 per cent. in 1989-90.

84. **Mr. Ashby:** To ask the Chancellor of the Exchequer if he will list all the taxes which have been abolished since 1979.

134. **Mr. Franks:** To ask the Chancellor of the Exchquer if he will list all the taxes which have been abolished since 1979.

136. **Sir David Price:** To ask the Chancellor of the Exchequer if he will list all the taxes which have been abolished since 1979.

155. **Mr. Boswell:** To ask the Chancellor of the Exchequer if he will list all the taxes which have been abolished since 1979.

Mr. Norman Lamont: The main taxes abolished since 1979 are:

investment income surcharge in 1984;
national insurance surcharge in 1984;
development land tax in 1985;
capital transfer tax on lifetime gifts in 1986;
capital duty and unit trust instrument duty in 1988.

In addition, a number of minor duties have been abolished.

132. **Mr. David Marshall:** To ask the Chancellor of the Exchequer if he will estimate how much the top 1 per cent. of tax units paid in tax in 1988-89 and how much would this group have paid had the 1987-88 tax levels remained unchanged except for indexing.

138. **Mrs. Mahon:** To ask the Chancellor of the Exchequer if he will estimate how much the top 1 per cent. of tax units paid in tax in 1988-89; and how much this group would have paid had the 1987-88 tax levels remained unchanged except for indexing.

157. **Mr. Madden:** To ask the Chancellor of the Exchequer if he will estimate how much the top 1 per cent. of tax units paid in tax in 1988-89, and how much would this group have paid had the 1987-88 tax levels remained unchanged except for indexing.

Mr. Michael J. Martin: To ask the Chancellor of the Exchequer if he will estimate how much the top 1 per cent. of tax units paid in tax in 1988-89 and how much would this group have paid had the 1987-88 tax levels remained unchanged except for indexing.

Mr. Norman Lamont: In 1988-89 the income tax liability of the top 1 per cent. of tax units liable to tax is estimated to be £6 billion. If the 1988 Budget had merely indexed tax thresholds and allowances and assuming the same levels of income as above, their liability would have been £8·1 billion.

These estimates are based on a projection of the 1986-87 survey of personal incomes and are provisional.

Gross Domestic Product

48. **Mr. John Browne:** To ask the Chancellor of the Exchequer what was the increase in the output measure of gross domestic product in the year to the fourth quarter of 1988.

178. **Sir Michael McNair-Wilson:** To ask the Chancellor of the Exchequer what was the increase in the output measure of gross domestic product in the year to the fourth quarter of 1988.

Mr. Major: The output measure of gross domestic product is estimated to have increased by 3 per cent. between the fourth quarter of 1987 and the fourth quarter of 1988.

Tax Relief

50. **Mr. Michael:** To ask the Chancellor of the Exchequer if he will estimate the cost to the Exchequer of tax relief in relation to *(a)* enterprise zones, *(b)* business expansion schemes and *(c)* personal equity plans.

74. **Dr. Moonie:** To ask the Chancellor of the Exchequer if he will estimate the cost to the Exchequer of tax relief in relation to *(a)* enterprise zones, *(b)* business expansion schemes and *(c)* personal equity plans.

144. **Mr. Martlew:** To ask the Chancellor of the Exchequer if he will estimate the cost to the Exchequer of tax relief in relation to *(a)* enterprise zones, *(b)* business expansion schemes and *(c)* personal equity plans.

Mr. Norman Lamont: I refer the hon. Members to the reply that I gave earlier today to the hon. Member for Cardiff, West (Mr. Morgan).

Mortgage Payments

51. **Mr. Simon Hughes:** To ask the Chancellor of the Exchequer by how much the average monthly mortgage repayment increased between March 1988 and March 1989.

Mr. Norman Lamont: It is not possible to make a direct comparison because of the variety of mortgages, some of which involve payments of interest and endowment premiums and others include repayments of capital as well as interest. But the additional interest payable on the average sized mortgage of £22,000 is about £50 per month. The increase is less in those cases where the repayment period has been extended or part of the interest has been deferred.

Profit-related Pay

54. **Mr. Allan Roberts:** To ask the Chancellor of the Exchequer what percentage of the work force is currently participating in profit-related pay schemes as defined by the Inland Revenue.

73. **Mr. Radice:** To ask the Chancellor of the Exchequer what percentage of the work force is currently participating in profit-related pay schemes as defined by the Inland Revenue.

Mr. Norman Lamont: I refer the hon. Member to the reply that I gave earlier today to the hon. Member for Motherwell, North (Dr. Reid).

Public Sector Debt

59. **Mr. Andrew Mitchell:** To ask the Chancellor of the Exchequer what representations he has received about the level of the public sector debt repayment.

87. **Mr. Brandon-Bravo:** To ask the Chancellor of the Exchequer what representations he has received about the level of the public sector debt repayment.

163. **Mr. David Davies:** To ask the Chancellor of the Exchequer what representations he has received about the level of the public sector debt repayment.

Mr. Lilley: The Treasury has received a number of representations welcoming the improvement in public sector finances, which is expected to result in 1988-89 in the largest budget surplus since figures has been kept on a comparable basis.

Low-cost Housing

61. **Mr. Gill:** To ask the Chancellor of the Exchequer what advice he has given to landowners regarding capital

gains tax liability in respect of land made available at below market prices for the purpose of enabling the provision of low-cost housing.

Mr. Norman Lamont: I refer my hon. Friend to my right hon. Friend's Budget Statement.

Charitable Donations

62. **Mr. Riddick:** To ask the Chancellor of the Exchequer what has been the change in charitable giving since 1979.

133. **Mr. Conway:** To ask the Chancellor of the Exchequer what has been the change in charitable giving since 1979.

177. **Mr. David Porter:** To ask the Chancellor of the Exchequer what has been the change in charitable giving since 1979.

Mr. Norman Lamont: I refer my hon. Friends to the reply given by my hon. Friend the Economic Secretary on 16 March to my hon. Friend the Member for Beaconsfield (Mr. Smith), *Official Report*, columns *300-1*, which included a number of changes introduced by the Government to encourage charitable giving.

Some measure of the success of these changes is shown in the increases in gifts to charity. For covenanted giving, the estimated growth in real terms between 1978-79 and 1987-88 is 140 per cent. The real increase in bequests to charities over the same period is 150 per cent.

Retail Prices Index

64. **Mr. Eastham:** To ask the Chancellor of the Exchequer if he will estimate the impact of the public sector price rises announced for April on the retail prices index.

119. **Mr. Douglas:** To ask the Chancellor of the Exchequer if he will estimate the impact of the public sector price rises announced for April on the retail prices index.

122. **Mr. Duffy:** To ask the Chancellor of the Exchequer if he will estimate the impact of the public sector price rises announced for April on the retail prices index.

128. **Mr. Fatchett:** To ask the Chancellor of the Exchequer if he will estimate the impact of the public sector price rises announced for April on the retail prices index.

Mr. Lilley: The electricity board and the water authorities have already announced price increases to take effect this month. It is estimated that these changes, once they have fully worked through to consumers' bills, will raise the RPI by less than ¼ per cent.

79. **Mr. French:** To ask the Chancellor of the Exchequer if he will give the average annual increase in the retail prices index for the period 1974 to 1979 and for the most recent five-year period for which figures are available.

Mr. Lilley: The retail price index rose on average 15·5 per cent. a year in the five years to 1979, over three times higher than its average annual growth of 5·1 per cent. over the five years to February 1989.

Manufacturing Investment

69. **Mr. Paice:** To ask the Chancellor of the Exchequer what is his latest information on the investment intentions of British manufacturing industry.

150. **Mr. Soames:** To ask the Chancellor of the Exchequer what is his latest information on the investment intentions of British manufacturing industry.

Mr. Major: I refer my hon. Friends to the reply that I gave earlier today to my hon. Friend the Member for Hereford (Mr. Shepherd).

Sports Clubs (VAT)

70. **Mr. Holt:** To ask the Chancellor of the Exchequer what estimate he has of the number of amateur sports clubs which pay value added tax on collections to provide refreshments; whether he has any proposals to abolish this requirement; and what information he has as to whether this requirement obtains in other EEC countries.

Mr. Lilley: The VAT treatment of sports clubs' collections is determined by European Community VAT law, which defines what constitutes a taxable supply. If no conditions are attached to the collections, they are outside the scope of VAT. However, where they amount to a general charge for facilities, such as the provision of refreshments, VAT does apply. Whether or not these provisions are likely to change depends on developments in the Council, which is considering possible amendments to the law in this area. I regret that detailed information about the treatment of sports clubs' collections in other member states is not available.

Personal Equity Plans

71. **Mr. Sheerman:** To ask the Chancellor of the Exchequer what was his original forecast for the take-up of PEP schemes; and what is his latest estimate of the number of existing schemes.

151. **Ms. Ruddock:** To ask the Chancellor of the Exchequer what was his original forecast for the take-up of personal equity plan schemes; and what is his latest estimate of the number of existing schemes.

Mr. Norman Lamont: When personal equity plans were announced in the 1986 Budget it was recognised that take-up would be heavily influenced by external factors. The estimated cost of the scheme assumed that take-up could reach 500,000 in the first year. Latest information suggests that more than 400,000 plans have been taken out to date.

104. **Ms. Short:** To ask the Chancellor of the Exchequer what percentage of those investing with personal equity plan schemes are higher rate taxpayers.

Mr. Norman Lamont: I regret that the information is not available.

Pensioners (Income)

72. **Mr. Moss:** To ask the Chancellor of the Exchequer what has been the change in the post-tax income of pensioners since 1979.

148. **Mr. Nelson:** To ask the Chancellor of the Exchequer what has been the change in the post-tax income of pensioners since 1979.

Mr. Norman Lamont: I refer my hon. Friend to the reply that my right hon. Friend the Chief Secretary gave earlier today to my hon. Friend the Member for Bedfordshire, North (Sir T. Skeet).

Group of Seven

75. **Mr. Tim Smith:** To ask the Chancellor of the Exchequer when he last met his counterparts in the Group of Seven; and what was discussed.

82. **Mr. Brazier:** To ask the Chancellor of the Exchequer when he last met his counterparts in the Group of Seven; and what was discussed.

98. **Mr. Simon Coombs:** To ask the Chancellor of the Exchequer when he last met his counterparts in the Group of Seven; and what was discussed.

169. **Mr. Fishburn:** To ask the Chancellor of the Exchequer when he last met his counterparts in the Group of Seven; and what was discussed.

Mr. Lilley: My right hon. Friend the Chancellor of the Exchequer met his counterparts on 2 April at the meeting of the Group of Seven Finance Ministers in Washington. A statement was released.

A wide range of topics were discussed, including progress and prospects for the world economy. Finance Ministers' commitment to close co-operation on exchange markets was reiterated. They committed themselves to resisting protectionist pressures wherever they arise. The recent proposals by several countries for further development of the debt strategy were also discussed, including ways by which the strategy could be strengthened by placing greater emphasis on voluntary debt and debt service reduction in agreement with commercial banks as a complement to new lending.

Hospital Radio Equipment

78. **Mr. Amess:** To ask the Chancellor of the Exchequer what representations he has received since his Budget statement of zero-rating hospital radio equipment.

Mr. Lilley: One.

Exchange Rates

86. **Mr. Cousins:** To ask the Chancellor of the Exchequer if he will make a statement on sterling exchange rate movements since the Budget.

Mr. Lilley: Following the Budget statement, sterling rose against the dollar and the Deutschmark.

Privatisation

101. **Mrs. Maureen Hicks:** To ask the Chancellor of the Exchequer if he will list the major businesses which have been privatised since 1979.

162. **Mr. McLoughlin:** To ask the Chancellor of the Exchequer if he will list the major businesses which have been privatised since 1979.

165. **Mr. Hannam:** To ask the Chancellor of the Exchequer if he will list the major businesses which have been privatised since 1979.

180. **Mr. Gow:** To ask the Chancellor of the Exchequer if he will list the major businesses which have been privatised since 1979.

Mr. Norman Lamont: Nineteen major businesses have been privatised since 1979. These are:

British Aerospace (1981 and 1985)
Cable and Wireless (1981, 1983 and 1985)
National Freight Consortium (1982)
Britoil (1982 and 1985)
Amersham International (1982)
Associated British Ports (1983 and 1984)
Enterprise Oil (1984)
Sealink (1984)
Jaguar (1984)
British Telecom (1984)
British Shipbuilders warship yards (1984-85)
British Gas (1986)
National Bus Company (1986-88)
British Airways (1987)
Royal Ordnance (1987)
Rolls-Royce (1987)
BAA (1987)
Rover Group (1988)
British Steel (1988)

Inland Revenue Staff

110. **Mr. Patnick:** To ask the Chancellor of the Exchequer when he expects the review into the viability of relocating Inland Revenue staff out of London to be completed; and if he will make a statement.

Mr. Norman Lamont: My right hon. Friend the Paymaster General announced on 9 February that most large Departments had reviews of location in hand. The Inland Revenue's review is well advanced, but its report has not yet been published, nor will decisions be taken on its recommendations, until full consultations have taken place with the staff and the departmental trade union side. As yet, no timetable has been set for such consultation, so I cannot tell my hon. Friend when an announcement will be made.

IMF (Loan Conditions)

121. **Mr. Corbyn:** To ask the Chancellor of the Exchequer what action he is taking to prevent the International Monetary Fund imposing conditions on loans to indebted countries which may harm the poorest people in those countries.

Mr. Lilley: The purpose of programmes supported by the International Monetary Fund is to help stabilise economies and so create the right environment for sustained growth, thus reducing poverty. Some of the poorest groups may benefit immediately—for instance farmers, through the introduction of agricultural reforms giving them better prices for their crops. The fund is aware that there may be short-run adverse effects on other poor groups, and is ready to help design programmes in a way which minimises these, with help from the World Bank. But it cannot impose any given income distribution—this has to be for the countries concerned to decide.

General Aviation and Manufacturers Association

129. **Mr. Colvin:** To ask the Chancellor of the Exchequer when he last met representatives of the General Aviation and Manufacturers Association; and what was discussed.

Mr. Lilley: My right hon. Friend has not met representatives of GAMTA. However, I met a deputation led by my hon. Friend which included representatives of GAMTA on 20 December 1988 when the duty charge on aviation gasoline (AVGAS) was discussed.

European Monetary Systems

137. **Mr. Dykes:** To ask the Chancellor of the Exchequer if he is now in a position to decide the right moment for the United Kingdom to effect full membership of the European monetary system.

Mr. Lilley: No.

Industrial Investment

141. **Mr. Strang:** To ask the Chancellor of the Exchequer what is his estimate of the level of industrial investment in the last year; and what change he expects in investment in the current year.

Mr. Major: Total business investment in 1988 was £49·8 billion at 1985 prices, its highest level ever, as a percentage of GDP. It was forecast in the Financial Statement and Budget Report to increase yet further, by 8 per cent. in 1989.

Court of Auditors Report

143. **Mr. Teddy Taylor:** To ask the Chancellor of the Exchequer if he will raise at the next meeting of the Council of Finance Ministers the issues set out in the Court of Auditors report; and if he will make a statement.

Mr. Peter Brooke: I refer my hon. Friend to the reply that I gave my hon. Friend the Member for Mid-Kent (Mr Rowe) on 15 March at column *245*.

Disposable Income

147. **Mr. Tredinnick** To ask the Chancellor of the Exchequer what was the growth of real personal disposable income between the third quarter of 1987 and the third quarter of 1988.

156. **Mr. Patrick McNair-Wilson:** To ask the Chancellor of the Exchequer what was the growth of real personal disposable income between the third quarter of 1987 and the third quarter of 1988.

161. **Mr. Neil Hamilton** To ask the Chancellor of the Exchequer what was the growth of real personal disposable income between the third quarter of 1987 and the third quarter of 1988.

Mr. Norman Lamont: Real personal disposable income rose by 5 per cent. between the third quarter of 1987 and the third quarter of 1988. Latest estimates show that in 1988 as a whole, real personal disposable income also rose 5 per cent.

Company Returns

158. **Mr. Gerald Bowden:** To ask the Chancellor of the Exchequer what was the percentage increase in 1987 in the net real rate of return for non-North sea industrial and commercial companies.

176. **Mr. Patrick Thompson:** To ask the Chancellor of the Exchequer what was the percentage increase in 1987 in the net real rate of return for non-North sea industrial and commercial companies.

Mr. Major: The net real rate of return for non-North sea industrial and commercial companies rose a further 15 per cent. in 1987 to reach 10·2 per cent., its highest level for 18 years.

Pensioners (Income)

Mr. Barry Field: To ask the Chancellor of the Exchequer what has been the change in the post-tax income of pensioners since 1979.

Mr. Norman Lamont: I refer my hon. Friend to the reply that my right hon. Friend the Chief Secretary gave earlier today to my hon. Friend the Member for Bedfordshire, North (Sir T. Skeet).

Employee Share Ownership

Mr. Ian Taylor: To ask the Chancellor of the Exchequer what are the latest figures he has for the growth in employee ownership among firms in the United Kingdom.

Mr. Norman Lamont: Nearly 1,600 all-employee share schemes have been approved, against 30 in 1979. More than 1¾ million employees have been given shares or options over shares under these schemes, with an initial market value in excess of £4 billion.

TRANSPORT

Vehicle Excise Duty

185. **Mr. Rathbone:** To ask the Secretary of State for Transport what the value of vehicle excise duty in the current financial year will be.

Mr. Peter Bottomley: Revenue (in cash terms) from vehicle excise duty (VED) is estimated at £2,775 million for financial year 1988-89 and £2,889 million for 1989-90. Rates of VED for all vehicles are contained in leaflet VI49, "Rates of Vehicle Excise Duty", which is available in the House of Commons Library.

Railway Accidents

Mr. Nicholas Bennett: To ask the Secretary of State for Transport if he will list the total number of fatal and non-fatal casualties for all railway accidents involving only railway employees in each year since 1959.

Mr. Portillo: This information is not available in the form requested. Details of the total number of railway employees killed or injured in accidents each year are given in the chief inspecting officer of railways' annual report, copies of which have been placed in the House of Commons Library. It is estimated from available data that the number of casualties sustained in accidents involving only railway employees is not significantly less than the overall total of staff casualties in all accidents.

Mr. Nicholas Bennett: To ask the Secretary of State for Transport if he will list the date and place and the number of fatal and non-fatal casualties for all railway accidents involving non-railway employees in each year since 1959.

Mr. Portillo: I regret that this information is not available.

Mr. Nicholas Bennett: To ask the Secretary of State for Transport what comparative information he has as to the number of accidents per million passenger train miles operated in the United Kingdom, other European Community countries, the United States of America and Japan; and if he will make a statement.

Mr. Portillo: In 1987, the significant accident rate per million train miles in the United Kingdom was 0·71. Directly comparable data for other countries is not readily available but inquiries are being made with the appropriate authorities. I will write to my hon. Friend when I have further details.

British Rail (Capital Investment)

Mr. Nicholas Bennett: To ask the Secretary of State for Transport if he will detail at constant 1988-89 prices the total capital investment in British Rail in each year since 1959; and if he will make a statement.

Mr. Portillo: British Rail has recently compiled the following table showing investment in the railway since 1948. The figures include investment in Freightliners, BRML and BREL, but exclude the laying of continuous welded track which British Rail does not now classify as investment.

	£ million cash	*£ million 1988-89 prices*
1948	40	572
1949	44	607
1950	43	591
1951	41	519
1952	38	444
1953	56	631
1954	63	710
1955	68	731
1956	90	916
1957	120	1,171
1958	134	1,255
1959	154	1,433
1960	147	1,353
1961	130	1,156
1962	94	810
1963	73	612
1964	83	673
1965	92	709
1966	81	599
1967	65	463
1968	58	401
1969	39	253
1970	48	289
1971	59	328
1972	73	376
1973	81	389
1974	103	432
1975	157	518
1976	176	506
1977	193	484
1978	208	468
1979	248	491
1980	304	501
1981	277	410
1982	243	334
1983	252	329
[1]1984	280	349
1985-86	399	465
1986-87	399	450
1987-88	526	563
1988-89	—	[2]596

[1] 1984-85 was a 15-month financial period. The figure shown for 1984 is the 12-month internally reported result.
[2] Forecast outturn.

Indicative figures for BR's plans for future investment (excluding investment in BREL, which is being sold, and in the proposed high speed link to the Channel tunnel) are:

	£ million
1989-90	740
1990-91	820
1991-92	880
1992-93	820

In order to show the most consistent picture the figures in the table include some elements of "corporate" as well as "railway" investment. BR's standard definitions of these have changed over the years. The figures have been adjusted to current values by the most recent indices and include the latest available information. They show that there was a high level of investment during the modernisation programme of the late 1950s and early 1960s. BR's route mileage now is 45 per cent. less than it was in the peak investment year of 1959, but passenger mileage is currently at broadly the same levels as in 1959.

Commissioners of Irish Lights

Mr. Nicholas Bennett: To ask the Secretary of State for Transport what is the total income and expenditure of the

Commissioners of Irish Lights for each year from 1985; how much of this sum in each year is spent on navigational aids in the Republic of Ireland; and how much of the income originates in the Republic.

Mr. Portillo: The annual expenditure of the Commissioners of Irish Lights (CIL) is as follows:

	IR £ million
1985-86	13·4
1986-87	13·7
1987-88	13·5
1988-89	[1]16·4

[1] Estimated.

The expenditure (which in 1988-89 included the purchase of a second-hand ship) is financed by advances from the General Lighthouse Fund (GLF).

Under a financial agreement made with the Irish Government in 1985, 70 per cent. of CIL's total expenditure is deemed to be incurred in the Republic. The principal sources of income in the Republic are light dues and a contribution made by the Irish Government under the 1985 agreement. The income from these sources credited to the GLF is as follows:

IR £ million

	Light dues earned in the Republic	*Financial contribution for year*[1]
1985-86	1·49	1·29
1986-87	1·90	1·32
1987-88	2·20	1·40
1988-89[2]	2·60	1·60

[1] Paid in following year.
[2] Estimated.

In addition, CIL has miscellaneous rental and other income amounting to IR £171,000, IR £170,000, IR £192,000 and IR £193,000 (estimated) in the four years listed above. This income is not broken down on a geographical basis.

Uxbridge (Property Sale)

Mr. Shersby: To ask the Secretary of State for Transport what representations he received from the district valuer, Harrow, on 28 February and 15 March concerning the external appearance and state of the gardens of the property known as Four Winds, Park road, Uxbridge; what consideration he is giving to the sale of this property in its existing condition; and if he will make a statement.

Mr. Peter Bottomley: The Department acquired "Four Winds" in 1984 following the serving of a blight notice.

Difficulties with the last tenant led to the property being unoccupied from December 1988.

The district valuer wrote to the Department on 27 February and enclosed with his letter an exchange of correspondence he had had with the owner of a neighbouring property about lack of maintenance to "Four Winds" and its garden. The district valuer stated that in order to ensure that the property and gardens were maintained and kept tidy it was necessary to have the property occupied.

The district valuer reaffirmed his advice that the Department should not dispose of this property until completion of the road works.

He has now been instructed to find a tenant.

Radioactive Material

Mr. Malcolm Bruce: To ask the Secretary of State for Transport whether radioactive material from Hinkley Point is transported via Combwich wharf; and what plans there are to do so in the future.

Mr. Peter Bottomley: No radioactive material is transported via Combwich wharf, neither are there any plans to do so.

Oil Discharges

Dr. Cunningham: To ask the Secretary of State for Transport what investigations have been conducted by his Department into recent alleged discharges of oil from the ferry Pride of Walmer.

Mr. Portillo: All papers and photographs received by the Department have been passed to the litigation division of the Treasury Solicitor's Department. An inquiry officer of that Department is investigating the alleged incident and in due course will present his findings to the Treasury Solicitor, who will determine whether the evidence is sufficient to justify a prosecution.

Microlight Aircraft

Mr. Colin Shepherd: To ask the Secretary of State for Transport if he has any proposals to change the law concerning the operation of the legislation and regulations currently in force concerning the safety, operation and construction both in respect of those flying microlight aircraft and those on the ground potentially affected by flying operations.

Mr. Peter Bottomley: Article 96 of the Air Navigation Order 1985 was recently amended to include a definition of microlight aeroplane. I understand from the Civil Aviation Authority that there are no other changes proposed at the moment specifically affecting microlight aeroplanes.

DEFENCE

Overseas Sales

Mr. Thurnham: To ask the Secretary of State for Defence if he will make a statement about the level of sales overseas by the British defence industry.

Mr. Sainsbury: The level of British defence exports remains impressively high, thanks to the efforts of British industry assisted by the Defence Export Services Organisation. Overall figures for United Kingdom defence sales are given annually in the Supplement on the Defence Estimates.

ATTORNEY-GENERAL

Civil Justice Review

Mr. Favell: To ask the Attorney-General, what are the Government's plans for the implementation of the civil justice review.

The Attorney-General: The Government have considered the report of the review body on civil justice, and

wish to record their gratitude to members of the advisory committee for their contribution to the work of the review over more than three years. In response to the report, the Government have decided to undertake a programme of improvements in the administration of civil justice in England and Wales. This is part of a general overhaul of the legal system, including reforms of child care law. The overall objective of these changes is to improve the service provided by lawyers and the courts to litigants in civil and family cases. The programme for civil justice will be phased over a period of up to five years, to take account of the need for primary and secondary legislation and further policy development, and of the capacity of the legal system to adapt to change in an effective and orderly way.

Jurisdiction and allocation of cases

A more appropriate distribution of business between the High Court and the county courts was identified by the civil justice review as the key to reducing delay and cost. The Government therefore intend, by means of primary legislation, to reserve the High Court for public law and other specialist cases, and for general cases of unusual importance, substance or complexity.

A new system will be introduced to ensure that cases are handled and tried at the appropriate level. The upper financial limit of county court jurisdiction will be removed. Entry to the High Court and eligibility for High Court trial will be regulated. The criteria for allocation of cases will include financial limits applied to particular classes of business. These powers will be exercised to effect a major shift of lower level personal injury cases from the High Court to the county courts. Similar provision will be made in due course for debt cases. Housing possession cases currently dealt with in the High Court will be moved to the county court at a later stage, following discussion with interested parties.

Increases in both the trial jurisdiction of registrars and the upper financial limit of the automatic small claims jurisdiction will complete the new pattern of case distribution, and will help to offset the additional workload for circuit judges resulting from the shift of cases out of the High Court. Development of continuous trial facilities at suitable centres will also help the county courts to absorb an increased volume of cases.

Related procedural changes

The new system of case allocation will be accompanied by a number of changes designed to eliminate unnecessary differences between High Court and county court procedure. Subject to certain exceptions, the same remedies will be available in both courts. An appropriate costs regime will be introduced for common cases and in the longer term, a common core of procedural rules will be developed to cover general High Court and county court business.

Improvements in the handling of cases

A number of procedural changes will be introduced as a means of speeding up and improving the handling of full trial cases in both the High Court and the county courts. The Government intend to give the courts a more active role in the management of case progress, in order to reduce delay before trial. A full system of court control will take some years to achieve, and in the meantime other steps are being taken to reduce pre-trial delay, especially in personal injury cases. The Government consider that the normal permitted period between issue and service of process should be reduced from 12 to four months, and that the court should have power of its own motion to order a split trial, in which the issue of liability is tried in advance of the issue of damages. The object of this is to reduce delay, which may be caused by, for example, waiting for adequate diagnosis of a plaintiff's medical condition.

Other bodies have a role in the reduction of pre-trial delay. One of the principal objectives of the Legal Aid Board is to improve the quality of service provided to users of the legal aid system, and this will include reducing the present level of delay in the handling of applications for civil legal aid. The Home Office will pursue with the police the proposal for early release of accident reports pertaining to civil proceedings. Similarly, revised guidelines will be issued by the Department of Health to health authorities, encouraging early release of medical reports.

New arrangements to encourage openness between parties, including early exchange of witness statements, are expected to encourage settlement in appropriate cases and reduce the length of hearings in cases which go to trial. There will also be new arrangements for the conduct of civil trials, to reduce the need for the lengthy taking of oral evidence.

Debt enforcement and issue of summonses

Arrangements for handling debt enforcement in the county courts will be rationalised so that in the majority of straightforward cases, judgment debts will be payable direct to the creditor. At the same time, a central, computerised summons production centre will be set up to deal more efficiently with the bulk issue of summonses by large creditors.

The division of responsibility for enforcement of judgment debts between county court bailiffs and High Court sheriffs will remain as at present, with the bailiffs' responsibility in county court cases defined by an upper financial limit of £5,000. All High Court judgments, of whatever value, will continue to go to the sheriffs. Various aspects of the system for managing bailiffs are currently being reviewed. Proposals for reform of the sheriff system are under consideration.

Access to justice

The increase in the small claims jurisdiction will be accompanied by procedural improvements, with a view to protecting unrepresented litigants and to encouraging individuals to participate more fully in the handling of small county court cases generally. These improvements include simplified court forms and printed information, and more guidance to unrepresented litigants from court staff.

The Government is planning a number of changes to the handling of housing cases in the counyy courts, including reform of existing possession procedures so as to provide the court with fuller evidence on the basis of the claim and the circumstances of the defendant. Simplified procedures will be introduced to enable landlords to recover rent arrears quickly and cheaply, without recourse to the full possession procedure; and to provide easier access to the court system for tenants and others involved in disputes about matters such as repairs. The precise scope and form of these procedures will be determined after further consultation with court users and others with an interest in housing matters.

Administration order procedures will be reviewed with a view to ensuring that they are used more effectively as a means of dealing with multiple debts.

Closer links between courts and advice agencies will be encouraged, and the Legal Aid Board will be asked to consider, in the context of its other responsibilities, whether agencies whose staff maintain a regular presence at courts, and which provide representation and other services to litigants, should be eligible for funding by the board in respect of such services. Wider availability of lay representation in smaller cases is among the matters put forward for consultation in the Government's recent Green Paper on the legal profession. The precise nature and scope of the service offered by the county courts to litigants in smaller cases will be reviewed when the results of this consultation process are known.

Judicial studies

The Government recognise the importance of enabling the judiciary to keep fully up to date with the new arrangements, particularly in relation to the proposed changes in procedure. The Judicial Studies Board will be invited to develop detailed plans to deal with this.

Other matters

There are a small number of outstanding matters to which further consideration is being given. The usefulness of the hearsay rule and the current machinery for rendering hearsay evidence admissible in civil proceedings will be examined in due course. The case for relaxing the current prohibition on contingency fees has already been opened for re-examination in a recently issued Green Paper. Finally, the Government intend to give effect to the recommendation for a judicial title for registrars.

Law Changes

Mr. Harry Greenway: To ask the Attorney-General how many matters formerly covered by the civil law now come under the auspices of the criminal law and vice versa; which are the principal areas in which change has occurred; and if he will make a statement.

The Attorney-General: I will write to my hon. Friend.

PRIME MINISTER

Gibraltar (Terrorists)

Q12. **Dr. Godman:** To ask the Prime Minister if she will place in the Library copies of her correspondence with the Spanish authorities following the deaths of the three suspected IRA terrorists in Gibraltar.

Mr. Wakeham: I have been asked to reply.

My right hon Friend the Prime Minister has not corresponded with the Spanish authorities over the deaths of the IRA terrorists in Gibraltar.

Environmental Conference

Q22. **Mr. Dalyell:** To ask the Prime Minister what response she sent to the invitation from the Dutch Government to participate in the environmental conference at The Hague during the week beginning 6 March.

Mr. Wakeham: I have been asked to reply.

My right hon. Friend the Prime Minister told the Prime Minister of the Netherlands that Her Majesty's Government would not be represented at the meeting in The Hague. As my right hon. Friend told the hon. Member for Cardiff, West (Mr. Morgan) on 23 February, we had a number of reservations about the proposed declaration.

Road Building (London)

Q24. **Mr. Corbyn:** To ask the Prime Minister when Her Majesty's Government expect to make a statement on the future of road building in London.

Mr. Wakeham: I have been asked to reply.

We are currently conducting the regular biennial review of the national trunk road programme, including the programme in London. We hope to make an announcement later.

Finchley Central Station.

Q34. **Mr. Spearing:** To ask the Prime Minister when she next expects to make an official visit to Finchley central station.

Mr. Wakeham: I have been asked to reply.

My right hon. Friend has at present no plans to do so.

Economic Performance

Q37. **Mr. Fishburn:** To ask the Prime Minister what representations she has received regarding the performance of the economy.

Mr. Wakeham: I have been asked to reply.

I refer my hon. Friend to the reply that I gave earlier today to my hon. Friend the Member for Eddisbury (Mr. Goodlad).

Budget

Q139. **Mr. John Browne:** To ask the Prime Minister what representations she has received regarding the tax changes in the Budget.

Q206. **Sir Anthony Grant:** To ask the Prime Minister what representations she has received regarding the tax changes in the Budget.

Q210. **Mr. Cash:** To ask the Prime Minister what representations she has received regarding the tax changes in the Budget.

Mr. Wakeham: I have been asked to reply.

The tax changes in the Budget have been widely welcomed.

Fraud

Q171. **Mr. Teddy Taylor:** To ask the Prime Minister what proposals she will submit to the European Council meeting in Madrid about fraud; and if she will make a statement.

Mr. Wakeham: I have been asked to reply.

I refer my hon. Friend to my right hon. Friend the Prime Minister's answer to his question of 2 March 1989 at columns *295-96*.

An important development since then has been the meeting of the Economic and Finance Council on 13 March at which the Commission promised new or revised proposals to combat fraud and mismanagement in a

number of areas, notably agricultural export refunds and intervention storage. Some of these proposals are expected to be tabled before the June meeting of the Economic and Finance Council at which action against fraud will once again be discussed. The Government's approach to the Madrid European Council will reflect the terms of this discussion.

Margaret Marsh

Q188. **Mr. Nicholas Baker:** To ask the Prime Minister if she will pay an official visit to Margaret Marsh.

Mr. Wakeham: I have been asked to reply.
My right hon. Friend has at present no plans to do so.

Quangos

Mr. McCrindle: To ask the Prime Minister if she will list the number of quangos abolished for each year since 1979 to the present date.

The Prime Minister: The numbers abolished are as follows:

	Number
1979-83	608
1983-84	73
1984-85	75
1985-86	60
1986-87	81
1987-88	40

Information relating to individual years 1979-83 is not available. Figures relate to 1 April each year. Information for 1988-89 will be published in December in "Public Bodies 1989".

Armed Forces (Medical and Dental Officers)

Mr. Leigh: To ask the Prime Minister if she will make a statement about the pay of medical and dental officers in the armed forces.

The Prime Minister: The armed forces pay review body has submitted to me a supplementary report on the pay of medical and dental officers in the Armed Forces which recommends increases of between 4·7 per cent. and 8·3 per cent. with effect from 1 April 1989. For the majority the recommended increase is 8 per cent. These awards are derived from those to civilian doctors and dentists which I announced in the House on 16 February 1989 and the Government have decided to accept them in full.

The report has been published as Cm 667 and copies are available in the Vote Office.

Engagements

Mr. Barry Field: To ask the Prime Minister if she will list her official engagements for Thursday 6 April.

Mr. Pike: To ask the Prime Minister if she will list her official engagements for Thursday 6 April.

Mr. Martin: To ask the Prime Minister if she will list her official engagements for Thursday 6 April.

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Thursday 6 April.

Mr. Wakeham: I have been asked to reply.

This morning my right hon. Friend the Prime Minister presided at a meeting of the Cabinet. In the course of the day she will be having meetings with President Gorbachev. This evening she will give a dinner for him.

SCOTLAND

Beef Variable Premium

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland how many cattle herds in Scotland are defined as *(a)* specialist rearing herds and *(b)* finishing herds for the purposes of payment under the variable premium scheme.

Mr. Michael Forsyth: Cattle herds were not distinguished for the purposes of payment under the beef variable premium scheme, which ended on 2 April 1989.

Set-aside Scheme

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will list in the *Official Report* the total number of applications received for set-aside from farmers in each Scottish region to the latest available date, indicating the number of hectares involved in each region.

Mr. Michael Forsyth: I refer the hon. Member to the reply which I gave the hon. Member for Angus, East (Mr. Welsh) on 19 December 1988. The closing date for applications to enter the set-aside scheme in 1988 was 21 October.

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will list in the *Official Report* the total level of set-aside arrangements which have been reached to the latest available date, giving a break-down of hectares per Scottish region.

Mr. Michael Forsyth: The information requested, in respect of applications accepted by 31 March 1989, is set out in the table.

Region	*Number of applications accepted by 31 March 1989*	*Total set-aside area (hectares)*
Borders	17	867
Central	3	181
Dumfries and Galloway	3	42
Fife	17	718
Grampian	222	6,760
Highland	25	1,143
Lothian	7	351
Orkney Islands Area	—	—
Shetland Islands Area	—	—
Strathclyde	13	268
Tayside	56	1,733
Western Isles Island Area	—	—
All Scotland	363	12,063

National Health Service Grading

Dr. Godman: To ask the Secretary of State for Scotland if he will publish in the *Official Report* the number of appeals currently lodged with each of the health boards concerning the clinical grading of National Health Service employees; how many of these appeals have been dealt with; and, of these, how many were upheld.

Mr. Michael Forsyth: This information is not held centrally.

Community Charge

Dr. Godman: To ask the Secretary of State for Scotland what is his latest assessment of the number of losers and gainers under the poll tax in *(a)* Inverclyde, *(b)* Strathclyde and *(c)* Scotland as a whole.

Mr. Lang: Our calculations show that the number of households in Scotland gaining and losing as a result of the introduction of the community charge is roughly equal. There is no reason to suppose that the situation in Inverclyde or Strathclyde would be any different.

Mrs. Ray Michie: To ask the Secretary of State for Scotland whether British citizens married to United States service men stationed in Scotland are exempt from payment of the community charge as members of visiting forces and their families.

Mr. Lang: No. The exemption for members of visiting forces does not extend to dependants who are citizens of the United Kingdom or who are ordinarily resident in the United Kingdom.

Fish Farms

Mrs. Ray Michie: To ask the Secretary of State for Scotland whether owners of fish farms are eligible for compensation from the Government for recent storm damage.

Mr. Michael Forsyth: Government have no general financial liability for storm damage. Details of the damage sustained in mid-January and early February, however, have been obtained from local authorities and others affected, including fish farmers. These are now being analysed and my right hon. and learned Friend will be making a statement shortly.

FOREIGN AND COMMONWEALTH AFFAIRS

Egypt

Mr. Neil Hamilton: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Dr. Ashraf Marwan is an accredited diplomat representing the Arab republic of Egypt in the United Kingdom.

Mr. Eggar: According to our records, Doctor Ashraf Marwan is not, nor has ever been, an accredited diplomat representing the Arab republic of Egypt in the United Kingdom.

Soviet Jewry

The Rev. Martin Smyth: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has as to those Soviet Jews who are still unable to leave the Soviet Union or who are unable to teach, learn or practise their religion; and if he will list those individuals about whom his Department is aware.

Mr. Waldegrave: We are encouraged by the recent improvements in Soviet human rights, including the granting of exit visas to a number of refuseniks known to us. But while individual gestures are always welcome there are many other cases still to be resolved. We want to see, above all, the fundamental reforms needed to ensure that human rights abuses do not recur. The quantity of such visas should not be dependent on lobbying by Her Majesty's Government and non-governmental organisations nor on the intervention of Mr. Gorbachev or Mr. Shevardnadze, however welcome these interventions may be.

Poland (Talks)

Mr. Wilshire: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the conclusion of the round table talks in Poland.

Mr. Waldegrave: I think that we have all watched events in Poland with fascination in recent weeks.

The round table itself deserves a place in history. We, and others in the West, now hope to see its proposals on political reform put into practice, to the benefit of the Polish people and the whole of Europe. We trust this will be done in such a way that there can be no question of a reversal.

Forty-four years ago at Yalta, the three powers called for free and unfettered elections in Poland. Such elections were never held. Now, for the first time in post-war Poland, we have the prospect of elections in which an opposition has a real chance to participate. This is a remarkable step forward. There is still far to go before the hopes of Yalta can be realised. But let us hope that the forthcoming elections will prepare the way.

Poland still has many problems to confront. The round table produced mainly generalities on economic policy. The Polish authorities and opposition will need to continue to work together to translate these generalities into practical policies. They need to agree an economic adjustment programme which can in due course secure the approval of the international community and financial institutions.

There is a great will here for Poland to succeed. The Government are already spending considerably increased sums to help the Poles help themselves, for example, by providing more training and scholarships. We shall certainly be looking seriously and urgently at other practical, carefully targeted ways of helping the Poles fulfil the hopes for political and economic advance that the round table agreement has raised.

WALES

Gynaecologists

Mrs. Clwyd: To ask the Secretary of State for Wales how many gynaecologists are employed in the National Health Service in Wales as a whole and by district; and how many are *(a)* men and *(b)* women in each district.

Mr. Grist: The information, which relates to consultants with a main specialty of obstetrics and gynaecology, is given in the table.

Numbers of consultants in post as at 30 September 1987[1]

Health Authority	*Male*	*Female*	*Total*
Clwyd	6	—	6
East Dyfed	10	—	10
Gwent	4	1	5
Gwynedd	7	—	7
Mid Glamorgan	6	4	10

Health Authority	Male	Female	Total
Pembrokeshire	2	—	2
Powys	5	—	5
South Glamorgan	6	2	8
West Glamorgan	5	1	6
Wales[2]	39	8	47

[1] Provisional. Excludes locum staff.
[2] Consultants working for more than one authority are shown against each and therefore the Wales total may not be the sum of numbers in individual authorities.

ENERGY

Electricity Prices

Mr. Andrew F. Bennett: To ask the Secretary of State for Energy if he will make a statement about the expected price of electricity over the next five years.

Mr. Michael Spicer: The electricity industry is currently announcing its prices for 1989-90. After privatisation, the combination of competition in electricity generation and supply and the controls contained in the public electricity supply licences will put downward pressure on prices.

Combined Heat and Power

Mr. Rost: To ask the Secretary of State for Energy if he will update the estimates provided in energy papers 20, 35 and 53, which calculated the reduction in fossil fuel burn that would result from the introduction of combined heat and power, assuming *(a)* the fuel for CHP plant will be coal, gas, or nuclear, and *(b)* a more competitive regime resulting from the privatisation of the electricity industry.

Mr. Peter Morrison: My Department has no plans to update the estimates made in energy papers 20, 35, 53.

While CHP would reduce the overall primary energy requirement compared to separate production of heat and power the extent of implementation of CHP and the resultant fuel savings will depend on investment decisions of developers. The inherent thermal efficiency of CHP means that it should be well placed to take advantage of the more competitive arrangements resulting from our privatisation proposals.

Reprocessing (Sellafield)

Dr. Thomas: To ask the Secretary of State for Energy, pursuant to his reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 8 March, column *546*, if he will set out the policy reasons underlying his statement that it is not in the national interest to give timing and operational reasons of reprocessing campaigns at Sellafield.

Mr. Michael Spicer: I have nothing to add to my answer of 8 March 1989, at column *546*.

Dr. Thomas: To ask the Secretary of State for Energy if, in light of the statement to Standing Committee E on the Electricity Bill, 7 March, *Official Report*, column 1480, by the hon. Member for Mid-Worcestershire (Mr. Forth) that every contract signed to reprocess foreign matter includes a requirement that all the waste products should be sent back to the country of origin, he will state when contracts signed before 1976 for reprocessing of spent nuclear fuel at BNFL Sellafield, which did not originally include such a requirement, were renegotiated to include such a clause.

Mr. Michael Spicer: The pre-1976 contracts to which the hon. Member refers have not been renegotiated to include return of wastes clauses.

Sellafield

Dr. Thomas: To ask the Secretary of State for Energy if Her Majesty's Government will give permission to the European Commission to give further details to Llwellyn Smith MEP, in reply to his question, number 881/88 of 2 August 1988, replied to on 21 February 1989 by Commissioner Cardoso E. Cunha on the specific issues of *(a)* the number of installations on the BNFL Sellafield site, *(b)* the number that handle only civil nuclear materials, *(c)* the number also contain simultaneously or sequentially military materials, and *(d)* the number of installations at BNFL Sellafield that have particular safeguard provisions under Commission regulation CR 3227/76 in force.

Mr. Michael Spicer: The particular safeguards provisions for facilities at BNFL Sellafield are currently under discussion and to date four have been brought into force. The additional information requested is confidential.

Hinkley Point C

Mr. Malcolm Bruce: To ask the Secretary of State for Energy (1) what representations he has received about the future use of Combwich wharf resulting from the construction of the proposed Hinkley Point C power station; and what response he has made;

(2) what steps he is taking to ensure that the natural environment near Combwich wharf, Combwich, Somerset and the living conditions of local residents are not adversely affected increased activity resulting from the construction of Hinkley Point C.

Mr. Michael Spicer: The CEGB submitted the Central Electricity Generating Board Compulsory Purchase (Combwich) Order 1988 to my right hon. Friend for confirmation on 2 February 1989.

Seventeen statutory objections to the order have been received from owners and occupiers affected by it, together with 68 other objections. A public local inquiry into the order has therefore been arranged.

Mr. Michael Barnes QC has been appointed to hold the public local inquiry which will commence at 9.30 am on Tuesday 13 June 1989 at Cannington court, Church street, Cannington, Bridgewater, Somerset.

Shell (Exploration Licence)

Sir John Stanley: To ask the Secretary of State for Energy where exploration licence EXL 083, granted by his Department to Shell in 1986, is available for public inspection; and whether he will place a copy in the Library.

Mr. Peter Morrison: Landward exploration licences (EXLs) are not made available for public inspection because they contain commercially confidential information. EXL 083 was issued pursuant to the Petroleum (Production) (Landward Areas) Regulations 1984, S.I.

1984 No. 1832, which sets out the model clauses to be incorporated in such a licence. Copies of these regulations are available in the Library of the House.

Quangos

Sir Neil Macfarlane: To ask the Secretary of State for Energy if he will list the quasi-autonomous non-governmental organisations either *(a)* created or *(b)* closed, since 1979 for which he has departmental responsibility; and how many people he appoints to these bodies.

Mr. Parkinson *[holding answer 5 April 1989]:* The following non-departmental public bodies were created:

Oil and Pipelines Agency[1]
Offshore Safety and Technology Board
Renewable Energy Advisory Committee
Offshore Industry Advisory Board

and the following were abolished:

Advisory Committee on Fixed Offshore Installations
Energy Commission
Offshore Safety Committee
Advisory Council on Energy Conservation

In addition the Office of Gas Supply, a non-ministerial department, was established under the Gas Act 1986. The Director General of Gas Supply was appointed under the terms of the Act.

Information on appointments, excluding those relating to Ofgas, can be obtained from "Public Bodies 1988", a copy of which is in the Library of the House. Questions about the staffing of Ofgas are a matter for the Director General of Gas Supply.

[1] The Oil and Pipelines Agency took over responsibility for the property, rights and liabilities of the British National Oil Corporation on 1 December 1985.

EMPLOYMENT

Claimant Advisers

Ms. Short: To ask the Secretary of State for Employment what advice his Department issues on the personal liability claimant advisers have if the advice they give to claimants about in-work benefits is incorrect and as a consequence the claimant loses money and is much worse off in work than was suggested to them; and if he will make a statement.

Mr. Lee: When giving advice on in-work benefits, claimant advisers are specifically instructed that any personal calculations provided should be clearly shown as estimates only and that entitlements can be assessed only when applications are properly made. The following disclaimer is included:

"Entitlements can only be assessed when applications are properly made and processed. The calculations below are therefore estimates only. The Department will not accept liability for loss occasioned if reliance is placed upon them".

Restart

Ms. Short: To ask the Secretary of State for Employment what happens to the newly, and any previously, completed RR6s that claimants have to fill in as part of their restart interview; and whether they can be passed on to other restart counsellors or claimant advisers, or other members of the employment service, such as fraud investigators.

Mr. Lee: Restart clients complete a restart interview form (RR6) every six months. The most recent form is kept with the client's records at the local office. Previous forms are usually destroyed. The RR6 may be passed on to other members of the employment service who are involved in follow-up reviews or concerned with entitlement to benefit.

Claimants

Ms. Short: To ask the Secretary of State for Employment whether, after a claimant has filled in an availability questionnaire, either a UB671 or an RR6, they can *(a)* subsequently obtain a copy of their answers on request; and *(b)* change their answers to the questions before or when they are passed on to an adjudication officer.

Mr. Lee: Yes.

SOCIAL SECURITY

Child Benefit

181. **Ms. Quin:** To ask the Secretary of State for Social Security what would have been the cost of increasing child benefit in line with earnings in each of the last two years.

182. **Mr. Nellist:** To ask the Secretary of State for Social Security what would have been the cost of increasing child benefit in line with earnings in each of the last two years.

183. **Mr. Parry:** To ask the Secretary of State for Social Security what would have been the cost of increasing child benefit in line with earnings in each of the last two years.

184. **Mr. Murphy:** To ask the Secretary of State for Social Security what would have been the cost of increasing child benefit in line with earnings in each of the last two years.

Mr. Peter Lloyd: After taking account of the uprating in April 1987, the additional cost (net of savings on other benefits) would have been about £70 million in 1987-88 and a further £260 million in 1988-89.

Mr. Robin Cook: To ask the Secretary of State for Social Security if he will place in the Library the papers relevant to his Department's re-estimation of the numbers eligible to receive family credit.

Mr. Peter Lloyd: We will do so shortly.

ENVIRONMENT

Rents

Mr. Chris Smith: To ask the Secretary of State for the Environment what information he has as to the average level of registered rents being set for *(a)* a one-bedroom flat, *(b)* a two-bedroom flat, and *(c)* a three-bedroom flat or house, in (i) inner London and (ii) the borough of Islington, in December 1986, December 1987, and now.

Mr. Trippier: The available estimates for each of the last three years are given in the table. Monthly estimates are based on samples too small to give reliable figures.

Annual average registered rents in regulated properties £ per annum[1,2]

	1986		1987		1988	
	Islington	*Inner London*	*Islington*	*Inner London*	*Islington*	*Inner London*
Flats with one habitable[3] room	897	1,161	1,420	1,357	845	1,394
Flats with two habitable rooms	979	1,174	1,077	1,283	1,199	1,444
Houses or flats with three or more habitable rooms	1,229	1,360	1,282	1,454	1,366	1,612

[1] Rents for rooms let as part of a house or flat are not included.
[2] Under pre-1988 legislation rents were registered for two years at a time so 1987 figures are not strictly comparable with 1986.
[3] Excluding bathrooms, kitchens, WCs, hallways, attics used for storage and cellars.

Rating Reform

Mr. Blunkett: To ask the Secretary of State for the Environment if he will publish the guidance to be sent to general practitioners on community charge exemption processing for those who are severely mentally impaired.

Mr. Gummer: When the guidance to general practitioners has been finalised, a copy will be placed in the Library.

Mr. Blunkett: To ask the Secretary of State for the Environment what arrangements are being made to financially support local authorities for revenue forgone on individuals exempt from the community charge.

Mr. Gummer: The distribution of the needs grant will take into account the fact that authorities will raise no community charge income from exempt persons.

Mr. Blunkett: To ask the Secretary of State for the Environment if he will list the rights of appeal available to residents of premises where a collective community charge is payable on the level of their contribution to the community charge.

Mr. Gummer: The level of the daily contribution is fixed by statute as the daily rate of the charging authority's personal community charge. There is no appeal against the level of the personal community charge and, therefore, similarly there is no appeal against the level of the statutory contribution. Information on the correct level of contributions will be available from the charging authority.

Council House Sales

Mr. Thurnham: To ask the Secretary of State for the Environment how many houses purchased by council tenants under the right-to-buy scheme have since been resold to the local authority; and if he will make a statement.

Mr. Trippier: Information on the repurchase of ex-council houses sold under the right-to-buy scheme is not available.

Dog Registration Scheme

Mr. Shersby: To ask the Secretary of State for the Environment if he will make an estimate of the annual cost of implementing a dog registration scheme on the basis proposed by the Royal Society for the Protection of Animals on the assumption that such costs are borne *(a)* by dog owners and *(b)* by the Exchequer.

Mrs. Virginia Bottomley: No. The setting up of a national dog registration scheme would require elaborate bureaucratic machinery. The Government do not intend to introduce such a scheme and therefore no estimate has been made of the costs involved.

Parish Councils

Mr. Blunkett: To ask the Secretary of State for the Environment if he will publish his best estimates of the total amount of business rate income lost to parish councils with *(a)* a population of more than 10,000 and *(b)* a population of less than 10,000 due to the introduction of the community charge in April 1990.

Mr. Gummer *[holding answer 23 March 1989]:* I have made no such estimates of the effects of the national non-domestic rate on individual parish councils.

House of Commons Cleaners

Mr. Vaz: To ask the Secretary of State for the Environment if the cleaners in the House of Commons use biodegradable cleaning products.

Mr. Chope *[holding answer 4 April 1989]:* The cleaning products purchased by the parliamentary works office for use by the House of Commons staff are biodegradable. Some cleaning work is also undertaken by a contractor who is responsible for providing his own materials. I understand that the cleaning materials they use are also biodegradable.

Sewage Treatment Works

Mr. Ron Davies: To ask the Secretary of State for the Environment if he will list those sewage treatment works in each English water authority which discharged effluent below the required standard for the most recent year for which full figures are available.

Mr. Moynihan *[holding answer 4 April 1989]:* Copies of reports from water authorities, listing those sewage treatment works which failed to comply with their discharge consents in 1987, are available in the Library of the House. I expect shortly to publish results for 1988.

Bathing Waters

Mr. John Garrett: To ask the Secretary of State for the Environment further to his answers to the hon. Member for Norwich, South on 20 March, *Official Report*, columns

421-22 and 21 March, *Official Report* columns *506-7*, if he will list in the *Official Report* the number and location of beaches in 1988 in the EEC guide and mandatory levels for those standards in respect of cadmium, arsenic, pesticides, nitrogen, ammonia, phosphates and faecal streptococci in bathing waters which were the responsibility of the Anglian water authority, which are not listed in the summary of the 1988 "Survey of Bathing Waters" he has placed in the Library.

Mr. Moynihan *[holding answer 4 April 1989]:* The report placed in the Library contains all the information reported to the Department by the Anglian water authority in connection with the 1988 bathing water quality survey.

London Residuary Body

Mr. Tony Banks: To ask the Secretary of State for the Environment who were the two London residuary body board members identified in the 1987-88 accounts to be in receipt of emoluments in the range £20,000 to £25,000; and how many days per week each of them worked.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Mr. Jack Esling and Mr. Michael Roberts. Their remuneration as members of the London residuary body board during 1987-88 was based on time commitments of four and three days a week respectively.

Mr. Tony Banks: To ask the Secretary of State for the Environment why the London residuary body decided to levy the sum of £297,000 in 1989-90 on the outer London boroughs; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The levy is required to meet the costs of pension payments to former magistrates courts' staff.

Mr. Tony Banks: To ask the Secretary of State for the Environment what properties have been disposed of by the London residuary body to the London docklands development corporation.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* None, but negotiations are in hand on a number of properties.

Mr. Tony Banks: To ask the Secretary of State for the Environment what sum was received by the London residuary body for the sale of the freehold interest in 45-59 Albion street, Southwark, to Storechart Property Ltd.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The disposal of 45-59 Albion street Southwark has yet to be completed.

Mr. Tony Banks: To ask the Secretary of State for the Environment what matters remain to be resolved as between his Department and the London residuary body in respect of the Greater London Supplies.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Discussions about the future of Greater London Supplies are continuing between the Department of the Environment, the Department of Education and Science, the London residuary body and the Inner London education authority.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will give details of the days worked each week by the part-time appointees to the London residuary body; and what was the sum each received in the financial year 1988-89.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The time commitments of part-time members of the London residuary body to LRB work and their salaries during 1988-89 were as follows:

		£ per annum	
	Number of days per week	*(from 1 April 1988)*	*(from 1 October 1988)*
Mr. Alan Blakemore, CBE	2	13,608	13,972
Mr. Jack Esling	2	13,608	13,972
Mr. Jack Wolkind, CBE	2	13,608	13,972
Mr. Wallace Mackenzie, OBE	2½	17,010	17,240
Mr. Michael Roberts	3	20,412	20,688
Cllr. Sir Peter Bowness, CBE	1	6,804	6,896

Remuneration is subject to abatement, if applicable, in respect of public sector pension received.

Information on the total remuneration paid to board members in 1988-89 will be contained in the LRB's annual report and accounts for that financial year, which will be laid before Parliament in the autumn.

Mr. Tony Banks: To ask the Secretary of State for the Environment to whom the London residuary body's freehold interest in the Matthews yard residential properties and the shops at 27 and 29 Shorts gardens WC2 was sold; and what was the disposal price in each case and collectively.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* This is a matter for the London residuary body and the purchaser.

Mr. Tony Banks: To ask the Secretary of State for the Environment to whom the London residuary body's freehold interest in Bush house was sold; and what was the disposal price.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* This is a matter for the London residuary body and the purchaser.

Mr. Tony Banks: To ask the Secretary of State for the Environment why the disposal decision of the London residuary body in respect of 100-124 Shaftesbury avenue to Gratex Ltd. was changed in favour of Carmellia Holdings Ltd; and what was the disposal price.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* In this case the name of the purchasing firm was changed in the course of the transaction. Information on the disposal price is a matter for the London residuary body and the purchaser.

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has regarding the sale of the London residuary body's freehold interest in Southwark bridge business centre to Mackenzie and Campbell House Ltd; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The London residuary body has yet to decide on the disposal of its interest.

Thames Flood Warning

Mr. Tony Banks: To ask the Secretary of State for the Environment what arrangements he proposes will exist beyond 30 April in respect of the Thames tidal flood warning system.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Recent meetings involving London boroughs, Government Departments and the London residuary body have concluded that it is for the boroughs using the powers available to them to consider the future of the tidal flood warning system.

Unitary Plans

Mr. Heddle: To ask the Secretary of State for the Environment if he will publish in the *Official Report* the timetable for the submission of unitary plans to his Department.

Mr. Howard: Once a commencement order has been made following the issue of strategic guidance by the Secretary of State, an authority is required to prepare its unitary development plan. DOE circular 3/88 advises that authorities should publish their draft plans within two years of commencement. Those with a good up-to-date local plan base should achieve this stage within one year of commencement.

Commencement orders were made for the west midlands and Merseyside in 1988. Commencement orders for London and the remaining metropolitan areas are likely to be issued by the summer.

AGRICULTURE, FISHERIES AND FOOD

Cattle Herds

Mrs. Margaret Ewing: To ask the Minister of Agriculture, Fisheries and Food how many cattle herds in England and Wales are defined as *(a)* specialist rearing herds and *(b)* finishing herds for the purposes of payment under the variable premium scheme.

Mr. Donald Thompson: Cattle herds were not distinguished for the purposes of payment under the beef variable premium scheme, which ended on 2 April 1989.

Sheepmeat Regime

Mrs. Margaret Ewing: To ask the Minister of Agriculture, Fisheries and Food when he anticipates completion of negotiations on the European Community sheepmeat regime; if he will make a statement on the current state of these negotiations; and what account he has taken of the importance attached by farmers to store sales.

Mr. Donald Thompson: Discussions on the EC Commission's proposals for changes to the sheepmeat regime have made little progress. Negotiations may well continue for some time. I am well aware of the desirability of ensuring that any changes to the regime are introduced with sufficient notice so that farmers can plan ahead, particularly when making purchases at store sales.

Mrs. Margaret Ewing: To ask the Minister of Agriculture, Fisheries and Food if he will list in the *Official Report* the pound sterling equivalent of the per ewe payment allocated to farmers in each member state of the European Community under the sheepmeat regime as presently constituted.

Mr. Donald Thompson: The Commission regulation setting rates of ewe premium is due to be published shortly. I will write to the hon. Member when the details are available.

Set-aside Schemes

Mrs. Margaret Ewing: To ask the Minister of Agriculture, Fisheries and Food if he will list in the *Official Report* the current level of progress on set-aside schemes in each member state of the European Community, showing such progress as percentage of levels currently attained in the United Kingdom.

Mr. Ryder: The United Kingdom was the first member state to implement the set-aside scheme, and others remain at various stages of implementation. No figures are yet available for Luxembourg and Denmark, who are still in the process of introducing schemes, and for Greece and Italy, who are still receiving applications for their schemes. The schemes in most other member states are also still open for applications, and the figures for uptake are therefore provisional. Portugal does not yet have to apply a scheme.

The information available to date on uptake in other member states compared with set-aside in the United Kingdom of about 58,000 hectares is as follows:

	Hectares set-aside	*Percentage of United Kingdom hectares set-aside*
Belgium	383	0·7
France	2,409	4·2
Ireland	1,918	3·3
Netherlands	1,222	2·1
Spain	6,202	10·8
Germany	170,635	296·2

Cereal Substitutes

Mrs. Margaret Ewing: To ask the Minister of Agriculture, Fisheries and Food if he will list in the *Official Report* the level of imports into the United Kingdom of cereal substitutes in each of the past five years.

Mr. Ryder: The following table shows the total tonnage of materials on the European Community list of cereal substitutes imported into the United Kingdom in each of the most recent five years.

Calendar year	*Imports of cereal substitutes (thousand tonnes)*
1984	1,048
1985	1,038
1986	1,035

Calendar year	Imports of cereal substitutes (thousand tonnes)
1987	1,091
1988	1,099

NORTHERN IRELAND

Road Programmes

Mr. McGrady: To ask the Secretary of State for Northern Ireland what were the individual costings of the following road programmes covered by the additional £8·7 million recently announced by the Parliamentary Under-Secretary of State for the Environment: both the M1 and M2 motorways, route A4 Dungannon to Enniskillen, route A2 near Carrickfergus, Bushmills and Ballykelly, route A37 between Coleraine and Limavady, route A20 Newtownards to Portaferry and Mountstewart, route A23 Belfast to Ballygowan, near Castlereagh, route A54 at Castleroe, near Coleraine, route A24 Belfast to Newcastle, near Seaforde and route A7 Carryduff to Saintfield, near Carryduff and Lisdoonan.

Mr. Needham: Individual costings of road maintenance works on the routes named are as follows:

M1 and M2 motorways—£618,000 (M1 £568,000, M2 £50,000)
Route A4—Dungannon to Enniskillen—£450,000
Route A2—near Carrickfergus, Bushmills and Ballykelly—£213,000
Route A37—between Coleraine and Limavady—£86,000
Route A20—Newtownards to Portaferry and Mountstewart—£76,000
Route A23—Belfast to Ballygowan, near Castlereagh—£116,000
Route A54—At Castleroe, near Coleraine—£28,000
Route A24—Belfast to Newcastle, near Seaforde—£43,000
Route A7—Carryduff to Saintfield, near Carryduff and Lisdoonan—£93,000

The works are representative of maintenance works carried out throughout Northern Ireland.

Medical Practices (Patients)

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland, pursuant to his written reply of 11 January to the right hon. Member for Strangford, *Official Report*, columns *693-94*, how many persons are on the lists of each of the three medical practices based at Portaferry and Kircubbin.

Mr. Needham: Information about the number of patients on a general medical practitioner's list is treated as confidential and may not be disclosed without the permission of the doctor concerned.

Griffiths Report

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland if he will publish his Department's reponse and observations on Sir Roy Griffiths' report "Care in the Community-Agenda for Action"; and what advice his Department is giving to health and social services boards as to how they should plan their services in the light of the findings in this report.

Mr. Needham: Sir Roy Griffiths was asked by the Secretary of State for Social Services to review the way in which public funds are used to support community care policy specifically in England and to advise on possible ways of improving the use of those funds to achieve a more effective delivery of community care. The issues raised by his report are being considered by the Government. The conclusions reached will be of interest throughout the United Kingdom, but differences in the arrangements for the management of community care in the various parts of the United Kingdom will have to be taken into account in framing proposals for action.

Sexual Abuse (Children)

Mr. Allen: To ask the Secretary of State for Northern Ireland what Government-funded research into the sexual abuse of children *(a)* has taken place since 1979, *(b)* is currently taking place and *(c)* is under consideration, giving the cost of each project listed.

Mr. Needham: The Department of Health and Social Services has provided £46,250 to finance the Northern Ireland children's study. The study, undertaken by a research team from the department of child psychiatry at the Royal Belfast hospital for sick children and the department of community medicine and medical statistics at the Queen's university of Belfast, investigates the incidence and prevalence of child sexual abuse in Northern Ireland. The findings should be published later this year. Proposals for following up the study by further research into questions about the incidence of child sexual abuse in Northern Ireland are being considered.

Housing

Mr. William Ross: To ask the Secretary of State for Northern Ireland what were the sums tendered for the demolition of each block of flats in the Bogside, Londonderry; when the work began and finished; when the last contract let begins and finishes; what technical standards are required of contractors tendering; if the Housing Executive employed outside consultants and what consultancy fees have been paid or are pending in respect of each stage of the work.

Mr. Needham *[holding answer 22 March 1989]:* This is a matter for the Northern Ireland Housing Executive and the chief executive has advised me that the tenders accepted for the demolition of the Rossville flats in Londonderry were as follows:

	£
Block 1	128,860
Blocks 2 and 3	297,800

The demolition contract for block 1 commenced on 30 June 1986 and was completed on 10 April 1987. Work on the demolition of blocks 2 and 3 began on 6 February 1989 with an estimated completion period of 30 weeks. All tenderers are required to be on the Housing Executive's register of approved contractors and have specialist insurance.

The executive employed a consultant who received a fee of £14,375 in respect of block 1. The fee to be paid for the demolition of blocks 2 and 3 is estimated at about £23,500.

Access to Information

Ms. Mowlam: To ask the Secretary of State for Northern Ireland if he has any plans to extend to Northern

Ireland the change in the law introduced by *(a)* the Local Government (Access to Information) Act 1985, *(b)* the Access to Personal Files Act 1987, and *(c)* the Access to Medical Reports Act 1988.

Mr. Ian Stewart *[holding answer 4 April 1989]:* Many of the functions carried out by local authorities in Great Britain are carried out by central Government in Northern Ireland. There are no plans at present to introduce legislation similar to the Local Government (Access to Information) Act 1985.

A draft Northern Ireland Order in Council, which will contain provisions corresponding to the Access to Personal Files Act 1987 and the Access to Medical Reports Act 1988, is currently in preparation.

Self-governing Hospitals

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what guidance he is issuing to health and social services boards as to the identification of hospitals which may wish to apply for self-governing status; what information he has about any hospital in Northern Ireland being a candidate for this status; and if he will make a statement.

Mr. Needham *[holding answer 4 April 1989]:* On 23 March 1989, I announced the publication of seven working papers which describe in greater detail how particular proposals outlined in the White Paper "Working for Patients" (Cm 555) will be implemented in Northern Ireland. Copies are available in the Library.

Working paper 1 "Self Governing Hospitals in Northern Ireland" makes it clear that the Government regard all hospitals as potentially eligible for self-governing status, but it is likely to be particularly appropriate to major acute hospitals with over 250 beds and I would expect initial proposals to come from this type of hospital.

Stolen Weapons

Mr. Livingstone: To ask the Secretary of State for Northern Ireland, pursuant to the answer to the hon. Member for Brent, East of 23 January, *Official Report*, column *395*, if he will state the number of weapons stolen from police stations in Northern Ireland in each of the categories from 1970 to the present date.

Mr. Ian Stewart *[holding answer 4 April 1989]:* As I indicated in the answer given to the hon. Member on 23 January 1989 at column *395*, centralised records do not differentiate between the actual sources of theft.

Mr. Peter Bell (Bombing)

Mr. Livingstone: To ask the Secretary of State for Northern Ireland if he will call for a report from the Chief Constable of the Royal Ulster Constabulary as to the stage which investigations have reached into the bombing of the home of Mr. Peter Bell, a civil servant working for his Department.

Mr. Ian Stewart *[holding answer 4 April 1989]:* A bomb explosion occurred on 12 March 1976 between the homes of Mr. Bell and another civil servant. Although there was extensive damage to both houses no one was injured in the explosion. I understand that the police file in this case remains open.

HEALTH

Organ Donors

Mr. Ashley: To ask the Secretary of State for Health if he will request regional health authorities to include the words, "Are you an organ donor?" on all hospital admission forms.

Mr. Freeman: No. The working party chaired by Sir Raymond Hoffenberg examined this suggestion and considered that it would increase the anxiety of patients entering hospital. It would be unlikely to increase substantially the availability of organs because most potential donors are unconcious on admission to hospital.

Prescriptions

Mr. Nicholas Bennett: To ask the Secretary of State for Health what estimate he has as to the total saving which has been made by the National Health Service since the limited list was introduced.

Mr. Mellor: In 1985-86 the selected list scheme saved £75 million on the drugs bill. It is difficult to make meaningful estimates for subsequent years but we have no reason to doubt that significant savings continue to be made.

Cook-chill Food

Mrs. Clwyd: To ask the Secretary of State for Health when the revised guidelines on cook-chill will be published.

Mr. Kenneth Clarke: I refer the hon. Member to my reply of 24 February 1989 to the hon. Member for Stoke-on-Trent, North (Ms. Walley) at columns *824-25*.

Mrs. Clwyd: To ask the Secretary of State for Health whether there will be stiffer regulations regarding temperature control of cook-chill food in the revised guidelines on cook-chill.

Mr. Kenneth Clarke: My Department's expert group and the relevant recent research have confirmed that the temperature controls specified in the 1980 guidelines are still appropriate and they are likely to form the basis of the guidance given in the revised guidelines when these are published.

Mrs. Clwyd: To ask the Secretary of State for Health what scientific advice has been taken by his Department in revising the guidelines on cook-chill.

Mr. Kenneth Clarke: My Department convened an expert group to review the guidelines on cook-chill catering systems and they provided the core of the scientific advice during the review.

Mrs. Clwyd: To ask the Secretary of State for Health whether he intends to introduce new statutory powers governing the preparation of cook-chill foods.

Mr. Kenneth Clarke: The preparation of cook-chill foods is subject to the requirement of the Food Act 1984 and the regulations made under that Act, in the same way as any other food business. Following extensive consultation, the Food Hygiene (General) Regulations 1970 are currently being reviewed.

Mrs. Clwyd: To ask the Secretary of State for Health what measures he intends to take and what proposals he

intends to include in the revised guidelines on cook-chill to ensure a high microbiological quality of food used in cook-chill.

Mr. Kenneth Clarke: During the review of the existing guidelines my Department's scientific expert group considered the recommended microbiological criteria and considered them to be satisfactory. They took the view that providing the 1980 guidelines were followed, they would provide food of sound microbiological quality. However, absence of listeria monocytogenes has been included in the recommended microbiological specification.

Mrs. Clwyd: To ask the Secretary of State for Health what measures he intends to take and what proposals he intends to include in the revised guidelines on cook-chill to ensure adequate hygiene education and training of cook-chill food handlers.

Mr. Kenneth Clarke: The production of cook-chill foods covered by the guidelines is subject to the requirements of the Food Act 1984 and the regulations made under that Act, as are all food businesses.

Following extensive consultation the Food Act and its regulations are currently being reviewed and the present proposals include regulation-making powers for Government to require appropriate hygiene training for those involved in food handling.

Mrs. Clwyd: To ask the Secretary of State for Health how many studies, and at what cost, his Department has conducted into the microbiological quality of cook-chill foods.

Mr. Kenneth Clarke: I refer the hon. Member to the reply by my hon. Friend the Parliamentary Secretary to the Ministry of Agriculture, Fisheries and Food on 9 February at columns *780-81* which provides details amongst others of research funded by the Ministry of Agriculture, Fisheries and Food which is of relevance to the microbiological quality of cook-chill foods.

Mrs. Clwyd: To ask the Secretary of State for Health where his Department intends to conduct any further research into the microbiological quality of cook-chill foods.

Mr. Kenneth Clarke: I see no need at this stage to conduct further research into the microbiological quality of conventional cook-chill foods other than that already sponsored by Government.

Mrs. Clwyd: To ask the Secretary of State for Health what measures he intends to take and what proposals he intends to include in the revised guidelines on cook-chill to prevent cross-contamination in the preparation of cook-chill foods.

Mr. Kenneth Clarke: The guidance on proper time and temperature control and the separation of cooked and uncooked food during the production process in the existing guidelines are intended to reduce the microbiological contamination to a minimum.

I expect these points will be emphasised in the reviewed guidelines.

Drug Abuse

Mr. Strang: To ask the Secretary of State for Health whether he will make a statement on the incidence of HIV amongst drug users.

Mr. Mellor: The following table shows the cumulative totals of AIDS cases and HIV anti-body positive reports at the end of February 1989.

	AIDS Cases (United Kingdom figures)				*HIV anti-body positive (England and Wales)*		
	Men	*Women*	*Total*[1]		*Men*	*Women*	*Total*[2]
Total	2,031	72	2,103	(1,116)	7,358	557	8,025
Injecting drug users only	31	12	43	(22)	418	219	642
Injecting drug users who are homosexual	33	—	33	(15)	72	—	72

[1] Deaths shown in brackets
[2] Includes small number where sex not specified

Mr. Strang: To ask the Secretary of State for Health whether he will make a statement on the funding of Mainliners.

Mr. Mellor: Mainliners, a voluntary organisation recently formed to help HIV positive drug users, has applied for a grant towards its administrative expenses to be incurred in 1989-90. The Department has notified Mainliners that, while we value the work that it is doing in this field, its current work is too local to fall within the scope of the general grant scheme that the Department operates under section 64 of the Health Services and Public Health Act 1968.

Airline Food (Safety)

Mrs. Clwyd: To ask the Secretary of State for Health whether his Department has now received a copy of the report, "A Survey of Microbiological Quality of Airline Foods", by the London boroughs of Hillingdon and Hounslow and Spelthorne borough council; and whether he will make a statement.

Mr. Kenneth Clarke: I have just received a copy of the report and I will give it due consideration.

Project 2000

Mr. Kirkwood: To ask the Secretary of State for Health if, pursuant to his reply of 31 January, *Official Report*, column *189*, he can give any estimate of when *(a)* the level of bursary for a nursing student enrolling on a course under the Project 2000 nursing education reforms will be announced, and *(b)* the arrangements for the longer term administration of such bursaries will be determined; and if he will make a statement on the progress towards the implementation of the Project 2000 reforms so far.

Mr. Mellor: We intend to make an announcement shortly on the level of bursaries for Project 2000 nursing students and the arrangements for administration. On

progress on Project 2000 generally, my right hon. and learned Friend announced on 3 April that approval had been given to the development of Project 2000 courses in the following districts/schools of nursing:

East Suffolk and Great Yarmouth
Crewe and Macclesfield
Newcastle
North East Essex
Parkside
North and South Bedfordshire
North Manchester
North West Surrey/South West Surrey/West Surrey and North East Hampshire
Avon
Sheffield
North Staffordshire
Portsmouth and Isle of Wight
Winchester and Basingstoke

Subject to detailed discussions about cost and manpower assumptions, and the receipt of educational approval from the English National Board for Nursing, Midwifery and Health Visiting, these courses should start in the autumn of this year or, in some cases, in early 1990.

HEALTH

Community Care

Mr. Robin Cook: To ask the Secretary of State for Health what mechanisms his Department has established to oversee the transfer of residents of long-stay institutions to the community; and if they are working satisfactorily.

Mr. Mellor: It is for health authorities, in consultation with social services departments and other care agencies to determine arrangements for the transfer of residents of long-stay institutions to the community. The annual accountability review process is the principal mechanism by which health authorities' performance across the whole range of their activities is monitored by the Department. During the course of this year, we intend to get a clearer picture of the development of mental health services throughout the country. The objective is to provide us with a properly informed basis for considering whether there are any steps it would be right and proper for us to take to improve the care of mentally disordered people, including former long-stay patients now in the community.

Mr. Robin Cook: To ask the Secretary of State for Health (1) when he now expects to respond to the report by Sir Roy Griffiths on community care;

(2) if he will make a statement on Her Majesty's Government's policy on community care.

Mr. Mellor: We remain committed to a policy of promoting the development of community services so that people can return to, or remain in, the community and live as independently as possible, wherever this is best for them. We are currently giving active consideration to the future organisation and management of community care following Sir Roy Griffiths' report and hope to be in a position to bring forward our own proposals in the near future.

Residential Care

Mr. Robin Cook: To ask the Secretary of State for Health (1) how many mentally ill and mentally handicapped patients have been moved from hospital care into residential care in each of the last five years;

(2) what are his Department's estimates of the numbers of mentally ill and mentally handicapped people not receiving long-stay hospital care in each of the last five years.

Mr. Freeman: The numbers of discharges from mental illness and mental handicap hospitals and units in England directly into residential care are not available centrally.

Many of the National Health Service patients discharged from mental illness and mental handicap hospitals and units after a stay of one year or more will transfer to residential care.

The table shows the numbers of patients discharged to the community from National Health Service mental illness and mental handicap hospitals and units in England after a stay of one year or more, for the last five years for which information is currently available. The figures exclude deaths, and transfers to another hospital.

Discharges from mental illness and mental handicap hospitals and units, England (1982 to 1986)

Year	Mental illness	Mental handicap	Total
1982	3,465	1,229	4,694
1983	3,563	1,457	5,020
1984	3,928	1,919	5,847
1985	3,441	2,052	5,493
1986	3,751	2,528	6,279

Day Care

Mr. Robin Cook: To ask the Secretary of State for Health how many day care places for mentally ill and mentally handicapped people were available in each of the last five years.

Mr. Freeman: The table shows the number of day places allocated on the last full working day of each year at National Health Service day hospitals; the number of day care places at single specialty mental illness and mental handicap hospitals are excluded as the data were not centrally collected.

The table also shows the number of day care places provided by local authority social services departments in each of the last five years for which figures are available.

Number of day care places in England for people with a mental illness or mental handicap, 1983-87

	Number of places in NHS day hospitals for		Number of places provided by local authority social services departments for	
Year	Mental illness	Mental handicap	Mental illness[1]	Mental handicap
1983	16,293	1,142	8,689	46,558
1984	16,996	1,195	8,919	47,464
1985	17,903	1,519	9,308	48,824
1986	18,661	1,528	9,216	50,374
1987	n/a	n/a	9,993	51,732

[1] Including places made available to local authorities by voluntary or private organisations and estimates of places for mentally ill people in day centres for mixed client groups.

Since 1987-88, data have been collected on available place-days at all National Health Service day care facilities for mentally ill and mentally handicapped patients. In 1987-88 there were 5·36 million place-days for mental illness day care and 1·02 million place-days for mental handicap day care. Most of these day care facilities are open five days a week.

Mr. Robin Cook: To ask the Secretary of State for Health what has been the rate of provision of day care places for the elderly per 1,000 people aged 75 years and over in each of the last five years.

Mr. Mellor: The available information for *(a)* National Health Service hospitals and *(b)* local authority social service departments is given in the tables.

Table 1
Geriatric medicine: Day care attendances, 1982 to 1987-88 and available place days, 1987-88 only
National Health Service hospitals in England

	1983	*1984*	*1985*	*1986*	*1987-88*

HOUSE OF COMMONS

Research Assistants

Mr. Allen: To ask the Lord President of the Council, pursuant to his answer to the hon. Member for Nottingham, North, *Official Report*, 20 March, column *455*, if he will arrange for the register signed by research assistants using the Library to be available for inspection by hon. and right hon. Members.

Mr. Wakeham: The register signed by research assistants using the Members' Library is kept permanently in the Oriel Room of the Library. It can be made available on request to any right hon. or hon. Member who wishes to inspect it.

Written Answers to Questions

Friday 7 April 1989

TRANSPORT

London Underground

Mr. Dobson: To ask the Secretary of State for Transport whether the railways inspectorate has completed its study of London Underground's management systems.

Mr. Portillo: I understand that the study has been completed. I am expecting the report in a few weeks.

HOME DEPARTMENT

London Underground (Fire Certification)

Mr. Dobson: To ask the Secretary of State for the Home Department when he expects to introduce an order to resolve the legal uncertainty about fire certification on the London Underground.

Mr. John Patten: I refer the hon. Member to the answer given by my hon. Friend the Minister for Public Transport to the hon. Member for Leyton (Mr. Cohen) on 1 February at columns *209-10*. The order came into force on 1 April.

London Underground (Fire Precautions)

Mr. Dobson: To ask the Secretary of State for the Home Department when he expects to make regulations under section 12 of the Fire Preventions Act 1971 to require specified fire precautions at all Underground stations.

Mr. John Patten: My right hon. Friend expects to do this in May. Detailed consultation is now being undertaken on their content.

Sizewell Inquiry (Objectors' Meetings)

Mr. McFall: To ask the Secretary of State for the Home Department if he will seek a report from the chief constable of Essex on what steps he intends to take to investigate the bugging of meetings of objectors to the pressurised water reactor at the Sizewell inquiry.

Mr. Hurd: No.

Segregated Prisoners

Mr. Mullin: To ask the Secretary of State for the Home Department how many persons have been placed in segregation by the governor of Her Majesty's prison, Albany in the last six months for suspected criminal offences; and how many of these have actually been charged with an offence.

Mr. Douglas Hogg: During the six months ended 31 March 1989, 25 prisoners at Albany prison were placed in segregation pending investigation of matters which might have led to criminal charges. None of these was charged with a criminal offence.

Hizbollah

Mr. Winnick: To ask the Secretary of State for the Home Department if he intends to seek powers to proscribe any British branch of the Hizbollah formed in the United Kingdom.

Mr. Douglas Hurd: No.

Prison Officers (Dog Handlers)

Dame Jill Knight: To ask the Secretary of State for the Home Department whether consideration is being given to the possible withdrawal from the prison service of prison officer dog handlers.

Mr. Douglas Hogg: Consideration is being given to the use of other grades of staff for some tasks now undertaken by prison officers. This includes some tasks in dog sections.

Dame Jill Knight: To ask the Secretary of State for the Home Department whether consideration is being given to the employment of private agencies to police penal establishments with dogs as an alternative to prison officer dog handlers.

Mr. Douglas Hogg: No current consideration is being given to the employment of private agencies in this area.

EDUCATION AND SCIENCE

Assisted Places Scheme

Mr. Dobson: To ask the Secretary of State for Education and Science how much has been spent on the assisted places scheme in each of the last five years; and what is the estimate for the current year.

Mr. Butcher: The information requested is as follows:

Financial year	*Expenditure (£ million)*
1984-85	22·2
1985-86	29·6
1986-87	37·9
1987-88	46·0
1988-89	[1]52·3
1989-90	[2]59·0

[1] Forecast outturn.
[2] Provision in Estimates.

Departmental Advertising, Publicity and Publications

Mr. Dobson: To ask the Secretary of State for Education and Science (1) what has delayed the finalisation of his Department's 1989-90 estimates for advertising, publicity and publications;

(2) whether the estimates for his Department's spending on advertising, publicity and publications for 1989-90 have yet been finalised.

Mrs. Rumbold: The estimated expenditure on Departmental advertising, publicity and publications for 1989-90 has now been determined at £2·4 million.

In addition, the Department estimates that expenditure on publications and information concerned with the national curriculum will be about £2·7 million.

Mr. Dobson: To ask the Secretary of State for Education and Science why the estimated expenditure by his Department on publications, videos, exhibitions etc. in 1988-89 exceeded by £1 million the estimate he gave to the hon. Member for Holborn and St. Pancras on 21 July 1988, *Official Report*, column 744; and if he will make a statement.

Mrs. Rumbold: Expenditure in 1988-89 is higher than the original estimate because of the need to give certain of the Department's publications a wide circulation and because of additional publications such as "Our Changing Schools: a handbook for parents". This is an example of a publication giving valuable information for parents which has been very well received. Well over 3 million copies have been distributed.

ATTORNEY-GENERAL

Drug Trafficking

Mr. Rathbone: To ask the Attorney-General what resources in the Crown prosecution service are allocated to offences relating to drug trafficking.

The Attorney-General: Drug trafficking cases are dealt with as part of the normal work of the Crown prosecution service. Resources are allocated as required by the number and weight of such cases. In addition it is the policy of the Director of Public Prosecutions that at least one lawyer in each of the 31 Crown prosecution service areas should have attended a specialist training course with regard to the provisions of the Drug Trafficking Offences Act 1986. That person will, in addition to his normal casework, either deal personally with cases arising under this Act or provide advice and assistance to colleagues who are dealing with such cases.

Committal for Trial (Northern Circuit)

Mr. Goodlad: To ask the Attorney-General what has been the change in waiting times from committal for trial until start of hearings in the northern circuit since 1979.

The Attorney-General: The table shows the change in waiting times, since 1979, both for those committed in custody and those committed on bail.

Average Waiting Time in weeks from date of committal to start of hearing—Northern Circuit

	Committed in custody	*Committed on bail*	*Total Committals*
1979	11·3	17·5	16·2
1980	10·4	16·7	15·6
1981	9·6	15·1	13·9
1982	12·1	15·2	14·5
1983	8·9	12·6	11·8
1984	8·3	12·1	11·2
1985	8·7	11·4	10·7
1986	8·4	10·8	10·2
1987	7·3	10·0	9·2
1988	7·5	10·6	9·7

Legal Profession

Mr. Alex Carlile: To ask the Attorney-General (1) how many additional civil servants he estimates will be required if the recent Green Papers on the legal profession are implemented;

(2) if he will make a statement as to the estimated additional cost to public funds arising out of the implementation of the recent Green Papers on the legal profession.

The Attorney-General: The Green Papers are consultation documents, which seek the views of both the public and the legal profession on the Government's provisional proposals for changes in the way in which legal services are to be provided in the future. No firm estimates based on settled policy can therefore be made, but it is anticipated that the implementation of the proposals contained in the Green Papers would not entail any additional cost to public funds but would be broadly cost neutral.

FOREIGN AND COMMONWEALTH AFFAIRS

Czechoslovakia

Mr. John Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the Czechoslovakian Government with regard to the case of Vaclav Havel.

Mr. Waldegrave: We have made repeated representations to the Czechoslovak Government over Vaclav Havel, most recently on 23 February. I take this opportunity to reiterate that we deplore the treatment of Havel, who is a distinguished writer; such treatment is contrary to Czechoslovakia's commitments under the Vienna concluding document.

Central America

Mr. Page: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has on the United States bipartisan accord on central America; and if he will make a statement.

Mr. Eggar: The accord announced on 24 March explicitly offers United States support for the peace and democratisation process in central America, and for the goals embodied in the Esquipulas II agreement. It puts emphasis on the need for democratisation in Nicaragua, and calls for progress towards strengthening civilian leadership, the defence of human rights and the consolidation of free, open, safe political processes elsewhere in the region. It calls for credible standards of compliance, strict timetables and effective means of verification. It supports the use of "incentives and disincentives" to achieve these United States policy objectives.

United States policy is of course a matter for the United States. But we have consistently supported the peace process and we welcome the United States Government's new diplomatic strategy. For our part, we shall continue to urge on all parties the need for early and full compliance with the commitments which the central American presidents freely undertook in the Esquipulas, Alajuela and El Tesoro summits.

Child Benefit

Mr. Dunn: To ask the Secretary of State for Social Security what is his estimate of how many families with children would not have gained from an increase in child benefit in April; and if he will make a statement.

Mr. Moore: Increasing child benefit would not help the 1.5 million families who receive income-related benefits. We believe it best to concentrate help on those who most need it. That is why almost all children in families claiming income-related benefits will get an extra 50p per week this April over and above the amount needed to maintain the real value of benefits. These benefits do hit their targets. Experience shows that almost £9 out of every £10 of available income-related benefits is claimed, and nearly four out of five families eligible actually get them. For families who do not rely on income-related benefits (and around 70 per cent. of them have incomes above average male earnings), £7.25 child benefit a week per child is a worthwhile recognition of the extra cost of bringing up a family.

Earnings

Mr. Gordon Brown: To ask the Secretary of State for Social Security how many workers currently earn below the national insurance contributions lower earnings limit; and how many of them are *(a)* part-time women, and *(b)* part-timers.

Mr. Peter Lloyd: About 2.5 million people will earn less than the lower earnings limit in 1989-90; 95 per cent. are part-timers, and about seven out of eight of these are women.

ENVIRONMENT

Seal Skins

Mr. Austin Mitchell: To ask the Secretary of State for the Environment (1) if Her Majesty's Government have investigated or intend to investigate the allegations that blueback or whitecoat seal skins have been illegally imported into the United Kingdom in contravention of Community directive 85/444; and if he will make a statement;

(2) if Her Majesty's Government intend to support an indefinite extension of the European Economic Community import ban on seal skins in Community directive 85/444; and if he will make a statement.

Mrs. Virginia Bottomley: I refer the hon. Member to the replies that I gave to the hon. Member for Moray (Mrs. Ewing) on 6 March 1989 at column *426*.

Rights of Way (Public Inquiries)

Dr. David Clark: To ask the Secretary of State for the Environment if he will place in the Library the handbook of guidance notes for inspectors holding public inquiries into rights of way cases.

Mrs. Virginia Bottomley: Guidance for inspectors dealing with rights of way casework is to be found in section D8 of the inspector's handbook. A copy of the handbook is already in the Library.

London Residuary Body

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will list the functions and responsibilities transferred from the London residuary body to the City of London since its inception.

Mrs. Virginia Bottomley: Particular responsibilities for Hampstead heath, some pipe subways, some records, portraits and paintings and the sub-mariners war memorial have been transferred on agreed terms to the corporation of the City of London from the London residuary body.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will list the item proposed by the London residuary body to be transferred from the Middlesex Guildhall collection to the London borough of Harrow.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The London residuary body hopes that all the items making up the Middlesex Guildhall collection will be transferred to one owner. Discussions on this are in hand with the London borough of Harrow.

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has regarding the relocation of the London residuary body; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* This is a matter for the London residuary body.

Mr. Tony Banks: To ask the Secretary of State for the Environment to whom the London residuary body's freehold interest in Wilton's Music Hall was sold; and what was the disposal price.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* the disposal of Wilton's Music hall has yet to be completed.

Hampstead Heath

Mr. Tony Banks: To ask the Secretary of State for the Environment why he rejected the possibility of a transfer of Hampstead heath from the London residuary body to the London borough of Camden; and if he will make a statement.

Mrs. Virginia Bottomley: The transfer of Hampstead heath to the London borough of Camden was not proposed to my right hon. Friend by the London residuary body.

Greater London Council (Tape Recordings)

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has regarding the whereabouts of the tape recordings of the last meeting of the Greater London council, held on 27 March 1986; and if he will make a statement.

Mrs. Virginia Bottomley: None.

County Hall, London

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has regarding the terms of the proposed purchase of county hall by the County Hall Development Group plc; and what is the envisaged timetable for the adaptation of county hall.

Mrs. Virginia Bottomley: The terms are for the vendor and purchaser to agree. The developers have recently submitted a planning application for proposed changes to the County hall complex.

Football Membership Scheme

Mr. Patnick: To ask the Secretary of State for the Environment when he expects the Football Association

and the Football League to submit their proposals for a national membership scheme for football to him; when he expects to have concluded his consideration of the proposals; and when he estimates that the scheme will be fully implemented.

Mr. Moynihan: Subject to parliamentary approval of the Football Spectators Bill, we hope that a body set up by the Football Association and the Football League will be appointed as the Football Membership Authority to run the national membership scheme. To that end they are already engaged in detailed consideration of the proposed scheme through the establishment of a joint working party.

Provided that the Bill achieves the Royal Assent by the summer recess the football authorities are aiming to submit a draft scheme by 31 August and my right hon. Friend the Secretary of State will then consider the draft in the autumn. It is expected that the scheme will be implemented in full in spring 1990 subject to the appropriate technology being in place.

Middlesex Guildhall Collection

Mr. Tony Banks: To ask the Secretary of State for the Environment why the London borough of Harrow was chosen to accept responsibility for the Middlesex Guildhall colection; and what other London boroughs were approached.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The London borough of Harrow, whose boundaries formerly fell within the area of Middlesex county council, expressed an interest in assuming responsibility for the Middlesex Guildhall collection.

Mr. Tony Banks: To ask the Secretary of State for the Environment what are the terms of the proposed agreement between the London residuary body and the London borough of Harrow in respect of the Middlesex Guildhall collection; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Discussions continue about the terms of a possible agreement.

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has regarding the cost of the restoration work needing to be made on the George III tapestry currently within the Middlesex Guildhall collection; who will be responsible for the restoration costs; where the tapestry is to be located; and under whose responsibility.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The scale of costs for this restoration has not been established as yet. The London residuary body proposes to meet the restoration costs. On restoration it is planned the tapestry will be placed in the Middlesex Guildhall building. Negotiations on the long term responsibility and care of the tapestry are continuing.

Palace of Westminster (Dust)

Ms. Walley: To ask the Secretary of State for the Environment if he will reconsider his decision not to analyse high levels of dust in office accommodation at the Palace of Westminster.

Mr. Chope *[holding answer 4 April 1989]:* I have nothing to add to the reply which I gave to the hon. Member on 7 March 1989 at column *458*.

Cryptosporidia

Dr. Cunningham: To ask the Secretary of State for the Environment if he will list those water authorities that have tested, or are testing, treated water derived from overground or river sources for the presence of cryptosporidia; and how many tests have revealed the presence of cryptosporidia.

Mr. Ridley *[holding answer 6 April 1989]:* This information is not held centrally. I refer the hon. Member to the reply given to the hon. Member for Oxford, East (Mr. Smith) on 5 April 1989 on the presence of cryptosporidia in water supplies in the Oxford area of Thames water authority.

DEFENCE

DROPS

Mr. Favell: To ask the Secretary of State for Defence when production orders for DROPS equipment will be placed.

Mr. Sainsbury: Following demanding and very satisfactory validation and field user trials, I am pleased to announce that at the end of March this year we took up production options within existing contracts, announced by my predecessor on 5 December 1986 at column *840*, with Leyland DAF for the medium mobility vehicle, including the load handling system, and with Paccar UK Ltd. (Foden Trucks Division) for flatracks. Production options on other DROPS equipments will be exercised when trials requirements have been satisfied.

Redundant Submarines

Mr. Barry Field: To ask the Secretary of State for Defence whether he has discussed the possibility of the United States navy accepting and disposing of redundant submarine reactors on behalf of the United Kingdom.

Mr. Sainsbury: This possibility has not been formally discussed with the United States authorities and we have no present plans to do so.

Unit Production Costs

Mrs. Clwyd: To ask the Secretary of State for Defence when and why his Department discontinued the practice of publishing unit production costs.

Mr. Sainsbury: I refer the hon. Member to the answer I gave to the hon. Member for Rhondda (Mr. Rogers) on 14 January 1988 at column *373*.

Arms Sales (Kenya)

Mr. Neil Hamilton: To ask the Secretary of State for Defence what representations he has received on the effects of Lonrho's attempts to frustrate British arms sales to Kenya; and if he will make a statement.

Mr. Sainsbury: None.

PRIME MINISTER

African Visit

Mr. Dobson: To ask the Prime Minister if she will list all those who accompanied her on her recent visit to Africa; and what their duties were.

The Prime Minister: On my visit to Africa I was accompanied by four officials and 11 support staff. It would not be appropriate to list their names and duties.

Mr. Dobson: To ask the Prime Minister how many of those officials who accompanied her on her recent visit to Africa were press and public relations staff.

The Prime Minister: Two.

Mr. Dobson: To ask the Prime Minister what is the provisional estimate of the cost of her recent visit to Africa; and whether all the cost was met from public funds.

The Prime Minister: The provisional estimate of the cost of my recent visit to Africa is £66,000. The cost was met from public funds.

Mr. Dobson: To ask the Prime Minister what was the final cost of her previous trip to Africa, to which she referred in her answer to the hon. Member for Holborn and St. Pancras on 14 January 1988, *Official Report*, column *353*.

The Prime Minister: The final cost of this visit was £56,542.

Publicity and Advertising

Mr. Dobson: To ask the Prime Minister whether Mr. Bernard Ingham or the Head of the Central Office of Information is the centre of advice on the propriety of Government publicity and advertising as defined in evidence to the Public Accounts Committee following the former's take-over of the latter's previous role as head of profession for Government information officers.

The Prime Minister: Ministers in charge of Departments are responsible for ensuring that Government conventions on publicity and advertising are complied with. The Cabinet Office provides guidance to Departments on the conventions governing propriety. The Cabinet Office also advises the Chief Secretary to the Treasury, who adjudicates on these matters in cases of doubt.

HEALTH

Cook-chill Food

Mr. Hinchliffe: To ask the Secretary of State for Health if, in view of the complaints received regarding the adequacy of the reheating of cook-chill food on wards at Clayton hospital, Wakefield, and the evidence of breaches of his Department's 1980 guidelines, he will order the immediate suspension of cook-chill catering in this hospital and the reintroduction of conventionally cooked meals.

Mr. Kenneth Clarke: Since cook-chill catering was introduced at the Clayton hospital on 6 March 14,000 cook-chill meals have been consumed by patients. As at 5 April the district health authority had received a total of five complaints, three of which were from the same patient. Only one related to cook-chill food. All five complaints were passed to the hon. Member who relayed them to the press before seeking an explanation from the health authority. As a result the local press produced biased and inaccurate reports of complaints which in my judgment would certainly not justify the suspension of the successful and popular introduction of cook-chill catering in this hospital.

Hospital Doctors (Negligence Claims)

Sir Michael McNair-Wilson: To ask the Secretary of State for Health what plans his Department has for switching liability for negligence claims against hospital doctors from medical defence organisations to health authorities; and if he will make a statement.

Mr. Mellor: The rising cost of medical defence subscriptions has been of concern to doctors and to the Government for some years. In 1988 and 1989 the Government are reimbursing two thirds of the cost of defence subscriptions to hospital doctors on whole-time contracts and to doctors on part-time contracts who work wholly for the National Health Service. This is an interim arrangement following a recommendation by the Doctors' and Dentists' Review Body in its 1988 report.

On 20 March 1989 we issued a consultative paper proposing that health authorities should take financial responsibility for negligent acts and omissions of their medical and dental staff in the course of their National Health Service employment. We have asked for comments from interested organisations by 5 May.

A copy of the paper has been placed in the Library.

Broseley Hospital

Mr. Gill: To ask the Secretary of State for Health if he will request the chairman of the Shropshire health authority to respond promptly to the letter from the hon. Member for Ludlow dated 22 March relating to Broseley hospital.

Mr. Freeman: I understand that the district general manager for the Shropshire district health authority wrote to my hon. Friend on 3 April in the absence of the chairman on holiday.

Brook Hospital, Woolwich

Mr. Cartwright: To ask the Secretary of State for Health when he now expects to reach a decision on the proposed removal of the neurosciences unit from the Brook hospital, Woolwich.

Mr. Mellor: Within a matter of days.

Waiting Lists

Mr. Dobson: To ask the Secretary of State for Health (1) if he will give for each district health authority the percentage increase, and the national ranking of that percentage increase, in the gross demand waiting list figures between March and September 1988 for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(2) if he will give for each district health authority the percentage increase, and the national ranking of that percentage increase, in the gross demand waiting list figures between September 1987 and September 1988 for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(3) if he will give for each district health authority the percentage increase, and the national ranking of that percentage increase, in the waiting list figures between September 1983 and September 1988 for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(4) if he will give for each district health authority the percentage of people on hospital waiting lists in September 1988 waiting 12 months or more, and the national ranking of that percentage, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(5) if he will give for each district health authority the percentage of people on hospital waiting lists in September 1988 waiting six months or more, and the national ranking of that percentage, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(6) if he will give for each district health authority the number of people on hospital waiting lists in September 1988, and the national ranking of that number, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(7) if he will give for each district health authority the notional time to clear the waiting lists in September 1988, and the national ranking of that notional time, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(8) if he will give for each district health authority the number on the waiting list for day admissions in September 1988, and the national ranking of that number, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(9) if he will give for each district health authority the percentage of people on waiting lists for day admissions in September 1988 waiting six months or more, and the national ranking of that percentage, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties;

(10) if he will give for each district health authority the percentage of people on waiting lists for day admissions in September 1988 waiting 12 months or more, and the national ranking of that percentage, for *(a)* obstetrics and gynaecology, *(b)* trauma and orthopaedics, *(c)* paediatric surgery, *(d)* cardiothoracic surgery, *(e)* general surgery, *(f)* ear, nose and throat and *(g)* all specialties.

Mr. Mellor *[holding answer 22 March 1989]:* The information requested has been placed in the Library. Reasons for the variations between districts in the number of cases on individual waiting lists include the size and age structure of the population and the extent of local development of specialised services. Not all health authorities have these specialties.

TRADE AND INDUSTRY

Restrictive Trade Practices

Mr. Heddle: To ask the Chancellor of the Duchy of Lancaster when he anticipates announcing his conclusions of the review into restrictive trade practices policy.

Mr. Maude: Within the next few months.

"Home Sweet Home"

Mr. Heddle: To ask the Chancellor of the Duchy of Lancaster what assessment he has made of the impact of the publication, "Home Sweet Home," a guide for first-time buyers, issued by the Office of Fair Trading; and whether he has any plans to make its availability more widely known through an advertising campaign in the national and regional press, and in magazines and journals specifically catering for the first-time buyer age-group.

Mr. Forth: I am advised that this publication has been well received by the public. One million copies of the edition applicable to England, Wales and Northern Ireland and 200,000 copies of the edition applicable to Scotland have been distributed.

The question of publicity for the leaflet is a matter for the Director General of Fair Trading. I will ask him to write to my hon. Friend.

Wireless Telegraphy Acts

Mr. Rowe: To ask the Chancellor of the Duchy of Lancaster what additional measures are being taken to reduce the burden of licensing requirements under the Wireless Telegraphy Acts.

Mr. Atkins: My Department is today laying a set of regulations under section 1 of the Wireless Telegraphy Act 1949 which will further reduce licensing requirements, in line with intentions expressed in the White Paper "Releasing Enterprise" (Cm 512), published in November 1988.

The regulations are designed to exempt certain low-power radio devices for industrial and non-industrial use from licensing requirements: induction, telemetry and telecommand, speech communications, field disturbance, alarm and general purpose devices. This covers a wide range of devices, including certain industrial remote control equipment and some security and burglar alarms, to domestic items such as garage door openers, and children's toys.

This is a far-reaching piece of deregulation, affecting industrial, retail and scientific users, and the general public. It is estimated that a further 25,000 licences will no longer be required. For the present the new arrangements will not apply in the Channel Islands or the Isle of Man, but free, once-and-for-all licences will be issued for devices which would otherwise be exempt.

The regulations are due to come into force on 1 May 1989.

Computer Consultants

Mr. Tim Smith: To ask the Chancellor of the Duchy of Lancaster what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Forth *[holding answer 4 April 1989]:* My Department's expenditure on consultants employed to improve the efficiency of the Department in the financial year 1988-89 is estimated to be £6,749,000, of which £3,612,000 is for computer consultancy contracts excluding hardware and software purchases. Expenditure on management consultants is not recorded separately from other consultancy spend. The following is the list of management or computer consultancy contracts awarded for the 1988 calendar year:

House of Fraser

Mr. Teddy Taylor: To ask the Chancellor of the Duchy of Lancaster (1) if he will review the decision on the publication of the report on the acquisition of House of Fraser plc in light of the recent publication of documents relating to the acquisition; and if he will make a statement;

(2) when he now expects to receive the report of the serious fraud squad on the material contained in the report on the acquisition of House of Fraser plc; and if he will make a statement.

(3) if he will invite the inspectors who produced the report into the acquisition of House of Fraser plc to review their powers under section 436 of the Companies Act 1985, in light of the publication of papers relating to the acquisition since the report was submitted to him; and if he will make a statement.

Mr. Maude: No. My right hon. and noble Friend the Secretary of State has made it abundantly clear that the inspectors' report will be published at the earliest possible moment consistent with the even-handed administration of justice.

Council of Research Ministers

Mr. Ieuan Wyn Jones: To ask the Chancellor of the Duchy of Lancaster what initiatives he intends to put to the European Council of Research Ministers in Brussels on 14 March.

Mr. Newton: I have been asked to reply.

I represented Her Majesty's Government at the meeting of the Community's Council of Ministers (Research) in Brussels on 14 March.

The Council adopted the following four programmes within the overall provisions of the Community's 1987 to 1991 framework programme for research and development:

JOULE, a programme of research in the field of non-nuclear energy and efficient use of energy supplies, with Community funding of 122 million ecu (£79 million) over 39 months.

BRITE/EURAM, a programme of research in the field of manufacturing technologies, advanced materials, and aeronautics with Community funding of 499 million ecu (£324 million) over three years.

The large facilities programme to provide wider access by European researchers to large-scale European scientific facilities and to contribute to the cost of

enhancements to those facilities. The programme will provide Community funding of 30 million ecu (£20 million) over four years.

A third five-year programme (1989 to 1993) of research and technological development for the European Atomic Energy Community in the field of decommissioning of nuclear installations, including the treatment of specific wastes, and decontamination and dismantling techniques. The programme will provide Community funding of 31·5 million ecu (£20·5 million).

The Council also adopted common positions on the following six Community programmes:

DOSES, a programme over four years with Community funding of 4 million ecu (£2·5 million) in the field of research into statistical expert systems:

FLAIR, a programme with Community funding of 25 million ecu (£16 million) over five years in the field of food linked agro-industrial research;

EUROTRA, an extension of the programme to develop a machine translation system of advanced design, with Community funding of 7 million ecu (£4·2 million);

MAST, a programme of research in basic and applied marine science. The programme is to run over a three-year period with Community funding of 50 million ecu (£32·5 million);

MONITOR, a programme on forecasting and assessment in science and technology, and evaluation of research and development programmes. The programme will receive Community funding of 22 million ecu (£14 million) over four years;

VALUE, a programme to promote the dissemination and utilisation of results from Community scientific research. The programme will receive Community funding of 38 million ecu (£25 million) over a five-year period.

The Council also held a preliminary exchange of views on the mid-term review of the 1987 to 1991 framework programme for research and development.

SCOTLAND

Scottish Grand Committee

Mr. Sillars: To ask the Secretary of State for Scotland if he will make it his policy to ensure that when the Scottish Grand Committee sits in the Scottish Assembly building, the notice at the public entrance gives details of the time the public can enter; and if he will ensure that the public are given access to wait in the cloakroom area until admitted to the gallery, and that such admission to that area be from 10 am.

Mr. Rifkind: At present members of the public are normally admitted to meetings of the Scottish Grand Committee in the Crown Office building from 10.20 am but are allowed to enter earlier at officials' discretion if the weather is inclement. I have decided that in future members of the public will be admitted to the public gallery from 10 am. The notice at the public entrance will so indicate.

Tree Preservation Orders

Mr. Brazier: To ask the Secretary of State for Scotland how many tree preservation orders have been made in each region in Scotland *(a)* for individual trees and *(b)* for groups of trees or woods, and what area is covered by the latter case.

Lord James Douglas-Hamilton: Information concerning the numbers of preservation orders or their area is not held by the Scottish Development Department.

Housing

Mr. Sillars: To ask the Secretary of State for Scotland what debt Scottish Homes has inherited from the Scottish Special Housing Association; and if he will show a breakdown by amount and interest rate.

Lord James Douglas-Hamilton: Scottish Homes inherited the total amount of loans outstanding to the Scottish Special Housing Associaion as at 31 March 1989, which totalled £596 million. The breakdown by amounts and interest rates are as follows:

Interest rate	*Loan outstanding*
2·500	2,530,826·84
3·000	12,951,131·11
3·125	511,402·14
3·750	2,555,008·26
4·000	3,939,574·13
4·250	13,019,915·31
5·000	2,541,755·50
5·125	1,683,873·58
5·375	1,704,769·61
5·500	9,966,733·13
5·625	4,120,670·15
5·750	7,232,054·02
6·000	27,287,559·17
6·250	1,407,179·75
6·375	1,214,675·39
7·375	10,412,689·91
7·750	6,536,406·52
8·125	3,735,625·90
8·250	7,936,655·77
8·875	4,934,512·12
9·000	6,727,927·57
9·125	11,860,970·95
9·250	22,707,207·68
9·375	4,629,167·17
9·500	23,990,296·06
9·750	15,994,104·90
9·875	2,899,460·35
10·375	965,176·17
10·500	28,446,130·63
10·625	5,494,428·86
10·750	24,344,310·20
11·000	29,741,832·19
11·125	15,256,405·17
11·500	7,535,106·16
12·375	7,645,554·56
13·000	19,053,159·71
13·125	20,771,610·44
13·500	28,404,386·56
13·750	25,026,871·38
13·875	23,669,144·80
14·000	23,443,179·14
14·125	7,724,149·82
14·250	67,806,283·50
14·375	17,118,260·15
14·625	8,353,939·69
15·875	6,539,888·91
16·375	13,926,504·30
	596,298,475·33

Bugging

Mr. McFall: To ask the Secretary of State for Scotland if he will seek a report from the chief constable of Strathclyde region on what steps he intends to take to investigate the bugging of various residences and establishments in Helensburgh by David Coughlin.

Lord James Douglas-Hamilton: No.

EMPLOYMENT

Wages (Midlands)

Mrs Golding: To ask the Secretary of State for Employment if he will list the excuses given by employers in the midlands who were discovered in 1988 to have been paying wages below the statutory minimum.

Mr. Nicholls: Specific information could be provided only at disproportionate cost, but such underpayment as occurs can often be attributed to ignorance or inadvertance.

Mrs. Golding: To ask the Secretary of State for Employment if he will list the names and addresses of those employers in the midlands who on check in 1988 were found to be paying wages below the statutory minimum.

Mr. Nicholls: No. The inspectorate treats all its inquiries and investigations as confidential and the results are disclosed only to those involved.

Employment Training

Mr. Leighton: To ask the Secretary of State for Employment what percentage of trainees on employment training *(a)* in London and *(b)* nationally have been placed with employers for 60 per cent. of their time for work experience.

Mr. Nicholls: The information requested on the percentage of trainees placed with employers for 60 per cent. of their time for work experience is not available. It is estimated that at any one time 17 per cent. of trainees in London and 21 per cent. nationally are on placements with employers.

Wages Councils

Mrs. Mahon: To ask the Secretary of State for Employment how many employers' organisations have requested the abolition of the wages councils; and if he will list them.

Mr. Nicholls: It is not the Department's practice to reveal the content of submissions made by individual organisations. The employer organisations which responded to the Government's consultation document on wages councils were listed in the reply given to the hon. Member for Oldham, West (Mr. Meacher) on 23 March, *Official Report*, column *798*. As that reply shows, 37 out of 68 employer organisations supported abolition.

Dock Labour Scheme

Mr. Nicholas Bennett: To ask the Secretary of State for Employment if he will give the average total gross payments per week to workers in the national dock labour scheme and the average total gross payments per week for all employees in Great Britain.

Mr. Nicholls *[holding answer 6 April 1989]:* The average total gross payments per week to workers in the dock labour scheme was £341·83 in March 1989. The latest available estimate of average total gross payments per week for all full time, adult employees in Great Britain was £234 in January 1989.

Vocational Training

Mr. Paice: To ask the Secretary of State for Employment what is his estimate of the total amount spent on vocational education and training *(a)* from public expenditure, *(b)* by employers and *(c)* by the armed services in each year since 1970 in cash and at 1988 prices.

Mr. Cope *[holding answer 4 April 1989]:* The Manpower Services Commission was established in 1974 and expenditure figures can be provided only from the financial year 1974-75 onwards.

The total expenditure on vocational education and training by the Manpower Services Commission and the Training Commission was as follows:

	Cash value £ *million*	*At 1988 prices* £ *million*
1974-75	96·4	318·5
1975-76	171·7	468·2
1976-77	256·0	598·1
1977-78	292·0	625·3
1978-79	373·6	728·6
1979-80	451·4	735·1
1980-81	560·4	810·4
1981-82	749·1	981·7
1982-83	868·5	1,087·8
1983-84	1,049·5	1,249·0
1984-85	1,144·1	1,283·5
1985-86	1,256·9	1,352·7
1986-87	1,441·4	1,491·5
1987-88	1,613·1	1,613·1

Records of the annual amount spent by employers and by the armed forces on vocational education and training are not kept by the Training Agency. However, a survey carried out for the Training Agency indicated that employers spent a total of some £18 billion on training over the 12 months to the summer of 1987, of which the armed services spent some £2 billion. Comparable figures are not available for earlier years.

AGRICULTURE, FISHERIES AND FOOD

Cereals

Mr. Pawsey: To ask the Minister of Agriculture, Fisheries and Food if he has received any representations about the introduction of a quota scheme for cereals.

Mr. MacGregor: The Government have received representations from trade organisations and individuals both for and against the introduction of a quota scheme or similar compulsory output restrictions for cereals. I am opposed to any such supply control arrangements for cereals, which would tend to ossify production patterns, to penalise efficient enterprises and would be very difficult to administer fairly throughout the European Community.

Milk Quotas

Mr. John D. Taylor: To ask the Minister of Agriculture, Fisheries and Food which member states have proposals, following the agreement by the EEC Council of Agriculture Ministers to measures to comply with the ruling by the European Court of Justice in the Mulder case, to allocate milk quota to producers who were involved in an EEC non-marketing scheme which expired between 1 October 1983 and 31 December 1988.

Mr. Donald Thompson: A Council regulation providing for milk quotas to be made available to former milk producers who took part in the 1977 non-marketing of milk and dairy herd conversion schemes, and who completed their obligations after 31 December 1983, was published in the *Official Journal* on 29 March. It is directly applicable in all member states. Publication of a further Commission regulation, laying down detailed rules on the handling of applications by member states, is expected shortly.

In the United Kingdom application forms will be available from divisional offices of my Ministry and of the Welsh Office Agriculture Department, and from the Agriculture Departments of Scotland and Northern Ireland. The closing date for applications will be 28 June 1989.

Salmon Dealer Licensing Scheme

Mr. Onslow: To ask the Minister of Agriculture, Fisheries and Food when he now expects to introduce his salmon dealer licensing scheme; and if he will make a statement.

Mr. Donald Thompson: Work on the scheme is still in hand and I cannot give a firm indication of our proposed timetable at this stage. Nevertheless, the Government recognise the importance of the proposals which will be presented as soon as possible.

Water Pollution

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what action his Department is taking to reduce the incidence of river and ground water pollution by silage effluent.

Mr. Ryder: As well as offering 50 per cent. grants for silage effluent facilities, the highest in the European Community, my Department provides free initial advice to farmers on pollution avoidance and is helping the Department of the Environment prepare regulations on minimum standards for silage plant. We fully support tough action by the water authorities over prosecutions of farmers who pollute rivers.

Bovine Spongiform Encephalopathy

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what percentage of all herds confirmed as including cases of bovine spongiform encephalopathy had *(a)* one animal, *(b)* two animals, *(c)* three animals and *(d)* more than three animals, infected.

Mr. Donald Thompson: Up to 31 March, the percentage of herds with confirmed BSE cases in each category is as follows:

(a) herds with 1 confirmed case—72·2 per cent.
(b) herds with 2 confirmed cases—15·4 per cent.
(c) herds with 3 confirmed cases—6·2 per cent.
(d) herds with more than 3 confirmed cases—6·2 per cent.

Whaling

Mr. Hanley: To ask the Minister of Agriculture, Fisheries and Food what were the results of the vote in the International Whaling Commission on the United Kingdom resolution against current Japanese research whaling.

Mr. Donald Thompson: The United Kingdom was seriously concerned about the current Japanese feasibility programme of whaling for scientific purposes. We therefore proposed a resolution in the International Whaling Commission calling on Japan to refrain from carrying out its programme until the various doubts had been resolved. I am pleased that the resolution has been supported by 16 of the 32 members of the International Whaling Commission eligible to vote, with only four votes against and four abstentions. We however required 17 votes for the resolution to take effect. Nevertheless the result very clearly demonstrates the unease and concern of the large majority of the International Whaling Commission members who chose to vote about whether the Japanese programme is fully justified and has fully satisfied criteria for sound scientific research. We consider that Japan should pay firm heed to this concern and will continue to work through the International Whaling Commission to this end.

Written Answers to Questions

Monday 10 April 1989

CIVIL SERVICE

Pensions (Retail Prices Index Error)

Mr. Redmond: To ask the Minister for the Civil Service when he last met or had correspondence with each of the Civil Service pension organisations that are awaiting the payable order awarded to them following an error in the calculation of the retail prices index about this matter; and when he expects Parliament to approve payment of the supplementary estimate for funds for those three organisations.

Mr. Luce: My Department wrote to each of the organisations awaiting awards from the RPI error funds on 16 March enclosing a payable order for the sums due.

HOME DEPARTMENT

DNA Testing

Mr. Dunnachie: To ask the Secretary of State for the Home Department what representations he has received about the introduction of DNA testing for the purposes of the immigration rules; and if he will make a statement.

Mr. Renton: We have received various representations from Members of Parliament and others concerning the possible introduction of DNA testing into the entry clearance process, and the operation of the immigration rules in relation to reapplicants previously refused entry clearance. We hope to make an announcement on both these matters in the relatively near future.

Wandsworth Prison

Mr. Cox: To ask the Secretary of State for the Home Department when he last visited Wandsworth prison.

Mr. Douglas Hogg: My right hon. Friend visited Her Majesty's prison Wandsworth on Monday 6 February 1989.

Press Council

Mr. Greg Knight: To ask the Secretary of State for the Home Department when he last met the chairman of the Press Council; and what subjects were discussed.

Mr. Hurd: I last met the chairman of the Press Council on 18 January. We discussed the chairman's recent appointment to the council, the forthcoming review of the council's role and procedures and the issues raised by the Right of Reply Bill and the Protection of Privacy Bill.

Prison Quarters

Mr. Barry Field: To ask the Secretary of State for the Home Department how many prison quarters remain unusable.

Mr. Douglas Hogg: Only a few prison quarters which are structurally unsound or substandard are considered to be unusable. National figures are not readily available and could be obtained only at disproportionate cost, but the number of such properties on the Isle of Wight is seven.

Electronic Tagging

Mr. John Evans: To ask the Secretary of State for the Home Department how many representations he has received on the electronic tagging of offenders; and if he will make a statement.

Mr. John Patten: In the last 12 months 26 letters have been received, including nine from Members of Parliament, together with a number of representations from interested individuals and organisations. One of the objectives of the forthcoming field trials involving the monitoring of defendants remanded on bail will be to enable decisions to be reached on the use of electronic monitoring in respect of convicted offenders.

Mr. Skinner: To ask the Secretary of State for the Home Department what consultations he has had with interested parties regarding the introduction of electronic tagging; and if he will make a statement.

Mr. John Patten: We have consulted the magistrates courts, the police and the Crown Prosecution Service in the three areas where we propose to conduct field trials of electronic monitoring. We shall shortly be arranging meetings at which the procedures envisaged can be explained to local legal practitioners and others with an interest. A meeting has also been arranged with representatives of the probation services in the areas concerned.

Video Recordings

Mr. Bright: To ask the Secretary of State for the Home Department (1) how many prosecutions have been brought and how many convictions obtained for hiring or selling video recordings to young people below the relevant minimim age classification in the last 12 months;

(2) how many prosecutions for hiring or selling unclassified video recordings have been brought *(a)* in the London borough of Newham *(b)* in the City of Westminster and *(c)* in England by trading standards officers in the last three months.

Mr. Renton: The latest information available centrally, which may be incomplete, relates to 1987. This indicates that in England and Wales there were six prosecutions under sections 9 and 10 of the Video Recordings Act 1984 for hiring or selling video recordings containing unclassified video works and two prosecutions under section 11 for hiring or selling video recordings to persons below the minimum age specified on the classification certificates issued in respect of works contained in the recordings. None of these prosecutions was in the City of Westminster; one under section 10 was in the London borough of Newham. The extension of enforcement powers to trading standards officers from September 1988 will result in far more prosecutions. I understand in several hundred cases already the British Board of Film Classification has been asked to certify (as evidence for use in criminal proceedings) whether works have been classified and, if so, under what classification.

Mr. Bright: To ask the Secretary of State for the Home Department (1) whether he has received representations from the British Videogram Association about delays in classifying video titles by the British Board of Film Classification; and if he will make a statement;

(2) when his officials last met representatives of the British Board of Film Classification to discuss delays on classifying video titles.

Mr. Renton: I am not aware of any recent representations from the British Videogram Association about delays at the British Board of Film Classification in classifying video works. Home Office officials are in regular contact with the board about the administration of the Video Recordings Act 1984 and discussed with its officials on 22 March the length of time taken to issue classification certificates for video works.

Police (Ethnic Minorities)

Mr. Vaz: To ask the Secretary of State for the Home Department what information he has for each police force of the number of officers of chief superintendent level and above, and as to the number of black and Asian officers holding such posts.

Mr. Douglas Hogg: The information requested is set out in the table. There are no black or Asian officers in these ranks.

Police forces in England and Wales

31 December 1988	*Chief Constable*[1]	*Deputy Chief Constable*[2]	*Assistant Chief Constable*[3]	*Chief Superintendent*
Avon and Somerset	1	1	3	14
Bedfordshire	1	1	1	5
Cambridgeshire	1	1	1	5
Cheshire	1	1	2	8
City of London	1	1	1	6

West Mercia	1	1	2	10
West Midlands	1	1	5	21
West Yorkshire	1	1	4	20
Wiltshire	1	1	1	6
TOTAL	48	58	128	565

[1] Includes ranks of assistant commissioner and above in the Metropolitan police and commissioner in the City of London police.
[2] Includes deputy assistant commissioner in the Metropolitan police and assistant commissioner in the City of London police.
[3] Includes commanders in the Metropolitan police and the City of London police.

Child Safety

Mr. Stern: To ask the Secretary of State for the Home Department when he intends to extend local authority access to police records to enable checks to be made on the background of all staff to be employed in areas where they have substantial access to children.

Mr. Douglas Hogg: Local authorities are already able to seek the disclosure of information from police records about all those seeking employment in posts with substantial access to children.

Surveillance Equipment

Mr. Cran: To ask the Secretary of State for the Home Department whether he has any plans to seek to change the law on the availability of surveillance and counter-surveillance equipment.

Mr. Renton: No, for the reasons given in my response to the debate on electronic surveillance devices initiated by my hon. Friend on 13 March at column 183.

Policing (Lancashire)

Mr. Jack: To ask the Secretary of State for the Home Department if he will make a statement on the measures to improve policing in Lancashire for 1988.

Mr. Douglas Hogg: I understand that among the measures taken in 1988 by the chief constable and his police authority are the civilianisation of 52 posts previously occupied by police officers; successful operations against crime, including one focusing on crimes committed mainly against the elderly by persons posing as officials; a number of schemes to streamline administrative procedures; the trial use of a computerised custody office system; and a number of successful community and crime prevention initiatives.

The chief constable would be pleased to discuss with my hon. Friend these and other examples of effective and efficient policing in Lancashire.

Suicide (Leeds Prison)

Mr. Maclennan: To ask the Secretary of State for the Home Department if he will place in the Library a copy of the report of the deputy director-general of the prison service of his inquiry into suicide at Leeds prison.

Mr. Douglas Hogg: The report was written as a guide for action within the Department rather than as a public document, but my right hon. Friend announced its main recommendations and his acceptance of them in reply to a question from the hon. Member for Leeds, West (Mr. Battle) on 7 March at columns *455-6*.

Independent Television

Mr. McCrindle: To ask the Secretary of State for the Home Department if he has any plans to include in legislation a timetable for achieving 25 per cent. independent television production; if he will make it his policy that once this target is reached he will seek to increase it; and if he will make a statement.

Mr. Renton: We have sought and received a commitment from the BBC and IBA that, subject to satisfaction in cost and quality, 25 per cent. of original television output will be commissioned from independent producers by the end of 1992. There are no plans to include that target in legislation, but we attach great importance to its achievement and are in close touch with broadcasters and independent producers to monitor progress.

Our White Paper on broadcasting proposes that from 1993 there should be a statutory requirement on all Channel 3 and 5 licensees for a minimum of 25 per cent. of original programming to come from independent producers. We will discuss with the BBC in due course the appropriate level of their commissioning from independent producers from 1993.

Criminal Injuries Compensation Board

Mr. Gow: To ask the Secretary of State for the Home Department what is the established staff for the Criminal Injuries Compensation Board; by how many the actual staff is below that figure; and what steps he is taking to reduce the delays of the board in dealing with claims.

Mr. John Patten: On 3 April 1989, the board had 312·5 whole-time equivalent staff (7·5 whole-time equivalent staff below its complement of 320), including 31 casual staff engaged as part of the gradual relocation of about 100 posts from London to Glasgow. We have increased staff by about 100 since 1987 to meet the increase in workload, and with the board we are reviewing administrative procedures with the aim of reducing the time taken to resolve claims.

Amusement Arcade Burnings

Mr. Marlow: To ask the Secretary of State for the Home Department what information he has on the identity of the victims of the recent amusement arcade burnings.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metroplis that the persons who died were Mr. Kandiahkanapathy Vinayagamoorthy, who was born on 2 June 1960 in Sri Lanka and Mr. Ambikaipahan Anapayan, born on 13 February 1968 in Sri Lanka. The injured persons were Miss Deborah Bernadine Alvares, born 20 August 1962 in east Africa, and Mr. Yurev Alejandro Gomez, born 25 November 1965 in Chile.

Gambling (Young People)

Mr. Wray: To ask the Secretary of State for the Home Department if he will make a statement on the new evidence on the harmful effects on children and young people of the addiction to fruit machines and similar gambling practices and on Her Majesty's Government support for local authorities which are trying to control these activities.

Mr. John Patten: The results of the Home Office research study "Amusement Machines: Dependency and Delinquency" published last year showed that very few young people are at risk of becoming dependent on amusement machines and there is no clear evidence of any association between the playing of machines and delinquency. We have received no reliable new evidence to contradict these results or to throw doubt on the conclusion we reached that further legislative controls are therefore not justified.

The Government fully support local authorities in their efforts to ensure the proper control of amusement-with-prizes machines. We issued a circular to all local authorities on 18 November to remind them of the considerable powers already available to them under the Gaming Act 1968 to regulate such machines in their areas. We have also consulted the local authority and trade associations on draft model byelaws controlling, among other things, the opening hours of amusement arcades and it is expected that model byelaws will be available for adoption in the summer.

Mrs. Nighat Nisar

Mr. Madden: To ask the Secretary of State for the Home Department when Mrs. Nighat Nisar, Ref A 412514 and IMM/90791, applied to the British post in Islamabad for permission to join her husband in the United Kingdom; on what date her application was referred to him; and when he expects to take a decision on this application.

Mr. Renton: Mrs. Nisar applied for entry clearance on 20 July 1987. She and the sponsor, Mr. Ahmed, were interviewed in Islamabad on 28 October 1987 and the application was referred to the Home Office on 16 December 1987. It was found necessary to interview Mr. Ahmed further in order to establish where he was domiciled at the time the marriage was celebrated; this was undertaken by the entry clearance officer in Islamabad on 2 June 1988. Mrs. Nisar's application was refused on 14 March 1989 because her husband did not meet the domicile requirements for the marriage to be valid under English law. Mrs. Nisar has been informed of this decision and her right of appeal to the independent appellate authorities. This was not a straightforward case, but I regret the considerable delay in deciding it.

Rape Victims

Mr. Maples: To ask the Secretary of State for the Home Department if he will make a statement on measures to protect the anonymity of rape victims in civil cases.

Mr. John Patten: Under section 4 of the Sexual Offences (Amendment) Act 1976, as amended by section 158 of the Criminal Justice Act 1988, it is an offence to publish or broadcast the name or address or a still or moving picture of a woman after an allegation has been made that she has been the victim of a rape offence, if that is likely to lead members of the public to identify her as an alleged victim of such an offence. The prohibition applies during the whole of the woman's lifetime, unless the courts make a specific direction to the contrary, and it applies whether proceedings follow or not; if they do, it applies in relation to civil as well as criminal proceedings. It is, however, a defence that the woman has given written consent for the matter to appear, provided that no person has unreasonably interfered with her peace or comfort with intent to obtain the consent. Prosecutions require the consent of my right hon. and learned Friend the Attorney-General. The maximum penalty is a £2,000 fine.

ENERGY

Roof Insulation

13. **Mr. Ron Davies:** To ask the Secretary of State for Energy what is his latest estimate of the amount of energy that would be saved by the implementation across the United Kingdom housing stock of the recommendation of the Building Research Establishment on the thickness of roof insulation.

Mr. Peter Morris: Where loft insulation is one inch or less, installation of an extra four inches could lead to an annual energy saving of some 0·73 million tonnes oil equivalent. However, householders are likely to want to opt at least in part for greater warmth rather than simply saving energy.

45. **Mr. Ray Powell:** To ask the Secretary of State for Energy what is his latest estimate of the tonnes of oil or coal equivalent that would be saved if 10 inches thickness of roof insulation were installed in every domestic property in the United Kingdom.

Mr. Peter Morrison: It is estimated that installation of 10 inches of insulation in all domestic buildings with accessible lofts would lead to a potential annual saving of 2·6 million tonnes of coal equivalent (1·5 million tonnes of oil equivalent). However, insulation to that thickness would not be cost effective.

CEGB

14. **Ms. Primarolo:** To ask the Secretary of State for Energy when he last met the chairman of the Central Electricity Generating Board; and what matters were discussed.

27. **Mr. Andrew Smith:** To ask the Secretary of State for Energy when he last met the chairman of the Central Electricity Generating Board; and what matters were discussed.

Mr. Michael Spicer: My right hon. Friend and I regularly meet the chairman of the CEGB to discuss matters of common interest.

Thermal Oxide Reprocessing Plant

18. **Mr. Norris:** To ask the Secretary of State for Energy whether he will invite the right hon. Member who was the Secretary of State for Energy when the Government gave planning permission for the thermal oxide reprocessing plant to open on its completion in 1992.

Mr. Peter Morrison: I am grateful to my hon. Friend for his interesting suggestion which I have passed on to the chairman of British Nuclear fuels plc.

French Energy Minister

19. **Dr. Kim Howells:** To ask the Secretary of State for Energy when he last met his French opposite number; and what matters were discussed.

Mr. Peter Morrison: My right hon. Friend the Secretary of State last met his French opposite number very briefly in December 1987 to discuss the fast reactor.

AGR Stations

20. **Mr. Cummings:** To ask the Secretary of State for Energy what is his latest estimate of the dates of full commissioning to their design capacity of the advanced gas-cooled reactor stations at Dungeness B, Hartlepool and Heysham I and II.

Mr. Michael Spicer: This is an operational matter for the CEGB. The board informs me that both reactor units at Heysham II have operated at their design capacity and the station is expected to be commissioned in 1989. The reactor units at Hartlepool, Heysham I and Dungeness B have operated at substantial load but have not reached their design rating. The CEGB intends to declare interim capacities for these units during 1989.

West Burton Power Station

21. **Mr. Haynes:** To ask the Secretary of State for Energy what is his latest estimate of the date when the

Central Electricity Generating Board, or either of its successor generating companies, will submit a planning application for the proposed West Burton 1800 MW coal-fired power station.

Mr. Michael Spicer: The CEGB submitted an application last year for my right hon. Friend's consent to construct a new electricity generating station at West Burton.

My right hon. Friend is awaiting confirmation from the Nottinghamshire county council, the Bassetlaw district council and the CEGB that agreement has been reached between them on certain outstanding matters before proceeding with his consideration of the application. These matters relate to access to the proposed site during construction of the station.

Energy Prices

22. **Mr. Matthew Taylor:** To ask the Secretary of State for Energy what representations he has received concerning the effects of increased energy prices on pensioners and the low paid.

Mr. Peter Morrison: I have received a number of representations, amounting to 38 cases raised by hon. Members during the last three years and in the same period an average of one letter a week from the general public. However, over the past five years the fuel bills of pensioners and the low paid have fallen in real terms by 15 per cent., while pensions have risen in line with the retail price index.

Power Station Capacity

23. **Mr. Cousins:** To ask the Secretary of State for Energy if he will estimate the size of the ordering programme for new power station capacity to the year 2000.

Mr. Michael Spicer: In evidence to the Hinkley Point C public inquiry the Central Electricity Generating Board estimated that an additional 15·5 GW of generating capacity would be required by the year 2000.

Small Mines

24. **Mr. Foulkes:** To ask the Secretary of State for Energy what plans he has to amend the legislation governing the operation of small mines.

Mr. Michael Spicer: Such plans will form part of our privatisation programme in the next Parliament.

European Market (Competition)

25. **Mr. Alan W. Williams:** To ask the Secretary of State for Energy if he will make a statement concerning the possible effects of the European Commission initiative announced on 9 March demanding greater competition in Europe's electricity and coal markets.

Mr. Michael Spicer: The European Commission has publicised an intention to make proposals on these matters. However, none has yet been received by Her Majesty's Government. We would welcome effective moves towards greater competition in the Community's coal and electricity markets.

Standing Charges

26. **Mr. Buckley:** To ask the Secretary of State for Energy what is his latest estimate of the revenue total in 1989-90 according to British Gas and to the 12 area boards and two Scottish boards in the electricity supply industry from domestic standing charges.

Mr. Peter Morrison: Forward estimates of revenue from standing charges are not available to my Department. They are matters for British Gas plc and the electricity boards.

Electricity Privatisation

28. **Mr. Anthony Coombs:** To ask the Secretary of State for Energy what proposals are being considered for an employee share ownership scheme following privatisation of the electricity industry; and if he will make a statement.

Mr. Michael Spicer: We shall make sure that special terms are available to enable employees to purchase shares in their companies. However, no decision on the type of offers that will be made to employees has yet been taken.

39. **Mr. Robert Hughes:** To ask the Secretary of State for Energy what is his latest estimate of the direct cost of privatisation to the two Scottish boards and the 12 area boards in the electricity supply industry in 1989-90 when compiled on the same basis as the £76 million proposed to be shown in the accounts of the Central Electricity Generating Board and its successor companies.

Mr. Michael Spicer: My right hon. and learned Friend, the Secretary of State for Scotland is responsible for the two Scottish boards. The costs of preparing for the forthcoming privatisation, incurred by any of the 12 area boards or the two Scottish boards, are the responsibility of the boards themselves.

44. **Mr. David Davis:** To ask the Secretary of State for Energy what proposals are being considered for customer rights following privatisation of the electricity industry; and if he will make a statement.

Mr. Michael Spicer: The Electricity Bill currently before Parliament provides customers with a whole range of new rights which they have never had before, including a new system of guaranteed standards of performance with automatic compensation for failures to meet these standards, special consideration for the elderly and disabled and help for those who have difficulty in paying bills. The Director General of Electricity Supply will have the key role of protecting the consumers' interests, and he will be advised on all issues affecting the consumer by the new regional consumer committees.

48. **Mr. Turner:** To ask the Secretary of State for Energy what is his latest estimate of the impact of privatisation on the number of employees employed by the electricity supply industry for 1988, 1990 and 1992.

Mr. Michael Spicer: Manning levels after privatisation will be a matter for the industry, as is the case now.

Energy Conservation

29. **Mr. Simon Hughes:** To ask the Secretary of State for Energy what information he has about how much an average householder's fuel bills could be reduced if tried and tested measures of energy conservation were adopted.

Mr. Peter Morrison: The scope for improvements in energy efficiency in individual dwellings varies considerably, depending on such factors as existing installations and the lifestyle of the occupants. However, over the country as a whole the scope for cost-effective energy efficiency improvements in the domestic sector estimated to allow savings of at least 20 per cent.

Electricity Supply Industry

30. **Mr. Martyn Jones:** To ask the Secretary of State for Energy when he next proposes to meet the electricity supply industry trade unions; and whether he will discuss the future of Marchwood Engineering Laboratories and the other research and development activities of the boards.

Mr. Michael Spicer: My right hon. Friend and I meet the electricity supply industry trade unions from time to time. The future of Marchwood Engineering Laboratories is a matter for the CEGB and its successor companies, which have said that the decision to vacate this site would have been the same, whichever successor company Marchwood had been allocated to. I have been assured that this will in no way prejudice essential research into nuclear safety matters, which will either be completed or transferred elsewhere before the site is closed.

Fuel Prices

31. **Mr. Fearn:** To ask the Secretary of State for Energy what information he has about the impact on the average pensioner of fuel price increases over the last five years.

Mr. Michael Spicer: Between 1983 and 1988 the fuel bills both of pensioners and of the low paid are estimated to have fallen by 15 per cent. in real terms. Over the same period, the state pension has risen in line with the retail price index.

Low-energy Domestic Appliances

32. **Mr. Pike:** To ask the Secretary of State for Energy when he last met the 12 area board chairmen and the chairman of the Electricity Council; and whether the future of the research work at the Capenhurst laboratory into low energy domestic appliances was discussed.

Mr. Michael Spicer: My right hon. Friend and I meet the chairman of the area boards and the chairman of the Electricity Council regularly to discuss a range of issues of mutual interest. My noble Friend the Parliamentary Under-Secretary of State for Energy, Baroness Hooper, has recently visited the Capenhurst laboratory and we appreciate the value of the work carried out there.

Magnox Power Stations

33. **Mr. Corbyn:** To ask the Secretary of State for Energy what is his latest estimate of the cost of decommissioning the Magnox nuclear power stations *(a)* in the shortest technologically feasible time and *(b)* by the lowest book-keeping cost technique.

Mr. Michael Spicer: Decommissioning Magnox nuclear power stations is an operational matter for the CEGB. I have asked the chairman to write to the hon. Member about the estimates of cost.

Wind Parks

34. **Mr. David Shaw:** To ask the Secretary of State for Energy what would be the estimated size of a wind park with an output capacity of 1200 MW; and if he will make a statement.

Mr Michael Spicer: It is estimated that the land area required for a wind farm with an installed capacity of 1200 MW might be between 110 and 140 square miles although there is still considerable uncertainty about this. It is likely that the machines required would be grouped within smaller wind farms, however. Currently, within my Department's research and development programme on wind energy, we are examining the environmental implications and public acceptability of wind farms. The programme is also examining constraints on the United Kingdom's total wind energy resource that would be imposed by such significant environmental factors as national parks, areas designated as being of outstanding natural beauty and urban land.

Deep-mined Coal (Scotland)

35. **Mr. Douglas:** To ask the Secretary of State for Energy if he will make a statement on the progress of negotiations between British Coal and the South of Scotland electricity board with regard to the future of deep mining coal burn in Scotland.

Mr. Michael Spicer: My right hon. and learned Friend the Secretary of State for Scotland recently announced that British Coal and the South of Scotland Electricity Board have been able to make substantial progress in their negotiations on a new coal deal. Negotiations on the details of an agreement, including the question of price, are however continuing, and are matters for commercial agreement. Pending completion of the detailed negotiations, the South of Scotland Electricity Board has confirmed that it will continue to take supplies from British Coal at the rate of 2 million tonnes per annum and British Coal has confirmed that it will continue to supply at this rate.

Electricity Prices

36. **Mr. Fatchett:** To ask the Secretary of State for Energy what is his latest estimate of the impact on the retail prices index of the 1989-90 increases in domestc electricity prices.

Mr. Michael Spicer: The reported average increase of 6·4 per cent. in domestic electricity prices will add one sixth of 1 per cent. to the retail price index.

49. **Mrs. Fyfe:** To ask the Secretary of State for Energy what is his latest estimate of where domestic electricity prices in *(a)* England and Wales and *(b)* Scotland will stand in 1989-90 in the league table of such prices in the Organisation of Economic Co-operation and Development countries.

Mr. Michael Spicer: The Electricity Council undertakes an annual survey of electricity prices in 20 countries. This includes domestic electricity prices. On the basis of the latest comparison at 1 July 1988, prices in England and Wales were in the mid-range of domestic prices in the developed world generally. Domestic prices in Scotland are slightly lower than those in England and Wales.

On current projections of international prices, the United Kingdom will remain in the mid-range of prices after the 1989 tariff revision.

55. **Mr. Moss:** To ask the Secretary of State for Energy what were the changes in real terms of *(a)* domestic and *(b)* industrial prices between the periods 1974 to 1979 and 1983 to 1988; and if he will make a statement.

Mr. Michael Spicer: In the last five years of Labour Government, between May 1974 and May 1979, domestic electricity prices rose by 9 per cent. and industrial prices by 6 per cent. in real terms.

In the last five years of Conservative Government, between December 1983 and December 1988, domestic electricity prices fell by 9 per cent. and industrial prices by 12 per cent. in real terms.

Offshore Licensing

37. **Mr. Carrington:** To ask the Secretary of State for Energy how many applications he has received for the 11th offshore licensing round; and if he will make a statement.

Mr. Peter Morrison: A total of 125 applications were received for the 212 blocks on offer from groups involving 84 companies. In terms of the number of applications received, this was a large response and has been exceeded in only one other licensing round in the past 25 years. I hope to announce awards later this year, probably in the early summer.

British Coal

38. **Mr. Strang:** To ask the Secretary of State for Energy when he last met the chairman of British Coal and what subjects were discussed.

Mr. Michael Spicer: My right hon. Friend and I meet the chairman of British Coal regularly to discuss all aspects of the coal industry.

Alternative Energy

40. **Mr. Atkinson:** To ask the Secretary of State for Energy if he has any plans to further encourage the private sector to research sources of alternative energy.

Mr. Michael Spicer: Energy paper 55, published in June 1988, laid out a strategy for encouraging the private sector to become involved in research, development and demonstration activities and eventually take these functions over from Government. The strategy is aimed at ensuring the full and timely commercial development of those renewable technologies shown to be economic, environmentally acceptable and capable of making a contribution to United Kingdom energy supply. It envisages a collaborative programme to the late 1990s involving Government and the manufacturing and energy supply industries to achieve the twin aims of encouraging and promoting the commercialisation of those technologies which are economically attractive, and reducing the uncertainty in the economics of those technologies currently classed as promising but uncertain so that, where possible, they become economic and confidence is created in them.

Already 20 per cent. of the cost of our programme is met by external contributions and we expect this proportion to grow over the next few years as the private sector increases its involvement.

Electricity Bills

41. **Ms. Mowlam:** To ask the Secretary of State for Energy what is the most up-to-date estimate of the percentage of all quarterly electricity bills sent out by estimation without a meter reading in 1980, 1983, 1986 and 1989.

Mr. Michael Spicer: This is a matter for the electricity supply industry. I have asked the chairman of the Electricity Council to write to the hon. Member with the information requested in respect of England and Wales. The question of estimated electricity bills in Scotland should be pursued through my right hon. and learned Friend the Secretary of State for Scotland.

Greenhouse Effect

42. **Mr. Malcolm Bruce:** To ask the Secretary of State for Energy what further action he plans to take in order to increase his departmental contribution to alleviating the greenhouse effect.

Mr. Michael Spicer: My Department has effective research and development programmes in energy efficiency and renewable energy. There is to be a new campaign to improve energy efficiency within Government and the public sector generally. Electricity privatisation will encourage greater efficiency, will maintain the level of non-fossil generation and will encourage the introduction of new, more efficient and less polluting technology including CHP and combined cycle gas turbines.

Such actions, alongside funding of some of the work of the intergovernmental panel on climate change, are prudent now. When scientific understanding of this complex topic improves we, in conjunction with the wider international community, shall be in a position to undertake further appropriate action.

Energy Sources

43. **Mr. Patnick:** To ask the Secretary of State for Energy what progress has been made by his Department in exploiting new and renewable sources of energy following the publication in 1988 of "Renewable Energy in the U.K.: The Way Forward".

Mr. Michael Spicer: Since the publication of energy paper 55 in June 1988, 70 projects committing a further £14 million have been initiated as part of our strategy to develop economically attractive and environmentally acceptable renewable sources of energy. These include a number of collaborative projects with industry aimed at encouraging and promoting the commercialisation of those technologies which are economically attractive, and improving technical performance and reducing capital cost for those technologies currently classed as promising but uncertain.

A comprehensive range of promotional literature is now available directed at both lay public audiences to raise general awareness about the prospects for renewable energy, and target professional audiences in particular market sectors to stimulate greater interest in the development of these technologies. Technology transfer plans are now being developed for each technology classed as economically attractive. Over the next year or two, increased effort will be placed on stimulating increased

industrial and commercial involvement in both the R and D programme and the uptake of economic technologies by industrial and commercial concerns.

Redundant Miners

46. **Mr. Illsley:** To ask the Secretary of State for Energy whether he will make a statement on any proposed changes to the redundant mineworkers' payments scheme.

Mr. Michael Spicer: I refer the hon. Member to the answer that I gave to the hon. Member for Bolsover (Mr. Skinner) earlier today.

Steel Industry (Electricity Costs)

47. **Mr. Flynn:** To ask the Secretary of State for Energy what is his latest estimate of the cost of electricity supplied to the steel industry in England and Wales; what is the EEC average; and what is his latest estimate of the position of England and Wales in the EEC league table of electricity prices supplied to the steel industry.

Mr. Michael Spicer: The information is not available in the detail sought.

The latest Electricity Council survey of electricity prices in 20 countries, including the EEC, indicates that for a typical high voltage industrial customer electricity prices in England and Wales at 1 July 1988 were in the mid-range of prices in the EEC States and the developed world generally.

Current estimates of industrial electricity prices internationally indicate that England and Wales will remain in the mid-range of prices in the EEC after the 1 April tariff revision.

Electricity Demand

50. **Mr. Harry Greenway:** To ask the Secretary of State for Energy by what percentage he expects demands for electricity to increase over the next five years; how this compares with five, 10, 15, and 20 years ago; and if he will make a statement.

Mr. Michael Spicer: In evidence to the Hinkley Point public inquiry, the CEGB estimated that electricity demand would rise by 2·1 per cent. per annum over the period to 1997, which represents a capacity requirement of 53·6 GW. This figure compares with peak capacity demands in 1984 of 41·9 GW; 1979—42·2 GW; 1974—40·9 GW and 1969—37·8 GW.

European Community Energy Commissioner

51. **Mr. Win Griffiths:** To ask the Secretary of State for Energy when he last met the EEC Commissioner for energy; and what matters were discussed.

Mr. Peter Morrison: My right hon. Friend the Secretary of State met Commissioner Cardoso e Cunha on 16 March in London. Discussions covered arrangements for common carriage of electricity, prospects for coal in the United Kingdom, the JET project, the renewables and energy efficiency programmes and the Community directive on gas burn in power stations.

Nuclear Power Stations (Inquiries)

52. **Mr. Ieuan Wyn Jones:** To ask the Secretary of State for Energy if he will indicate the criteria used in determining when a public inquiry should be held into an application to build a nuclear power station in the United Kingdom.

Mr. Michael Spicer: Before reaching his decision on any application for his consent to construct an electricity generating station my right hon. Friend is obliged to hold a public inquiry into the application if a relevant local planning authority has objected to it.

Even if there is no objection from a relevant local planning authority, my right hon. Friend can still call for a public inquiry to be held, if he thinks it appropriate, in the light of other objections received.

Integrated Reactors

53. **Mr. Mans:** To ask the Secretary of State for Energy what assessment he has made of the proposed Anglo-American consortium plans for a safe integrated reactor.

Mr. Michael Spicer: Last December the Atomic Energy Authority signed a memorandum of understanding with Rolls-Royce Associates and others to proceed with the design and development of a 300 MW pressurised water reactor known as the safe integrated reactor. The Department is continuing to keep itself informed of developments.

Fossil Fuel Imports

54. **Mr. Barron:** To ask the Secretary of State for Energy what is his Department's estimate of the level of fossil fuel imports for the year 1990.

Mr. Michael Spicer: The Department does not publish forecasts of fossil fuel imports.

Tidal Barriers

56. **Mr. Tredinnick:** To ask the Secretary of State for Energy what proportion of the nation's energy requirements could be met by tidal barriers; and if he will make a statement.

Mr. Michael Spicer: I refer my hon. Friend to the answer given to my hon. Friend the Member for Warrington, South (Mr. Butler) on 30 January at column *88*.

EC Competition Commissioner

57. **Ms. Quin:** To ask the Secretary of State for Energy when he last met the EEC Commissioner for competition; and what matters were discussed.

Mr. Peter Morrison: Neither my right hon. Friend the Secretary of State nor I have met the EC Commissioner for competition since his appointment.

Renewable Energy

58. **Mr. Morley:** To ask the Secretary of State for Energy what is his latest estimate of the contribution of renewables to the supply of electricity in Britain by the year 2000 and 2010.

Mr. Michael Spicer: Renewable energy technologies are at an early stage of development and there is great uncertainty about future projections. The most recent estimates of the contribution that could be made by each renewable energy source in the year 2025 have been published in energy paper 55, copies of which are in the Libraries of the House. Energy paper 55 estimates that by the year 2025 renewable energy might provide up to the equivalent of around 24 per cent. of supply electricity requirements if the technologies can be proven and applied commercially. No estimates are available for the years 2000 and 2010. It is Government policy to encourage the maximum exploitation of renewable sources of energy wherever they have prospects of being economically viable and environmentally acceptable.

Sellafield (Visitors Centre)

59. **Mr. Arbuthnot:** To ask the Secretary of State for Energy what is the total number of people to have visited the visitors centre at Sellafield.

Mr. Michael Spicer: Nearly 145,000 people have visited the visitors centre at Sellafield since it was opened in June 1988.

Gas Prices

5. **Mr. Yeo:** To ask the Secretary of State for Energy if he will meet the director general of Ofgas to discuss implementation of the Monopolies and Mergers Commission report on gas prices.

Mr. Peter Morrison: My right hon. Friend is due to meet the Director General of Gas Supply later this month when they will discuss a range of issues of mutual interest.

Tritium

Dr. Thomas: To ask the Secretary of State for Energy what is the current stockpile of tritium in the United Kingdom intended for *(a)* fusion energy reseach and *(b)* luminosity use; and what information he has of the amounts of tritium stockpiled and used for non-military purposes in other OECD countries.

Mr. Michael Spicer: There is no stockpile of tritium in the United Kingdom for fusion research. No central records of commercial stocks of tritium are kept, but users have to be registered under the Radioactive Substances Act 1960 and are limited in the amount of tritium they are allowed to store on their premises. Their records are subject to regular inspections by the Department of the Environment. I have no information concerning overseas stockpiles of tritium.

Wave Energy

Mr. Home Robertson: To ask the Secretary of State for Energy if he will give the date of the start of work on the oscillating water column project on Islay, the date of the completion of civil construction work on that project; and the date of the formal signature by his Department of the papers authorising this work.

Mr. Michael Spicer: My Department announced the construction of the shoreline wave energy project in Islay on 1 July 1987.

Construction work was started at the beginning of August 1987. The construction and preliminary monitoring phase was successfully completed by the end of March this year. I announced to the House on 23 March that the next phase of the project, to install an air driven power turbine and generator, will now proceed, subject to contract, on the basis of the data acquired so far.

Mr. Home Robertson: To ask the Secretary of State for Energy (1) if he will list the number and amounts of payments for work on wave energy in which settlement of the invoice by the United Kingdom Atomic Energy Authority was more than a year after the submission of the invoice; and if he will give the length of the delay in each case;

(2) if he will list those contracts on wave energy research in which final signatures of the papers by the United Kingdom Atomic Energy Authority officials was more than a year after the start of the contract; and if he will give the length of the delay in each instance.

Mr. Michael Spicer: The information can be provided only at disproportionate cost.

Dungeness B

Mr. Blair: To ask the Secretary of State for Energy what will be the cost, in terms of repairs and lost output, of the minor accident at Dungeness B nuclear power station on 5 February, in which a fuel rod fell into the reactor from the refuelling winch; and for how long the reactor will be out of service.

Mr. Michael Spicer: This is an operational matter for the CEGB and I have asked the chairman to reply diret to the hon. Member.

Coal Imports

Mr. Cummings: To ask the Secretary of State for Energy (1) if he will give the projected figure for the import of coal from the Soviet Union for each of the next five years; and if he will make a statement;

(2) if he will give figures for levels of coal imports from the Union of Soviet Socialist Republics for each of the last five years; and if he will make a statement.

Mr. Michael Spicer: Coal imports from the USSR since 1984 have been as follows:

	thousand tonnes
1984	11
1985	23
1986	48
1987	89
1988	375

Source: Her Majesty's Customs and Excise.

In 1988 these imports accounted for 0·3 per cent. of the United Kingdom market for coal. The Government do not make projections of these coal imports.

EDUCATION AND SCIENCE

Medical Research Council

Mr. Peter Griffiths: To ask the Secretary of State for Education and Science what sum of the grant-in-aid to the Medical Research Council was specifically directed to the study of the problems of sufferers from myalgic encephalomyelitis in the year 1988-89.

Mr. Jackson: The Medical Research Council did not support any research specifically concerning myalgic encephalomyelitis in 1988-89. It did, however, support some work on immune responses to muscles, nerve cells and related structures which may be relevant to the understanding and treatment of this condition. The Medical Research Council is always ready to consider soundly-based scientific proposals for funding of new research, in competition with other applications.

Education Reform Act

Mr. Fatchett: To ask the Secretary of State for Education and Science when the Government intend to issue orders under section 222 of the Education Reform Act 1988.

Mrs. Rumbold: The Government intend to make an order under section 222 of the Education Reform Act towards the end of May this year.

Marine Engineering

Mr. Henderson: To ask the Secretary of State for Education and Science which universities, polytechnics and colleges of technology had departments of marine engineering in 1968 and in 1988; and how many undergraduate and postgraduate students each department had in 1968 and 1988.

Mr. Jackson: Figures for 1988-89 are not yet available. In 1987-88 there were no postgraduate or first degree students studying marine engineering at polytechnics and colleges in England, although there were 471 sub-degree higher education students; information for 1968 is not available. Published statistics for university students studying mechanical engineering include students studying marine engineering and are shown in the following table. Comprehensive information for individual departments of marine engineering is not readily available.

University students studying mechanical engineering[1]

	1968-89 United Kingdom universities	*1987-88 Great Britain universities*
Full-time		
Postgraduate	698	875
Undergraduate	5,100	5,872
Part-time		
Postgraduate	445	461
Undergraduate	38	20

[1] Includes marine engineering.

School Budgets

Mr. Hinchliffe: To ask the Secretary of State for Education and Science what safeguards exist under the provisions for delegated schools budgets to ensure that governors do not misuse their positions in respect of the placing of contracts with private companies.

Mr. Butcher: Governers are free to place contracts with whichever company offers the service which best meets their school's needs. There are a number of safeguards: the Education (School Government) Regulations prevent individual governors from participating in any decision in which they have a pecuniary interest; governors acting in bad faith over the placing of contracts, whether for gain or otherwise, would not be protected from personal liability; and the use of improper influence in the placing of contracts would also constitute grounds for the withdrawal of delegated responsibility.

Student Unions

Mr Andrew Smith: To ask the Secretary of State for Education and Science (1) what arrangements he intends to make for consultation on the forthcoming publication of Government proposals on student unions;

(2) when he intends to publish the Government's proposals arising from its survey of student unions; and what form the publication will take.

Mr. Jackson: My Department has prepared a factual analysis of responses to the survey of student unions announced by my right hon. Friend in his reply to my hon. Friend the Member for Thurrock (Mr. Janman) on 18 April 1988 at column *292*. The analysis will be sent shortly for comment to the Committee of Vice-Chancellors and Principals, the Committee of Directors of Polytechnics, the Standing Conference of Principals, the Association of Principals of Colleges and the National Union of Students. Thereafter, it will be published. As I indicated in my reply to my hon. Friend the member for Basildon (Mr. Amess) on 17 February 1989 at column *415*, the Government will now consider what action might be taken and in due course will consult all those concerned. The form of the consultations will depend on the nature of the conclusions reached.

Teachers' Pay and Conditions

Ms. Armstrong: To ask the Secretary of State for Education and Science what is the average rise in salary for each of the last 10 years expressed in relation to the rise in average professional earnings for *(a)* scale 1 primary school teachers, *(b)* the average primary school teacher and *(c)* the heads of primary schools.

Mrs. Rumbold *[holding answer 23 March 1989]:* The information is as follows:

Increases in average full-time primary teachers' salaries [relative to increases in professional earnings]

Annual percentage increases:

	All Primary teachers[1]	*Relative to professional earnings*[2]	*Scale One*[3]	*Relative to professional earnings*[2]	*Heads*	*Relative to professional earnings*[2]
As at 1 April						
1980	36·9	+8·7	36·0	+7·9	40·2	+11·2
1981	9·0	−7·7	9·9	−6·9	6·0	−10·2
1982	7·6	−0·2	8·0	+0·2	7·4	−0·4
1983	5·8	−2·3	6·7	−1·5	3·9	−4·1
1984	5·7	−1·1	6·3	−0·5	5·1	−1·7
1985	7·3	+0·5	7·7	+0·8	6·8	0
1986	7·3	−2·1	7·7	−1·7	7·1	−2·3
1987	16·5	+7·4	—	—	19·9	+10·6
1988	4·2	−6·3	—	—	4·2	−6·3
1989[4]	7·2	—	—	—	7·5	—

[1] Based on the database of teacher records and relevant salary scales. Figures take account of salary drift and incentive allowances, and include the salaries of heads and deputies.

[2] Data is from the average gross earnings of full-time employees for combined occupation groups II, III & V, new earnings survey. Data for 1 April 1989 not yet available.

[3] Scale One teachers were incorporated on to the main scale on October 1987.

[4] Assuming adoption of the recommendations in the second report of the Interim Advisory Committee on School Teachers' Pay and Conditions.

Ms. Armstrong: To ask the Secretary of State for Education and Science what is the average primary schoolteacher's rise in salary for each of the last 10 years in absolute cash terms, in real terms and in relation to the rise in average earnings.

Mrs. Rumbold *[holding answer 23 March 1989]:* The information is as follows:

Increases in average full-time primary teachers' salaries

Annual percentage increase:

	actual[1]	*in real terms*[2]	*in relation to average earnings*[3]
As at 1 April			
1980	36·9	12·5	+11·4
1981	9·0	−2·7	−3·9
1982	7·6	−1·6	−1·6
1983	5·8	1·7	−2·6
1984	5·7	0·5	−2·2
1985	7·3	0·4	0
1986	7·3	4·2	−0·6
1987	16·5	11·7	+8·2
1988	4·2	0·3	−5·1
1989[4]	7·2	—	—

[1] Based on database of teacher records and relevant salary scales. Figures take account of salary drift and incentive allowances, and include the salaries of heads and deputies.

[2] Derived from the retail price index. Data for 1 April 1989 not yet available.

[3] Data is from the average gross earnings of full-time employees (all occupations), new earnings survey. Data for 1 April 1989 not yet available.

[4] Assuming adoption of the recommendations in the second report of the Interim Advisory Committee on School Teachers' Pay and Conditions.

EDUCATION AND SCIENCE

Teachers

Mr. Straw: To ask the Secretary of State for Education and Science what will be the estimated number of people graduating with first degrees in each of the years 1989 to 1995; and what number and what proportion of these totals for each year will need to be recruited into teaching to maintain current pupil to teacher ratios, on the assumption that relative pay and wastage continues at current levels.

Mr. Kenneth Baker *[holding answer 6 April 1989]:* The latest available projections of the total numbers of first degree graduates in Great Britain, including Open university and overseas graduates, were published in the Government's expenditure plans 1989-90 to 1991-92 (Cm. 612). The numbers are shown below.

	Thousands
1989	133
1990	135
1991	136
1992	138

The proportions of these graduates who will need to be recruited into teaching in order to maintain current pupil-teacher ratios will depend in part on the number of recruits from sources other than newly trained graduates.

OVERSEAS DEVELOPMENT

Aid (Environmental Factors)

74. **Mr. Yeo:** To ask the Secretary of State for Foreign and Commonwealth Affairs what representations has he received regarding the attention paid to environmental factors in the aid programme.

Mr. Chris Patten: Environmental aspects of aid, including our commitment to sustainable development and such specific matters as rain forest conservation, are frequently raised by hon. Members and members of the public, as well as by the non-governmental organisations with which we have regular contact.

Forestry

75. **Mr. Wood:** To ask the Secretary of State for Foreign and Commonwealth Affairs what support for forestry is provided under the overseas aid programme.

Mr. Chris Patten: We have committed about £80 million to forestry projects currently underway. We are encouraging aid recipients to direct more of our aid to forestry and we are increasing our support through British charities and for forestry research. We shall also encourage other donors, including multilateral agencies, to give more support to forestry.

British Undergraduate Fellowship Scheme (South Africa)

76. **Miss Lestor:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the future plans for the British undergraduate fellowship scheme, South Africa.

Mr. Chris Patten: We are increasing the number of awards available for undergraduate level studies by disadvantaged South Africans, some of whom will continue to be sponsored on courses in this country under the British undergraduate fellowship scheme.

Namibia

77. **Mr. Hunter:** To ask the Secretary of State for Foreign and Commonwealth Affairs what criteria will determine *(a)* which organisations in Namibia may receive development aid and *(b)* the amount of development aid available to Namibia in the run-up to the independence of that country.

Mr. Chris Patten: From 1 April 1990 we expect to provide aid to Namibia on the same basis as to other independent countries. In the meantime, we plan to continue with the existing programme and to make preparations for future activities. In the financial year just ended disbursements on our Namibian programme amounted to about £1·5 million.

Sri Lanka

79. **Mr. Cox:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last visited Sri Lanka; and if he will make a statement.

Mr. Chris Patten: I visited Sri Lanka in March 1988, when I signed a £20 million reconstruction grant for projects and programmes in the north and east of the island.

Amazonia

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what support is being given to Dr. John Proctor and the forest regeneration team at Maraca on their work on management of regeneration where rain forests have been destroyed and abandoned and on why rain forests end abruptly and give way to natural savanna.

Mr. Chris Patten: Since 1987 the ODA has committed £80,500 in support of the forest regeneration team which forms part of the Maraca rain forest project organised by the Royal Geographical Society.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what studies he is financing in the Maraca project or elsewhere to help stem forest destruction by better understanding of the significance of different soil types.

Mr. Chris Patten: The soil studies of the Maraca project, which the ODA helps to fund, are directed to this end by, for example, helping to understand the relationships between the forest and the soil in the critical boundary zone between the rainforest and the savanna woodland. Examples of other ODA activities include the Overseas Development Natural Resources Institute's land use work in Belize, Cameroon, Indonesia and Sri Lanka and the ODA-supported land use studies being carried out by the World Wide Fund for Nature in Cameroon and Nigeria.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to monitor the work of the joint Brazil—United Kingdom research project on Maraca Island in the Amazon.

Mr. Chris Patten: The ODA's forestry and environment advisers have been monitoring the project on the basis of regular reports from the research team since April 1987. A review conference took place in Brazil from 3 to 5 April; we expect a report from the Royal Geographical Society.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what consideration he has given, pursuant to the statement on 13 March *Official Report*, column 170, to the report of Mr. Philip Morrice on fire-fighting and related equipment for saving the Amazon forest; and if he will make a statement.

Mr. Chris Patten: Mr. Morrice reported that the Brazilian authorities needed aircraft, vehicles, patrol boats and telecommunications equipment for fire fighting. I understand that the Brazilian Government are formulating an environmental project, which would cover fire fighting equipment, for consideration by the World Bank. We are discussing with the Brazilians what technical cooperation we could offer in the area of rain forest management and protection.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on *(a)* multilateral and *(b)* bilateral research with Brazil on rainforest problems.

Mr. Chris Patten: Multilateral assistance for research in the Brazilian rain forest has been provided over a number of years through the FAO. Additional proposals are being considered by the International Tropical Timber Organisation and the World Bank. Bilaterally we are currently considering with the Brazilian authorities how and where we might provide further support for their programmes of research on rainforest problems.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to the statement of 13 March, *Official Report*, column 172, to what debt-for-nature swop the Parliamentary Under-Secretary of State, the hon. Member for Enfield, North (Mr. Eggar), was referring following his visit to Bolivia; and what lessons have been learned.

Mr. Chris Patten: My hon. Friend was referring to the arrangement agreed between the United States charity,

Conservation International, and the Bolivian Government in July 1987. I understand that Conservation International bought $650,000 of Bolivia's commercial bank debt at an 85 per cent. discount. In return for cancellation of the debt the Bolivian Government undertook to implement conservation measures in the Beni Biosphere reserve in northern Bolivia. Although it is too early to judge the outcome of the scheme, we believe that this type of market based debt reduction mechanism can play a modest but useful role in augmenting the resources available for conservation.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what request he has received from the Brazilian Government for *(a)* further technical co-operation and *(b)* co-operation to understand the genetic potential of the Amazon; and if he will make a statement.

Mr. Chris Patten: During his visit to London in March, the Secretary-General of the Brazilian Ministry of Foreign Affairs asked us to suggest further work under the aid programme to help cope with problems of the rainforests. We shall be writing shortly offering assistance in one or more of several areas: genetic resources, social forestry and forestry management and further help for research projects like the Maraca project. The Secretary-General of the Brazilian Ministry of the Interior called on me on 6 April and undertook to send proposals for additional aid projects in this area. We offered help in training and institutional links. I hope to send out professional advisers shortly to discuss the details with the Brazilian authorities.

Ethiopia and Sudan (Aid)

Mr. Baldry: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on United Kingdom aid to Ethiopia and the Sudan.

Mr. Chris Patten: We maintain a small technical co-operation programme for Ethiopia, but the bulk of our aid has been in the form of emergency and relief assistance (more than £21 million in 1988 through bilateral and European Community channels).

In the case of Sudan, we have a substantial development aid programme, totalling about £18 million in 1988. We also gave an additional £14·4 million last year, through bilateral and European Community channels, in emergency and relief aid.

ATTORNEY-GENERAL

Legal Reform

Mr. Austin Mitchell: To ask the Attorney-General how many local prosecutors have issued instructions to their staff not to comment on the Lord Chancellor's Green Papers on legal reform; and whether he has issued such an instruction.

The Attorney-General: The Director of Public Prosecutions has reminded all members of the Crown prosecution service that, in accordance with standard Civil Service practice, they should not comment publicly on matters of current political controversy. The director has expressed the view that if members of staff wish to make comments on issues raised in the Green Paper, the most appropriate course is to send them to the working party which has been set up under the chairmanship of the deputy director-chief executive to consider the Department's response to the Lord Chancellor's proposals.

All chief crown prosecutors have taken steps to ensure that their staff are aware of the director's views. In addition, one chief Crown prosecutor has informed staff that he will forward their views to the Director of Public Prosecutions, but that they are not otherwise to comment, and one chief Crown prosecutor has issued instructions that his staff should consult him before commenting.

I have not issued any such instruction.

68. **Mr. Favell:** To ask the Attorney-General what assessment he has made of the savings to clients in the cost of provision of legal services which would arise from the Lord Chancellor's proposals for the legal profession.

The Attorney-General: The purpose of the Government's provisional proposals is to ensure that the public are provided with the most efficient and effective network of legal services at the most economical price. No assessment has yet been made of the potential savings to clients.

Mr. Baldry: To ask the Attorney-General what representations he has received on the Green Paper proposals on reforming the legal system with respect to their effect on the constitutional relationship between the Government and the judiciary.

The Attorney-General: As at 31 March 1989 a total of 72 such responses had been received.

Land Registry

Mr. Barry Field: To ask the Attorney-General when he expects the Land Registry to become an agency.

The Attorney-General: The Land Registry's candidacy as an agency has been announced, but no date has yet been fixed for it to assume agency status.

Crown Prosecution Service

Mr. Austin Michell: To ask the Attorney-General how many qualified lawyers are employed by the Crown prosecution service; and how many of these are also qualified as barristers.

The Attorney-General: The latest figures available were given to the hon. Gentleman in my written answer of 16 March 1989. On 31 December 1988 the Crown prosecution service had 1,539 qualified lawyers in its employment, of whom 549 were barristers.

Appeals

Mr. Austin Mitchell: To ask the Attorney-General what is his estimate of the costs to the Crown prosecution service of employing barristers in Crown court appeals against sentence or conviction and committals for sentence in *(a)* Greater London and *(b)* Manchester at the latest available year.

The Attorney-General: Barristers employed by the Crown prosecution service do not have rights of audience in the Crown court. The average fees paid to counsel instructed to appear on behalf of the CPS in such cases for the period 1 April to 31 December 1988, the only period for which such information is available were:

	£
Appeals against sentence	72
Appeals against conviction	121
Committals for sentence	74

The information given is for the three London Crown prosecution service areas, whose boundaries extend beyond Greater London. Separate figures for Greater London are not available.

The equivalent figures for Greater Manchester are:

	£
Appeals against sentence	81
Appeals against conviction	132
Committals for sentence	84

Public Defender System

Mr. Austin Mitchell: To ask the Attorney-General if he will arrange for an experiment with a public defender service as recommended by the Hughes royal commission.

The Attorney-General: The experiment recommended by the Royal Commission on legal services in Scotland (Cmnd. 7846) was limited to the Scottish jurisdiction. There are no plans to examine the case for a public defender service in England and Wales.

Serious Fraud Office

64. **Mr. Rooker:** To ask the Attorney-General when he last met the director of the serious fraud office; and what matters were discussed.

The Attorney-General: On Monday 3 April. We discussed matters of departmental interest.

Legal Profession (Complaints)

Mr. Ieuan Wyn Jones: To ask the Attorney-General what representations he has received on the case for renewing the procedure for making complaints against members of the legal profession, and for dealing with such complaints more effectively.

The Attorney-General: As at 31 March a total of 56 such responses had been received.

Director of Public Prosecutions

66. **Mr. Bowis:** To ask the Attorney-General when he last met the Director of Public Prosecutions; and what matters were discussed.

The Attorney-General: On 3 April. We discussed matters relating to the Department.

Mr. Skinner: To ask the Attorney-General when he next intends to meet the Director of Public Prosecutions; and what matters will be discussed.

The Attorney-General: On 27 April. We intend to discuss a variety of matters of departmental interest.

Incitement to Murder

67. **Mr. Winnick:** To ask the Attorney-General what representations he has received regarding the range of penalties available to the court for incitement to murder.

The Attorney-General: None.

"Fighting on Two Fronts"

Mr. Livingstone: To ask the Attorney-General what representations he has received concerning the legal implications of the forthcoming publication of the book entitled, "Fighting on Two Fronts", by Fred Holroyd.

The Attorney-General: None.

Immigration

Mr. Madden: To ask the Attorney-General when the appeal on behalf of Mr. Shaukat Ali (Ref: IMM/82875) into the refusal to grant him entry clearance into the United Kingdom for marriage is expected to be heard in the United Kingdom.

The Attorney-General: The appeal papers were received at the immigration appellate authorities headquarters on 25 January 1989. There has been a delay in processing the papers, but they have now been sent to the IAA's office in Leeds. They will be forwarded to the appellant's representatives in the United Kingdom and to the respondent within the next few days. Thereafter, when both parties indicate their readiness to proceed, the appeal will be listed for hearing in Leeds within six weeks.

NATIONAL FINANCE

Relief Agencies

82. **Mr. Bowis:** To ask the Chancellor of the Exchequer what steps he is taking to encourage voluntary giving to relief agencies.

Mr. Lilley: I assume that my hon. Friend is referring to charitable relief agencies. If so, I refer him to the reply that I gave to my hon. Friend the Member for Beaconsfield (Mr. Smith) on 16 March at columns *300-1*.

Income Tax

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for single persons, one-earner married couples and two-earner married couples above and below pension age the number of tax units in each revenue band of £1,000 to £15,000, £2,500 to £25,000 and in available bands thereafter, together with the forecast revenue from income tax in each case.

Mr. Norman Lamont: Provisional estimates for the 1989-90 tax regime, based on a projection of the 1986-87 survey of personal incomes, are given in the table.

Number of tax units and tax liability by range of total income 1989-90

	Single		Married couple with wife's earnings		Married couple without wife's earnings	
Total income (lower limit) (£ pa)	*Number of units paying tax ('000s)*	*Tax yield (£ millions)*	*Number of units paying tax ('000s)*	*Tax yield (£ millions)*	*Number of units paying tax ('000s)*	*Tax yield (£ millions)*
Tax units under 65						
2,000	140	[1]	—	—	—	—
3,000	790	150	—	—	—	—
4,000	740	300	—	—	60	10
5,000	790	500	10	[1]	150	40

50,000	20	430	20	490	20	500

[1] Less than £5 million or 5,000.

Schedule E Taxation

Mr. Gordon Brown: To ask the Chancellor of the Exchequer how many individuals in salary bands of £20,000 to £30,000, £30,000 to £40,000, £40,000 to £50,000, £50,000 to £6,000, £60,000 to £70,000 and £70,000 upwards are assessed on an accounts basis rather than an accruals basis for schedule E purposes.

Mr. Norman Lamont: I regret that the information is not collected centrally.

Mr. Gordon Brown: To ask the Chancellor of the Exchequer what is the number of higher rate taxpayers on Schedule E and their average income.

Mr. Norman Lamont: In 1989-90, about 1·2 million tax units (single people and married couples) whose main source of income is schedule E are liable to higher rate income tax. Their average income is just under £45,000 per annum. This estimate is based on a projection of the 1986-87 survey of personal incomes and is provisional.

London Tax Districts

Mr. Trotter: To ask the Chancellor of the Exchequer how many London tax districts are being moved from London under the exit London programme; to which locations they are being moved; and how many staff are involved in each case.

Mr. Norman Lamont: Under the exit London programme, nine London tax districts have already moved and a further 12 are planned to be moved in the next two years. The receiving locations are Glasgow, Manchester, Liverpool, Leeds, Bristol and Solihull and the approximate numbers of posts involved are 16, 35, 23, 33, 26 and 33 respectively.

Computer Consultants

Mr. Tim Smith: To ask the Chancellor of the Exchequer what was the total amount spent by the Inland Revenue in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Inland Revenue in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Norman Lamont *[holding answer 4 April 1989]:* The amount spent by the Inland Revenue in 1988 on management and computer consultancy contracts excluding hardware and software purchases was £14·6 million.

The Inland Revenue awarded the following consultancy contracts in 1988:

Arthur Young—Financial Systems
Panacea—Projects Support
ICS (Sales) Ltd—Development of local systems
Compass Ltd—Capacity planning
Coopers & Lybrand—Review of Payroll System
BIS Applied Systems—Contingency Planning
Industrial Society—Assistance with "Team Briefing"
Inforam—BROCS Project Office consultancy
Expertech—Expert System development in Information Centre

F1 Group—Leeds Underwriters unit development
Nicol, Jones & Lomax—Matheson House Planning
Oasis—Customer support activities
The Plan—Matheson House planning
Humphrey & Associates—Review of cost control package
NRPB—VDU radiation survey

Mr. Tim Smith: To ask the Chancellor of the Exchequer, (1) what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment;

(2) what was the total amount spent by the Central Computer and Telecommunications Agency in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by the Central Computer and Telecommunications Agency in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr Peter Brooke *[holding answers 4 April 1989]:* Total Treasury expenditure in 1988 was some £6·0 million (including some £5·6 million by the Central Computer and Telecommunications Agency). Figures given include the cost of development studies, which in turn included the cost of associated hardware and software; the latter items are not separately identifiable.

The following management or computer consultancy contracts were awarded by Her Majesty's Treasury in 1988. With the exception of the first 15, all were placed by the Central Computer and Telecommunications Agency.

Firm	*Subject of assignment*
Motivation Strategy Limited	Non-cash incentives.
Moody International Developments	Materials handling.
Peat Marwick McLintock	Assistance with GAD Management Review.
ICL	Computer Software Modification.
Scicon	Computer Software Modification.
B Toyn	Preparation of CUP guidance on planning and progress monitoring in relation to capital expenditure contracts.
M N Pickett	Advice on contracts and contract conditions and preparation of CUP guidance on de-briefing.
M W King	Preparation of CUP guidance on contracting out of departmental purchasing activities.
F Griffiths	Preparation of CUP guidance on the appointment of consultants, engineers and architects.
P A Gee	Preparation of CUP guidance on stock management and computer systems for purchasing and supply.
A N Fegent	Preparation of CUP guidance on stock control.
R Davidson	Production of CUP guidances on quality assurance—principles and terminology; quality systems; project sponsorship—planning and progress monitoring; and project sponsorship—role of project sponsor and relationship with PSA.
D S Collins	Advice on CUP guidance on good buying practice and model conditions of contract.
I Billson	Production of CUP guidance on Performance Measurement.
C D Boylan	Advice on issues relating to the introduction of project sponsorship and "untying" of services from PSA.
Treehouse International Ltd.	Production of Standards and Quality Assurance Procedures.
Treehouse International Ltd.	Infrastructure Library Presentation Design Study.
Treehouse International Ltd.	Information Systems Strategy Guidelines.
Computer System Architects	Provision of a Systems Consultant.
Castel Computers and Systems Telecommunication Ltd.	Verification of Electronically Reproduced Data in Court (VERDICT).
R M O'Connor	IT Standards Catalogue updates and enhancements.
PA Consulting Services Ltd.	Consultancy for Information Systems Evaluation Guides.
Praxis System Plc	Technical Writing and Production of Information Systems Guides.

Firm	Subject of assignment

Touche Ross	Provision of a System Consultant.
PE Computer Services Ltd.	Provision of a Systems Consultant.
Sergent Baker	Production of Information Systems Guide A4.
Insight International Ltd.	Adaptation and extension of Plexus Software for incorporation into IMSE Demonstrator.

Firm	Subject of assignment
Logica Consultancy Ltd.	Consultant for Documentation of draft Requirements for Infrastructure Management Support Tools.
System Designers Scientific	Public Domain Expert Systems Methodology.
The Instruction Set Ltd.	Common Applications Environment for Government Study.
Electronic Facilities Design Ltd.	Consultancy for the Revision of MEVIOTS—Method for Evaluating the Impact of Office Systems.
Logica Communications and Electronic Systems Ltd.	Development Study into Network Service Access Point (NSAP)—address allocation requirement in Government.
Kermon Associates Ltd.	Government Data Network (GDN) Strategic Planning.
Ultracomp Ltd.	Development of a Service Level Agreement Manager.
Metron Technology Ltd.	Development of a Computer-Based Link between GITTIMM support tool and SSADM support tool.
Martin Ashley Design Associates	Symbol Design for the Advanced Technology Group.
Birmingham Polytechnic	Development Contract for SSADM Conformance Scheme.
CAP Industry Ltd.	Study into the practicalities of harmonising SSADM and MERISE.
Babelease Ltd.	Development Study to produce a generic Model of Expert System Tools.
British Telecom plc	CBX System Design Study.
Stage 3 Solutions Ltd.	Completion of Must 3.
Software Sciences Ltd.	Development of ECLIPSE Software.
International Computers Ltd (ICL)	Computer Aide Support Environment (CASE) phase 2 and Phase 3.

Interest Rates

Mr. Cox: To ask the Chancellor of the Exchequer what have been the effects on British industry of increased interest rates over the last six months.

Mr. Major: Inflation is the greatest threat to corporate prosperity. British industry will greatly benefit from the Government's firm anti-inflationary policy.

EC Finance

Dr. Hampson: To ask the Chancellor of the Exchequer if he will set out Britain's net payment to the European Community for each of the financial years 1980, 1984 and 1988, with the equivalent figures for France and Germany in constant money terms.

Mr. Brooke *[holding answer 7 April 1989]:* The information requested for the United Kingdom is set out below. Equivalent figures for other member states are not available.

Net contributions to the EC budget

(£ million)

Year	Cash Value	At constant 1988 prices[1]
1980	706	1,138
1984	656	802
[2]1988	1,362	1,362

[1] Constant prices have been constructed using the GDP deflator at market prices.
[2] Provisional figure.

PRIME MINISTER

Right of Silence

Mr. Redmond: To ask the Prime Minister whether the speech made by the Lord Chancellor in Washington, United States of America, to members of the United States legal profession represented Her Majesty's Government's policy in respect of the right of silence.

The Prime Minister: Government policy continues to be that there is a strong case for substantial changes in the law of England and Wales, but that their precise nature will be decided in the light of the recommendations made by the Home Secretary's working group, whose report is due shortly.

Ministers (House of Lords)

Ms. Quin: To ask the Prime Minister how many government Ministers were members of the House of Lords; and what percentage of the total those ministers represented in *(a)* 1959, *(b)* 1964, *(c)* 1966, *(d)* 1970, *(e)* 1974, *(f)* 1979, *(g)* 1985, *(h)* 1986 and *(i)* 1987.

The Prime Minister: The figures are as follows:

Number of Ministers who were Members of the House of Lords

Year[1]	Total number of Ministers	Ministers in the House of Lords	Percentage
1959	89	19	21
1964	97	24	25
1966	110	20	18
1970	99	17	17
1974	99	21	21
1979	108	16	15
1985	106	20	19

Year[1]	*Total number of Ministers*	*Ministers in the House of Lords*	*Percentage*
1986	107	21	20
1987	107	21	20

[1] Figures relate to 1 January in each year.

Mr. Charles Powell

Mr. Winnick: To ask the Prime Minister if she will list the duties and responsibility of Mr. Charles Powell in January 1986 and the position he has since occupied in her office.

The Prime Minister: Mr. Powell was appointed to my office in June 1984 as my private secretary responsible for foreign affairs.

Sir Leon Brittan

Mr. Winnick: To ask the Prime Minister whether, in the light of Sir Leon Brittan's recent remarks, she will make a further statement on the approval which was given by her office for the leaking of the then Solicitor-General's letter regarding the Westland affair.

The Prime Minister: I have nothing to add to the many answers given in statements and in reply to questions on this subject.

Mr. B. Ingham

Mr. Winnick: To ask the Prime Minister whether she will now transfer Mr. B. Ingham from her office.

The Prime Minister: No.

Namibia

Mr. Caborn: To ask the Prime Minister when the Secretary General of the United Nations informed her that his report to the United Nations Security Council on Namibia should be kept confidential.

The Prime Minister: As my right hon. Friend the Leader of the House said during business questions on 6 April 1989, I was not aware that the document in question was confidential until after I referred to it in the House on 4 April 1989.

FOREIGN AND COMMONWEALTH AFFAIRS

Turkey (Human Rights)

Mr. Allen: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what recent representations Her Majesty's Government have made to the Turkish authorities about the persistent abuse of human rights in Turkey;

(2) if Her Majesty's Government will urge the Turkish Government to take specific measures against the use of torture in their country, including limiting the length of incommunicado detention, rejecting as evidence in court confessions extracted under torture and reforming the Turkish penal code to allow full freedom of expression and association;

(3) when he will next meet representatives of the Turkish Government to discuss the concern raised by hon. and right hon. Members about the human rights situation in Turkey.

Mrs. Chalker: As I informed the House on 7 and 8 February, my right hon. and learned Friend the Secretary of State discussed human rights with the Turkish ambassador on 1 February, as I did the following day. We urged him that his Government should respect and abide by the terms of the international human rights conventions to which Turkey is a party. The Turkish ambassador readily accepted this point, and reaffirmed the determination of his Government to secure further improvements. We also expect Turkey to live up to internationally accepted standards concerning the treatment of prisoners. We have no immediate plans to meet any other representative of the Turkish Government.

Palestine Liberation Organisation

Mr. Latham: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has raised with the Palestine Liberation Organisation the implications for the peace process in the middle east of the statement in call number 37, broadcast by PLO Central Radio on 31 March, that 5 April was to be a day of violent struggle involving knives, axes and large stones pushed from rooftops and 8 and 9 April were to be devoted to violent militant activities.

Mr. Waldegrave: No. The Palestinians are already aware of our view that the intifada should be pursued with the utmost restraint.

European Parliament

Mr. Marlow: To ask the Secretary of State for Foreign and Commonwealth Affairs what was the total amount for each of the last four years spent by the European Parliament on Members of the European Parliament's private expenses, broken down into *(a)* secretarial, *(b)* hotel and accommodation, *(c)* travel and *(d)* other expenses; and what was the average amount in each category per Member for the last available year.

Mrs. Chalker: The information requested is not immediately available. A further reply will be given in due course.

Sir Geoffrey Finsberg: To ask the Secretary of State for Foreign and Commonwealth Affairs what response he will make to the European Parliament report containd in document A2-425/88 which calls for the merging of the European Community and Western European Union.

Mrs. Chalker: The report in question is a Committee report which has not been debated at a European Parliament plenary session. There are no plans for such a merger.

Sir Geoffrey Finsberg: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to request the Council of Ministers of the European Community to draw to the attention of the European Parliament and its Committees the exclusion of defence matters from their competence.

Mrs. Chalker: No. The European Parliament is an independent Community institution. It is not for the Council to determine what the Parliament may discuss.

Namibia

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the United Kingdom

contribution to the European Community grant to promote democracy in Namibia; and if he will make a statement on how it is to be distributed to the parties concerned in the forthcoming elections.

Mrs. Chalker: We have checked with the European Commission, which is not aware of any such grant. Provision for measures in preparation for Namibian independence was written into the Community's 1989 budget, but no money has yet been allocated to that budget line.

European Community assistance to Namibia to date has consisted of support for non-governmental organisations, food aid and assistance to Namibian refugees.

Sugar

78. **Ms. Mowlam:** To ask the Secretary of State for Foreign and Commonwealth Affairs if the United Kingdom Government will support proposals to maintain the price of sugar imported under the sugar protocol from African, Caribbean and Pacific states; and if he will make a statement.

Mrs. Chalker: The guaranteed price paid to the ACP for imports of sugar under the Lomé sugar protocol is related to the level of support prices for EC-produced sugar. The latter are set annually as part of the CAP price fixing exercise. Discussions are continuing in Brussels on this year's prices.

European Assembly

Mr. Meale: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent decisions have been taken by the European Economic Community Council about the attendance of ministers and officials of national Governments at meetings and committees of the European Assembly.

Mrs. Chalker: Apart from normal presidency contacts with the European Parliament, representatives of EC Member states may accept invitations to attend and speak at plenary meetings and committees of the European Parliament.

Immigration

Mr. Madden: To ask the Secretary of State for Foreign and Commonwealth Affairs why Mrs. Shahnaz Akhtar, (ref: IMM/96739), who was born on 5 July 1966 was not given a re-entry visa at the British port at Islamabad to return with her husband to the United Kingdom where they have both lived for some years, after their recent holiday in Pakistan; why was she told she would have to apply for entry clearance to the United Kingdom and issued with an entry clearance reference number; why her husband was told to send various documents to the post on his return to the United Kingdom; and if he will compensate Mrs. Akhtar and her husband for the inconvenience and distress caused by their separation as a result of the refusal of the post to assist Mrs. Akhtar to return to the United Kingdom with her husband.

Mr. Eggar: This information is not immediately available. I will write to the hon. Member when a full report is received from the embassy in Islamabad.

Mr. Madden: To ask the Secretary of State for Foreign and Commonwealth Affairs when Mrs. Rubina Kausar, who was born on 3 March 1968, applied to the British post in Islamabad for entry clearance to join her husband in the United Kingdom; and when a decision will be taken on her application.

Mr. Eggar: The Embassy in Islamabad is unable to trace an application for entry clearance from Mrs. Kauser. If the hon. Member can supply the immigration section file reference number and date of application I will ask the embassy to make a further search.

Mr. Madden: To ask the Secretary of State for Foreign and Commonwealth Affairs when Mr. Abdul Sattar (ref: IMM/77322) applied to the British post in Islamabad for entry clearance to join his wife in the United Kingdom; and when a decision will be taken on his application.

Mr. Eggar: Mr. Sattar re-applied for a settlement entry clearance at the embassy in Islamabad on 13 May 1987 and was refused a visa on 9 August 1988. Mr. Sattar appealed against the refusal and the entry clearance officer's explanatory statement was forwarded to the appellate authority on 8 February 1989.

Mr. Madden: To ask the Secretary of State for Foreign and Commonwealth Affairs when Mr. Shaukat Ali, ref: IMM/82875, applied to the British post in Islamabad for entry into the United Kingdom for marriage; when his application was refused; and when the British post sent a statement to the United Kingdom appellate authorities explaining why his application was refused.

Mr. Eggar: Mr. Ali applied for an entry clearance at the embassy in Islamabad on 17 September 1986. His application was refused on 25 April 1988 and the entry clearance officer's explanatory statement was sent to the appellate authorities on 12 January 1989.

Semtex

Sir John Farr: To ask the Secretary of State for Foreign and Commonwealth Affairs what response he has received to requests made to the Czechoslovak Government to ensure that future production of Semtex is given a readily readable signature to assist in the fight against air terrorism.

Mr. Waldegrave: As part of a wider initiative for an international convention on the subject the Czechoslovak Government have expressed willingness to mark Semtex. We are currently discussing with them how to take this forward. Both we and the Czechoslovak Government were represented at an expert meeting under ICAO auspices from 6 to 10 March. The Czechoslovak Government have informed us that they have never knowingly supplied explosives to terrorists and ceased all exports of Semtex in 1982.

European Court of Human Rights

Mr. Alton: To ask the Secretary of State for Foreign and Commonwealth Affairs how much has been spent by the Government since 1979 in fighting cases before the European Court of Human Rights up to and including the hearing of 28 March; how much has been paid for the instruction of lawyers; what are the estimated costs in employees' time, travelling and accommodation costs of officials involved in these cases; how much has been paid out in costs or expenses and compensation by the

Government following rulings by the court; and if he will list the sums involved in each case which has reached a ruling stage.

Mrs. Chalker: This information is not immediately available. I will reply to the hon. Member as soon as possible.

AGRICULTURE, FISHERIES AND FOOD

Sheep Dip

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will introduce an amnesty scheme whereby farmers can return to his Department's offices partly used or unused containers of sheep dip of a lindane base.

Mr. MacGregor: I have no plans to do so. Farmers wishing to dispose of such chemicals are advised to consult a reputable waste disposal company.

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will revise his booklet, "Guidelines for the Disposal of Unwanted Pesticides and Containers on Farms and Holdings", especially in regard to sheep dip.

Mr. MacGregor: In consultation with the working group on the disposal of pesticides, my Department is reviewing and revising the guidance available to farmers. A revised code of practice on pesticide use should be available at the end of the year. Sheep dips are veterinary medicines and are being considered separately. Any changes in the guidance offered to farmers will be reflected in the labelling of sheep dips, in the code of conduct for the safe use of veterinary medicines on farms and in my Department's leaflets and booklets on sheep dipping.

Farm Incomes

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food how many farmers in *(a)* England and *(b)* Wales received annual incomes from farming of (i) less than £4,999, (ii) £5,000 to £7,499, (iii) £7,500 to £9,999, (iv) £10,000 to £14,999, (v) £15,000 to £19,999 and (vi) £20,000, respectively, for the latest convenient year.

Mr. Ryder: I regret that this information is not available in the precise form requested. The farm business survey does, however, allow estimates to be made of the proportional breakdown of full-time farm businesses by income band. Information relating to the latest available year, 1987-88, is shown in the table.

Percentage distribution of full-time farm businesses in England and Wales by net farm income:[1] [2]
All types of farm—1987-88

Level of net farm income	*England*	*Wales*[3]
Below £5,000	40	38
£5,000 to £7,499	8	13
£7,500 to £9,999	9	6
£10,000 to £14,999	11	14
£15,000 to £19,999	9	9
£20,000 and above	21	19
All income bands	100	100

[1] Figures are derived from data collected in the farm business survey by universities and agricultural colleges in England and Wales.

[2] Net farm income represents the return to the farmer and spouse for their manual and managerial labour and on tenant type capital in livestock, crops, machinery etc. but excluding land and buildings. It is calculated before the deduction of interest on any farming loans. All farms are treated as rented in the derivation of net farm income and an imputed rental value for owner-occupied land is charged as an expense in the accounts.

[3] Figures for Wales relate to all dairy and livestock farms only.

Tropical Timber

Mr. Dalyell: To ask the Minister of Agriculture, Fisheries and Food what representations he has received from local authorities concerning their powers to accept other than the lowest tenders for sea defence schemes constructed of tropical timber, in order that the timber can be obtained from sources that can be guaranteed to be sustainable and non-destructive of tropical rain forests; and what advice has been given to any such authorities.

Mr. Ryder: There has been one occasion when a local authority has wished to accept a tender, which was other than the lowest submitted, utilising timber obtained from a sustainable source. On this occasion, it was possible for the purposes of Ministry grant aid to the scheme to agree to the council's wishes, as this was justified on both the longer-term durability and economic advantage of the preferred timber, and also on the grounds of ensuring, where possible, that timber is obtained from sustainable sources.

Potatoes

Mr. Kirkwood: To ask the Minister of Agriculture, Fisheries and Food (1) what recent representations he has received regarding the advisability of abolishing the Potato Marketing Board;

(2) what plans he has to meet members of the Potato Marketing Board to discuss its future;

(3) when he expects to announce the action to be taken by his Department as a result of the recent review of the Potato Marketing Board;

(4) if he will make a statement on the future of the Potato Marketing Board.

Mr. Ryder: The Government's consultation paper on future potato market policy was issued on 6 September 1988 and invited comments by 31 December 1988. By the closing date, 93 individuals and organisations (including the Potato Marketing Board) had commented, and I have received numerous representations since then. In addition, I met the chairman, vice chairman and chief executive of the Potato Marketing Board on 8 March. We are now considering what conclusions to draw from this exercise, and an announcement will not be unduly delayed.

Food Irradiation

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what is his policy concerning the irradiation of food; and if he will make a statement.

Mr. Ryder: I refer the hon. Member to the reply given by my hon. Friend the Parliamentary Under-Secretary of State for Health on 21 February at column *600*.

Bovine Spongiform Encephalopathy

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what is his estimate of the number of cattle currently incubating bovine spongiform encephalopathy.

Mr. MacGregor: Any estimate must be tentative. However, the report of the Southwood working party on BSE estimates that by 1993, the cumulative total of confirmed BSE cases may be about 17,000 to 20,000.

Edible Dormice

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food on how many occasions during each of the last three years he has issued licences to trap edible dormice; to whom those licences were issued; and what information he records about the number of animals so taken.

Mr. Ryder: Licences to trap glis glis (edible dormouse) were issued under section 16(3) of the Wildlife and Countryside Act 1981 on four occasions in the last three years. The licences were issued to occupiers of commercial forests where this non-indigenous animal was causing serious damage. It was a condition of each licence that the numbers of glis glis taken should be reported to the Ministry. Details are as follows:

Year	*Number taken*
1986 1 Licence	4
1987 1st Licence	43
2nd Licence	14
1988 1 Licence	6

Committee on Food Safety

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food (1) whether he intends to appoint some independent consumers to his committee on food safety;

(2) when he intends to announce the membership of the committee on food safety; and if he will make a statement.

Mr. Ryder: I refer the hon. Member to the reply given by my right hon. and learned Friend the Secretary of State for Health to my hon. Friend the Member for Staffordshire, Moorlands (Mr. Knox) on 23 March at column *771*.

Organic Farming

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what research he is currently funding into organic farming.

Mr. Ryder: The following projects are currently being funded by my Department:

1. Winter wheat: disease control in crops grown to organic standards (ADAS).
2. Winter wheat varieties and seed rates for organic systems (ADAS).
3. The nitrogen cycle on organic farms.
   (University College of Wales—Aberystwyth).
4. The use of under sown forage legumes in cereals for nitrogen accumulation in organic arable systems.
   (Elm Farm Research Centre).
5. The availability of water insoluble phosphate and potash sources in organic farming systems.
   (Elm Farm Research Centre).
6. Mixed cropping of cereals and grain legumes (in organic farming).
   (Reading University/Elm Farm Research Centre).

In addition, other research funded by my Department is relevant because it is directed at reducing the use of artificial fertilizers and pesticides, or improving the use of organic wastes from animals and crops.

Farming Industry

Mr. Alexander: To ask the Minister of Agriculture, Fisheries and Food if he will outline the Government's long-term intentions for the British farming industry, separately for each sector; and if he will make a statement.

Mr. MacGregor: The Government continue to provide substantial direct and indirect financial support to the agriculture industry.

The Government's intention is that the United Kingdom agriculture industry should be soundly based and competitive in marketing its products. In particular, the industry needs to prepare itself to take full advantage of the opportunities and challenges which the completion of the single European market of 320 million consumers will bring.

In EC negotiations and domestically the Government will continue to:

- promote the role of the market as the key determinant of farmers' choice of action;
- press for measures which bring supply and demand into better balance;
- seek to reduce further the role of institutional support;
- demand fair competition with no discrimination between member states.

The Government also advocate policies aimed at helping to achieve a better balance between agricultural production and the needs of the rural economy and environment as a whole.

A number of new initiatives have been introduced to encourage farmers to consider ways of utilising their assets to augument their income in ways which reduce surplus production. These include set aside, and the farm woodlands and diversification schemes.

Grain Supplies

Mr. Ralph Howell: To ask the Minister of Agriculture, Fisheries and Food how many days' supply of grain are currently in store in the United Kingdom *(a)* in intervention storage and *(b)* in all storage.

Mr. Ryder: Current United Kingdom intervention stocks of wheat and barley represent around 21·5 days' supply of grain. Information on the quantity of grain currently in commercial storage is not available.

Mr. Ralph Howell: To ask the Minister of Agriculture, Fisheries and Food (1) what is the latest estimate of the stocks of grain which will be in store in July 1989 *(a)* in Britain, *(b)* in the European Economic Community and *(c)* in the world, expressed in tonnes and days' supply;

(2) what is the latest estimate of the stocks of grain at the present time *(a)* in Britain, *(b)* in the European Economic Community and *(c)* in the world, expressed in tonnes and days' supply.

Mr. Ryder: Estimates of stocks of grain in store are only available for the end of the cereals marketing year. For the Community, the marketing year ends on 30 June

and the latest estimates for the United Kingdom and the European Community as a whole at the end of June are as follows:

	Million tonnes	*Days' supply*
United Kingdom	5·6	105
EC	39·4	106

The International Wheat Council's estimate of world stocks of grain is an aggregate of national figures based on different definitions of marketing years and therefore does not relate to any particular month. The council's latest estimate for world stocks for the end of the 1988-89 crop year is 228 million tonnes or around 60 days' supply.

Horticulture

Mr. Cox: To ask the Minister of Agriculture, Fisheries and Food what policy is followed by his Department to help small horticultural companies sell into the markets of the European Economic Community; and if he will make a statement.

Mr. Ryder: The Ministry of Agriculture, Fisheries and Food backs the export efforts of horticultural companies of all sizes. Small companies can benefit particularly from the help we give for the establishment of co-operatives and from half price plant health services.

My ADAS export technical adviser provides free advice to exporters. Food from Britain, whose establishment costs are met by my Department, develops and promotes export opportunities in the Community, and gives exporters advice and help. It also acts as our agent in the administration of the agricultural and horticultural co-operation scheme, under which we provide non-capital grants towards formation and initial management costs of new marketing co-operatives and capital grants on a range of buildings and equipment. My officials in the horticultural marketing inspectorate provide advice on the Community quality standards which apply to most horticultural produce and issue export certificates free of charge. My Department also provides a number of plant health services for companies selling within the Community, including provision of the necessary phytosanitary certificates; small exporters are eligibile for a half price concession on these services. My officials also provide for exporters a summary of the plant health requirements of member states, and have set up the voluntary export nursery approval scheme which facilitates the export of high quality produce.

In addition, my Department tries to help horticulturists to respond to specific challenges. They recently held a conference on horticulture and the single European market to promote awareness of the EC Commission's 1992 initiative, and its implications for all aspects of horticultural businesses.

"Nuclear Accidents and the Farmer"

Mr. Redmond: To ask the Minister of Agriculture, Fisheries and Food if he will list by location the farmers who have received his Department's leaflet, "Nuclear Accidents and the Farmer"; and if he will make a statement.

Mr. Ryder: I refer the hon. Member to the reply that I gave on 20 March 1989 at column *472* to the hon. Member for South Shields (Dr. Clark). Our initial distribution was to holdings in England in the vicinity of nuclear power stations operated by the Central Electricity Generating Board, licensed nuclear sites of British Nuclear Fuels plc and the various nuclear facilities run by the Ministry of Defence, the United Kingdom Atomic Energy Authority and Amersham International plc. Large numbers of copies have also been distributed at meetings held by my officials and in response to individual requests. Distribution has been carried out principally through my Department's regional organisation and no central record has been maintained. Further copies remain available free of charge on request from any of my Department's regional offices.

EMPLOYMENT

Wages Inspectorate

Mrs. Golding: To ask the Secretary of State for Employment what reasons other than at the request of the workers involved for not pursuing arrears of wages underpayment were discovered by the wages inspectorate in the midlands in 1988.

Mr. Nicholls: Specific information could be provided only at disproportionate cost. However, in the small minority of cases where the inspectorate does not pursue arrears the decision is taken only after careful consideration of all the circumstances, including the likelihood of success bearing in mind such factors as the employers' ability to pay and the adequacy of evidence.

Mrs. Golding: To ask the Secretary of State for Employment what level of arrears of pay has been discovered by the wages inspectorate as not pursued at the request of workers; what assessment he has made of the reasons which lie behind the requests of workers not to recover their arrears; and whether he will make a statement.

Mr. Nicholls: In 1988 arrears of pay amounting to £295,746 were not pursued by the wages inspectorate at the request of workers. No comprehensive record is kept of the reasons given by workers for requesting non-pursuance. However, the decisions typically reflect the good personal relationships between employer and worker, concern about the viability of the business, contentment with the rate paid prior to the inspection, or the fact that the underpayment resulted from ignorance or inadvertance. Inspectors must, however, inform the worker of the sum involved and must satisfy themselves that the worker's decision not to pursue payment is made voluntarily.

It is also made clear to the worker that a request not to pursue arrears at a particular time does not prevent them obtaining the inspectorate's help in seeking payment at a later date.

Mrs. Golding: To ask the Secretary of State for Employment how many establishments were found by the wages inspectorate to be underpaying in *(a)* north Staffordshire and *(b)* the Stoke-on-Trent travel-to-work area; what percentage this was of all checked; how many workers were covered; and what was the total and weekly pay involved in the latest year for which figures are available.

Mr. Nicholls: Wages inspectorate statistics are not compiled for areas smaller than the inspectorate's nine divisions, of which the midlands is one. Information on the midlands for 1988 is as follows:

	Information
Number of establishments found underpaying	747
Percentage of all establishments checked found underpaying	14·9 per cent.
Number of workers found underpaid	1,425
Total arrears of pay assessed	£190,698

No statistics are kept on weekly underpayment.

Mrs. Golding: To ask the Secretary of State for Employment if he will list the 10 worst cases of underpayment of wages by midlands employers discovered by the wages inspectorate in 1988, setting out both the weekly and total amounts involved.

Mr. Nicholls: The information requested could be provided only at disproportionate cost.

Job Clubs

Mr. Allason: To ask the Secretary of State for Employment if he will give his reasons for reducing the number of job clubs; and why the job club in Paignton is under threat of imminent closure.

Mr. Lee: I refer my hon. Friend to the reply given to my hon. Friend the Member for Bury, North (Mr. Burt) on 27 January 1989 at column *810*, by my right hon. Friend the Secretary of State.

Employment service regional directors are currently considering how the job club network should be reshaped so as most effectively to achieve the objective of increasing numbers of people helped while making more efficient use of resources. There is spare capacity at present in the network in Paignton, Torquay and adjoining areas. This will be taken into account in reaching decisions about its future shape, together with the need to maintain access to the programme for longer term unemployed people in these areas.

Working Mothers

Mr. Leighton: To ask the Secretary of State for Employment what proportion of mothers with children aged under five years go to work in *(a)* each of the EEC countries, and *(b)* Sweden; what is the average number of hours worked by mothers of children aged under five years in *(a)* each of the EEC countries, and *(b)* Sweden; and what is the comparable information for the United Kingdom.

Mr. Cope: It is estimated from the preliminary results of the 1988 labour force survey (LFS) that in spring 1988, 36·4 per cent. of women in the United Kingdom with at least one child aged under five were in employment and their average total usual hours worked were 23·5 hours per week.

Comparable information for other countries is not available in my Department.

Labour Statistics

Mr. Redmond: To ask the Secretary of State for Employment what is the number of people employed in *(a)* the mining industry; *(b)* the steel industry and *(c)* on the railways for the Yorkshire and Humberside region, what was the comparable figure five years and 10 years ago; and if he will break down the answer by sex.

Mr. Lee: The available information for the mining industry and railways for the dates specified is given in the following table. The figures are subject to considerable potential estimation error as the monthly and quarterly employment surveys carried out between censuses of employment are based on samples which are not large enough to provide reliable estimates at regional level for individual industries. Comparable regional estimates of employment in the steel industry are available only from the censuses of employment held in September 1981 and September 1984, and these are included in the table.

	September 1978			*September 1981*[1]			*September 1983*			*September 1984*[1]			*September 1988*		
	Males	*Females*	*All*	*Males*	*Females*	*All*	*Males*	*Females*	*All*	*Males*	*Females*	*All*	*Males*	*Females*	*All*
Coal extraction and manufacture of solid fuels (class 11)[2]	76·4	3·3	79·8	76·2	3·3	79·5	68·0	3·0	71·0	63·3	2·9	66·1	31·9	1·5	33·4

[1] Census of employment data.
[2] Sub division of the 1980 Standard Industrial Classification.
n/a—Not available.

Mr. Redmond: To ask the Secretary of State for Employment what was the annual number of *(a)* full-time and *(b)* part-time working women for each year since 1979 in the Yorkshire and Humberside region; and what was the annual percentage change.

Mr. Lee: For the dates specified the only available information about female full and part-time employment in regions is for employees in employment. The latest date for which estimates are available is September 1988. The information is as follows:

Female employees in employment in Yorkshire and Humberside region

Thousand

	Full-time		*Part-time*	
September each year	*Number*	*Percentage change since previous September*	*Number*	*Percentage change since previous September*
1979	457	−1	356	4
1980	441	−4	353	−1
1981	418	−5	347	−2
1982	404	−3	349	1
1983	403	0	352	1
1984	408	1	361	3

September each year	Full-time Number	Full-time Percentage change since previous September	Part-time Number	Part-time Percentage change since previous September
1985	411	1	373	3
1986	410	0	387	4
1987	427	4	391	1
1988	452	6	395	1

Mr. Andrew F. Bennett: To ask the Secretary of State for Employment how many people have been out of work for over *(a)* 12 months, *(b)* two years and *(c)* three years for the most recent date for which figures are available; and what are the comparable figures for similar dates in 1984 and 1979.

Mr. Lee: Direct comparisons of unemployment by duration since 1979 are not possible because of changes in the coverage of the count. The following is the available information, which is also obtainable from the Library.

Unemployment by duration in the United Kingdom

Duration of unemployment	January 1979 Unemployed registrants[1]	January 1984 Unemployed claimants	January 1989 Unemployed claimants
Over 1 year	354,204	1,188,040	821,419
Over 2 years	n/a	616,411	544,507
Over 3 years	n/a	332,199	410,667

[1] In October 1982 registration at jobcentres became voluntary, necessitating a change to counting claimants at unemployment benefit offices.

Mr. Yeo: To ask the Secretary of State for Employment what has been the fall in unemployment in East Anglia during the last 12 months for which figures are available; and if he will make a statement.

Mr. Lee: In February 1989 the level of unemployment, seasonally adjusted, in East Anglia was 37,100 compared with 57,200 in February 1988, a fall of 20,100 or 35·1 per cent.

Mr. Devlin: To ask the Secretary of State for Employment how many people were employed in Cleveland in each of the last five years.

Mr. Lee: The latest available employment estimates for the county are from the September 1984 census of employment. There were then 183,600 employees in employment in Cleveland. This compares with a figure of 207,000 in September 1981 when the previous census of employment was taken.

More up-to-date county employee estimates, from the September 1987 census of employment, will become available later this year.

Re-start Scheme

Mr. Redmond: To ask the Secretary of State for Employment if he will make a statement on progress on the re-start scheme in the Doncaster and Mexborough areas of South Yorkshire.

Mr. Lee: From 28 March 1988 to 24 February 1989 just over 12,000 interviews have been carried out in Doncaster, of which 91 per cent. have resulted in an offer of positive help being made. Nearly 4,000 interviews have been carried out in Mexborough, of which 90 per cent. have resulted in an offer of positive help being made.

The re-start programme now offers interviews at six-monthly intervals to everyone who has been unemployed for six months or more. In addition, certain clients are now offered follow-up interviews in order to provide further guidance and support.

Since September 1988 the programme has delivered the Government's guarantee to people aged between 18 and 24 who have been unemployed for between six and 12 months, of the offer of a place on employment training, in a job club or on the enterprise allowance scheme.

Single Parents

Mr. Clelland: To ask the Secretary of State for Employment what were the numbers of single parents on employment training schemes on *(a)* 28 February and *(b)* 31 January in (i) the south Tyne area, (ii) the north Tyne area, (iii) the Gateshead local authority area and (iv) the Newcastle local authority area.

Mr. Nicholls: The information requested is not available.

Pneumoconiosis (Compensation)

Mr. Wigley: To ask the Secretary of State for Employment how many applications he has received for compensation during 1988 under the provisions of the 1979 Pneumoconiosis etc. (Workers' Compensation) Act; how many of these were approved and what is the total money paid out for these cases; how many applications were rejected; and how many are still waiting to be determined.

Mr. Nicholls: During 1988, 108 applications were received for compensation under the Pneumoconiosis etc (Workers' Compensation) Act 1979. Of these, 50 were approved, totalling £443,257 in compensation payments, 53 were not accepted and one was withdrawn; four of the 1988 applications are still awaiting determination.

Low Pay Unit (West Yorkshire)

Mrs. Mahon: To ask the Secretary of State for Employment if he has any plans to visit the West Yorkshire low pay unit.

Mr. Nicholls: My right hon. Friend has no such plans.

Labour Statistics (East Midlands)

Mr. Leigh: To ask the Secretary of State for Employment what has been the average monthly fall in the number of unemployed in the east midlands during the last quarter for which figures are available; and if he will make a statement.

Mr. Lee: The information is available from the Library. In the quarter ending February 1989, the average monthly fall in unemployment, seasonally adjusted, in the east midlands was 3,600. Unemployment in the east midlands has fallen by 35,300 or 22.8 per cent. over the last 12 months.

Self-employed

Mr. Andrew MacKay: To ask the Secretary of State for Employment what is the increase in the number of self-employed since June 1987; and if he will make a statement.

Mr. Lee: Between June 1987 and September 1988, the latest date for which estimates are available, there was a net increase of 156,000 in the estimated number of self-employed people in Great Britain. It is estimated that nearly 3 million people are now self-employed and the number is still rising. The numbers of self-employed people have risen by over 60 per cent. since 1979 and they now represent almost one in nine of the work force in employment.

Birds Eye

Mr. Sumberg: To ask the Secretary of State for Employment if he has any plans to meet the General Secretary of the Transport and General Workers Union to discuss the closure of the Birds Eye factory at Kirkby; and if he will make a statement.

Mr. Nicholls: I have no such plans. The decision to close the factory was made by the company on commercial grounds and I cannot see that such a meeting would serve any useful purpose.

Closed Shop

Mr. Riddick: To ask the Secretary of State for Employment if he has any plans to meet the General Secretary of the Trades Union Congress to discuss his Green Paper on the closed shop; and if he will make a statement.

Mr. Nicholls: My right hon. Friend the Secretary of State has no current plans for such a meeting.

Labour Statistics (South-East)

Mr. Bowis: To ask the Secretary of State for Employment if he will make a statement on the rise in the number of people in employment in the south-east since June 1987.

Mr. Lee: Between June 1987 and September 1988, the latest date for which figures are available, there was an increase of 363,000 in the civilian work force in employment in the south-east region. The civilian work force in employment is the sum of employees in employment, the self-employed and participants in work-related Government training programmes. Comparisons of data for June 1987 and September 1988 are affected by seasonal variations. Seasonally adjusted employment estimates are not available for regions.

Labour Statistics (West Midlands)

Mr. Mills: To ask the Secretary of State for Employment what has been the fall in unemployment in the west midlands during the last 12 months for which figures are available; and if he will make a statement.

Mr. Lee: In February 1989 the level of unemployment, seasonally adjusted, in the west midlands was 186,800 compared with 253,100 in February 1988, a fall of 66,300 or 26·2 per cent.

Labour Statistics (Merseyside)

Mr. Parry: To ask the Secretary of State for Employment if he will make a statement on the latest unemployment figures for Merseyside.

Mr. Lee: The information is available from the Library. In February 1989, the latest available date, the number of unemployed claimants in Merseyside was 98,188, a fall of 19,438 over the last 12 months.

Tourism

Mr. Amos: To ask the Secretary of State for Employment when he expects to be able to make an announcement about the outcome of the review on tourism.

Mr. Lee: The tourism review report is still under consideration. An announcement will be made in due course.

London Docklands

Mr. Leighton: To ask the Secretary of State for Employment when he expects unemployment to begin to fall faster in the three London Docklands boroughs than the average rate for London.

Mr. Lee: There is a very large number of new jobs in prospect for London Docklands which should have a beneficial effect on unemployment in the area. However, my Department does not make estimates of future levels of unemployment.

Training Agency (Staff)

Mr. Leighton: To ask the Secretary of State for Employment what were the numbers of staff in post in *(a)* the Inner London, North, *(b)* the Inner London, South, *(c)* the East London Training Agency offices and *(d)* the Docklands liaison group, during each of the past two years and currently.

Mr. Nicholls: The average numbers of staff-in-post for Inner London, North, Inner London, South and East London Training Agency area offices for the last two years and currently are listed in Table 1.

When first set up in September 1987 the work of the Docklands liaison group was undertaken by Training Agency East London area office staff. It is not therefore possible to give precise numbers of staff engaged on that work. The group became self contained in April 1988 and the average number of Employment Department staff in post during that year was 10·5. The same number of staff were in post on 31 March 1989.

Table 1

	1987	*1988*	*Current (31 March 1989)*
Inner London North	98	110	110
Inner London South	74·5	83	85
East London	58	67	65·5

Training

Mr. Leighton: To ask the Secretary of State for Employment what is the average payment of benefit, plus the additional £10, per employment training place.

Mr. Nicholls: The average weekly training allowance including the training premium is estimated to be around £50 per trainee on employment training.

Foreign Nationals

Mr. Leighton: To ask the Secretary of State for Employment what percentage of the labour force in the tourist, hotel and catering industry consists of foreign nationals.

Mr. Lee: According to preliminary results from the 1988 labour force survey, 8 per cent of all persons in employment in hotels and catering and other tourism-related industries are foreign nationals.

Part-time Work

Mr. Leighton: To ask the Secretary of State for Employment what information he has on the principal differences between regulations and restrictions on part-time work in European Economic Community countries other than the United Kingdom.

Mr. Cope: My Department does not have comprehensive and up-to-date information on this subject. It could be provided only at disproportionate cost.

Construction Industry

Mr. George Howarth: To ask the Secretary of State for Employment if he will publish a table showing the size of the occupational categories for the construction industry for each year since 1979.

Mr. Nicholls: Estimates from the labour force survey (LFS) of persons in employment in the construction industry in Great Britain by occupation, for LFS years since 1979, are as shown in the following table:

Persons in employment in construction industry[1]—occupational analysis
Great Britain, Spring each year

Thousands

CODOT major groups	*1979*	*1981*	*1983*	*1984*	*1985*	*1986*	*1987*	*[2]1988*

Source: Labour Force Surveys.

Trade Union Ballots

Mrs. Mahon: To ask the Secretary of State for Employment what information he has as to how many work forces balloted in 1988 by their trade union on whether to take industrial action voted against the proposal.

Mr. Nicholls: There is no statutory requirement for a union to notify such a ballot, or details of its result, other than to those given entitlement to vote. I understand, however, that the Advisory, Conciliation and Arbitration Service is aware of 23 union ballots in 1988 asking members whether they were willing to take part in, or continue with, industrial action which resulted in a majority against doing so.

Marine Fish Farms

Mrs. Ray Michie: To ask the Secretary of State for Employment how many inspections of marine fish farms have been made in each of the last five years by the Health and Safety Executive.

Mr. Nicholls: This information is not available in the form requested.

Factory Inspectors

Mr. Livingstone: To ask the Secretary of State for Employment how many factory inspectors were conducting preventative inspections on the following dates: 6 June 1988, 7 September 1988 and 23 January 1989.

Mr. Nicholls: Factory inspectors in the Health and Safety Executives area office are not employed solely on

preventive inspection but also make visits in response to accidents or other incidents, complaints, inquiries or to follow up previously identified shortcomings.

Staffing figures are recorded on the first of each month. The numbers of factory inspectors in area offices on 1 June 1988, 1 September 1988 and 1 February 1989 were 520, 522 and 533, respectively.

Children (Injuries)

Mr. Archer: To ask the Secretary of State for Employment if, pursuant to his answer of 16 February, *Official Report*, column *373-4*, he will place in the Library anonymised summaries of the circumstances of *(a)* fatal, *(b)* major and *(c)* over three day injuries to children in 1987-88; and if he will make it his policy to make such summaries available in future years.

Mr. Nicholls: No. The cost would be disproportionately high.

Unique Fresh, Swansea

Mr. Alan Williams: To ask the Secretary of State for Employment why there has been a delay in paying the protective award of four weeks' pay agreed by a tribunal in February to workers made redundant by Unique Fresh in Swansea in August 1988; and when his Birmingham office will ensure that payment is made.

Mr. Nicholls: Because the firm is insolvent the amount of the protective award is payable from the redundancy fund subject to the various limits specified in part VII of the Employment Protection (Consolidation) Act 1978. My Department is awaiting the insolvency practitioner's statement of the amount due. When this is available we shall pay the employees as soon as possible.

Benefit (Suspensions)

Dr. Godman: To ask the Secretary of State for Employment how many claims for unemployment benefit have been received since the increase in the maximum number of weeks' suspension of unemployment benefit from 13 weeks to 26 weeks at unemployment benefit offices in *(a)* Greenock and Port Glasgow, *(b)* Strathclyde and *(c)* Scotland as a whole; in how many of these cases the maximum 26 weeks' suspension has been initially applied by the adjudication officers; in how many cases where the maximum 26 weeks' suspension has been applied the length of suspension has been reduced on review of the case; and in how many cases where the 26 weeks' suspension has been initially applied, the suspension has been reduced on appeal.

Mr. Lee *[holding answer 6 April 1989]:* The table shows, for the period April 1988 to February 1989, the number of claims for unemployment benefit that were received for the locations requested.

Information is not available on how many of these claims were disqualified by the adjudication officer, nor on the numbers where the maximum period of disqualification was imposed or reduced on review or appeal.

Locations	*Number of claims taken for period April 1988 to February 1989*
Greenock and Port Glasgow	6,788
Strathclyde	177,619
Scotland	456,063

Departmental Advertising, Publicity and Publications

Mr. Dobson: To ask the Secretary of State for Employment what is his Departmental budget for 1989-90 for spending on general publicity, including *(a)* television advertising, *(b)* radio advertising *(c)* newspaper advertising, and *(d)* other promotional material; and what are the equivalent figures for the Training Agency.

Mr. Nicholls *[holding answer 7 April 1989]:* The information on my departmental budget for 1989-90 for spending on general publicity, to include that for the Training Agency, will be found in table 7.29 on page 25 of the "Public Expenditure" White Paper, column 607, published January 1989.

Detailed decisions on expenditure by media group for 1989-90 as requested have not yet been taken.

WALES

River Quality

Mr. Gareth Wardell: To ask the Secretary of State for Wales to what extent the new regulations for classifying the quality of rivers will specify requirements as to the substances that are to be present or absent from the water, and the concentration of such substances, for the purpose of ensuring the conditions needed for the survival of certain aquatic plant and invertebrate communities.

Mr. Grist: Regulations for classifying the quality of rivers have not yet been prepared. We will be consulting widely on proposals for possible revisions to the classification systems later in the spring. This represents the first stage in developing new systems of classification for rivers and estuaries which can, in due course, be embodied in regulations. I will arrange for the hon. Gentleman to receive a copy of the consultation paper when it is issued.

Accidents in the Home

Mr. Flynn: To ask the Secretary of State for Wales whether he intends to place a duty on Welsh district councils for each authority to appoint a home safety officer to tackle the problem of accidents in Welsh homes.

Mr. Grist: No. Home safety officers who are appointed by local authorities make an important contribution to accident prevention, but it is for an individual local authority to decide whether such an appointment is appropriate for any accident prevention strategy in its own area.

Mr. Flynn: To ask the Secretary of State for Wales whether he plans to place a mandatory duty on Welsh local authorities to devise preventive measures to reduce the level of accidents in Welsh homes.

Mr. Grist: No. Welsh local authorities already have a statutory duty to enforce the safety legislation. They also

engage in other accident prevention initiatives but decisions on what is appropriate or desirable in each area should be taken by the local authority itself in the light of local circumstances.

Mr. Flynn: To ask the Secretary of State for Wales what education or training initiatives he is planning to reduce the level of fatal and other serious accidents in Welsh homes.

Mr. Grist: Since 1987 my right hon. Friend the Secretary of State for Trade and Industry has run a series of safety awareness and education campaigns throughout the United Kingdom. These have included child safety initiatives; electrical safety awareness and, in particular, promoting the use of RCDs (residual current devices) and the publication of a guide to producing better instructions and warnings for consumer products. In Wales these campaigns have benefited greatly from the support of the Welsh local authorities. Some of the campaigns will be extended or repeated and over the next few months a number of further safety initiatives are planned.

South Beach Hotel, Tenby

Mr. Nicholas Bennett: To ask the Secretary of State for Wales when he expects CADW to announce a decision on the appeal under the Town and Country Planning Act 1971 by Mr. P. T. Harris in respect of the South Beach hotel, Tenby.

Mr. Wyn Roberts: Mr. Harris has submitted four appeals in respect of the South Beach hotel. The appeals, made under section 88 and section 97 of the Town and Country Planning Act 1971 are being considered concurrently.

My right hon. Friend is aware of the need to reach speedy decisions on all planning matters which come before him and decisions on these appeals will be issued as soon as possible.

Hospital Referrals

Mr. Nicholas Bennett: To ask the Secretary of State for Wales if he will list the hospital referral rate per 1,000 of population for each family practitioner committee in Wales in the latest available year.

Mr. Grist: The information is not immediately available. I will write to the hon. Gentleman as soon as possible and place a copy of my letter in the Library of the House.

Prescribing Costs

Mr. Nicholas Bennett: To ask the Secretary of State for Wales if he will list the per capita prescribing cost for each family practitioner committee in Wales for the latest available year.

Mr. Grist: The information which relates to prescriptions submitted for payment during 1988, is shown in the following table:

Average total cost per person on NHS prescribing lists

	£
Clwyd	53·31
Dyfed	51·94
Gwent	53·77
Gwynedd	57·15
Mid Glamorgan	58·08
Powys	50·07
South Glamorgan	48·47
West Glamorgan	54·97

Set-aside Schemes

Mr. Nicholas Bennett: To ask the Secretary of State for Wales how many farmers in *(a)* Pembrokeshire and *(b)* Wales have applied for set-aside payments; and what is the total acreage for which claims have been made and the total amount claimed in each category.

Mr. Peter Walker: Fifteen farmers from the Preseli Pembrokeshire and South Pembrokeshire districts have applied to join the scheme, entering a total of 295 hectares. The figures for Wales are 35 farmers involving 1,008 hectares. Since payments are made annually in arreas, no claims are yet due.

Farmers (Income)

Mr. Nicholas Bennett: To ask the Secretary of State for Wales what information he has as to the total income of farmers in Wales, in the latest year for which figures are available, from *(a)* farming and *(b)* other activities; and what were the comparable figures for 1984 and 1979.

Mr. Peter Walker: Based on the Inland Revenue's survey of personal incomes, details of which are to be published shortly in "Farm Incomes in the United Kingdom" the total incomes of self employed individuals in agriculture in Wales assessed for tax were as follows:

£ million

	Income from Agriculture and Horticulture	*Income from other activities*	*Total Income*
1985-86	160·1	94·9	255·0
1984-85	159·3	111·6	270·9

Figures for Wales for the year 1979-80 are not available except at disproportionate cost.

Patients (Gwynedd)

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Wales how many patients in Gwynedd receive treatment for ileostomy, colostomy and urostomy; and if he will give the number in each category on a constituency basis.

Mr. Grist: Information in the form requested is not available.

The available information on operations performed on residents from Gwynedd as in-patients or day cases at Welsh hospitals is shown in the following table. The information relates to 1987:

Op Code/Description	*Number*
453 Enterostomy (ileostomy)	0
454 Anastomosis of intestine (including ileo-colostomy)	2
460 Colectomy and resection (including colostomy and ileostomy)	64
462 Primary colostomy	4
464 Colon by-pass	1

Op Code/Description		*Number*
533	Anastomosis of pancreatic duct (including ileo-pancreatostomy)	0
591	Urinary diversion to bladder	2
592	Urinary diversion to bowel	0
593	Urinary diversion: anastomosis	1
594	Urinary diversion: other	1
595	Repair of urinary tract	2
Total		77

Note: These figures include six Gwynedd residents treated in Clwyd and four Gwynedd residents treated in East Dyfed.

NHS Reform

Mr. Alan Williams: To ask the Secretary of State for Wales whether he will be publishing supplementary working papers on the future organisation of the National Health Service in Wales; what programme of consultation with which organisations will be undertaken; and how the general public will be informed of the details not included in the White Paper itself.

Mr. Grist: In addition to the working papers on the implementation of the proposals contained in the White Paper "Working For Patients" which the Welsh Office has already circulated to interested bodies in the NHS in Wales, further guidance will be issued during the course of the year as appropriate.

We have already had discussions about the White Paper with the Wales TUC and are shortly to meet the chairman of district health authorities, family practitioner committees, and the statutory advisory committees and representatives of NHS staff organisations and health care professions. In addition, officials of the Welsh Office are engaged upon a round of discussions with a range of NHS interests.

We have already announced that there will be public consultation later this year to provide clearer and more focused representation of consumer interests. We shall announce decisions on the details of particular proposals as appropriate.

Report (Bristol University)

Mr. Barry Jones: To ask the Secretary of State for Wales when he proposes to publish the commissioned report of the School for Advanced Urban Studies, university of Bristol, made for his housing department; and if he will make a statement.

Mr. Grist: We are still awaiting the final report from the School for Advanced Urban Studies.

Bed and Breakfast Accommodation

Mr. Wigley: To ask the Secretary of State for Wales if he will publish a table showing for each area of Wales the number of people who are dependent on their local authority providing them with bed and breakfast.

Mr. Grist: The numbers of households accommodated in bed and breakfast accommodation at 31 December 1988 under part III of the Housing Act 1985 in each district authority is given in the following table. The number of persons in those households is not available centrally.

Number of households accommodated in bed and breakfast at 31 December 1988[1]

	Number
Aberconwy	—
Alyn and Deeside	—
Arfon	—

[1] Under Part III of the Housing Act 1985.

Rating Reform

Mr. Win Griffiths: To ask the Secretary of State for Wales, pursuant to his answer to the hon. Member for Bridgend of 27 February, *Official Report*, column *19*, concerning expenditure provision of £9 million in the 1989-90 rate support grant settlement to cover the cost of implementing the poll tax, what proportion of that sum the actual cash grant will represent.

Mr. Grist: Rate support grant is paid to all authorities in Wales in support of their expenditure generally and is not hypothecated. It is not therefore possible to calculate a notional allocation of grant to any particular function.

Schools

Mr. Barry Jones: To ask the Secretary of State for Wales how many schools there were in Wales in 1979; and how many there are in the current year.

Mr. Wyn Roberts: The information requested is shown in the following table:

Number of Schools in Wales

	January 1979	*January 1989*
Nursery	70	56
Primary	1,930	1,744
Secondary	244	232
Special	74	64

	January 1979	January 1989
Independent	[1]71	65
Total	2,389	2,161

[1] Includes three direct grant schools.

Teachers

Mr. Barry Jones: To ask the Secretary of State for Wales how many teachers there are in Wales *(a)* in primary schools and *(b)* in secondary schools in the current year; and what were the corresponding numbers in May 1979.

Mr. Wyn Roberts: The information available relates to January 1979 and September 1988. At those dates the numbers in full-time equivalent terms, of teachers in Wales is shown in the following tables:

	January 1979	September 1988
Primary Schools	13,581	11,724
Secondary Schools	14,413	12,504

These figures must, of course, be considered in the light of falling pupil numbers as follows:

	January 1979	September 1988
Primary pupils	298,196	255,869
Secondary pupils	241,662	192,803

Pupil:teacher ratios have improved over the period as follows:

	January 1979	September 1988
Primary pupils/teacher	22·0	21·8
Secondary pupils/teacher	16·8	15·4

Hospital Closures

Mr. Barry Jones: To ask the Secretary of State for Wales how many hospitals have been closed in Wales since may 1979; how many hospital beds there were in May 1979 in Wales; and what is the number for the present day.

Mr. Grist: Since 1 May 1979 the number of hospitals which have closed, and are still closed, is 22. However during the same period seven hospitals (including four district general hospitals) have opened.

The available information on the number of staffed beds allocated, as at 31 March, is as follows:

	Number
1979	23,693
1988	21,242

Council House Sales

Mr. Barry Jones: To ask the Secretary of State for Wales how many council houses have been sold to sitting tenants in Wales since May 1979; what is the total value of the houses sold since 1979; and if he will make a statement.

Mr. Grist: A total of 66,593 local authority dwellings were sold to sitting tenants between April 1979 and December 1988. The value of these dwellings is not available. The capital value (net of discount) of the total of 66,875 dwellings sold during that period, which includes sales other than those to sitting tenants, was however £564 million.

Council Houses

Mr. Barry Jones: To ask the Secretary of State for Wales how many council houses have been built since May 1979; what is the estimated value; and if he will make a statement.

Mr. Grist: A total of 17,662 local authority dwellings have been built since May 1979. Information on the value of these buildings is not available centrally.

Housing Waiting Lists

Mr. Barry Jones: To ask the Secretary of State for Wales what is his estimate of the number of people currently on the waiting lists of Welsh housing authorities; and if he will make a statement.

Mr. Grist: Information on the number of people on housing waiting lists is not held centrally.

Homelessness

Mr. Barry Jones: To ask the Secretary of State for Wales how many homeless persons there are estimated to be in Wales; and if he will make a statement.

Mr. Grist: The normal measure of statutory homelessness is given by cases accepted by local authorities under part III of the Housing Act 1985. The number of persons in households accepted as homeless during the third quarter of 1988 (July-September) was 4,534.

Bristol Channel (Sewage)

Mr. Speller: To ask the Secretary of State for Wales if he will make a statement on the Welsh Water Authority's intention to build a sewerage outlet one mile out into the Bristol channel from Swansea; if planning permission has been given; and if he will make a statement on the anticipated environmental effect of raw sewage flooding into the Bristol channel.

Mr. Grist: Welsh water authority has proposals for improving the quality of Swansea bay, which currently fails to meet the standards of the EC bathing water directive. Whilst the provision of a long sea outfall is likely to form part of the improvements, planning approval for which would not be required, details have yet to be finalised.

Sewage discharged to sea is treated through the disinfecting action of salt water, sunlight and waves which together break down the bacteria as effectively as inland treatment. That is why the Royal Commission on Environmental Pollution concluded in its 10th report that with well designed sewage outfalls, the discharge of sewage to the sea was not only acceptable but environmentally preferable in many cases to alternative means of disposal.

"Roads in Wales"

Mr. Gwilym Jones: To ask the Secretary of State for Wales when he plans to publish the new editions of "Roads in Wales".

Mr. Wyn Roberts: I am pleased to say that it has been published today. Copies are available in the Vote Office, and have also been placed in the Library of the House.

NORTHERN IRELAND

Royal Ulster Constabulary (Firearms)

Mr. McCusker: To ask the Secretary of State for Northern Ireland if he will state the conditions with regard to the carrying of firearms which have to be observed by Royal Ulster Constabulary officers whilst in the territory of the Irish Republic for the purpose of discussing anti-terrorist co-operation with their counterparts in the police force of the Republic.

Mr. Ian Stewart: Authorisation for the carrying of firearms by officers of the Royal Ulster Constabulary whether on or off duty is confined to Northern Ireland.

Advertising

Mr. Dobson: To ask the Secretary of State for Northern Ireland what is the latest figure for the estimated spending in 1988-89 by the Northern Ireland Office on *(a)* television advertising, *(b)* radio advertising, *(c)* newspaper advertising and *(d)* other promotional material; and what is the 1989-90 budget for each of these categories of spending.

Dr. Mawhinney *[holding answer 13 March 1989]:* The information is not available in the form requested. However, the latest figure for the estimated spending on all advertising and other promotional material for my Department in 1988-89 is £4,782,821. The estimated budget for 1989-90 is £4,777,950.

Press and Public Relations

Mr. Dobson: To ask the Secretary of State for Northern Ireland what are the latest figures for the number of staff presently employed, and the full complement of staff, including vacant posts, in the press and public relations office of the Northern Ireland Office; and what is the proposed complement for 1989-90.

Dr. Mawhinney *[holding answer 13 March 1989]:* At present 50 staff are employed in the Northern Ireland Office and Northern Ireland Departments. The full complement, including vacant posts, is 52. The proposed complement for 1989-90 is 51.

Mr. Dobson: To ask the Secretary of State for Northern Ireland what is the latest figure for *(a)* the estimated expenditure by his Department on press and public relations during 1988-89 and *(b)* the budget for 1989-90.

Dr. Mawhinney *[holding answer 13 March 1989]:* The latest figure for the total estimated expenditure on press and public relations during 1988-89 is £1,174,402.

The total budget for 1989-90 is £1,310,700.

RUC Traffic Division

Mr. William Ross: To ask the Secretary of State for Northern Ireland what has been the strength of the Royal Ulster Constabulary traffic division in each year since 1980 to the latest available date; and whether there are any plans to increase it.

Mr. Ian Stewart *[holding answer 23 March 1989]:* The information requested is not readily available prior to 1985 and could be obtained only at disproprtinate cost. The available information is as follows:

Year	*RUC Traffic Division (Strength)*
31 December 1985	401
31 December 1986	363
31 December 1987	361
31 December 1988	316
20 March 1989	312

The operational strength of the RUC's traffic division is a matter for the chief constable.

Kincora Boys' Home

Mr. Livingstone: To ask the Secretary of State for Northern Ireland how many civil servants investigated in the inquiry into the Kincora boys' home in 1982 by Sir George Terry are still employed by his Department.

Mr. Ian Stewart *[holding answer 4 April 1988]:* I have nothing to add to the answer that I gave to the hon. Member on 26 February 1988 at column *322*.

Information Units

Mr. Livingstone: To ask the Secretary of State for Northern Ireland which parts of the information policy unit, the information liaison unit and the information planning unit are still in operation; and what was the status of each such unit within the structure of his Department at the time it was most recently in existence.

Mr. Ian Stewart *[holding answer 4 April 1989]:* I have nothing to add to the answer given to the hon. Member on 23 May 1988 at columns *36-37*.

SCOTLAND

Catholic Marriage Advisory Council

Mr. Steel: To ask the Secretary of State for Scotland if he will make a statement about the withdrawal of funding for the Scottish Catholic Marriage Advisory Council by the social work services group.

Mr. Michael Forsyth: I am considering a number of representations made by and on behalf of the Scottish Catholic Marriage Advisory Council against the recent decision not to award it a training grant under section 9 of the Social Work (Scotland) Act 1968. The council will be informed of my decision as soon as possible.

Nurses (Grading)

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will list in the *Official Report* the total number of appeals against regrading which have been received in each Scottish health board area; how many have now been assessed; and how many have resulted in a subsequent upgrading of the nurse's grade.

Mr. Michael Forsyth: I refer the hon. Member to the answer I gave to the hon. Member for Greenock and Port Glasgow (Dr. Godman) on 6 April 1989.

Water Rates

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will list the representations he has had regarding the commercial effects of increased water rates; and if he will make a statement.

Lord James Douglas-Hamilton: Representations expressing concern about the effect of increased water rates have been received on behalf of 12 trade and business associations, eight companies and one community council group.

I would refer to the answers I gave the hon. Member on 15 February at columns *218-20*.

Suicides

Mrs. Margaret Ewing: To ask the Secretary of State for Scotland if he will publish what information he has on the number of suicides and attempted suicides which have occurred in Scotland in each year since 1979.

Mr. Michael Forsyth: The information available is as follows:

	Number of Suicides[1]	*Number of in-patient discharges for self-inflicted injury or poisoning*[2]
1979	494	9,916
1980	515	8,609
1981	517	9,474
1982	563	9,269
1983	505	8,707
1984	519	9,337
1985	569	9,118
1986	568	8,963
1987	522	9,306

Data source:
[1] Registrar General for Scotland
[2] Scottish hospital data within admissions category "Emergency—Deliberate self inflicted injury or poisoning."

Transport Users Consultative Committee

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will publish in the *Official Report* the names and addresses of the current members of the Transport Users Consultative Committee for Scotland.

Lord James Douglas-Hamilton: The current membership of the committee was published in its annual report for 1987-88. Mr. John Corrie was appointed chairman to the committee in succession to Colonel W. A. Dalziel in December 1988. Copies of the report are available in the House of Commons Library and may also be obtained from:

The Secretary
Scottish Transport Users Consultative Committee
249 West George Street
Glasgow
G2 4QE

through whom contact with individual members may also be made.

Head Injuries

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) what facilities currently exist in Scotland for intensive specialised rehabilitation of traumatic brain damage caused by head injury; what plans he has to set up such a specialised unit; and if he will make a statement;

(2) what steps have been taken to implement the Mair report recommendation in 1972 that two specialised centres providing specialist rehabilitation treatment for traumatic brain damage through head injury were required in Scotland;

(3) if he will estimate the annual additional need that arises every year in Scotland for places which provide specialist rehabilitation for patients who suffer traumatic brain damage through head injury;

(4) what proportion of the population suffer from permanent long term disability following head injury; and what is the average age at the time of the injury and the average life expectancy thereafter;

(5) what specialist training and advice is given to care professionals treating patients with traumatic brain damage caused by head injury;

(6) what medical studies have been carried out into the special needs of those who suffer traumatic brain damage through injury;

(7) what evidence exists to demonstrate the efficacy of specialist rehabilitation of patients who suffer traumatic brain damage through head injury;

(8) what advice is given to area health boards regarding the provision of specialist rehabilitation of patients with traumatic brain damage caused by head injury, and what checks are made on the quality of long-term care provided to such patients by the area health boards.

Mr. Michael Forsyth: Provision of specialist treatment and rehabilitation facilities for head injured patients in Scotland is a matter for individual health boards. The Scottish Home and Health Department is currently considering as a matter of urgency the needs of brain-injured patients and the most appropriate form of rehabilitation facility which is required. The Mair report did not make a specific recommendation that two specialised centres were required.

It is understood that around 100 patients each year are left with severe disability following traumatic brain injury. The average age of these patients is around 28 and life expectancy is 30 or 40 years. All doctors, nurses and members of paramedical professions receive basic training in rehabilitation techniques. The two main centres for the treatment and rehabilitation of patients with traumatic brain injury are located in Edinburgh and Glasgow respectively and it is there that care professionals can gain training and experience. A wide range of studies has been carried out into the special needs of brain-damaged patients, and a number demonstrate the efficacy of specialist rehabilitation.

Boards providing general rehabilitation services are aware of the more specialised facilities available in Edinburgh and Glasgow for more severe cases of head injury and can seek advice if necessary. Patients are referred from other boards to these specialised facilities. Long-term in-patient care is provided generally within psychiatric or geriatric hospitals. Both are inspected regularly by the Scottish Hospital Advisory Service; in addition the Mental Welfare Commission makes annual visits to all mental hospitals.

New Towns

Mr. Ingram: To ask the Secretary of State for Scotland if he will list those organisations which have asked that

their responses to the consultation document "The Scottish New Towns, Maintaining the Momentum" be treated in confidence.

Mr. Lang: No, since the respondents asked that their responses be treated in confidence; there were two such responses.

Transport

Mr. Wray: To ask the Secretary of State for Scotland what consultations he is now having with the trade unions, entrepreneurs and environmentalists regarding the case for fast trains between Scotland and the continent for the Scottish manufacturing industry, and the environmental requirements which the Scottish people demand from railways and motorways.

Lord James Douglas-Hamilton: None at the present time. British Rail is still working on its proposals for Channel Tunnel passenger and freight services and any associated investment. It is required by section 40 of the Channel Tunnel Act 1987 to publish a plan by the end of the year.

As part of this process, British Rail is consulting with a wide range of interests in Scotland in a series of meetings.

DEFENCE

Cruise Missiles

Mr. Martyn Jones: To ask the Secretary of State for Defence, (1) what consideration he has given to the procurement of smart cruise missiles for British forces;

(2) what consideration he has given to the procurement for the British forces of cruise missiles armed with cluster munitions; and what is the policy of Her Majesty's Government on the stationing of such missiles on British territory or in British territorial waters.

Mr. Sainsbury: A number of future missile options are under consideration.

Unit Production Costs

Mr. Andrew F. Bennett: To ask the Secretary of State for Defence pursuant to his answer to the hon. Member for Denton and Reddish of 22 March, *Official Report*, column *616*, when it became his policy not to publish unit production costs.

Mr. Sainsbury: I refer the hon. Member to the answer I gave to the hon. Member for Rhondda (Mr. Rogers) on 14 January 1988 at column *373*.

Queen Elizabeth Military Hospital

Mr. Cartwright: To ask the Secretary of State for Defence how many National Health Service *(a)* in-patients and *(b)* out-patients have been treated at the Queen Elizabeth military hospital, Woolwich, during each of the past 10 years.

Mr. Neubert: I refer the hon. Gentleman to the reply given by my predecessor on 28 April at columns *242-43*. It has not proved possible to produce reliable information for the years prior to 1983 when the records were maintained manually. The comparable figures for 1988 are: in-patients 6,507; day patients 1,575; out-patients 5,208.

Armed Forces (Postal Voting)

Mr. Nicholas Bennett: To ask the Secretary of State for Defence what representations he has received from members of the armed forces and their dependents serving overseas regarding the introduction of postal voting in United Kingdom elections; and if he will make a statement.

Mr. Neubert: I am not aware of any recent representations on postal voting overseas. The Representation of the People Act provides a separate registration procedure for service personnel enabling them to retain their right to vote when serving overseas and allows the spouses of service personnel to register under this procedure if they so wish. Currently service personnel and their spouses must vote by proxy when overseas. They can use either the proxy or the postal voting procedure if serving away from their constituency but within the United Kingdom.

Royal Ordnance

Mr. Graham: To ask the Secretary of State for Defence (1) what are the financial arrangements between his Department and Royal Ordnance plc for the deployment of Ministry of Defence police at Royal Ordnance Bishopton;

(2) what financial arrangements exist between his Department and Royal Ordnance plc for providing the services of Ministry of Defence police at Royal Ordnance factories.

Mr. Sainsbury: Under the terms of an agreement made in April 1985 on the deployment of MOD police at Royal Ordnance sites, including Bishopton, RO plc pays the equivalent of a commercial charge for the services of the MOD police.

Mr. Graham: To ask the Secretary of State for Defence whether, in the light of recent developments and the announcement by Royal Ordnance plc that it is considering a partial reprieve of the site, it is intended to retain a complement of Ministry of Defence police at Royal Ordnance Bishopton; and if he will make a statement.

Mr. Sainsbury: No decision has yet been taken on whether MOD police should remain at Royal Ordnance, Bishopton.

HOUSE OF COMMONS

Prime Minister's Speeches

Mr. Allen: To ask the Lord President of the Council if he will list the *(a)* statements and *(b)* other speeches in debate made by Prime Ministers in each of the last 15 years.

Mr. Wakeham: I refer the hon. Gentleman to the relevant published indexes of the *Official Report* and to information held on POLIS in the House of Commons Library.

Sir Leon Brittan

Mr. Spearing: To ask the Lord President of the Council if, pursuant to his reply to the hon. Member for Falkirk,

East (Mr. Ewing) on 6 April, concerning statements made by Sir Leon Brittan, he will give the name of any documents, together with appropriate references, that show that approval was given by two named officials to the disclosure of a letter from the Solicitor-General; and if he will place copies of any such documents in the Library.

Mr. Wakeham: I refer the Gentleman to the fourth report of the Select Committee on Defence for the 1985-86 Session.

Food Consultants

Ms. Walley: To ask the hon. Member for Berwick-upon-Tweed, as representing the House of Commons Commission, what is the policy of the Commission on the level of nutritional expertise which it will require in respect of the appointment of consultants on the provision of food in the House.

Mr. Beith: Policy matters concerning the Refreshment Department are the responsibility of the General Manager of the Department on the advice of the Catering Sub-Committee of the Select Committee on House of Commons (Services). The Commission considers proposals for expenditure from the Refreshment Department trading fund account in accordance with the general principles of financial prudence.

HEALTH

Benzodiazepines

Mr. McLoughlin: To ask the Secretary of State for Health how many prescriptions for benzodiazepines were prescribed in *(a)* January to June 1987, *(b)* July to December 1987, *(c)* January to June 1988 and *(d)* July to December 1988.

Mr. Mellor: The number of prescriptions for benzodiazepines dispensed by community pharmacists in Great Britain during the periods in question were as follows:

	Number of prescriptions (millions)
January to June 1987	12·7
July to December 1987	12·8
January to June 1988	11·9
July to December 1988	[1]

[1] Not yet available.

Coronary Heart Disease

Mr. McLoughlin: To ask the Secretary of State for Health if he will set out the mortality rate from coronary heart disease for men aged under 65 years from 1979 to the present time, analysed by socio-economic group.

Mr. Freeman: I regret that the information requested is not readily available and could be provided only at disproportionate cost.

AIDS

Mr. Dalyell: To ask the Secretary of State for Health what assessment Sir Donald Acheson has made of the plant alkaloid Castanospermine, as a possible treatment for certain forms of AIDS, in the light of clinical tests at St. Mary's hospital in London; and if he will make a statement.

Mr. Mellor: I understand that there have been some in vitro tests involving derivatives of Castanospermine, but none involving patients. If the hon. Member would like more information he may wish to approach the Medical Research Council.

Office of Population Censuses and Surveys

Mrs. Margaret Ewing: To ask the Secretary of State for Health if he will publish the information he has regarding problems in the Office of Population Censuses and Surveys; and if he will make a statement.

Mr. Freeman: The Office of Population Censuses and Surveys is responsible for recruiting staff below the executive officer (and equivalent) grades. No major recruitment problems are currently being encountered at its Titchfield and Southport locations but, in common with other Departments, there are difficulties in recruiting and retaining administrative officers, personal secretaries and administrative assistants at its London headquarters.

Mrs. Margaret Ewing: To ask the Secretary of State for Health whether interviewers employed by the Office of the Population Censuses and Surveys are termed employees of the Crown; and to what pension rights they are entitled to under existing legislation.

Mr. Freeman: Interviewers employed by the Office of Population Censuses and Surveys are employees of the Crown. Under existing social security legislation, interviewers have a choice between contributing to SERPS (provided that their earnings are sufficient) or to a personal pension.

Mrs. Margaret Ewing: To ask the Secretary of State for Health how many men and women are employed as interviewers by the Office of the Population Censuses and Surveys on *(a)* a full-time and *(b)* a part-time basis.

Mr. Freeman: Interviewing work carried out by the Office of Population Censuses and Surveys fluctuates with the demand for surveys and with the requirements of individual surveys. As a result the number of interviewers employed by the Office of Population Censuses and Surveys is variable. At present, 476 hourly-paid interviewers are employed, of whom 52 are male and 424 are female.

Interviewers are not guaranteed any fixed amount of work and are paid on an hourly fee basis for work undertaken. The nature of the work means that all interviewers are employed on a part-time basis.

Mrs. Margaret Ewing: To ask the Secretary of State for Health if he will list *(a)* the number of unfilled vacancies at the Office of Population Censuses and Surveys as a percentage of total employees and by job category and *(b)* the average length of time taken to fill a vacancy by job category at the office.

Mr. Freeman: *(a)* The information is in the table. The numbers of unfilled vacancies are the difference between staff in post and the staff profile, as at 1 March 1989, the latest date for which information is available. Casual staff are excluded.

Job category	Vacancies	Percentage of employees	Percentage of profile
Grade 7 and above	(+4·0)	(+4·7)	(+4·9)
Senior executive officer—executive officer and equivalents	33·0	5·6	5·3
Administrative officers and assistants	39·5	3·4	3·3
Other staff	34·5	15·4	13·4
Total	103·0	5·0	4·8

(b) Due to the different recruitment methods and wide variation between categories, this information is not collected and could not be obtained without incurring disproportionate cost.

Mrs. Margaret Ewing: To ask the Secretary of State for Health if he will list *(a)* the Civil Service pay rates applicable to interviewers employed by the Office of Population Censuses and Surveys and *(b)* the starting times for shift work when applicable.

Mr. Freeman: Interviewers employed by the Office of Population Censuses and Surveys are paid one of seven rates ranging at present from £3·69 to £5·38 per hour plus expenses. In addition, higher rates are paid for unsocial hours and to interviewers based in the London area.

Interviewers' pay is linked to the pay spine agreed between HM Treasury and the Institution of Professional Civil Servants. This link is solely a means of determining pay movement.

A minority of interviewers work on projects with fixed starting and finishing times. With the exception of a small group of interviewers whose starting time is normally 4.15 pm on weekdays and 9.30 am on Saturdays, starting times vary by location and to take account of the requirements of particular surveys.

Social Work

Mr. Hinchliffe: To ask the Secretary of State for Health what action he is taking to ensure that the Government's rejection of the proposed three year qualification for social work does not jeopardise the achievement of parity of recognition of British social work qualifications alongside other European qualifications.

Mr. Mellor: The European Community directive on a general system for the recognition of higher education diplomas was adopted on 21 December 1988 and will be implemented in European Community member states on 4 January 1991. It will make it easier for members of a number of professional groups to practice in other member states.

The Government and the European Commission support the principle of mutual recognition of qualifications irrespective of length of training and will be working towards this in the context of completing the single market by 1992.

The Government, meanwhile, fully recognise the importance of achieving high standards of training for social workers and other staff employed in the personal social services. We are promoting, with full knowledge of the Directive and in co-operation with the Central Council for Education and Training in Social Work and other organisations, a number of improvements to present arrangements.

Health Care Providers

Mr. McCrindle: To ask the Secretary of State for Health what consideration has been given to the effect on the need for patients with long-term care needs to develop a relationship of trust with health care providers of proposals for health authorities to buy in the necessary services from different sources; and if he will make a statement.

Mr. Freeman: The Government fully recognise the importance of trust between patients and those caring for them. Under our proposals district health authorities will have a responsibility to ensure that the health care services available to their resident populations are comprehensive and of a high standard. Continuity of treatment will remain an important consideration. Contracts will specify periods of notice to ensure that any changes in the provision of services are introduced without disruption or inconvenience to patients.

Family Practitioner Committees

Mr. Nicholas Bennett: To ask the Secretary of State for Health if he will list the hospital referral rate per 1,000 of population for each family practitioner committee in England in the latest available year.

Mr. Kenneth Clarke: This information is not currently available.

Electoral Registration Figures

Mr. Harry Barnes: To ask the Secretary of State for Health, pursuant to his answer to the hon. Member for Derbyshire, North-East of 4 April, why he does not propose to supply a pre-publication list of the electoral registration figures for the local government areas of England and Wales due to be published in an OPUS monitor (EL 89/1) at the end of April.

Mr. Freeman: The list of 1989 electorate figures for local authority areas is still being assembled by OPCS. It will be published as soon as possible after all information has been received from electoral registration officers and queries have been resolved.

Down's Syndrome

Mr. Nicholas Winterton: To ask the Secretary of State for Health if he will give a breakdown by age of the mother of the numbers and rates of incidence of births of Down's syndrome babies in *(a)* the latest year for which figures are available and *(b)* 10 years previously.

Mr. Freeman: The information is shown in the table.

Figures are derived from a voluntary system of notification which collects information on cases reported at birth or up to seven days thereafter. It is, therefore, likely to be an incomplete measure of the total number of babies affected.

Number of babies born with Down's syndrome and rate per 10,000 births, by age of mother, England and Wales 1977 and 1987

Age of mother	Number	Rate
1977		
All ages	425	7·4
Under 20	28	5·1

Age of mother	*Number*	*Rate*
20-24	80	4·5
25-29	116	5·5
30-34	81	8·0
35-39	67	25·9
40-44	39	69·1
45+	7	149·6
Not stated	7	n/a
1987		
All ages	459	6·7
Under 20	33	5·7
20-24	71	3·7
25-29	118	4·9
30-34	107	7·8
35-39	89	19·0
40-44	35	42·7
45+	3	55·7
Not stated	3	n/a

n/a = Not available.

Mr. Nicholas Winterton: To ask the Secretary of State for Health what is the current incidence of Down's syndrome; and what it was *(a)* 10 years and *(b)* 20 years ago.

Mr. Alton: To ask the Secretary of State what has been the incidence of Down's syndrome in newborn infants in *(a)* the latest year for which figures are available, *(b)* 10 years previously and *(c)* 20 years previously.

Mr. Freeman *[pursuant to his reply, 21 March, column 573]:* The answer omitted nine Down's syndrome cases for 1987 for which information was not reported as to their being live or still births. The correct table should therefore read:

Number of babies born with Down's syndrome and rate per 10,000 total and live births in England and Wales for 1967, 1977 and 1987

	All births		*Live births*	
Year	*Number*	*Rate*	*Number*	*Rate*
1967	613	7·3	594	7·1
1977	425	7·4	413	7·3
1987	459	6·7	443	6·5

Drug Budgets

Mr. Fearn: To ask the Secretary of State for Health if he will estimate the savings to the National Health Service drugs bill from the introduction of indicative drug budgets.

Mr. Mellor: It is premature to try to determine the exact level of the savings.

Medical Secretaries

Mr. Fearn: To ask the Secretary of State for Health if he has any plans to introduce a national grading system for medical secretaries.

Mr. Mellor: No. The pay and grading of administrative and clerical staff (including medical secretaries) are matters for negotiation in the Administrative and Clerical Staffs Whitley Council. The management side of the council has made proposals for a new grading structure for all staff in the group. Negotiations on these proposals and on the staff side's pay claim will continue when the joint negotiating committee of the council meets next on 12 April.

"Children in Danger Factfile"

Mr. Hinchliffe: To ask the Secretary of State for Health what action he is taking to deal with the problems identified in the National Children's Home publication, "Children in Danger Factfile 1989", a copy of which he has been sent.

Mr. Mellor: As the hon. Member may be aware, the factfile was launched on 21 March and is a detailed and wide-ranging document requiring careful consideration.

Pharmaceutical Wholesalers

Mr. Michael Morris: To ask the Secretary of State for Health what arrangements are made to inspect the premises of pharmaceutical wholesaling establishments in the United Kingdom who import from countries which are not a party to the pharmaceutical inspection convention.

Mr. Mellor: No special arrangements are made. All licensed wholesale dealers in imported medicinal products are regularly inspected by medicines inspectors.

Residential Homes (Mismanagement)

Mr. Hinchliffe: To ask the Secretary of State for Health if he will bring forward proposals to prevent persons found guilty of mismanaging residential homes to go on caring for profit for up to three residents at a time.

Mr. Mellor: I refer the hon. Member to my reply to my hon. Friend the Member for Wyre Forest (Mr. Coombs) on 23 February at column *793*.

SOCIAL SECURITY

Residential Care

Mr. Andrew Bowden: To ask the Secretary of State for Social Security what is his policy towards implementation of the recommendations made in the report by the National Council for Voluntary Organisations, "Who Pays? Who Cares?" on the future funding of residential care; and if he will make a statement.

Mr. Peter Lloyd: The report is being taken into account in the Government's consideration of the future arrangements for community care.

Mr. Andrew Bowden: To ask the Secretary of State for Social Security what representations he has received following the publication by the National Council for Voluntary Organisations of "Who Pays? Who Cares?" on the future funding of residential care.

Mr. Peter Lloyd: We have received letters form Servite Houses Ltd., the Brendoncare Foundation, and the National Council for Voluntary Organisations itself, drawing attention to the report. Some individuals have also written in similar terms.

Social Fund

Mr. Frank Field: To ask the Secretary of State for Social Security what proportion of first instance social fund decisions are taken *(a)* after a home visit or *(b)* after the social fund officer has interviewed the claimant.

Mr. Peter Lloyd: The proportion of first instance social fund decisions cleared by visit is 1 per cent. The proportion cleared after interview is 25 per cent. Details of the number of applications processed are available in the Library.

Family Credit

Mr. Robin Cook: To ask the Secretary of State for Social Security what is the average award of family credit; and what was the average award of family income supplement.

Mr. Peter Lloyd: The latest information on family credit is derived from an examination of amounts in payment at the end of February 1989. This indicated that the average amount in payment at that time was around £25 per week. The latest information on family income supplement relates to June 1987 when the average was £15·28 per week.

Cold Weather Payments

Mr. Allen: To ask the Secretary of State for Social Security how many payments have been made under the cold weather payments scheme for each of the weeks in 1989 *(a)* in Nottingham and *(b)* the United Kingdom as a whole.

Mr. Peter Lloyd: None.

Bed and Breakfast

Mr. Redmond: To ask the Secretary of State for Social Security what is the number of people for whom bed and breakfast payments are being made in Doncaster and Mexborough; and whether they are *(a)* single, *(b)* single with children, *(c)* a couple or *(d)* a couple with children, for each year since 1979.

Mr. Peter Lloyd: I regret that the information requested is not available and could be obtained only at disproportionate cost.

Injuries and Industrial Diseases

Mr. Wigley: To ask the Secretary of State for Social Security if he will publish a table showing, for the most recent available date, the number of persons securing compensation for industrial diseases and injuries, analysed by percentage disability groupings.

Mr. Scott: At 2 April 1988, the provisional numbers of recipients of industrial injuries disablement pension, reduced earnings allowance or both were as shown in the table:

Assessed Disablement Per cent.	*Number (thousands)*
All percentages	262
Less than 20	103
20 to 24	64
25 to 34	46
35 to 44	22
45 to 54	11
55 to 64	7
65 to 74	3
75 to 84	2
85 to 94	1
95 to 100	4

Attendance Allowance (Halifax)

Mrs. Mahon: To ask the Secretary of State for Social Security how many people in Halifax who have claimed attendance allowance are currently within the six-month waiting period.

Mr. Scott: I regret that the information is not available.

Household Incomes

Mr. Cousins: To ask the Secretary of State for Social Security if he will publish a table showing an estimate of the annual rise in living standards since 1980 for *(a)* non-pensioner couples with children, *(b)* non-pensioner couples without children, *(c)* non-pensioner single people, *(d)* non-pensioner single people with children, *(e)* single pensioners and *(f)* pensioner couples.

Mr. Peter Lloyd *[holding answer 15 March 1989]:* The available information is set out in the table.

Improvements in living standards percentage (individuals in households) 1979 to 1985 Great Britain

	1979 to 1981	*1981 to 1983*	*1983 to 1985*	*1979 to 1985*
Non-pensioner couples with children	−0·2	2·6	6·1	8·6
Non-pensioner couples without children	1·7	−1·5	5·7	5·9
Non-pensioner single people	4·8	−8·7	10·2	5·5
Non-pensioner single people with children	5·9	2·8	0·7	9·7
Single pensioners	7·3	6·2	1·1	15·2
Pensioner couples	5·8	5·7	2·9	15·1
All individuals	2·2	0·2	6·2	8·8

Notes:
1. Based on the methods and assumptions of "Households Below Average Income: 1981-85" copies of which are in the Library.
2. Improvements in living standards are measured by percentage changes in the real average household income of individuals (before housing costs). For further details see Cm. 523 "The Measurement of Living Standards For Households Below Average Income", November 1988.

TRADE AND INDUSTRY

Professional Liability

Mr. Heddle: To ask the Chancellor of the Duchy of Lancaster when he expects to announce the conclusion of his Department's study to establish the nature, scope, extent and implications of professional liability problems.

Mr. Maude: I expect the report of the studies of professional liability problems to be submitted to me in the near future.

GATT

80. **Mr. Tom Clarke:** To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the recent negotiations on the general agreement on tariffs and trade.

Mr. Alan Clark: The trade negotiations committee of the GATT met in Geneva last week to deal with the four issues—agriculture, intellectual property, textiles and safeguards—left unresolved at its meeting in Montreal last December. The committee agreed frameworks of principles to guide further negotiation of these issues, and confirmed the agreements provisionally made in Montreal on the other 11 issues under negotiation in the Uruguay round.

On agriculture, the committee agreed that the long-term objective of the negotiation should be to work towards substantial and progressive reductions in agricultural support and protection sustained over an agreed period of time. It agreed to realise this objective through strengthened GATT rules and disciplines applicable to all contracting parties and extending to all measures affecting import access and export competition. It also agreed that developed countries would not exceed their current levels of domestic and export support and protection before the end of the round.

On the protection of intellectual property rights it agreed that the negotiations should cover effective enforcement, and dispute settlement, adequate standards, and the applicability of basic GATT principles. It confirmed that the negotiations on textiles and clothing should aim for a further general liberalisation of trade including progressive integration of this sector into the GATT on the basis of strengthened rules and disciplines. On the question of better safeguard arrangements to deal with sudden surges of imports the committee instructed negotiators to draw up a draft text for a comprehensive agreement.

These four agreements, and the confirmation of those made in Montreal on such important issues as services, tariffs and dispute settlement, provide a firm basis for the negotiation of substantial strengthening and extension of liberal and multilateral rules for trade by the conclusion of the round around the end of 1990. The Government will continue to work with our European Community partners to ensure an effective outcome to the negotiations which reflects United Kingdom priorities.

EC Committees (Chairmanship)

Mr. Robertson: To ask the Chancellor of the Duchy of Lancaster how many technical committees of the European Committee for Standardisation and of the European Committee for Electrotechnical Standardisation are chaired by the United Kingdom, France and West Germany, respectively.

Mr. Forth: I am informed by BSI that the present position is as follows:

	United Kingdom	*France*	*Germany*
CEN secretariats and chairmanships	30	25	51
CENELEC secretariats	8	9	17
CENELEC chairmanships	9	13	5

Hearing Aid Council Act

Mrs. Rosie Barnes: To ask the Chancellor of the Duchy of Lancaster what representations he has received concerning the reform of the Hearing Aid Council Act 1968.

Mr. Forth: My Department received a large number of representations from bodies about the Hearing Aid Council (Amendment) Bill sponsored by the hon. Member for Ynys Môn (Mr. Jones). These bodies represent dispensers of hearing aids, consumers and those with specialised medical and audiological knowledge.

Price Indication (Code of Practice)

Ms. Quin: To ask the Chancellor of the Duchy of Lancaster, further to his answer of 20 March, to the hon. Member for Gateshead, East, *Official Report*, column *429*, what is his estimate of the amount of time that will have to elapse before there is sufficient experience of the operation of the code of practice on price indication to enable an informed assessment on it to be made; and if he will make available in the Library the representations on the code which have been received since it came into operation on 1 March.

Mr. Forth: It would not be practicable to estimate when there will be sufficient experience of the operation of the code of practice for traders on price indications to enable an informed assessment of it to be made. However, as I said in my reply to the hon. Member on 20 March at column *249*, I have suggested that a committee should be set up to monitor the operation of the legislation and the working of the code. It is important, however, that sufficient time should elapse to allow the effectiveness of part III of the Consumer Protection Act 1987 and the associated code of practice to be assessed before consideration is given to making any further changes.

I have no plans to make available in the Library the representations which have been received on the code since it came into operation on 1 March.

Arms Exports

Mr. Neil Hamilton: To ask the Chancellor of the Duchy of Lancaster what information he has on the volume of arms export business with Libya conducted by Lonrho or its subsidiary company, Tradewinds plc.

Mr. Alan Clark *[holding answer 7 April 1989]:* It has been the practice of successive Governments not to comment on individual licensing matters. Licences are required for the export to all destinations, including Libya, of arms which are subject to control under the Export of Goods (Control) Order 1987 (SI 1987 No. 2070), as amended.

Television Advertising

Mr. Dobson: To ask the Chancellor of the Duchy of Lancaster if he will list the television advertising campaigns mounted by the Department of Trade and Industry in 1985-86, 1986-87, 1987-88, 1988-89 and those to be mounted in 1989-90 giving the cost or estimated cost in each case.

Mr. Forth *[holding answer 7 April 1989]:* The details are as follows:

1985-86 — None.
1986-87 — None.
1987-88 — Enterprise Initiative: £4·3 million.
Single European Market: £0·3 million.
1988-89[1] — Enterprise Initiative: £6·1 million.
Single European Market: £7·1 million.

[1] Provisional.

Allocations for 1989-90 have not been finalised.

Publicity Campaigns

Mr. Dobson: To ask the Chancellor of the Duchy of Lancaster if he will place in the Library details of each major publicity campaign mounted by the Department of Trade and Industry in 1985-86 and each succeeding year, including in each case the objects of the campaign, the intended audience and the outcome of the monitoring of the achievement of the intended objectives, together with a note of the intended objectives in the campaign to be mounted in 1989-90.

Mr. Forth *[holding answer 7 April 1989]:* I shall arrange for the information requested to be placed in the Library as soon as possible.

ENVIRONMENT

Waste

81. **Sir Trevor Skeet:** To ask the Secretary of State for the Environment if he will give the total volume per week of *(a)* domestic, *(b)* coal and *(c)* nuclear waste; and if he will make a statement.

Mrs. Virginia Bottomley: The amount of waste produced varies from week to week and year to year. The volume of waste produced may not be the same as that which is disposed of; some volumes may be reduced by compaction or incineration; others may be increased by solidification of liquids or stabilisation of reactive solids.

Approximate figures for the volume of domestic, coal and nuclear waste are as follows:

(a) Domestic (England and Wales)—120 million cu m per annum of loose waste or about 2,300,000 cu m per week (based on arisings of 18 million tonnes per annum and assuming a weight of 150 kgm per cu m).

(b) Coal (British Coal deep mined: England, Scotland and Wales)—25 million cu m per annum of non toxic material which is not a controlled waste under the Control of Pollution Act 1974.

(c) Nuclear (United Kingdom)—46,050 cu m per annum of waste conditioned for safe storage or disposal (of which 30 cu m is high-level waste, 1,920 cu m intermediate level waste, and 44,100 cu m low-level waste), or about 886 cu m per week.

Hazardous Waste

Dr. Cunningham: To ask the Secretary of State for the Environment if, pursuant to his answer to the hon. Member for Copeland, 22 March, *Official Report*, column *651*, he will make a statement about the recent United Nations environment programme conference in Basle on the international trade and regulation of hazardous and toxic wastes.

Mr. Ridley: I refer the hon. Member to the reply that I gave him on 5 April.

Ms. Walley: To ask the Secretary of State for the Environment if he will establish a national register of contaminated land sites.

Mrs. Virginia Bottomley: A Department of the Environment working party is currently examining the feasibility of compiling registers of contaminated land and their report is expected shortly. It would be unwise to pre-empt the recommendations of this working party.

Kirkgate Market (Compulsory Purchase Order)

Dr. Cunningham: To ask the Secretary of State for the Environment when he proposes to announce a decision in respect of *(a)* the City of Leeds (Kirkgate Market Area) Compulsory Purchase Order 1987 and *(b)* the City of Leeds (Kirkgate Market Area) Compulsory Purchase (No. 2) Order 1987, following the public inquiry held in April 1988.

Mr. Ridley: Decisions will be announced shortly.

Water Industries (EC and US)

Mr. Nicholas Bennett: To ask the Secretary of State for the Environment what information he has as to the structure of the water industry in other European Community states and in the United States of America and the level of investment and consumer charges in each of these countries.

Mr. Howard: I would refer the hon. Member to table 13C of the 1988 edition of the water authorities publication, "Waterfacts", a copy of which has been placed in the House of Commons Library. Further information, on a consistent basis is not available.

Water Companies (Foreign Control)

Sir John Stanley: To ask the Secretary of State for the Environment what is his policy towards the acquisition of United Kingdom statutory water companies by foreign-domiciled companies; and if he will list which foreign companies have acquired majority or controlling interests in which United Kingdom statutory water companies since 1 January 1988.

Mr. Howard: The following foreign companies have acquired controlling interests in United Kingdom statutory water companies since 1 January 1988:

Foreign company	*Statutory water company*
Lyonnaise des Eaux	East Anglian
	Essex
	Newcastle and Gateshead
	Sunderland and South Shields
Generale des Eaux (through its subsidiary, General Utilities)	Folkestone and District
	Lee Valley
	North Surrey
	Tendring Hundred
SAUR	Eastbourne
	Mid Southern
	Mid-Sussex
	West Kent

We do not discriminate against foreign investment in the water industry. An important objective of privatisation is to enable English and Welsh water undertakers to compete with foreign companies in the world-wide market for water services. It would be contrary to our EC obligations to discriminate against investment by nationals of other member states.

Mr. Gow: To ask the Secretary of State for the Environment what are the percentage increases in water charges inforced by the statutory water companies since 1 January; which of these companies are French-owned; and which are owned by SAUR SA.

Mr. Howard: I refer my hon. Friend to the reply that I gave on 14 March to my hon. Friend the Member for Bedfordshire, South-West (Mr. Madel) and to the reply that I gave today to my right hon. Friend the Member for Tonbridge and Malling (Sir J. Stanley).

Clay Pigeon Shooting

Mr. Colin Shepherd: To ask the Secretary of State for the Environment what decision he has reached about the use of land for clay pigeon shooting without specific planning permission.

Mr. Howard: My right hon. Friends the Secretaries of State for the Environment and for Wales have considered carefully the responses to a consultation paper that we issued in December. They have concluded that the General Development Order 1988 should be amended to revert to 28 days permitted use of land for clay pigeon shooting. They propose to lay an amending order before the House today. In reaching their decision they have taken particular account of two arguments. First, the change from 28 to 14 days permitted use could result in less control and safety if shoots were to take place for 14 days on one piece of land and 14 days on another. Secondly, the Department has now concluded negotiations with the Clay Pigeon Shooting Association on a draft code of practice for clay pigeon shooting. This would apply to all clay pigeon shoots and would cover such matters as separation distances between shoots and noise sensitive premises, times of operation and sound reduction techniques. The draft code is now being issued for consultation. Subject to comments from consultees, when finalised it will be approved by my right hon. Friends under section 71 of the Control of Pollution Act 1974.

Enterprise Zone (Sunderland)

Mr. Patnick: To ask the Secretary of State for the Environment if he is now in a position to make an announcement about the designation of an enterprise zone for Sunderland.

Mr. Trippier: Statutory invitations under the terms of schedule 32 of the Local Government, Planning and Land Act 1980, were issued today to Tyne and Wear Development Corporation and Sunderland borough council to prepare schemes with a view to designation as an enterprise zone of some 150 acres of land at Southwick Shipyard, Hylton Riverside, Castletown and Doxford Park. It is intended that the enterprise zone will last for 10 years from its designation. Copies of the invitations and maps showing the land specified are being placed in the Library of the House. The statutory procedures of consultation and then the hearing of representations will begin shortly.

Public Bodies (Appointments)

Mr. Tony Banks: To ask the Secretary of State for the Environment what consideration he gives to the possible conflict of interests when making appointments to public bodies responsible to his Department.

Mr. Ridley *[holding answer 7 April 1989]:* The question of possible conflicts of interest is always considered when appointments are being made. The Department generally follows the guidance for dealing with conflicts of interest on the part of board members set out in the HMSO publication "Non Departmental Public Bodies—A Guide for Departments".

Planning Decisions

Dr. Cunningham: To ask the Secretary of State for the Environment when he expects to announce a decision in respect of *(a)* the Hythe (Kent) marina and *(b)* the implementation of the revocation procedure in respect of the irregular granting of ancient monument consent for the destruction of the eastern end of the Royal military canal.

Mr. Ridley *[holding answer 6 April 1989]:* I hope to write to the parties about these matters soon.

River Teign (Pollution)

Mr. Malcolm Bruce: To ask the Secretary of State for the Environment (1) what representations he has received about the level of sewage pumped into the River Teign; and what response he has made;

(2) what information he has on the level of untreated and partly treated sewage pumped into the River Teign;

(3) what steps he is taking to ensure that the River Teign is protected from pollution by sewage.

Mr. Moynihan *[holding answer 6 April 1989]:* Information is not held by the Department in a form which would allow the identification of discharges in any particular area. Details of all consents granted a water authority are, however, held on the register maintained by the water authority which may be inspected free of charge at all reasonable hours.

The only representations that my right hon. Friend has received concerning sewage disposal to the River Teign were submitted in response to the statutory advertising of a discharge consent application made by the South West water authority under the Control of Pollution Act 1974 for the repositioning of the sewage outfall at Shaldon occasioned by the blockage of the existing one by shifting sand. Consent was granted to this discharge on 29 November 1988.

The only discharges of untreated sewage to inland waters are from storm and emergency overflows. By definition, the operation of these is intermittent and thus conditions imposed reflect this and prescribe when a discharge may take place.

Many existing discharges to estuarial waters are of crude sewage or screened or macerated sewage and are of long standing. These discharges have deemed consent. It is the Department's intention that each should be reviewed by 1992 and where necessary, alternative arrangements considered.

Her Majesty's inspectorate of pollution issued guidelines on the environmental conditions new long sea outfalls should be designed to achieve. Copies of these guidelines have been placed in the Library of the House.

Boundary Commission

Dr. Cunningham: To ask the Secretary of State for the Environment if he will list any requests made to him for county council boundary reviews that involve the abolition of any county councils, other than Humberside; and if he will state his criteria for instructing the Local Government Boundary Commission to consider the abolition of any county councils as part of their reviews.

Mr. Ridley *[holding answer 4 April 1989]:* Since the Local Government Boundary Commission for England has a statutory duty to consider the abolition of counties when carrying out its periodic review of county boundaries, I do not keep records of any requests that I receive for this to be done and I do not have criteria for instructing it to consider that question.

It was in view of the scale and strength of the representations that I received on the report of the Boundary Commission in which it concluded that, on the guidelines that it had been given, it could not recommend major change in the case of Humberside, that I decided to direct it to carry out a further review of that county without the limitation that it should propose the abolition of a principal area only where present arrangements clearly fail to provide effective and convenient local government.

Rating Reform

Dr. Cunningham: To ask the Secretary of State for the Environment if he will give details of *(a)* the responses he has had to his request to charging authorities for a progress report on implementing the community charge, *(b)* when he proposes to publish the responses to his Department's request for a progress report from local authorities on implementing the community charge, *(c)* whether the Department of Environment has any plans to undertake further surveys of local authorities in connection with implementation of the community charge, and *(d)* whether any future surveys of local authorities will ask them for information concerning the costs incurred by them in implementing the community charge.

Mr. Gummer *[holding answer 4 April 1989]:* I have today placed in the Library a summary of progress on the implementation of the community charge. It is based on the responses from chief finance officers to the letter sent to them on 21 December 1988.

The survey reveals an encouraging picture overall. All of the 90 per cent. of authorities which have responded to the letter so far have made plans for the implementation of the community charge, and the majority of these appear to be making good progress with their arrangements.

I intend to issue a detailed questionnaire to all charging authorities later this month. The main purpose will be to obtain details of the implementation programme for each authority. I do not intend that this questionnaire should seek information about the cost of implementation.

Homelessness

Mr. Hoyle: To ask the Secretary of State for the Environment how many people are currently registered homeless in *(a)* Warrington, *(b)* Macclesfield, *(c)* Congleton, *(d)* Crewe and Nantwich, *(e)* Vale Royal and *(f)* Staffordshire, Moorlands; and how many people were registered homeless in March 1979 in the same districts.

Mr. Trippier *[holding answer 4 April 1989]:* The numbers of households accepted as homeless by each English local authority under the Housing (Homeless Persons) Act 1977 in the first six months of 1979 appear in table A of "Homeless households reported by local authorities in England: Statistics for first half of 1979."

Latest estimates appear in table 7 of the regular quarterly publication "Local authorities' action under the homelessness provisions of the 1985 Housing Act: England. Results for the fourth quarter of 1988. Supplementary Tables."

All these publications are available in the Library.

Mr. Frank Field: To ask the Secretary of State for the Environment if he will list for each year since its establishment the planned housing developments *(a)* the Wirral side and *(b)* the Liverpool side of the Merseyside development corporation area; and what progress has been made on the completion of these plans.

Mr. Trippier *[holding answer 4 April 1989]:* Since the MDC was established in 1981, the corporation has intended that land would be made available for housing in its designated area. No figures were put on the annual number of dwellings planned and the following information records those completed or under construction in the period up to 1988-89. From 1989 to 1994 land zoned for housing development will provide for approximately 1330 dwellings in the MDC area (1,237 in Liverpool and 97 in Wirral). These will be provided by the private sector and housing associations, mainly on land reclaimed and serviced by the MDC.

Dwellings Completed or Under Construction

	Liverpool	*Wirral*
1981-84	8	Nil
1984-85	100	Nil
1985-86	19	Nil
1986-87	32	[1]20
1987-88	11	Nil
1988-89	305	Nil

[1] A 20-bed single persons hostel was opened in December 1986.

Docklands

Mr. Leighton: To ask the Secretary of State for the Environment pursuant to his answer to the hon. Member for Newham North East of 16 March, *Official Report*, column 315, if he will list the several employment and training co-ordinating groups which have been set up in docklands; and if he will list their membership.

Mr. Trippier: The co-ordinating groups which have been set up are listed below, together with the organisations which attend. In addition there are regular contacts at working level.

Joint LDDC/Bishop of Stepney Docklands Wide Group:

—Bishop of Stepney, the Roman Catholic Bishop of East London, East London Church Leaders Group, LDDC, ILEA, LB Tower Hamlets, LB Southwark, LB Newham, Department of Employment (Training Agency, Employment Service and Docklands Liaison Group), Department of the Environment, LENTA, Docklands Forum, Skillnet.

Tower Hamlets Education Employment and Training Co-ordination Group:

—LB Tower Hamlets, LDDC, Department of Employment, Department of the Environment, Department of Education and Science, ILEA, New Start, Olympia and York, CITB.

Southwark Employment and Training Co-ordination Group:

—LB Southwark, LDDC, Department of Employment, Department of the Environment, North Peckham Task Force.

LDDC has offered to set up similar new arrangements in

Newham.

For the time being LDDC and the borough are continuing to liaise closely through existing arrangements.

Industrial Pollution Control

Mr. Page: To ask the Secretary of State for the Environment, what responses he has received to his consultation document on a new system of industrial pollution control for industry; and if he will make a statement.

Mrs. Virginia Bottomley *[pursuant to her reply 28 February, Official Report, c. 110]:* Our proposals for controlling inputs of the most dangerous substances to water—the "Red List"—were published last July. We have received responses from 80 organisations and individuals. A list of these has been placed in the Libraries of both Houses. There was very widespread support for our proposals and it is now our intention to implement them. This will provide the regulatory framework for cleaning up our rivers, and for meeting our international obligations including those on cleaning up the North sea. It puts us in the forefront of developments in Europe in this area.

Comments were sought and received on a number of points of detail, and these have been taken into account in reaching conclusions.

We announced on 28 February (*Official Report*, column *110*) our intention to proceed with the proposal that discharges from prescribed processes should be controlled by Her Majesty's inspectorate of pollution (HMIP) under the proposed new arrangements for integrated pollution control. Such discharges would be subject to a requirement, to be introduced progressively for existing plant, that the process should be operated according to the best available technology not entailing excessive costs with a view to minimising discharges of the most dangerous substances. However, discharge consents would also have to ensure that strict environmental quality standards were met and maintained in the receiving waters, and the proposed National Rivers Authority would have to be satisfied that this was the case before consent could be granted by HMIP.

An important part of our proposals, welcomed by many respondents, was the establishment of a priority "Red List" of dangerous substances. As a result of consultation and of some new and corrected data received, we have slightly amended the provisional "Red List" set out in the consultation paper. The initial priority "Red List" will comprise the following substances:

Substance	*CAS number*
Mercury and its compounds	
Cadmium and its compounds	
Gamma-hexachlorocyclohexane	00058-89-9
DDT	00050-29-3
Pentachlorophenol	00087-86-5
Hexachlorobenzene	00118-74-1
Hexachlorobutadiene	00087-68-3
Aldrin	003090-00-2
Dieldrin	00060-57-1
Endrin	00072-20-8
Polychlorinated Biphenyls	01336-36-3
Dichlorvos	00062-73-7
1,2-Dichloroethane	00107-06-2
Trichlorobenzene	12002-48-1
Altrazine	01912-24-9
Simazine	00122-34-9
Tributyltin compounds	
Triphenyltin compounds	
Trifluralin	001582-09-8
Fenitrothion	00122-14-5
Azinphos-methyl	00086-50-0
Malathion	00121-75-5
Endosulfan	00115-29-7

Further substances may be added to the list from time to time where there are sound scientific reasons for doing so. These will be identified broadly along the lines set down in the annex to the consultation paper. The selection scheme is being further developed and modified in the light of the comments received. Candidates substances identified by the scheme will be subject to a second-stage assessment, taking particular account of the risk posed for the aquatic environment, and to consultation before addition to the list.

Many respondents confirmed the view expressed in the consultation paper that diffuse sources constitute an important input for many dangerous substances and that these merit greater attention. In the light of comments received we remain of the view that existing powers and arrangements for controlling the supply, use and disposal of substances should be sufficient to deal with any potential pollution problem from diffuse sources, but this position will remain under review. In the meantime, we have initiated more widespread environmental monitoring for priority substances and will consider the need for specific action where this proves necessary case by case.

The consultation document also referred to earlier proposals issued by my Department for controlling discharges to sewer of the most dangerous substances after privatisation of the water authorities. There we have concluded that the Secretary of State, advised by HMIP, should authorise the discharge of these substances to sewer. However, dischargers need only make a single application to the sewage undertaker, who will refer any aspects involving dangerous substances to the Secretary of State. These arrangements are reflected in the Water Bill currently before Parliament, and regulations would be made under proposed powers in that Bill to prescribe the substances or processes to which they would apply.

The full application of technology-based emission standards to discharges from prescribed processes under a system of integrated pollution control will require new legislation, which will be introduced at the earliest opportunity. However, provisions included in the Water Bill currently before Parliament would enable such controls to be introduced before then on an interim basis. We will make further announcements about this in due course.

In the meantime the Department, together with the Welsh Office, has today issued a circular (DOE circular 7/89, Welsh Office circular 16/89) revising and extending existing guidance on the implementation of EC Directives concerning the discharge of dangerous substances into the aquatic environment. The circular includes environmental quality standards for a number of new list I and list II dangerous substances.

TRANSPORT

Double Decker Buses

Ms. Ruddock: To ask the Secretary of State for Transport how many new double decker buses London Regional Transport has bought in each of the last five years.

Mr. Portillo: That is a matter for London Regional Transport's operating subsidiary, London Buses Ltd.

London Regional Transport

Ms. Ruddock: To ask the Secretary of State for Transport if he will list the salaries and expenses of the board members of London Regional Transport.

Mr. Portillo: Current annual salaries of the board members of London Regional Transport are as follows:

	Salary	*Time Commitment*
	£	
Chairman		
Mr. Wilfrid Newton	80,000	Full time
Full-time Members		
Mr. John Telford-Beasley	60,000	Full time
Mr. Michael Marsh	60,000	Full time
Part-time Members		
Sir Neil Shields	18,900	2 days per week
Mr. Oscar Roith	9,450	1 day per week
Mr. Keith Brown	5,775	half day per week
Dr. Stephen Glaister	5,775	half day per week
Mrs. Helen Robinson	5,775	half day per week
Miss Patricia Steel	5,775	half day per week
Mr. Roy Thomas	5,775	half day per week

Members' expenses are a matter for London Regional Transport.

Dial-a-Ride

Ms. Ruddock: To ask the Secretary of State for Transport how much each local transport authority spent on its dial-a-ride services in 1987 and 1988; and what was the average number of journeys for each authority.

Mr. Portillo: I regret that the information requested is not readily available.

Unleaded Petrol

Mr. Malcolm Bruce: To ask the Secretary of State for Transport whether he will consider making conversion of an engine to run on unleaded petrol compulsory as part of the MOT test.

Mr. Peter Bottomley: Where cars are convertible we are encouraging owners to have this done right away. There are now significant tax advantages. From October 1990 all new petrol engined vehicles must be capable of running on unleaded petrol.

Legislation leaves the choice with owners so compulsion would be impracticable. Some cars—especially older ones—cannot be converted to unleaded running.

Road Tax Offences

Mr. Cox: To ask the Secretary of State for Transport how many motorists have been charged with driving without a road fund tax following the recent campaigns by his Department.

Mr. Peter Bottomley: The 20 vehicle excise duty enforcement campaigns run by the Department in conjunction with police forces in England and Scotland during 1988 resulted in 12,000 motorists being reported for not having a valid tax disc.

Some 8,000 of these have already been prosecuted and many more cases will be dealt with by the courts in the coming months.

Accident Statistics

Mr. David Porter: To ask the Secretary of State for Transport how many road traffic accidents in *(a)* Suffolk, *(b)* Norfolk and *(c)* England were attributed to (i) roads requiring remedial works, (ii) alcohol, (iii) criminal driving and (iv) others in the latest year for which figures are available.

Mr. Peter Bottomley: The STATS 19 return made to the Department of Transport does not record the causes of road accidents; it is therefore not possible to provide information on the number of accidents attributable to a particular factor.

Information is available on the number of accidents in which a driver or rider failed a breath test, and this is shown in the table, along with the total number of accidents for 1987, the latest year for which these figures are available.

Total accidents and those in which a driver or rider failed the breath test
Norfolk, Suffolk, England—1987

	Failed breath test	*Total*
Norfolk	155	3,403
Suffolk	136	2,715
Rest of England	9,041	203,788
England	9,332	209,906

Mr. David Porter: To ask the Secretary of State for Transport what were the total fatalities in motor vehicle accidents in *(a)* Suffolk, *(b)* Norfolk and *(c)* England every year from 1979 to the most recent year for which figures are available.

Mr. Peter Bottomley: The figures are as follows:

Fatalities in motor vehicle and road accidents in Norfolk, Suffolk and England from 1979 to 1987
Number of fatalities

	Norfolk	*Suffolk*	*Rest of England*	*England*
1979	97	76	4,630	4,803
1980	72	72	4,465	4,609
1981	81	63	4,360	4,504
1982	79	60	4,416	4,555
1983	74	58	4,099	4,231
1984	99	71	4,208	4,378
1985	75	67	3,856	3,998
1986	85	53	4,006	4,144
1987	88	58	3,835	3,981

Noise Standards

Mr. Dunn: To ask the Secretary of State for Transport (1) what is the policy of his Department with regard to acceptable noise standards in areas adjacent to major new rail and road projects; and if he will make a statement;

(2) whether he will accept the noise standard of 65 dba for compensation purposes for the Docklands Railway Extension Bill; and if he will make a statement.

Mr. Portillo: Noise insulation standards for new road schemes are laid down in the Noise Insulation Regulations 1975, made under part II of the Land Compensation Act 1973. Because major new rail schemes have been comparatively rare, no regulations have ever been made laying down noise insulation standards for such schemes. However, I am now setting in hand the work necessary to establish a national noise insulation standard for new railway construction. The objective will be to establish the standard at a level which equitably relates to the standard set by regulation for new highways.

In connection with their proposal for a new rail link to the Channel tunnel, British Rail is offering to provide noise insulation on a similar basis to the scheme which operates in respect of new roads if noise resulting from the new link exceeds 70 dB(A) on the 24 hour Leq noise index. BR consider, on the basis of advice from independent experts, that this level is equivalent to the level at which insulation is provided for properties affected by new road schemes. LRT have also taken independent expert advice and share this view.

Before promulgating any national standards for railway noise, the Government would wish to take its own independent view, and consult other interested parties on the appropriate standard to be adopted. We are therefore not yet in a position to take a view on the appropriateness of any particular noise standard, including that now proposed for the Docklands railway extension.

Seat Belts

Mr. McCrindle: To ask the Secretary of State for Transport if he has received any representations concerning exemption of children from the Motor Vehicles (Wearing of Rear Seat Belts by Children) Act 1988, where the available seat belts are being used by adult passengers; and if he will make a statement.

Mr. Peter Bottomley: Responses so far favour exempting children where the available seat belts are being used by adults.

This issue is discussed in our consultation document, "Rear Seat Belt Wearing by Children". Comments are invited by 2 May.

Where belts exist they should be used, either by children or adults. Seat belt wearing saves lives.

No responsible parent should wait for the law before properly restraining their children in the car.

Taxis

Mr. Nicholas Bennett: To ask the Secretary of State for Transport whether he will consider, as part of his review of the operation of taxi services, the abolition of the power of local authorities to restrict the number of taxis which might be operated in their area.

Mr. Portillo: Yes.

Railways (Privatisation)

Mr. Nicholas Bennett: To ask the Secretary of State for Transport what information he has as to the number of private national railways operated in different parts of the world and moves being made by national Governments to privatise existing state-owned railway networks; and if he will make a statement.

Mr. Portillo: I am aware of privately owned railways in the United States of America and Canada, and of the privatisation process in Japan. These and other relevant international comparisons will be taken into account in our consideration of the case for privatising British Rail.

Pollution (Alaska)

Mr. Barry Field: To ask the Secretary of State for Transport what assistance the marine pollution control unit is offering the authorities in Alaska; if he will list the United Kingdom equipment available to assist in cleaning up this disaster; if the Frogmat has been brought to the Alaskan authorities' attention; and if he will make a statement on the use of dispersants.

Mr. Portillo: The marine pollution control unit's resources exist to deal with oil spills around United Kingdom coasts. Some of these can be offered to assist neighbouring European states under an agreement for co-operation in dealing with pollution of the North sea by oil (the Bonn agreement). Assistance is not normally offered to an authority as far away as Alaska since to do so would reduce unacceptably our ability to respond to any incident at home. Any request for assistance from the Alaskan authorities would nevertheless by sympathetically considered. The United Kingdom developer of Frogmat has advised the marine pollution control unit that he has brought his product to the attention of the Alaskan authorities. The use of dispersants for dealing with oil spills is a well proved method, but their effectiveness depends on the type of oil, how quickly they can be applied, and the weather conditions.

Channel Tunnel (Irish Link)

Mr. Beggs: To ask the Secretary of State for Transport what decision has been made by the Irish and British Governments, on a Belfast-Dublin-Dun Laoghaire-Holyhead link to the Channel tunnel; and if he will make a statement.

Mr. Portillo: The planning of rail services in the United Kingdom is the responsiility of British Rail and Northern Ireland railways. Under section 40 of the Channel Tunnel Act 1987, British Rail is required to publish a plan by the end of 1989 setting out its proposals for Channel tunnel rail services serving various parts of the United Kingdom. It has not yet completed the regional consultations which it is undertaking in preparation for this plan.

Thermal Neutron Analysis Machines

Sir John Farr: To ask the Secretary of State for Transport if he will consider the encouragement of research and experimentation into thermal neutron analysis machines to detect Semtex.

Mr. Peter Bottomley: As explained to the hon. Member for St. Helens, South (Mr. Bermingham) on 8 March at

column *538*, research and development work on this technique is being funded by a commercial organisation in the private sector under a contract with the United Kingdom Atomic Energy Authority's Harwell laboratory.

Sir John Farr: To ask the Secretary of State for Transport if he has assessed the efficiency of the recently produced thermal neutron analysis machines; whether he intends to introduce them at British airports; and if he will make a statement.

Mr. Peter Bottomley: I refer to my reply to the question by the hon. Member for St. Helens, South (Mr. Bermingham) on 27 February at columns *55-6*.

Settle-Carlisle Railway

Mr. Redmond: To ask the Secretary of State for Transport what discussions he has had with British Rail about the surcharging of charter trains using the Settle-Carlisle railway line; and if he will make a statement.

Mr. Portillo: Decisions on the level of fares and charges are entirely a matter for BR's commercial judgment.

New Drivers

Mr. Atkinson: To ask the Secretary of State for Transport if the Transport and Road Research Laboratory's current study into the performance and behaviour of new drivers will also include research into the experience of other countries including Australia.

Mr. Peter Bottomley: The current study is confined to United Kingdom drivers.

A specific study of new driver experience in other countries is not included in TRRL's research programme. We do keep in touch with relevant overseas research.

A423 (Compulsory Purchases)

Dr. Glyn: To ask the Secretary of State for Transport when the necessary compulsory purchases will be completed in relation to the A423 west of Maidenhead-Oxford trunk road (Maidenhead Thicket-Burchetts Green section) and work on the road able to commence.

Mr. Peter Bottomley: Most of the land required for this scheme is covered by made compulsory purchase orders. An order for the remaining small area will be made shortly. Advance works for cable diversions at Maidenhead Thicket are in progress. The road works are programmed to start in the summer of next year.

Public Service Obligation

Mr. Bowis: To ask the Secretary of State for Transport what the PSO grant cash ceiling will be for 1989-90.

Mr. Portillo: The cash ceiling on PSO grant for 1989-90 will be £496 million.

Written Answers to Questions

Tuesday 11 April 1989

HOME DEPARTMENT

Electoral Boundaries (Liverpool)

Mr. Alton: To ask the Secretary of State for the Home Department what is the timetable for the redrawing of ward and constituency boundaries in Liverpool.

Mr. Douglas Hogg: There are no immediate plans to review either the ward or constituency boundaries of Liverpool. The Local Government Boundary Commission for England will review the city's external boundaries in its mandatory review of metropolitan district boundaries, due for completion in 1992. The Parliamentary Boundary Commission for England will review the boundaries of constituencies in Liverpool in its general review of constituencies in England, provisionally due to start in 1991.

Members (Prison Visits)

Mr. Cox: To ask the Secretary of State for the Home Department what are the procedures that an hon. Member needs to follow when seeking to visit a constituent detained in one of Her Majesty's prisons.

Mr. Douglas Hogg: He or she should contact the governor of the prison, who will normally issue a special visiting order admitting the hon. or right hon. Member to the prison.

Correspondence

Mr. Leighton: To ask the Secretary of State for the Home Department when he expects to reply to the letter from the hon. Member for Newham, North-East dated 6 March on Paul Higgins.

Mr. Douglas Hogg: A reply was sent on 6 April to the hon. Member concerning Mr. Higgins' appeal. A further letter will be sent to the hon. Member as soon as inquiries about Mr. Higgins' treatment in custody have been completed.

Safer Cities Programme

Mr. Leighton: To ask the Secretary of State for the Home Department what are the criteria by which London boroughs are selected for the safer cities programme.

Mr. John Patten: The criteria used to select safer cities initiatives are that an area must (i) be an urban programme area; (ii) have a high crime rate; (iii) be targeted for Government action and (iv) be willing to participate in the safer cities programme. These criteria apply to all areas selected for inclusion in the programme including the London boroughs.

Telephone Tapping

Mr. Vaz: To ask the Secretary of State for the Home Department if he will seek to have included in future reports made under section 8 of the Interception of Communications Act 1985, details of the number of interceptions made on telephones belonging to *(a)* hon. and right hon. Members, *(b)* leaders of trades unions and *(c)* elected representatives of public bodies.

Mr. Hurd: The annex to the report for 1988 of the commissioner appointed under section 8 of the Interception of Communications Act 1985 gave the information concerning the number of warrants issued which the commissioner judged could be published without harming national security. I see no reason to take a different view or to depart from the established policy of successive Governments of not commenting on allegations relating to the interception of communications. The commissioner said in his report he was satisfied from his examination of cases that the issuing of the warrant in each case was justified on one or more of the grounds set out in section 2(2) of the 1985 Act. With regard to allegations of the interception of the telephones of Members of Parliament, the position remains as set out by the then Prime Minister the Lord Wilson of Rievaulx on 17 November 1966 at columns 634-41 and reaffirmed since by successive Governments

Basildon (Crime Statistics)

Mr. Amess: To ask the Secretary of State for Home Department what are the latest crime figures for Basildon and for the same period in each of the last four years.

Mr. John Patten: The information requested is published annually in the report of the chief constable of the Essex police and is given in the following table.

Notifiable offences recorded by the police in Basildon

Year	*Number of offences*
1984	11,410
1985	10,534
1986	13,581
1987	13,717
1988	12,546

Arson

Mr. Wheeler: To ask the Secretary of State for the Home Department if he will make it his policy to support the proposed formation of the arson bureau, which was recommended in the Home Office standing conference on crime prevention report "The Prevention of Arson"; what steps have been taken to date; and when the bureau is likely to be running.

Mr. John Patten: I believe that such a bureau might make a useful reduction in the problems of arson. It will first be necessary to develop the working party's proposals to see whether a precise basis for an arson bureau can be established which is acceptable to the Government, the insurers and to the business community. Discussions for that purpose are in hand.

Prisons

Mr. Andrew Smith: To ask the Secretary of State for the Home Department for what reasons prisoners Ella O'Dwyer and Martina Anderson, in H-wing of Durham prison, were locked up under rule 43 on 4 March; and for how long.

Mr. Douglas Hogg: Ms. Ella O'Dwyer and Ms. Martina Anderson were removed from normal association with other inmates in the wing for a period of two weeks in the interests of good order and discipline. The authority under prison rule 43 was given by a member of the board of visitors.

Mr. Andrew Smith: To ask the Secretary of State for the Home Department what complaint mechanisms there are for prisoners who consider their living conditions to be intolerable.

Mr. Douglas Hogg: Prisoners may raise complaints informally with members of the prison staff, but there is a provision under the prison rules for them to see on request the governor, a visiting officer of the Secretary of State, or a member of the board of visitors on any matter. They may also petition the Secretary of State, Parliament or the Queen, write to their Member of Parliament (who may refer a complaint to the Parliamentary Commissioner for Administration), the European Commissioner for Human Rights, or seek redress through the courts.

Deportation

Mr. Tim Smith: To ask the Secretary of State for the Home Department how many persons were removed under deportation powers in 1987 and 1988; and whether he will make a statement.

Mr. Renton: A total of 1,388 persons were removed under the deportation powers in 1988, a 50 per cent. increase on the 923 removed in 1987. While the number of deportation orders enforced in the two years was much the same (776 in 1987 and 745 in 1988), the numbers of supervised departures increased very substantially from 147 in 1987 to 643 in 1988. This increase occurred among those removed under section 3(5)(a) of the Immigration Act 1971 for overstaying or working in breach of their conditions. It reflects the combined impact of more effective administrative arrangements introduced on 1 August 1988 and the provisions in the Immigration Act 1988 which restricted the appeal rights of those who had been here for less than seven years to matters of fact and which also provided authority to meet the cost of all supervised departures.

The increases in the figures reflect the Government's determination to make every effort to deal quickly and effectively with those who offend against the immigration laws. As was announced when the Government's expenditure plans were published, we intend to increase the resources devoted to enforcement of the immigration laws over the next three years.

More detailed figures on those removed under the enforcement powers, covering illegal entrants as well as those removed under the deportation process, were published in "Control of Immigration: Statistics—Fourth Quarter and Year 1988" (Home Office Statistical Bulletin 10/89), a copy of which is in the Library.

FOREIGN AND COMMONWEALTH AFFAIRS

Kircindeep Singh

Mr. Bidwell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he is yet in a position to write to the hon. Member for Ealing, Southall concerning the immigration case of Kircindeep Singh in India, mentioned by the Minister of State, Home Office as having been referred to him in a letter dated 6 March.

Mr. Eggar: A reply was sent to the hon. Gentleman on 6 April 1989.

Kampuchea

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will be willing to offer British personnel for an international control mission to monitor a Kampuchean settlement.

Mr. Eggar: It is too soon to say what sort of international presence may be required in the event of a Cambodian settlement, and, hence, the nature of a possible British contribution.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he has expressed concern to Prince Sihanouk over the prince's proposal to bring Khmer Rouge troops back into Kampuchea in the context of a settlement;

(2) with which members of the Khmer Rouge leadership Her Majesty's Government are prepared to deal; and if he will make a statement.

Mr. Eggar: We have no dealings with the Khmer Rouge leadership. Prince Sihanouk has proposed the inclusion of the Khmer Rouge, but excluding Pol Pot, in an interim Government. If some Khmer Rouge involvement proved acceptable to the Cambodian factions, we would not oppose it, though it is clear that neither Pol Pot himself nor his cronies have any place in a peaceful settlement.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to offer full support for Prince Sihanouk should the prince seek to negotiate with Premier Hun Sen on the basis of backing from the West.

Mr. Eggar: We have made it clear on many occasions that we fully support Prince Sihanouk's efforts to bring about a peaceful and durable settlement in Cambodia.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will raise the subject of Kampuchea with Mr. Gorbachev and Mr. Deng Xiao Ping in advance of their Sino-Soviet summit in May emphasising Her Majesty's Government's concern over the threat to a peaceful settlement posed by the Khmer Rouge.

Mr. Eggar: Cambodia was one of many issues touched on during Mr. Gorbachev's visit to Britain on 5-7 April. We keep in close touch with the Soviet and Chinese Governments on this subject.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will propose an amendment to the United Nations' resolution on Kampuchea naming the leadership of the Khmer Rouge as being unfit ever to govern Kampuchea again.

Mr. Eggar: The terms of any future United Nations resolution on Cambodia will depend on developments. I hope that, by the next session of the General Assembly, Vietnam will have withdrawn completely from its illegal occupation, as called for in successive General Assembly resolutions.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs when the European Council of Ministers last discussed the future of Kampuchea; what issues were raised; and if he will make a statement.

Mr. Eggar: Cambodia is regularly discussed in the context of political co-operation amongst the Twelve. The Twelve support efforts to restore an independent, democratic, neutral and non-aligned Cambodia, and call for early and unconditional Vietnamese withdrawal.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs what support the United Kingdom has given to the Kampuchea peace talks; and if he will make a statement.

Mr. Eggar: We have supported the efforts of Prince Sihanouk and the ASEAN, as well as the two Jakarta informal meetings and talks between the factions in France and elsewhere. We have raised the issue among the five permanent members of the Security Council. With our EC partners we have issued several statements.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his reply to the hon. Member for Birmingham, Northfield (Mr. King), *Official Report*, 8 March, column *877*, that he has placed the matter of Kampuchea on the agenda of the United Nations Security Council, if he will now take the issue forward as a matter of urgency.

Mr. Eggar: As my right hon. and learned Friend stated in his reply, the five permanent members of the United Nations Security Council will carry forward discussion of Cambodia when they feel it is appropriate.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Thai Government about the future of Khmer Rouge soldiers based in camps on the Thai/Kampuchea border and how the Thais propose to disarm and neutralise the threat of the Khmer Rouge army to peace and development in both Kampuchea and Thailand.

Mr. Eggar: We regularly discuss the Cambodian problem with Thailand (and other members of the Association of South East Asian Nations). We believe that the only framework for removing any threat from Khmer Rouge forces is a peaceful political settlement.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will initiate proposals at the United Nations for the Kampuchean refugees in camps in Thailand to be given refugee status and the protection and rights afforded to refugees.

Mr. Eggar: These Cambodians are in Thailand as a result of Vietnam's occupation of their country. We hope that they will soon be able to return in safety. The question of refugee status for any individual in Thailand is a matter for the Thai authorities.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will initiate proposals to extend United Nation's protection in the Kampuchean refugee camps in Thailand to ensure that those wishing to leave camps controlled by the Khmer Rouge may do so safely.

Mr. Eggar: We have taken a leading role with the Thai Government and the relevant United Nations agencies in securing proper access by United Nations personnel to Khmer Rouge-controlled camps. The Thai Government do not allow displaced persons in any of the Cambodian camps to leave them freely.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will hold talks with representatives of the People's Republic of Kampuchea;

(2) if, following the recent establishment by the Government of Thailand and the Government of Kampuchea of a joint committee to oversee economic co-operation, he will send a delegation to Kampuchea to discuss future aid, trade and commercial links between the United Kingdom and Kampuchea.

Mr. Eggar: We have no plans at present to alter our policy towards the so-called People's Republic of Kampuchea.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if, following Prince Sihanouk's recent statement that the coalition Government of democratic Kampuchea is dominated by the Khmer Rouge, he will seek to have CGDK removed from the United Nations where they occupy a seat.

Mr. Eggar: I refer the hon. Lady to the reply given by my hon. Friend the Minister of State to the hon. Member for Kirkcaldy (Dr. Moonie) on 5 December 1988 at column *40*.

Human Rights

Mr. Alton: To ask the Secretary of State for Foreign and Commonwealth Affairs how much has been spent by the Government since 1979 in fighting cases before the European Court of Human Rights up to, and including the hearing of 28 March; how much has been paid for the instruction of lawyers; what are the estimated costs in employees' time, travelling and accommodation costs of officials involved in these cases; how much has been paid out in costs or expenses and compensation by the Government following rulings by the court; and if he will list the sums involved in each case which has reached a ruling stage.

Mrs. Chalker: The information requested is given in the accompanying table.

It is not the practice to publish fees paid to individual counsel in specific cases. The total Government legal costs incurred to date in relation to the 24 cases before the court between 1979 and 28 March 1989 is approximately £215,000.

It is not possible to estimate the costs in respect of officials' time, travel and accommodation for each of these cases.

Case	*Compensation paid to the applicant/s* £	*Costs and expenses paid to the applicant/s (Including proceedings prior to those before the Court)* £
Sunday Times	—	22,626·78

[2] These sums were reimbursed by the Government of Guernsey.
[3] Judgment awaited.

NATIONAL FINANCE

714 Certificates

Mr. Steel: To ask the Chancellor of the Exchequer how many section 714 certificates have been issued to the self-employed in each of the last five years; and how many of these have been issued to persons already engaged in full-time employment paying income tax through the PAYE system.

Mr. Lawson: There are several types of 714 exemption certificate. 714I and 714S certificates are issued only to self-employed individuals. 714P certificates are issued to partnerships and companies but it is not possible to say how many are issued to each category.

The numbers of certificates issued, including renewals, in each of the last five years are:

Year	*714I & S*	*714P*
1984-85	149,410	29,877
1985-86	164,856	31,986
1986-87	167,316	32,627
1987-88	180,562	32,074
[1]1988-89	187,994	34,509

[1] to 29 March 1989.

There is no record of issues to persons already engaged in full-time employment taxed through the PAYE system.

Whisky (Excise Duty)

Mrs. Margaret Ewing: To ask the Chancellor of the Exchequer if he will publish *(a)* the annual amount of revenue accruing to the Exchequer in real terms from the levying of excise duty on Scotch whisky and *(b)* the proportion of excise duty which has arisen from whisky production in Speyside, in the latest year for which figures are available.

Mr. Lilley: During 1987-88 an estimated £0·7 billion accrued to the Exchequer from clearances to the home market of whisky produced in the United Kingdom. This figure includes a small amount attributable to production outside Scotland. An estimate is not available of the proportion of the tax borne by production in Speyside.

Third World Debt

Mr. Andrew Smith: To ask the Chancellor of the Exchequer whether Her Majesty's Government support the initiative by United States Treasury Secretary Nicholas Brady to provide debt relief to major Third world debtors.

Mr. Lilley: The United Kingdom welcomes the recognition that the next phase of the debt strategy can give greater emphasis to debt reduction. It believes that this should not require a transfer of risk from the private to the public sector.

Mr. Andrew Smith: To ask the Chancellor of the Exchequer what action Her Majesty's Government intend to take, in support of the Brady initiative, to persuade British banks to reduce the debt and the debt service of major Third world debtors.

Mr. Lilley: The interim committee of the IMF encouraged the Governments of creditor countries to review the extent to which tax, regulatory and accounting systems might unnecessarily constrain the participation of commercial banks in debt reduction. It does not appear that such obstacles arise in the United Kingdom, but the United Kingdom has agreed to review its policies in these areas. G7 Ministers agreed that concrete negotiations on debt and debt service reduction are a matter for the debtor countries and the commercial banks.

Mr. Andrew Smith: To ask the Chancellor of the Exchequer if Her Majesty's Government will support a United States initiative to increase the resources of the International Monetary Fund and the World Bank so that greater debt relief can be provided for major Third world debtors.

Mr. Lilley: Secretary Brady has not proposed that the resources of the International Monetary Fund or the World Bank should be increased. A general capital increase at the World Bank of $74·8 billion was agreed in February 1988. The United Kingdom share was $3·7 billion. The interim committee has asked the executive board of the IMF to complete its work on the ninth review of quotas with a view to a decision by the board of governors before the end of this year.

Mr. Andrew Smith: To ask the Chancellor of the Exchequer, following the International Monetary Fund riots in Venezuela, whether it remains the Government's policy only to assist major Third world debtors who comply strictly with International Monetary Fund adjustment policies.

Mr. Lilley: The United Kingdom fully supports the internationally agreed strategy for middle-income debtors which involves the adoption by debtors of appropriate strong adjustment policies supported by the IMF and World Bank in conjunction with the provision of finance by creditors. Economic reform is vital to this process, which aims to restore growth and creditworthiness. The United Kingdom is playing an important role through its financial support to the international financial institutions, through Paris Club reschedulings and the provision of new export credits, and by maintaining and encouraging an open trading system and a favourable world economic environment.

Mr. Andrew Smith: To ask the Chancellor of the Exchequer when Her Majesty's Government anticipate that positive flows of resources to the major Third world debtors will be resumed.

Mr. Lilley: Future resource flows to the major Third world debtors will depend in large part on the efforts of the countries themselves to repatriate flight capital and attract inward direct investment. The OECD estimates that in 1987 net resource flows to developing countries as a whole less net investment income paid by these countries were positive by $30 billion.

Mr. Andrew Smith: To ask the Chancellor of the Exchequer what information he has on what percentage of the pre-tax profits of British banks was accounted for by debt servicing and repayments by major Third world borrowers in each of the last five years.

Mr. Lilley: Data are not collected centrally in the form requested.

Balance of Payments

Mr. Nicholas Bennett: To ask the Chancellor of the Exchequer if he will give the balance of payments deficit as a percentage of gross domestic product in *(a)* 1974 and *(b)* 1988.

Mr. Major: The current account deficit on the balance of payments was equivalent to 3·8 per cent. of GDP in 1974. In 1988 the deficit was equivalent to 3·2 per cent. of GDP.

EDUCATION AND SCIENCE

Capital Investment

Mr. Leighton: To ask the Secretary of State for Education and Science what has been the level of capital investment in each year since 1979 in constant prices in *(a)* schools, *(b)* polytechnics, *(c)* universities.

Mr. Jackson: The information available is as follows:

£000 (1979 Prices)

Capital expenditure on Maintained Schools, Voluntary Aided and Special Agreement Schools, Polytechnics and Universities.

	Schools			
	Maintained	*Voluntary Aided*	*Polytechnics*	*Universities*
1979-80	258,155	n/a	19,480	153,800
1980-81	292,157	n/a	28,553	144,600
1981-82	200,860	n/a	24,128	138,800
1982-83	184,650	n/a	24,675	134,300
1983-84	186,021	13,144	20,754	123,900
1984-85	188,215	16,272	20,633	122,200
1985-86	189,164	19,381	23,501	128,300
1986-87	192,245	16,338	23,003	136,700
1987-88	[1]	18,184	[1]	128,800
1988-89	[1]	22,955	[1]	130,600

[1] Not yet available.

The figures above relate to capital expenditure on schools and polytechnics in England whereas the universities figures are for Great Britain and apply to grants made on the advice of the University Grants Committee. Universities also have access to capital funding from other Government Departments, research councils and their own private funds, but such expenditure cannot be separately identified.

The figures for voluntary aided and special agreement schools show the total value for grant aided capital expenditure, including the governors' contribution of 15 per cent. Figures for the years prior to 1983-84 are not readily available.

St. Anne's Primary School, Worksop

Mr. Ashton: To ask the Secretary of State for Education and Science why his department did not approve additional expenditure on St. Anne's primary school, Worksop, as requested by the governors and the Southwell diocesan education committee and Nottingham county council, in their submission to him on 14 September 1988.

Mr. Butcher: It was not possible to provide an allocation for this school from the limited resources available because, under the Department's well-publicised criteria, it had a lower priority than the approved statutory proposals for other schools in south Worksop.

Mr. Ashton: To ask the Secretary of State for Education and Science what steps he intends to take to reduce the split-site operation of St. Anne's primary school, Worksop.

Mr. Butcher: It is for the diocese and governors, in consultation with the Nottinghamshire LEA, to decide on priorities for improving educational facilities at this school. Should a scheme to unite the school on one site be submitted with the authority's plans for 1990-91 we shall give it most careful consideration in accordance with the criteria that we apply to all similar proposals.

Aided Schools

Mr. Ashton: To ask the Secretary of State for Education and Science why his Department refuses to give priority to capital allocation for projects carried out by governors of aided schools unless they are for basic need in housing growth areas and not simply for improvement.

Mr. Butcher: Since resources available for providing grant aid are limited, my right hon. Friend has to apply a series of criteria in order to determine which of the many applications he receives should receive priority. These are, first, committed expenditure on projects which are already under way, second, basic need for additional school places in areas of population growth, third, building work which governors have a statutory duty to undertake as a result of proposals approved under section 13 of the 1980 Education Act and, fourth, projects to improve or replace inadequate buildings.

Under-fives

Mr. Cohen: To ask the Secretary of State for Education and Science if he will list the individuals appointed to the recently announced committee of inquiry into the educational experience of under-fives, indicating for each the duration they have taught in *(a)* a nursery school or class and *(b)* a reception class.

Mrs. Rumbold: The members of the committee have been invited to serve in a personal capacity with particular reference to the breadth of the committee's task. Full information on the teaching experience of all the members is not currently available; however, Mrs. Ann Sharp and Ms. Lesley Abbott taught four-year-olds in reception classes for seven years and five years respectively. Ms. Abbott also taught a nursery class for one year and Mrs. Rose Johnson teaches from time to time both reception and nursery classes.

Mr. Cohen: To ask the Secretary of State for Education and Science (1) if he will consider inviting Margaret Clark,

professor of education at Birmingham university, to serve on the recently announced committee of inquiry into the educational experience of under-fives; and if he will make a statement;

(2) what consideration the recently announced committee of inquiry into the educational experience of under-fives will give to the recent review of research into the education of children under-five written by Professor Margaret Clark which was commissioned by his Department; and if he will make a statement.

Mrs. Rumbold: The committee of inquiry contains suitably qualified academics. I see no need to supplement their expertise other than through the various forms of expert evidence. Among these Professor Clark's review will without any doubt have a prominent place.

Mr. Cohen: To ask the Secretary of State for Education and Science (1) when he expects to publish the Her Majesty's inspectorate of schools' document on quality in the area of education of under-fives;

(2) what areas of consideration for the recently announced committee of inquiry into the educational experience of under-fives have not already been covered by *(a)* his Department's commissioned review of research into the education of children under five and *(b)* Her Majesty's inspectorate of schools' document on quality in the area of education of under-fives; and if he will make a statement.

Mrs. Rumbold: The report by Her Majesty's inspectorate, expected to be published on 22 May, deals with good practice in maintained schools only. Professor Clark's critical evaluation of the outcome of recent research on the under-fives was not so constrained. Neither study, however, addresses fully these issues which the committee is required to take into account: the diversity of needs and of types of provision; demographic and social factors; the nature of training for teachers and other professional staff involved in the education of children under five.

Government Data Network

Mr. Cohen: To ask the Secretary of State for Education and Science what considerations his Department has given to joining the Government data network; and if he will make a statement.

Mr. Butcher: The Department is considering its requirements, and the extent to which these might be met by the Government data network, and will take into account advice from Racal Data Networks Ltd.

Academic Research Equipment

Mr. Andrew F. Bennett: To ask the Secretary of State for Education and Science when the Advisory Board to the Research Councils' survey of academic research equipment will be published; if he will undertake to place a copy of the report in the Library as soon as it is published; and if he will make a statement on the future funding of university research.

Mr. Jackson: I understand that the Advisory Board for the Research Councils will receive a report on its survey of academic research equipment later this month. Publication of the report is a matter for the board.

As already announced, the Government intend to separate the funding of teaching and research in universities, through the Universities Funding Council, in order to encourage institutions to think more systematically about the quality of their performance in both areas. The level of public funding for university research will be reviewed in the normal way as part of the annual public expenditure survey, and by the UFC, the research councils, Government Departments and other publicly funded agencies.

Bovine Immunodeficiency Disease

Mr. Bermingham: To ask the Secretary of State for Education and Science if his Department has received any applications for the funding of research into the bovine immunodeficiency virus; and if he will make a statement.

Mr. Jackson: No applications have been received. The Agricultural and Food Research Council's institute for animal health has recently started a small research programme on BIV using existing science budget funds. In addition, the institute has recently been awarded a grant from the Medical Research Council's AIDS-directed programme for work on BIV.

University Physics Department (Funding)

Mr. Bermingham: To ask the Secretary of State for Education and Science if he will list the level of funding to each university physics department in England and Wales over each of the last five years for which figures are available; and if he will make a statement.

Mr. Jackson: Universities receive public funding in the form of block grants from the Universities Funding Council, which succeeded the University Grants Committee on 1 April. It is for each university to determine how its block grant, and the other income at its disposal, is distributed between Departments.

Pupil-Teacher Ratio

Mrs. Peacock: To ask the Secretary of State for Education and Science, if he will list in tabular form *(a)* the number of teachers in each local education authority in England and Wales, *(b)* the number of pupils in each and *(c)* the pupil-teacher ratio of each.

Mr. Butcher I shall reply as soon as possible giving the figures for England. Welsh statistics are the responsibility of the Secretary of State for Wales.

Research Vessels

Mr. Straw: To ask the Secretary of State for Education and Science if he will list, with dates, the home ports of vessels of the British Antarctic Survey during the last 10 years, giving reasons for any change of port.

Mr. Kenneth Baker: The British Antarctic Survey vessels, which are both used to supply the survey's bases at the start of each austral summer, sailed from Southampton from 1979 to 1984, and since 1985 have used Grimsby. The change was made for reasons of efficiency in handling cargo, and for economies in the laying up costs of the ships during the summer months.

Mr. Straw: To ask the Secretary of State for Education and Science if he will list, with dates, those ports at which

refitting or servicing has been carried out on *(a)* vessels of the British Antarctic Survey and *(b)* other research vessels of the Natural Environment Research Council.

Mr. Kenneth Baker British Antarctic Survey vessels have been refitted at yards on the rivers Tyne and Humber exclusively in the last 10 years. Other Natural Environment Research Council vessels have used the following ports:

	Year
Discovery:—	
Viana do Castela, Portugal	1988
Cardiff	1987
Falmouth	1986, 1982
Tyne	1979-80, 1983-85
Humber	1981
Charles Darwin:—	
Valparaiso, Chile	1988
Singapore	1987
Glasgow and Mombasa	1986
Falmouth (Commissioned 1984)	1985
Challenger:—	
Great Yarmouth	1988
Cardiff	1987
Southampton	1986
Tyne	1979-82, 1985
Falmouth (no refit in 1983)	1984

Mr. Straw: To ask the Secretary of State for Education and Science how many cruises have in whole or in part been undertaken in the last 10 years by research vessels based at Research Vessel Services, Barry, on behalf of departments of the university of Southampton; and what proportions these are of the total of such work.

Mr. Kenneth Baker: During the past 10 years, Southampton university has used NERC ships as sole user for a total of nine weeks. Most cruises in recent years have involved more than one user. In the past three years Southampton university scientists participated in 24 of a total of nearly 120 cruises on Discovery, Charles Darwin and Challenger. Southampton provided the principal scientist on seven of the 24 cruises. It is not possible to calculate the proportion of the total work involved, since figures are not available for the time used where the university was not the main user.

In Vitro Fertilisation (Report)

Mrs. Ann Winterton: To ask the Secretary of State for Education and Science whether the report of the Medical Council into children conceived by in vitro fertilisation, referred to in his answer of 26 July, *Official Report*, column *210*, has yet been published.

Mr. Jackson: The report has not yet been published. I understand that the Medical Research Council expects it to be published later this year.

Schools (Employment Statistics)

Mr. Straw: To ask the Secretary of State for Education and Science (1) if he will publish tables giving the most detailed information available, for England and Wales and by local authority, of the number of persons, full and part-time, other than fully qualified teachers, employed in schools including nursery schools and classes, breaking down the figures by nature of responsibilities undertaken and with an estimate of the full year salary costs and of average earnings per employee, at the latest available date;

(2) what information is collected, and what studies have been made, concerning the number, qualifications and responsibilities of people employed in schools other than fully qualified teachers.

Mr. Kenneth Baker *[holding answer 7 April 1989]:* The Chartered Institute of Public Finance and Accountancy publication "Education Statistics 1988-89 Estimates", a copy of which is in the Library, shows, separately for each respondent local education authority and for primary (including nursery), secondary and special schools, estimated full-time equivalent numbers of and associated expenditure per full-time equivalent pupil on support staff, premises related staff, administrative and clerical staff and mid-day supervisory assistants. It also shows for each authority estimated numbers of unqualified teachers and of school meals service staff broken down into organisers and clerical staff, mid-day supervisors and kitchen and canteen staff. Staff numbers are not broken down into full time and part time.

The Department collects information by local education authority on the number of student teachers and instructors in schools. The figures for January 1988 are set out in table 1. Local education authorities make returns to the Department of the Environment of their spending on non-teaching staff in schools. Table 2 sets out for 1986-87, the latest year for which firm data are available, spending by LEA on educational support staff, adminstrative and clerical staff and manual staff and on school meals staff. Information on average earnings per employee is not available.

No other information is collected, and no specific studies have been made, of the number and characteristics of persons employed in schools other than qualified teachers. The information given above is for England only: information for Wales is a matter for my right hon. Friend the Secretary of State for Wales.

Table 1

Student teachers and instructors in maintained nursery, primary, secondary and special schools (January 1988)

[4] Caretakers, cleaners and midday supervisory assistants.

AGRICULTURE, FISHERIES AND FOOD

Advisory Committee on Pesticides

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will publish a list of the members of his advisory committee on pesticides.

Mr. Ryder: I published such a list on 26 January 1989, and a copy is lodged in the Library of the House.

Organic Farming

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he has any proposals to encourage the replacement of existing intensive farming systems with organic alternatives.

Mr. Ryder: It is for individual farmers to decide whether to switch from intensive to organic farming systems. However, I am anxious that our own farmers should meet as large a share as possible of the increasing demand for organic produce. To this end I encouraged Food From Britain to establish the United Kingdom register of organic food standards which is currently drawing up agreed standards for the production and processing of organic food and is to provide an independent verification system. In addition, our agricultural advisory services now offer specialised advice to organic producers; UKROFS is being consulted on research needs; and the possibility of including an organic option in any extensification scheme that may be adopted under the European Community arrangements is under active consideration.

Intervention Stores

Mr. Andrew Welsh: To ask the Minister of Agriculture, Fisheries and Food if he will publish the amount of foodstuffs, by weight and at current prices, held in the United Kingdom each year since 1979 under European

Economic Community intervention policies in the following categories *(a)* butter, *(b)* beef, *(c)* wine and *(d)* cheese; and if he will make a statement.

Mr. Ryder: The information requested is as follows:

Tonnes

Year ending	*Butter*		*Beef*		*Wine*	*Cheese*
	Held in intervention	*Privately owned and stored against EC aided contracts*	*Held in intervention*	*Privately owned and stored against EC aided contracts*		
1980	19,148	4,674	25,588	2,055	Nil	Nil
1981	29	17,976	10,247	2,093	Nil	Nil
1982	8,830	26,085	13,025	310	Nil	Nil
1983	108,331	8,294	16,781	365	Nil	Nil
1984	144,430	10,097	52,430	29,200	Nil	Nil
1985	201,688	4,309	85,029	7,633	Nil	Nil
1986	237,632	7,066	55,985	5,970	Nil	Nil
1987	159,930	6,118	54,067	4,983	Nil	Nil
1988	24,179	448	25,412	4,357	Nil	Nil

Note: Current valuation figures for intervention butter and beef are £1,422·46/tonne and £1,322·71/tonne respectively.

Sources:

Council Regulation (EEC) No. 3721/85 of 20 December 1985—Official Journal of European Communities (OJ) No. L361 of 31 October 1985.

Council Regulation (EEC) No. 4034/86 of 22 December 1986—OJ No. L376 of 31 December 1986.

Council Regulation (EEC) No. 3977/87 of 21 December 1987—OJ No. L375 of 31 December 1987.

The figures shown above do not take into account quota exchanges.

In the years 1986, 1987 and 1988 the United Kingdom has concluded important quota exchanges with the Netherlands giving the United Kingdom valuable additional opportunities of sole in the Irish sea, south coast of Ireland area and North sea of 590 tonnes, 430 tonnes and 655 tonnes respectively. So far in 1989 we have negotiated an additional 725 tonnes of sole from the Netherlands through quota swaps.

Sheep Dips

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food whether the approval process for organophosphate-based sheep dips took into account the regularly occurring residue impurities in technical grade organophosphates.

Mr. MacGregor: Yes.

Veterinary Medicine

Dr. Thomas: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on progress towards European Community harmonisation of veterinary medicine licensing and distribution.

Mr. MacGregor: Common rules making the issue of licences for many veterinary medicinal products conditional upon a satisfactory assessment of safety, quality and efficacy were established in 1981. In February this year the Council received from the Commission proposals to extend the scope of these rules, and to harmonise the records which distributors are required to keep. The distribution system itself would not be affected. An explanatory memorandum (4228/89) has been submitted to the Scrutiny Committee, and I have also asked interested bodies to let me know their views.

Sole

Mr. Steen: To ask the Minister of Agriculture, Fisheries and Food what is the European Community quota for Holland for sole for each of the last three years; and if he will make a statement.

Mr. MacGregor: Sole quotas for the Netherlands for each of the last three years were as follows:

tonnes

Geographical Region (Zones of International Council for the Exploration of the Seas (ICES))	*1986*	*1987*	*1988*
III a, b, c, d	50	70	80
II, IV	15,050	10,530	10,530
VII a	300	330	275
VII h, j, k	80	80	80
VIII a, b	105	305	275
Total	15,585	11,315	11,240

Pesticides

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will publish a list of those pre-1965 pesticide ingredients which have been re-reviewed, indicating in each case the year of re-review and whether or not the ingredient was approved.

Mr. Ryder: The information requested by the hon. Gentleman may be found in table 1 of the information paper on the programme for routine reviews of approved pesticides which was made available to the public on 16 March 1989 and a copy of which is in the Library of the House. Of the 36 active ingredients or groups of active ingredients listed in table 1, numbers 2, 5, 9, 10, 12, 13, 14, 15, 16, 18, 19, 21, 22, 25, 27, 28, 29, 30, 33 were first cleared for supply and use in the United Kingdom before 31 December 1965.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food when he expects to complete his re-review of pre-1965 pesticide ingredients.

Mr. Ryder: I refer the hon. Gentleman to the reply given to the hon. Member for Gordon (Mr. Bruce) on 23 March 1989 at column *726*.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will publish a list of all pre-1965 pesticide ingredients currently in use which have not yet been re-reviewed; and when he expects each ingredient to be reviewed.

Mr. Ryder: Such a list is already available in table 3 of the information paper on the programme of routine reviews of approved pesticides, a copy of which is in the Library of the House.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will list those pesticide ingredients which he is currently reviewing; and if he will indicate in each case the year of the ingredient's initial approval.

Mr. Ryder: Pesticide active ingredients which are currently under review are listed in tables 1 and 2 of the information paper on the programme for routine review of approved pesticides, a copy of which is in the Library of the House. The year in which each was initially cleared is as follows:

	Year
2-aminobutane	1972
Alachlor	1969
Bromoxynil	1967
Captan	1962
Diazinon	1956
Dimethoate	pre-1958
Dinocap	1964
Fenbutatin oxide	1983
Fentin acetate	1965
Fentin hydroxide	1964
Furmecyclox	1979
Ioxynil	1964
Iprodine	1976
Methyl bromide	1964
2-Phenylphenol	1967
Tecnazene	1970
Tributyltin oxide	1976

Foot and Mouth Disease

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will identify those European Community countries that vaccinate against foot and mouth disease in cattle.

Mr. MacGregor: Cattle are vaccinated against foot and mouth disease in all European Community countries except Denmark, the Republic of Ireland and the United Kingdom.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he has any plans to stop the testing for foot and mouth disease by British veterinary staff of imported livestock; and if he will make a statement.

Mr. MacGregor: No tests for foot and mouth disease are carried out on imported livestock. Livestock susceptible to the disease, from countries which have had outbreaks within the last two years or where vaccination is practised, are required to be tested with negative results before export and also to undergo 21 days supervised post-import quarantine. There are no plans to remove these requirements from our import controls.

Badgers

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what further work is necessary before field trials can begin of the tuberculosis vaccine for badgers which has been developed by the Middlesex hospital.

Mr. MacGregor: Further work is necessary to check whether accidental contact with the vaccine could lead to desensitisation of cattle infected with tuberculosis so that they would no longer be reactors when tuberculin tested.

Veterinary Medical Products

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will list those products which the European Economic Community veterinary medical products committee have recommended as being suitable for product licences for each of the last three years.

Mr. MacGregor: The committee on veterinary medicinal products has not yet reached a conclusion on any of the product licence applications referred to it.

Alphachloralose

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food under what circumstances his Department authorises the use of alphachoroloralose against wild birds; and how many such licences were granted in each of the last three years.

Mr. Ryder: Under section 16(9)(d) of the Wildlife and Countryside Act 1981 my right hon. Friend is the appropriate authority for the purpose of issuing licences under section 16(1)(i), (j) and (k) of the Act for the use of prohibited methods to kill or take wild birds.

In practice my Department issues licences only to local authorities of competent pest control contractors and for a limited number of species, namely feral pigeon, house sparrows and in one case, herring gulls. The number of licences issued in the last three years were:

	Number
1986	685
1987	738
1988	589

Milk (Testing)

Mr. Bermingham: To ask the Minister of Agriculture, Fisheries and Food what steps his Department is taking to ensure that there will be no reduction in the number of milk samples being tested as a result of the closure of research stations in the south-west, the north-west, the south midlands and Kent; and if he will make a statement.

Mr. MacGregor: The only regular milk testing carried out by my Department is to ensure that untreated milk producers comply with one of the conditions of their licence. This work will not be significantly affected by the closure of certain microbiology laboratories, since the samples in question will be transported to other laboratories. The comprehensive testing carried out by the Milk Marketing Board (which includes monthly testing for brucellosis on behalf of the Ministry) will not be affected at all.

Research (Funding)

Mr. Bermingham: To ask the Minister of Agriculture, Fisheries and Food if he will give details of the impact on the Agriculture and Food Research Council of funding reductions already announced; and if he will make a statement.

Mr. Ryder: Commissions by my Department with the Agricultural and Food Research Council will be reduced by £1·6 million in 1989-90, as part of the £5 million reduction in Government funding which has been

announced for that year. Decisions on the future programme of commissioned work will depend on the consultations we are currently holding with industry organisations. The implications of changes in funding for the staff and research establishments of the Agricultural and Food Research Council are matters for that organisation.

Salmonella

Mr. Bermingham: To ask the Minister of Agriculture, Fisheries and Food what is the level of additional funding awarded to the Institute of Animal Health for research on salmonella contamination; and if he will make a statement.

Mr. Ryder: I refer the hon. Member to the answer given to my hon. Friend the Member for Daventry (Mr. Boswell) on 21 March at columns *514-15*. My Department was already spending around £700,000 in 1989-90 on research at the Institute of Animal Health on enteric diseases of poultry, including salmonella. Two new salmonella projects have now been added at a cost of £173,000 in 1989-90.

Veterinary Surgeons

Mr. Paice: To ask the Minister of Agriculture, Fisheries and Food what action he is proposing to take to consider the supply and demand for veterinary surgeons, particularly in the light of the Riley report.

Mr. MacGregor: Consideration of the Riley report is a matter for the Universities Funding Council. I am concerned, however that there appears to be a growing shortage of British-trained veterinary surgeons. After discussions with my right hon. Friends the Secretaries of State for Education and Science and for Scotland, I have decided that it would be sensible and prudent to review the demand for veterinary surgeons in both the public service and the private sector. The study will also consider the supply of veterinary education and the demand from home and overseas students and will have regard to the potential funding from the Universities Funding Council and other sources. I shall be announcing the details as soon as possible.

PRIME MINISTER

Climatic Changes

Q34. **Mr. Corbyn:** To ask the Prime Minister what action Her Majesty's Government are taking to arrest world climatic changes.

The Prime Minister: I refer the hon. Member to the Government's reply to the first report from the Environment Committee, Session 1987-88 (Cm. 552).

The United Kingdom continues to play a full part in international consideration of the climate change issue, in the WMO/UNEP intergovernmental panel on climate change, the EC and in other special fora.

Budget

Q78. **Mr. Marland:** To ask the Prime Minister what representations she has received regarding the Budget.

Q152. **Mr. John Browne:** To ask the Prime Minister what representations she has received regarding the Budget.

Q190. **Mr. Malins:** To ask the Prime Minister what representations she has received regarding the Budget.

The Prime Minister: The proposals in the Budget have been widely welcomed.

EC Fraud

Q134. **Mr. Fishburn:** To ask the Prime Minister what representations she has received regarding fraud in the European Economic Community.

Q185. **Sir Anthony Grant:** To ask the Prime Minister what representations she has received regarding fraud in the EEC.

Q204. **Sir Hugh Rossi:** To ask the Prime Minister what representations she has received regarding fraud in the European Economic Community.

The Prime Minister: I have received a small number of representations.

British Intelligence (History)

Q192. **Mr. Dalyell:** To ask the Prime Minister when she expects an announcement to be made on the possible publication of the volume prepared by Professor Sir Michael Howard in the series entitled the "Official History of British Intelligence"; what criteria are being used in determining whether publication can take place; whether publication with appropriate deletions is being considered; on whose authority Sir Michael Howard was commissioned to write his volume; what has been the cost to public funds of work on this volume; and what assessment she has made of the utility and cost-effectiveness of the commissioning of official histories on intelligence matters which are not subsequently published.

The Prime Minister: The "Official History of British Intelligence in the Second World War" was commissioned in 1971 by the Government of the day. The right to decide on publication of this history, as with all official histories, rests exclusively with the Government. Four volumes of the "History of British Intelligence" have already been published, volume I in 1979, volume II in 1981, volume III, part 1 in 1984 and volume III part 2 in 1988. The decision about timing and form of publication of the volume commissioned from Professor Sir Michael Howard, the direct cost of which was in the region of £10,000, will be taken in the light of our best judgment of the national interest.

Griffiths Report

Mr. Blunkett: To ask the Prime Minister when she intends to announce the Government's conclusions on the report by Sir Roy Griffiths; and if she will make a statement.

The Prime Minister: I refer the hon. Member to the reply given by my hon. and learned Friend the Minister of State, Department of Health to the hon. Member for Livingston (Mr. Cook) on 6 April.

Engagements

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Tuesday 11 April.

Mr. Nicholas Bennett: To ask the Prime Minister if she will list her official engagements for Tuesday 11 April.

Mr. Andrew F. Bennett: To ask the Prime Minister if she will list her official engagements for Tuesday 11 April.

Mr. Harry Greenway: To ask the Prime Minister if she will list her official engagements for Tuesday 11 April.

Mr. Pike: To ask the Prime Minister if she will list her official engagements for Tuesday 11 April.

The Prime Minister: This morning I had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today.

TRADE AND INDUSTRY

Employee Share Ownership

Mr. Ian Taylor: To ask the Chancellor of the Duchy of Lancaster what discussions have taken place as to the feasibility of introducing an employee share ownership scheme in any future privatisation that his Department may sponsor.

Mr. Maude: When considering any privatisation proposal, the possibility of providing for an employee share ownership scheme is always carefully assessed.

Regional Initiatives

Mrs. Mahon: To ask the Chancellor of the Duchy of Lancaster if he plans to announce any new initiatives to benefit Britain's regions.

Mr. Atkins: No. Major changes in the focus of DTI's policies were made early last year. Regional policy now operates within a framework designed to encourage enterprise and economic growth in all parts of the country but with extra help available for firms in the regions.

Manufacturing Output

Mr. Baldry: To ask the Chancellor of the Duchy of Lancaster what are the latest figures he has for the growth in manufacturing output.

Mr. Atkins: Manufacturing output in the three months to January 1989 was at a record level, 7 per cent. higher than a year earlier, 11 per cent. above its 1979 average level and 6·5 per cent. above the previous all-time peak year of 1973.

Import Substitution

Mr. Gill: To ask the Chancellor of the Duchy of Lancaster what steps he will take to encourage import substitution by United Kingdom manufacturing industry.

Mr. Alan Clark: It is not for the Government to tell industry what to produce. The greatest encouragement to buy British is the availability of competitive British goods and services. My Department's policies are geared to helping business to achieve this.

Scotch Whisky

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster what progress has been made towards the liberalisation of Scotch whisky and the reduction in the rates of import duty and other taxation levied on Scotch whisky in the Korean market.

Mr. Alan Clark: We continue to press the Korean authorities on all appropriate occasions, both bilaterally and through the European Community, to remove restrictions on the import of Scottish whisky to Korea. The Korean Government have recently proposed certain steps towards liberalisation of this important market. These proposals are welcome, but some problems remain. Further relaxation is being sought, and the Government will continue to pursue the issue vigorously.

Distance Measures

Mr. Meale: To ask the Chancellor of the Duchy of Lancaster (1) what assessment he has made of the benefits for the United Kingdom resulting from the abolition by the European Economic Community of non-metric measures of distance;

(2) what assessment he has made of the economic advantages which will result from the implementation of the European Economic Community proposal to abolish non-metric measures of distance.

Mr. Maude *[holding answer 10 April 1989]:* My Department has made no assessment of the benefits or economic advantages which would result if non-metric measures of distance were abolished. In view of the substantial costs which would be involved in metricating distance and speed road signs and associated equipment in vehicles, the European Commission's proposal to amend the units of measurement directive would allow the United Kingdom to decide whether to phase out the mile, yard, foot and inch for road transport purposes.

Single Market

Mr. Meale: To ask the Chancellor of the Duchy of Lancaster if he intends to change *(a)* the method of collection of trade statistics and *(b)* the form of their public presentation, as a consequence of the completion of the European Economic Community single market; and if he will make a statement.

Mr. Maude *[holding answer 10 April 1989]:* I have nothing to add to the reply given to my hon. Friend, the Member for Rutland and Melton (Mr. Latham) on 21 February at column *546* on the method of collection. The presentation of United Kingdom trade statistics after the completion of the single market has yet to be decided.

ATTORNEY-GENERAL

Lynx

Mrs. Dunwoody: To ask the Attorney-General what representations the Treasury Solicitor has received concerning the self-misrepresentations of Lynx as a charity; what reply he has sent; what further action he will take in the light of continued misrepresentation in relation to donations from the profits deriving from sales of the "Eat Your own Pet Cookbook"; and if he will make a statement.

The Attorney-General: On a number of occasions since October 1987 the Treasury Solicitor has received

complaints from solicitors acting for the British Fur Trade Association about statements, which have appeared in four publications, suggesting that Lynx, a campaigning body opposed to the trade in animal furs, is a charity. On each occasion the Treasury Solicitor has on my behalf made inquiries of the directors of Lynx, as a result of which I have in each case been satisfied that Lynx itself is not responsible for the alleged misrepresentations and has not sought to hold itself out as a charity.

TRANSPORT

M1 (Traffic Flow)

Mr. Pawsey: To ask the Secretary of State for Transport what is his estimate of the current peak hourly traffic flow *(a)* south bound and *(b)* north bound on the M1 south of Luton; what was the maximum hourly flow for which the original specifications were drawn up; and what is the current average speed during peak hours in each direction.

Mr. Peter Bottomley: The maximum hourly traffic flow recorded in each direction between junctions 9 and 10 of the M1 is 5,200 vehicles. During peak hours congestion may lead to lower traffic flows. There were no hourly traffic flow standards when this motorway, opened in 1959, was designed. Vehicle speeds are not recorded systematically on this stretch of motorway.

Mr. Pawsey: To ask the Secretary of State for Transport if he will increase the length of the deceleration lane on the M1 to ease the way for traffic leaving the M25.

Mr. Peter Bottomley: We are considering what remedial action might be justified. We are aware of some problems of queuing at this point.

Explosives (Carriage by Road)

Mr. Meacher: To ask the Secretary of State for Transport on which date he approved the draft Carriage of Explosives by Road Regulations.

Mr. Peter Bottomley: 14 March.

Mr. Flynn: To ask the Secretary of State for Transport if he expects that the Governments of Germany and the Netherlands will continue to insist on the provision of locally trained drivers on British vehicles carrying explosives, following the introduction of the new Carriage of Explosives by Road Regulations.

Mr. Peter Bottomley: Under the regulations the driver and any attendant must have received adequate training and instruction in the dangers to which the explosives carried may give rise, the action to be taken in an emergency and their duties under the regulations. A written record of the training must be kept. The CBI has prepared an appropriate training course. We intend to use this course as the basis for negotiation of reciprocal recognition with other authorities.

Mr. Moss: To ask the Secretary of State for Transport when he will lay the new Carriage of Explosives by Road Regulations; and if he will make a statement.

Mr. Peter Bottomley: The new regulations have been laid today; an advance copy of the associated approved code of practice has been placed in the Library.

Since the regulations are necessarily in part somewhat technical, the Department has also provided the Joint Committee on Statutory Instruments with an additional memorandum on the changes being made and the ways in which these seek to improve the pre-1974 health and safety legislation in this particular field.

In making the regulations in the aftermath of the Peterborough incident, and following further discussion with the HSE, one change has been made to the draft code of practice. The guidance in the proposed code would have allowed the normal requirement for double manning to be waived in certain circumstances and where there was a means of radio communication in the cab. In the light of the discussions in the House on 23 March and additional comments received about the use of new technology to safeguard loads, the Health and Safety Commission has been invited to consider further that proposal.

The question of mixed loads has been considered again. As I explained in my answer to my hon. Friend the Member for Ealing, North (Mr. Greenway) on 4 April at columns *66-67*, the new regulations aim to ensure that the possibility of ignition of any kind of explosion is not increased during carriage by the mixing of the load and that the consequences of an incident are not made worse by so doing. The main problem is fire, and the point is that high explosives are likely to burn to detonation whether detonators and other items are present or not. The new regulations proposed by the Health and Safety Executive deal satisfactorily with this.

As explained to my hon. Friend the Member for Harborough (Sir J. Farr) on 4 April at column *67*, there is a requirement in the new regulations for the route to be followed to be agreed with the relevant chief officers of police when a large load of the most dangerous type of explosive is being carried. To require prior notification or agreement on routes for all dangerous goods, as has been suggested, would involve the emergency services in masses of additional paperwork which would not provide overall benefit in safety terms.

Employee Share Ownership

Mr. Ian Taylor: To ask the Secretary of State for Transport what discussions have taken place as to the feasibility in introducing an employee share ownership scheme in any future privatisation that his Department may sponsor.

Mr. Portillo: My right hon. Friend will certainly consider the scope for furthering the Government's policy of encouraging employee shareholdings in any future privatisations that may be sponsored by this Department.

Road Maintenance

Mrs. Ann Winterton: To ask the Secretary of State for Transport if he will make a statement outlining the extent to which local authorities have used funds which were originally allocated by his Department for road maintenance for other projects, making specific reference to the situation of the Cheshire county council.

Mr. Peter Bottomley: No specific grant is made for local authority spending on local road maintenance. Road maintenance needs are included in the needs assessments used to calculate authorities' block grant entitlements. Authorities have discretion as to how they choose to spend

their grant. Statistical returns from Cheshire county council suggest that in 1988-89 it budgeted to spend more on local road maintenance than its assessed need to spend.

HGV Tests

Mr. Thurnham: To ask the Secretary of State for Transport what is the current waiting period for HGV tests in the north-west; and if he will make a statement.

Mr. Peter Bottomley: Between four and six and a half weeks. The wait at some testing stations is longer than we would like because of the rise in demand for tests and the diversion of the work load resulting from the unforeseen need to close the Wallasey testing station. Urgent action is being taken to reduce delays. A replacement for Wallasey opens this summer, and the vehicle inspectorate executive agency is taking on extra staff.

Ferndown Relief Road

Mr. Adley: To ask the Secretary of State for Transport what proposals he is making for reconsideration of the line of route of the Ferndown relief road, following rejection by the Department of the Environment on environmental grounds of the route proposed by Dorset county council.

Mr. Peter Bottomley: I understand that Dorset county council is re-examining its proposals following the decision of my right hon. Friend the Secretary of State for the Environment to refuse planning permission for its proposed route. It will be for my right hon. Friend to decide whether he wishes to consider any revised route which may be proposed by the county council.

Ferries (Safety)

Mr. Ward: To ask the Secretary of State for Transport whether there is any evidence that the new safety rules for roll-on/roll-off ferries recently introduced by his Department are being avoided by ferries registered in foreign countries but operating from British ports.

Mr. Portillo: The recently introduced safety rules for ro-ro passenger ferries, the Weighing of Goods Vehicles and Other Cargo Regulations and the Loading and Stability Assessment of Ro/Ro Passenger Ships Regulations, apply to all foreign-registered ro-ro passenger ferries while in United Kingdom ports with effect from 31 March 1989 and 4 April 1989 respectively.

I have no evidence of any intent to avoid them.

Toll Charges

Mr. Home Robertson: To ask the Secretary of State for Transport what consideration he is giving to private funding for a new motorway between Newcastle and the Scottish border; and what is the Government's policy concerning the imposition of toll charges on any part of the national road network.

Mr. Peter Bottomley: The Department is not considering motorway proposals between Newcastle and the Scottish border. We are keen to encourage the private funding of infrastructure and would willingly consider proposals from the private sector. Promoters of privately funded schemes would need to recoup their costs and this would probably involve tolls. There are no plans to impose tolls on existing routes.

Settle-Carlisle Railway

Mr. Curry: To ask the Secretary of State for Transport whether he can now announce a decision on the future of the Settle-Carlisle railway.

Mr. Channon: I have now completed my consideration of British Rail's proposal to close the Settle-Carlisle railway. Having reviewed all the evidence, I have decided to refuse closure consent for this line as well as for the associated Blackburn-Hellifield line. A number of factors have changed since I announced last year that I was minded to give consent to closure.

There have been changes in the financial case. For example, following the trial repairs to Ribblehead viaduct that I requested last year, it now seems that it will be much cheaper to repair the whole structure than previously thought, and a new survey by the local authorities suggests that traffic on the line has continued to grow and that significantly more people are travelling for essential purposes. British Rail has estimated that revenue on the line is some 40 per cent. higher in 1988-89 than in 1987-88. I believe that there is scope for increasing revenue further by better marketing of the line and by the pricing of tourist journeys on a more commercial basis. The line may continue to run at a loss, but not necessarily a large one. As required by statute, I have also taken account of new evidence on hardship and the line's importance to the local economy.

The private sector has shown interest in the line and I want it to be involved in helping to develop it. I have asked the chairman of British Rail to see what private sector involvement can be arranged to make the most of marketing and operating the line.

The local authorities are committed to co-operating with British Rail and other organisations to support and promote the line. It has been proposed that a trust fund be set up to care for the structures on the line of heritage importance. I support that proposal. I also look to all who have promised to support the line to work together to ensure that it has a successful future and so that the case for closure will not re-emerge.

ENERGY

Opencast Operations

Dr. Thomas: To ask the Secretary of State for Energy (1) if he will detail the ex-gratia payments made for community benefit and as a sign of goodwill by British Coal's opencast operations in each year since 1979; (2) if he will explain the changes between 1987 and 1988 in the percentage of the total cost of mining opencast coal in Wales by British Coal devoted to site restoration.

Mr. Michael Spicer: These are matters for the British Coal Corporation, and I have asked the chairman to write to the hon. Member.

EMPLOYMENT

Restart

Ms. Short: To ask the Secretary of State for Employment if he will outline the terms of reference and details of the large restart cohort survey which his Department will be commissioning; if he will explain the

position of those unemployed claimants who will not be called for restart interviews for the purposes of creating a control group; and whether the survey will be asking questions to find out to what degree claimants feel coerced into participation in employment service schemes as a result of the restart process.

Mr. Lee: The terms of reference of the restart cohort study are to look at the effects of restart on its clients and on the operation of the labour market, and to describe how restart is achieving changes.

The study will be based on a random sample of 16,000 people, selected from those becoming eligible for a restart counselling interview. Information will be collected on their progress after they have had their restart interview. Survey interviews will be held with a random selected group of 5,500 people within the sample. Participation will be voluntary.

The position of those in the control group is that they will not be invited for a restart interview but they will, of course, have access to the full range of employment service and Training Agency services through the jobcentres and unemployment benefit office networks. Eligibility for programmes will not be affected. Any member of the control group who requests a counselling interview will be able to have one.

The interview survey will include questions on the characteristics and employment background of clients, and their attitudes to and views of the restart process.

Bridging Allowance

Mr. Redmond: To ask the Secretary of State for Employment how many young people in the Doncaster and Mexborough areas of the county of South Yorkshire have applied for bridging allowance since September 1988; and if he will make a statement.

Mr. Cope: From September 1988 to 9 March 1989, the latest available date, 937 young people in the Doncaster and Mexborough areas have received bridging allowance. I am satisfied that there are more than sufficient YTS places in these areas for all young people who apply for them.

Benefits (Young People)

Mr. Redmond: To ask the Secretary of State for Employment how many 16 and 17-year-olds in Doncaster and Mexborough have lost benefits since September 1988 because they are unemployed or have been unable to take advantage of guaranteed YTS places.

Mr. Cope: The guaranteed offer of a YTS place to all 16 and 17-year-olds not in full-time education or employment means that there is now no need for young people to be unemployed. I am satisfied that the training agency has more than sufficient YTS places available in Doncaster and Mexborough for those who apply for one.

Enterprise Allowance Scheme

Mr. Redmond: To ask the Secretary of State for Employment what is the number of unemployed people in the Doncaster and Mexborough areas of South Yorkshire who have been helped to start a business through the enterprise allowance scheme in each year since its inception; and how many of these schemes have failed in each year.

Mr. Lee: The information is not available in the form requested. In the area covered by the Wakefield EAS office which comprises Barnsley, Castleford, Doncaster, Mexborough, Pontefract, Thorne and Wakefield, a total of 7,189 unemployed people have joined the scheme from its inception to the end of the 1988-89 financial year.

In each financial year the figures are as follows:

Financial year	*Number*
1983-84	442
1984-85	628
1985-86	892
1986-87	1,519
1987-88	1,824
1988-89	1,884

Data on business closure are not available below regional level.

Employment Training

Mr. Harry Greenway: To ask the Secretary of State for Employment how many people have so far benefited from the employment training scheme; in what particular ways; and if he will make a statement.

Mr. Nicholls: Unemployed people clearly recognise the benefits the programme has to offer and the opportunity it provides to help them get a job. By 31 March over 238,000 people had entered the programme. This is a major achievement in the seven months since the programme was launched.

Mr. Leighton: To ask the Secretary of State for Employment how much has been spent advertising employment training.

Mr. Nicholls: A total of approximately £10·3 million has been spent on advertising employment training between July 1988 and March 1989.

YTS

Mr. Dunnachie: To ask the Secretary of State for Employment what is the latest fatal and major injury accident rate for participants on YTS.

Mr. Cope: The latest available figure for the year ended on 31 December 1988 is 146 per 100,000 trainees.

Technical and Vocational Education Initiative

Mr. David Shaw: To ask the Secretary of State for Employment how many local education authorities, schools and colleges are currently taking part in the technical and vocational education initiative; and if he will make a statement.

Mr. Cope: All education authorities in Great Britain are taking part in the technical and vocational education initiative; at present approximately 2,000 schools and colleges are involved. From September this year, some two thirds of authorities will have moved from the pilot phase to extending the initiative to all their schools and colleges.

Health and Safety

Mr. Strang: To ask the Secretary of State for Employment what plans he has to increase the qualifications of competent persons in health and safety matters.

Mr. Nicholls: I have no such plans. Requirements for "competent persons" in health and safety law do not normally specify qualifications because competence depends on a number of things including experience, training and personal qualities. Qualifications do not necessarily show that someone is competent for a particular task. Ultimately, whether a person is competent for the purpose depends on the circumstances and is a matter for the courts to decide.

Skills Training Agency

Mr. Harry Greenway: To ask the Secretary of State for Employment if he will make a further statement on his timetable to privatise the Skills Training Agency.

Mr. Cope: As my right hon. Friend the Secretary of State made clear in his statement on 13 March, it is important for sale to proceed as rapidly as possible. It is not possible to specify a timetable precisely at this stage, but we intend that the sale process should be completed as soon as possible after the relevant provisions of the Employment Bill have received Royal Assent.

Wage Levels (South-East)

Mr. Andrew Smith: To ask the Secretary of State for Employment what were the lowest wage levels reported to the south-east wages inspectorate in each of the last 10 years.

Mr. Nicholls: The information requested could be provided only at disproportionate cost.

Labour Statistics

Dr. Thomas: To ask the Secretary of State for Employment what is *(a)* the current rate of unemployment and *(b)* the average annual salary of (i) all men in full-time employment, (ii) all women in full-time employment and (iii) all in full-time employment *(a)* in Great Britain, *(b)* in England and *(c)* in the standard English region.

Mr. Lee: The latest available information is provided in the tables.

Unemployment rates in February 1989

	Unemployment as a percentage of the workforce[1]		
	Males	*Females*	*All*
Great Britain	8·0	4·6	6·6
England	7·4	4·3	6·1
of which:			
South East	5·0	3·0	4·2
East Anglia	3·8	3·1	3·5
South West	5·7	4·2	5·0
West Midlands	8·1	5·2	6·9
East Midlands	7·1	4·4	6·0
Yorkshire and Humberside	9·9	5·6	8·1
North West	11·9	6·2	9·4
North	13·3	6·8	10·6

[1] Unemployment, seasonally adjusted, expressed as a percentage of the total workforce (the sum of unemployed claimants, employees in employment, self-employed, HM Forces and participants on work-related government training programmes) at mid 1988.

Average gross weekly earnings of full-time employees on adult rates whose earnings were not affected by absence, April 1988

	Males £	*Females* £	*All* £
Great Britain	245·8	164·2	218·4
England	248·4	166·1	220·9
of which:			
South East	283·0	188·1	249·5
East Anglia	229·6	150·3	204·4
South West	227·6	152·2	202·7
West Midlands	225·8	148·9	201·2
East Midlands	222·5	145·3	197·8
Yorkshire and Humberside	224·1	150·6	201·5
North West	231·1	153·2	205·5
North	223·8	148·8	199·3

Source: New Earnings Survey

Black Workers

Mr. Redmond: To ask the Secretary of State for Employment what percentage of the work force of each local authority is black.

Mrs. Virginia Bottomley: I have been asked to reply. This information is not collected centrally.

ENVIRONMENT

Housing (Newham)

Mr. Leighton: To ask the Secretary of State for the Environment how many of the 14,000 units of housing for Newham mentioned in the draft strategic planning guidance for London published on 6 March will be for people nominated from Newham's housing waiting list.

Mr. Trippier: This is a matter for future decision. The draft guidance proposes the number of additional dwellings in the period 1987-2001 for which Newham should make provision in preparing its unitary development plan. The guidance refers to the use of land not to questions of tenure.

PSA (Cambridge)

Sir Eldon Griffiths: To ask the Secretary of State for the Environment what estimate he had made of the number of additional vehicle journeys into and out of the city of Cambridge that will arise as a result of his transferring Property Services Agency staff and functions from Newmarket to Cambridge, breaking this down into the following categories: staff journeys to and from their homes in and around Newmarket, client journeys by United States Air Force, Royal Air Force and other Ministry of Defence personnel, journeys made to service the construction of Property Services Agency's additional accommodation in Cambridge, and journeys made by contractors and others who service these officials' activities.

Mr. Chope: The transfer affects about 35 staff. The additional vehicle movements generated by the transfer will be insignificant in the context of total vehicle movements in Cambridge.

Housing Action Trusts

Mr. Faulds: To ask the Secretary of State for the Environment what were the costs of the examination of the Windmill lane estate in Sandwell for its inclusion in the housing action trust programme.

Mr. Trippier: The total cost of the Sandwell housing action trust study completed on 1 December 1988 will not be known until all claims from the consultants have been settled by the Department. We expect the final cost to be less than £105,000, including VAT. The costs of examining the Windmill lane estate, which was one of four covered by the study, are not separately identifiable.

Mr. Faulds: To ask the Secretary of State for the Environment what were the costs of examination of the Cape Hill area of Smethwick for its possible inclusion in the housing action trust programme; and what will be the additional costs for the further examination of that area for treatment under the programme.

Mr. Trippier: The Sandwell housing action trust study included an examination of the Windmill lane estate but not of the wider Cape Hill area. For the reasons set out in their report the consultants recommended that a second study should be carried out to examine some further areas. This study is now in progress; the cost of the contract is commercially confidential.

Mr. George Howarth: To ask the Secretary of State for the Environment how many requests he has received to set up housing action trusts by *(a)* local authorities, *(b)* resident associations, *(c)* tenants' groups or associations, *(d)* urban renewal agencies and *(e)* amenity groups; and if he will list them.

Mr. Trippier: We have received a number of inquiries from local authorities, tenants and other residents interested in the establishment of housing action trusts. It is for them to decide whether to make their informal approaches public. The latest position on the currently proposed trusts was set out in my right hon. Friend's reply to my hon. Friend the Member for Wyre (Mr. Mans) on 16 March at column *322*.

Mr. George Howarth: To ask the Secretary of State for the Environment how many housing action trusts he expects to be in place in 1989, 1990, 1991 and 1992.

Mr. Trippier: I refer the hon. Member to the answer my right hon. Friend gave to my hon. Friend the Member for Wyre (Mr. Mans) on 16 March at column *322*. It will be for the individual tenants to decide whether they want my right hon. Friend to seek Parliament's approval to orders setting up housing action trusts.

Property Services Agency

Mr. Redwood: To ask the Secretary of State for the Environment why the Property Services Agency has recently paid £50 per sq ft to rent space at the Adelphi, the Strand.

Mr. Chope: The PSA acquired the Adelphi at the behest of the Departments of Health and Social Security as part of a major planned rationalisation of its London HQ accommodation.

Mr. Redwood: To ask the Secretary of State for the Environment whether the Property Services Agency has recently examined office properties in docklands, available at under £25 per sq ft, for the location of some central London staff in better and cheaper accommodation than in the west end.

Mr. Chope: It is the Government's policy that Departments should review the location of their work with a view to selecting locations offering better value for money, easier recruitment and retention of staff and other advantages. PSA is currently assisting Departments in undertaking their reviews by giving relevant information on property in different locations, including docklands.

Docklands (Housing)

Mr. Leighton: To ask the Secretary of State for the Environment what is the commitment by the London Docklands development corporation in the agreement with the London borough of Newham on affordable rented housing in the borough; and what progress has been made in achieving this.

Mr. Trippier: The memorandum of agreement states that

"both authorities agree the objective to produce 1,500 social housing units to let at fair rent or thereabouts subject to its achievement being reasonably practicable in all the financial circumstances".

Negotiations are at a very advanced stage for the provision of approximately 500 units at Winsor park. Discussions are under way concerning further social housing units on other sites in the royal docks.

Housing Associations

Mr. George Howarth: To ask the Secretary of State for the Environment what is his estimate of the number of housing association units of accommodation which will be financed by mixed housing association grant and private finance for the 12 months period commencing 1 April; and if he will break down his estimates by Housing Corporation regions.

Mr. Trippier: This information will be available in full only when the Housing Corporation have completed the annual regional allocation process to associations. I have therefore asked the Housing Corporation to respond to the hon. Member direct as soon as that process is completed.

Housing Act 1988

Mr. George Howarth: To ask the Secretary of State for the Environment how many requests he has received under the provisions of the Housing Act 1988 to activate the process of opting out of local authority control by *(a)* housing associations, *(b)* private landlords, *(c)* local authorities, *(d)* tenants' groups or associations and *(e)* registered housing co-operatives; and if he will list them.

Mr. Trippier: None. The responsibility for approving landlords for the purposes of tenants' choice (part IV of the Act) lies with the Housing Corporation in England and with Housing for Wales in Wales.

Personal Data

Mr. Cohen: To ask the Secretary of State for the Environment whether he intends to introduce regulations

under the Local Government Finance Act that will allow charging authorities and community charges registration officers to use or disclose personal data for purposes other than those directly related to the community charge; and whether he will make a statement.

Mr. Gummer: No.

Mr. Cohen: To ask the Secretary of State for the Environment whether he will list the uses and disclosures of personal data that can currently be made by charging authorities and community charges registration officers for purposes other than those directly related to the community charge; and whether he will make a statement.

Mr. Gummer: An electoral registration officer may inspect the community charges register of any charging authority. Apart from that no personal data collected for the purposes of community charges registers may be disclosed for any purpose unconnected with the community charge.

Nuclear Waste (Imports)

Mr. Cox: To ask the Secretary of State for the Environment if he will list the countries that send civil nuclear waste to the United Kingdom; and how such waste is moved in the United Kingdom.

Mrs. Virginia Bottomley: There are no countries that send civil nuclear waste to the United Kingdom.

Council House Sales

Mr. Redmond: To ask the Secretary of State for the Environment how many council properties have been sold to council house tenants in Doncaster metropolitan borough council as a whole since 1979 to date; and what proportion of the total stock of council properties these sales represent in each year since 1979.

Mr. Trippier: From April 1979 to September 1988 Doncaster metropolitan borough council reported selling 8,289 dwellings to is tenants. The sales represented the following percentages of the estimated stock at the start of each financial year.

	Percentage of Stock Sold to Sitting Tenants
1979-80	Nil
1980-81	0·2
1981-82	3·9
1982-83	8·3
1983-84	2·5
1984-85	1·7
1985-86	1·4
1986-87	1·3
1987-88	1·8
[1]1988-89	1·2

[1] Six months only.

Mr. Redmond: To ask the Secretary of State for the Environment what has been the annual cost since 1979 for South Yorkshire of the publicity material promoting the right to buy council housing and flats; and if he will give in his answer the amount for each local authority.

Mr. Trippier: My answer of 6 March to the hon. Member for Newham, North-West (Mr. Banks) at column *427*, gave the costs of national publicity to draw the attention of tenants to their right to buy their homes. The expenditure cannot be attributed to particular areas.

Rating Reform

Mr. Allen: To ask the Secretary of State for the Environment what response has he received from Nottingham city council to his request for a progress report on implementing the community charge; if he will publish that response; and whether he has received any request for a future survey of costs incurred by the council in implementing the poll tax.

Mr. Gummer: We have received a progress report dated 26 January from the Nottingham city treasurer. As requested, it outlines the council's plans for staffing, accommodation, computing, etc. On the question of publication, I refer the hon. Member to the answer my right hon. Friend gave to the hon. Member for Copeland (Dr Cunningham) on 23 January 1989 at column *459*.

The Government have no plans to introduce a poll tax.

Dr. Cunningham: To ask the Secretary of State for the Environment what are the reasons for publishing community charge practice note No. 16 on joint and several liability before community charge practice note 15 on enforcement; when practice note 15 will be published; and what are the reasons for the delay.

Mr. Ridley: Practice notes are prepared jointly by the Government and the local authority associations. They are published as they become ready, and no reason was seen to delay the note on joint and several liability, which was numbered 16 on our provisional schedule, simply because No. 15 was not yet ready. Discussions on the practice note on enforcement are taking place in the normal way, and it will be published once these are complete.

Mr. Steen: To ask the Secretary of State for the Environment when the remainder of the leaflets listed in the booklet entitled "You and the Community Charge", dealing with *(a)* the rebate scheme, *(b)* students and the community charge, *(c)* the community charge and second homes, *(d)* the collective community charge, *(e)* the appeal system and *(f)* the business rate, are to be made available.

Mr. Gummer *[holding answer 10 April 1989]:* These are all in preparation and will be published variously over the next few weeks.

Colliery Slag Heaps

Mr. Allen: To ask the Secretary of State for the Environment what responsibility he has for the redevelopment of former colliery slag heaps.

Mr. Chope: Responsibility for the redevelopment of former colliery slag heaps is a matter for the developer, subject to the usual planning controls. The Department does provide financial assistance towards the reclamation of derelict spoil heaps in appropriate cases, through the derelict land grant system.

Littlewoods Cup Final

Mr. Allen: To ask the Secretary of State for the Environment if he will visit the Nottingham Forest *v.* Luton Littlewoods cup final on Sunday.

Mr. Moynihan: My right hon. Friend did not attend the cup final. However, my hon. and learned Friend the Minister for Water and Planning and I were present.

Rates

Mr. David Nicholson: To ask the Secretary of State for the Environment if he will print in the *Official Report* the percentage rate increase in each English shire county between 1984-85 and the latest year for which figures are available.

Mrs. Virginia Bottomley: The information requested is as follows:

County council precepts percentage increase 1984-85 to 1989-90

	Per cent.
Avon	54·7
Bedfordshire	75·5
Berkshire	51·3
Buckinghamshire	71·4
Cambridgeshire	64·1
Cheshire	46·7
Cleveland	57·4
Cornwall	61·6
Cumbria	77·1
Derbyshire	64·0
Devon	59·6
Dorset	50·0
Durham	74·0
East Sussex	62·8
Essex	75·8
Gloucestershire	64·3
Hampshire	51·8
Hereford and Worcester	37·2
Hertfordshire	70·5
Humberside	73·6
Isle of Wight	71·2
Kent	52·3
Lancashire	69·7
Leicestershire	71·1
Lincolnshire	56·2
Norfolk	61·2
Northamptonshire	65·5
Northumberland	56·6
North Yorkshire	71·2
Nottinghamshire	52·8
Oxfordshire	77·2
Shropshire	67·9
Somerset	72·0
Staffordshire	53·2
Suffolk	53·5
Surrey	54·1
Warwickshire	76·1
West Sussex	54·2
Wiltshire	79·0

Mr. Matthew Taylor: To ask the Secretary of State for the Environment if he will list by county the percentage annual rate rise from 1981 to 1985 and from 1985 to 1989.

Mrs. Virginia Bottomley: The information requested is as follows:

County council precepts
Average annual percentage increases

	1981-82 to 1985-86	*1985-86 to 1989-90*
Avon	12·1	9·8
Bedfordshire	7·1	13·1
Berkshire	7·7	9·4
Buckinghamshire	6·0	12·8
Cambridgeshire	6·1	12·4
Cheshire	9·0	8·6
Cleveland	10·7	9·2
Cornwall	7·6	11·8
Cumbria	7·7	12·1
Derbyshire	13·6	11·8

Staffordshire	10·7	8·7
Suffolk	6·0	10·2
Surrey	8·2	10·1
Warwickshire	6·8	13·6
West Sussex	7·0	9·4
Wiltshire	8·0	13·4

Chlorofluorocarbons

Dr. Thomas: To ask the Secretary of State for the Environment what was the total amount of chlorofluorocarbons used in the United Kingdom in each of the last five years for which figures are available; and what are the corresponding figures for chlorofluorocarbons substitutes.

Mrs. Virginia Bottomley: I regret that this information is not available.

Sulphur Emissions

Dr. Thomas: To ask the Secretary of State for the Environment what changes he expects in the levels of sulphur emissions in the United Kingdom as a whole over the coming decade; and if he will make a statement.

Mrs. Virginia Bottomley: The Government are determined to cut sulphur emissions, the largest single source of which is electricity generation. We have a firm commitment, embodied in the European Community's large combustion plants directive, to reduce sulphur emissions from existing power stations by 40 per cent. of the 1980 level by 1998. We have also adopted stringent standards for new plants.

Local Development Projects

Dr. Thomas: To ask the Secretary of State for the Environment what local development projects have been undertaken in England; and what are their costs.

Mr. Trippier: "Local development projects" does not, in England, refer to any identifiable group of projects.

Methane Gas (Landfill Sites)

Ms. Walley: To ask the Secretary of State for the Environment if he will name the landfill sites identified in the waste management paper No. 27 published in January where a potential danger from methane gas has been identified.

Mrs. Virginia Bottomley: Waste management paper No. 27 is a technical memorandum on methods for dealing with landfill gas. A site survey is presently being conducted by Her Majesty's inspectorate of pollution in conjunction with local authorities and results will be published as soon as possible.

Water Authority Land Holdings

Mr. David Porter: To ask the Secretary of State for the Environment what arrangements have been made for a review of water authority land holdings.

Mr. Howard: My right hon. Friend has appointed, jointly with the nine water authorities in England, the following firms of surveyors, to carry out a review of land holdings:

Anglian water authority—Jones Lang Wootton
Northumbrian water authority—Sanderson Townend and Gilbert
North West water authority—Grimley J. R. Eve
Severn Trent water authority—Bernard Thorpe and Partners
Southern water authority—Hillier Parker
South West water authority—Chesterton
Thames water authority—Healey and Baker and St. Quintin
Wessex water authority—J. P. Sturge and Sons
Yorkshire water authority—Savills

My right hon. Friend the Secretary of State for Wales has appointed the firm of Gerald Eve, jointly with the Welsh water authority. This review will help ensure that the prospectuses of the new water public limited companies contain any information about the land which is relevant to investors' decisions on whether to apply for shares.

Water plcs (Share Applications)

Mr. Leigh: To ask the Secretary of State for the Environment what plans he has to counter fraudulent applications for shares in the new water plcs.

Mr. Howard: My right hon. Friend has appointed the firm of Price Waterhouse to advise on procedures for preventing and detecting fraudulent share applications when the water authorities are privatised later this year.

North West Water Authority

Mr. Thurnham: To ask the Secretary of State for the Environment (1) what representations he has received about the sale of the Turton/Belmont estate by the North West water authority; and if he will make a statement;

(2) if he will make it his policy to make consent to the North West water authority sale of land on the Turton/Belmont Estate tenanted by the Dunscar Golf Club Ltd. for less than the best price conditional on the offer to that golf club of the parcel of land of which it is tenant for a commercially acceptable price.

Mr. Howard *[holding answer 10 April 1989]:* I have received five letters expressing concern about the sale. The authority does not need my consent if it obtains best price. Otherwise, it is for the authority concerned to apply for consent to dispose of land if it believes this is required. I have received no such application from North West water in respect of the Turton/Belmont estate.

House Prices

Mrs. Mahon: To ask the Secretary of State for the Environment what information he has as to what was the annual rate of increase for house prices in *(a)* the United Kingdom and *(b)* Calderdale in 1988.

Mr. Trippier *[holding answer 10 April 1989]:* Between the last quarters of 1987 and 1988 the price of houses bought with building society mortgages rose at an annual rate of 34 per cent. for the United Kingdom as a whole. Information is not available for Calderdale but the regional index for Yorkshire and Humberside rose by 39 per cent. over the same period.

Eastbourne Waterworks Company

Mr. Gow: To ask the Secretary of State for the Environment by what amount the Eastbourne Waterworks Company has increased its charges since 1 January; which water companies have increased their charges since that date by a larger amount; what powers he has to afford protection to the customers of the Eastbourne Waterworks Company against the price increase; and whether he will make a statement.

Mr. Howard *[holding answer 7 April 1989]:* I am writing to my hon. Friend today.

London Residuary Body

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will remove Mr. Michael Roberts from his position as a part-time member of the London residuary body; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 7 April 1989]:* No.

Mr. Tony Banks: To ask the Secretary of State for the Environment what qualifications he took into account when appointing Mr. Michael Roberts a part-time member of the London residuary body.

Mrs. Virginia Bottomley *[holding answer 7 April 1989]:* Particular account was taken of Mr. Roberts' financial expertise.

Mr. Tony Banks: To ask the Secretary of State for the Environment why he has refused to accept a nomination from the Association of London Authorities to membership of the London residuary body; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 7 April 1989]:* My right hon. Friend the Secretary of State is not aware of any recent nomination from the Association of London Authorities. He is always prepared to consider suggestions for appointments.

Greater London Council Heritage Collection

Mr. Tony Banks: To ask the Secretary of State for the Environment (1) if he will list the items proposed by the

London residuary body to be transferred from the Greater London council's heritage collection to the corporation of the City of London; and if he will make a statement;

(2) if his Department has given consent to the transfer of items from the Greater London council's heritage collection to the City of London under the terms of section 67(1)(b) of the Local Government Act 1985 as amended by section 162(2)(c) of the Education Reform Act 1988; and if he will make a statement;

(3) what proposals he has received from the London residuary body in respect of the Greater London council's heritage collection under the terms of section 67(1)(b) of the Local Government Act 1985 as amended; and what decisions he has made.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The London residuary body has proposed the substantive transfer of portraits and paintings to the Corporation of the City of London. We have made no decisions yet.

Mr. Tony Banks: To ask the Secretary of State for the Environment what are the terms of the deed of gift made between the London residuary body and the City of London in respect of items transferred from the Greater London council's heritage collection.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* The Corporation of the City of London has agreed to make items reasonably available to the public either by display or, if stored, by inspection on request. Items may also be loaned for public exhibitions.

Mr. Tony Banks: To ask the Secretary of State for the Environment what advice was given by his Department to the London residuary body in respect of the transfer of items from the Greater London council's heritage collection to the City of London.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* No advice was sought or given.

Mr. Tony Banks: To ask the Secretary of State for the Environment what are the terms of the loan agreement between the London residuary body and the City of London in respect of items from the Greater London council's heritage collection.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Terms relate inter alia, to insurance, safe custody, conservation, public display, inspection of stored items, loans for public exhibition and return to the LRB in the event of a permanent transfer not being effected.

Mr. Tony Banks: To ask the Secretary of State for the Environment what items have been transferred from the Greater London council's heritage collection by the London residuary body to the Victoria and Albert museum.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Three items have been given to the Victoria and Albert museum: an embroidered panel entitled "Flint" by Diana Springall, a porcelain polar bear, and a Victorian carved corner chair.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will give details of each item from the Greater London council's heritage collection sold by the London residuary body at auction: and how much was realised for each item and in total.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Four items realised in all a sum of £30,195: an antique bookcase, an antique desk and two clocks.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will give details of the items transferred from the Greater London council's heritage collection by the London residuary body to *(a)* the London borough of Bromley and *(b)* the Thames Water authority; and what price was paid for each item in total.

Mrs. Virginia Bottomley *[holding answer 4 April 1989]:* Trophies and memorabilia related to Crystal palace were given to the London borough of Bromley as functional successor to the GLC for Crystal palace. A painting of the Thames barrier was given to the Thames water authority as functional successor to the GLC for the Thames barrier.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will list each of the bodies which have received or are likely to receive items from the Greater London council's heritage collection since 1 April 1986.

Mrs. Virginia Bottomley *[holding reply 4 April 1989]:* The London borough of Bromley, the Corporation of the City of London, the London borough of Harrow, the Inner London education authority, the London fire and civil defence authority, the Thames water authority, the Victoria and Albert museum, and the purchasers of items disposed of at auction.

OVERSEAS DEVELOPMENT

Tanzania

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussion his Department is having with the Government of Tanzania to develop a joint project for the mining of coal in that country.

Mr. Chris Patten: No such discussions are taking place at present. The Government of Tanzania have not raised this issue with us.

Kampuchea

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs what guarantees he has received that the United Kingdom aid provided for the Kampuchean refugee camps in Thailand goes only to those camps to which the United Nations has access and that no United Kingdom aid, either bilateral or multilateral, goes to camps controlled by the Khmer Rouge.

Mr. Chris Patten: Our assistance, which is provided through the relevant United Nations agencies, is subject to the stipulation that it should go only to the occupants of those camps controlled by the non-Communist elements of the Cambodian resistance. We have received assurances that this stipulation is observed.

Mrs. Clwyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will increase the United Kingdom contribution to the UNBRO education and training for Kampuchean refugees in camps in Thailand.

Mr. Chris Patten: I did so last month by increasing our 1988-89 contribution to UNBRO by £100,000 to £350,000 following an appeal for additional funds based on increased requirements in the camps.

SCOTLAND

Funding Sources

Mr. Sillars: To ask the Secretary of State for Scotland if he will list sources of funding to which organisations previously funded by the Manpower Services Commission may apply for assistance.

Mr. Lang: The availability of assistance for any particular organisation will depend on its functions and the particular projects in which it is involved.

Community Charge

Mr. Cohen: To ask the Secretary of State for Scotland whether he will list the uses and disclosures of personal data that can currently be made by charging authorities and community charges registration officers for purposes other than those directly related to the community charge; and whether he will make a statement.

Mr. Lang: Personal data collected for community charges purposes can only be disclosed through inspection of community charges register. The register is available for inspection to the extent specified and for the purposes set out in section 20 of the Abolition of Domestic Rates Etc. (Scotland) Act 1987, as amended by the Local Government Finance Act 1988, and in regulation 16 of the Community Charges (Registration) (Scotland) (No. 2) Regulations 1988.

Mr. Allen: To ask the Secretary of State for Scotland how many people in Scotland have *(a)* registered and *(b)* not registered for the poll tax; how many have (i) paid and (ii) not paid the poll tax; and how many are currently undergoing court proceedings.

Mr. Lang: Registration for and payment of the community charges are matters for individual community charges registration officers and levying authorities (regional and islands councils) respectively and the information requested is not held centrally. However, I understand from figures provided by them that registration is estimated to be approaching 99 per cent. of the adult population. Local authorities have published no figures regarding payment levels.

Head Teachers

Mr. Bradley: To ask the Secretary of State for Scotland over each of the 10 years from 1978 to 1988 how many *(a)* male and *(b)* female head teachers of schools in Scotland have left for the following reasons: *(a)* normal retirement, *(b)* early retirement, specifying the various reasons for this, *(c)* death in service, and *(d)* death within five years of retirement; and how many in each category were from (i) primary schools, (ii) secondary schools, (iii) special schools and (iv) other schools.

Mr. Michael Forsyth: The information requested is not available.

Sports Clubs

Mr. Pendry: To ask the Secretary of State for Scotland (1) what provision is made for rates relief for sports clubs in Scotland;

(2) what additional funds have been made available to Scottish local authorities to enable sports clubs to obtain 100 per cent. rate relief.

Mr. Lang: Full account is taken of the relief that each local authority plans to give to sports clubs when calculating that authority's entitlement to revenue support grant. The cost of such relief in rate income forgone and in extra grant for 1989-90 is estimated to be £3 million.

Rating Reform

Mr. Allen: To ask the Secretary of State for Scotland what meetings he has had since 1 April on the implementation, registration and collection of the poll tax in England and Wales.

Mr. Lang: None.

Health Boards

Mr. Galbraith: To ask the Secretary of State for Scotland when he last met the chairmen and general managers of health boards; and what subjects were discused.

Mr. Michael Forsyth: As part of my regular pattern of meetings I met the chairmen of health boards and of the Common Services Agency on 10 March, when we discussed a wide range of issues relating to the National Health Service in Scotland. I do not regularly meet the general managers as a group, though the Scottish Home and Health Department does.

Children's Playgrounds

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) if he will list in the *Official Report* those regulations which govern safety requirements in children's playgrounds belonging to local authorities;

(2) what requirements are imposed on local authorities to ensure that local authorities play areas have yielding ground surfaces below playground equipment including swings and climbing frames;

(3) what guidance has been given to local authorities regarding safety surfaces in local authority play areas;

(4) what plans he has to introduce requirements to lay safety surfaces on local authority playgrounds.

Mr. Michael Forsyth: There are no regulations governing safety requirements or safety surfaces in children's playgrounds belonging to local authorities. The Health and Safety at Work etc. Act 1974 requires all playground operators to take all reasonable measures to ensure the safety of such facilities and to report certain accidents to the Health and Safety Executive, which enforces the Act. Additionally, a number of British standards apply to playground surfaces and equipment. I have no plans for further requirements or guidance to local authorities.

Historic Churches

Mr. Kirkwood: To ask the Secretary of State for Scotland whether he has any plans to introduce a scheme to assist the Church of Scotland to retain historic churches no longer used for acts of worship and which would otherwise be liable to be demolished; and if he will make a statement.

Lord James Douglas-Hamilton: Churches in Scotland of any denomination may receive historic building repair grant for repairs and restoration, if they are of outstanding

architectural merit or historic interest. Where a church is no longer used for worship, grant is available to encourage a prospective purchaser to restore the building for a new purpose. Over the past 10 years repair grants awarded to former churches for which new uses have been found have amounted to about £2 million.

Road Signs

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will make a statement outlining current criteria used to determine which forward destinations are shown on road direction signs on primary routes in Scotland.

Lord James Douglas-Hamilton: First, places are selected as being of traffic importance because of their value as reference points for drivers to assist them to find the most satisfactory route on long journeys. They are then classed as either super-primary destinations (Edinburgh, Glasgow and Inverness only) or primary destinations (all others). As a rule advance direction signs should contain only one place name for each direction and on primary routes this should be the next primary destination along the immediate route. A super-primary destination may also appear. This rule is not applied so rigidly as to impair the effectiveness of the signing system and occasionally additional primary destinations may appear.

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will list in the *Official Report* all places of traffic importance in the Borders region.

Lord James Douglas-Hamilton: They are Coldstream, Galashiels, Hawick, Jedburgh and Peebles.

Mr. Kirkwood: To ask the Secretary of State for Scotland when he expects the road signposting of the town of Hawick on that part of the A7 in the Dumfries and Galloway region and on the M6 to be carried out.

Lord James Douglas-Hamilton: When the proposal to signpost Hawick was agreed in June 1986 it was on the basis of a gradual programme to implement the necessary sign changes over five years, with priority for replacement of these groups of signs that were in the worst state of repair.

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will list in the *Official Report* locations of primary route signs situated to the south of the town of Hawick which show *(a)* Hawick and *(b)* Galashiels as a place of traffic importance.

Lord James Douglas-Hamilton: Work on amending signposting to the south of Hawick to show Hawick as a place of traffic importance has not yet started in Dumfries and Galloway or Cumbria. However, Hawick has been added to a route confirmatory sign 1½ miles south of Hawick and to an advance direction sign at the A7/B711 junction, both in Borders region. Galashiels appears on primary route signs at the following locations:

Cumbria

M6/A7	Junction 44 (for travellers on A7 northbound, A74 southbound and approaching from Brampton/Carlisle Airport).
A7	Harker Park.
A7	Blackford (south end and St. John the Baptist Parish Church).
A7	West Linton.
A7/A6071	Longtown (north and south).
A7	Oakbank.

Dumfries and Galloway

A7/B7201	Canonbie.
A7/B6357	Canonbie.
A7/B720	Hollows.
A7/B6318	Skipper's Bridge.
A7/B7068	Langholm.
A7/C76A	Whitsheils.
A7/C78A	Sorbie.
A7/C77A	Fiddleton Toll.

Mr. Kirkwood: To ask the Secretary of State for Scotland what plans he has to list the town of Hawick as a place of traffic importance alongside the town of Galashiels on road signs from the north within the Lothian region.

Lord James Douglas-Hamilton: I agreed last month that Hawick should be included alongside Galashiels on road signs from the north within Lothian region.

Petrochemical Development (Peterhead)

Mr. Salmond: To ask the Secretary of State for Scotland what information he has on the development of the North Collielaw site in Peterhead by petrochemical companies; and if he will make a statement.

Lord James Douglas-Hamilton: My right hon. and learned Friend is not aware of any such proposals at present. Any proposal would be subject to normal planning procedures and, in the first instance, would be the responsibility of Banff and Buchan district council as planning authority.

Sexual Assaults

Mr. Menzies Campbell: To ask the Secretary of State for Scotland how many people have been tried in Scotland for sexual assaults of all kinds for each of the past five years for which figures are available.

Lord James Douglas-Hamilton: The information available is given in the table:

Year	*Persons called to court*	*Persons tried following a plea of not guilty*
1983	197	103
1984	182	94
1985	221	126
1986	234	127
1987	225	116

The term "sexual assaults" includes rape, assault with intent to rape and indecent assault.

Toll Charges

Mr. Home Robertson: To ask the Secretary of State for Scotland what consideration he is giving to private funding for a new motorway between Edinburgh and the English border; and what is his policy concerning the imposition of toll charges on any part of the national road network.

Lord James Douglas-Hamilton: No Government consideration is being given to private funding for a new motorway from the border to Edinburgh. My right hon. and learned Friend is aware that a possible extension to

Scotland of a proposed east coast motorway project from Cambridge to Teesside was mooted to Scottish local authorities by the group of promoting local authorities in England. He understands that the Scottish authorities approached are unlikely to favour considering an extension.

As to toll charges on any part of the national road network, there are, of course, charges already on, for example, the Forth, Tay and Erskine bridges. Tolls can be an appropriate means of meeting all or part of capital costs.

Prisoners

Mr. Moss: To ask the Secretary of State for Scotland how many *(a)* successful escapes and *(b)* unsuccessful escape attempts there have been from prisons in Scotland by category A prisoners in each of the last 10 years.

Lord James Douglas-Hamilton *[holding answer 4 April 1989]:* The information is set out in the table.

Year	*Prison*	*Escapes*	*Attempted escapes*
1979	Perth	1	—
1980	—	—	—
1981	—	—	—
1982	Peterhead	3	1
1983	Peterhead	—	1
1984	—	—	—
1985	Peterhead	—	3
1986	Inverness	—	2
1987	—	—	—
1988	—	—	—

WALES

Valleys Initiative

Dr. Thomas: To ask the Secretary of State for Wales (1) what representations he has received concerning the voluntary work content of the valleys initiative programme; and if he will make a statement;

(2) what consultations his Department has undertaken with regard to the voluntary effort content of the valleys initiative programme;

(3) if he will make a statement on the progress of the voluntary effort content of the valleys initiative programme.

Mr. Peter Walker: Representations have been received from the Wales Council for Voluntary Action and the Mid Glamorgan Association of Voluntary Organisations about community development activity and the development of voluntary services generally in the valleys.

Consultations are taking place with the county associations of voluntary organisations in Gwent, Mid Glamorgan and West Glamorgan to agree a programme of action for which £100,000 has been set aside in 1989-90. This is in addition to the substantial voluntary sector funding already made available under other headings.

The urban programme is continuing to provide very substantial support for a wide range of voluntary schemes including those concerned with social services, environmental improvement and business support and advice. In 1989-90 allocations to voluntary schemes benefiting the valleys will total £3 million.

Good progress is also being made with other schemes identified in the programme and being undertaken by the Community Projects Foundation, Groundwork Foundation, Prince of Wales Committee and UK2000, all of which are expected to make an important contribution in the valleys.

Housing

Dr. Thomas: To ask the Secretary of State for Wales what measures his Department is taking to ensure that changes in his Department's financial provision for housing associations allow the associations in Wales to continue to provide housing for rent to tenants on low wages; and if he will make a statement.

Mr. Grist: The Welsh Office is particularly concerned about the situation facing people on low incomes in Wales. We have accordingly secured Treasury agreement that there will be no maximum rate of housing association grant in Wales this year. This will give Housing for Wales the flexibility that it needs to progress schemes which reflect local needs and costs in every area in Wales and for all categories of people in housing need.

Dr. Thomas: To ask the Secretary of State for Wales what is his policy with regard to the promotion of low-cost home ownership schemes in Wales; and if he will make a statement.

Mr. Grist: We have asked Housing for Wales for this year to give particular attention to low-cost home ownership schemes, particularly in rural areas. Welsh Office officials have also recently secured a significantly higher value limit for shared ownership schemes as it is important that this type of development should continue throughout the Principality.

Dr. Thomas: To ask the Secretary of State for Wales if he will list *(a)* the number of dwellings owned, *(b)* the number of dwellings built, *(c)* the number of dwellings sold and *(d)* the number of dwellings purchased from the private sector, in each year since 1980 by each housing authority in Wales.

Mr. Grist: The information requested is not readily available and I will reply as soon as possible.

Dr. Thomas: To ask the Secretary of State for Wales if he will give the details of each request he has received from housing authorities for special loans to allow them to purchase dwellings from the private sector.

Mr. Grist: The Welsh Office has received bids totalling £1·2 million from the following district authorities:

Aberconwy
Arfon
Ceredigion
Dwyfor
Isle of Anglesey
Montgomeryshire
Preseli (Pembs)

We are currently considering the applications and hope to announce the actual allocations shortly.

Dr. Thomas: To ask the Secretary of State for Wales how many second homes there are in each district authority area in Wales; and in each case what percentage of the total housing stock they represent.

Mr. Grist: Estimates of the number of second homes alone are not available. The Welsh inter-censal survey,

however, provides an assessment of the percentage of homes identified as definite or presumed second/holiday homes. These figures are given in the following table:

Second and Holiday Homes 1986

	Number of Second and Holiday Homes	*Second and Holiday Homes as per cent. of District Stock (a)*

Dr. Thomas: To ask the Secretary of State for Wales what is the average price of each category of dwelling in each district authority area in Wales; and what are the corresponding figures for each year since 1979.

Mr. Grist: Average dwelling prices are not available by district. The average dwelling prices by type of dwelling for Wales as a whole are shown in the following table:

Average private sector dwelling prices by type of dwelling: Wales

£000's

Year	Bungalow	Detached house	Semi-detached house	Terraced house	Flat or maisonette in converted house	Purpose built flat or maisonette	All dwellings
1979	18·5	26·0	15·6	11·4	13·2	11·5	17·1
1980	21·5	29·6	18·3	13·6	16·1	17·0	19·4

Dr. Thomas: To ask the Secretary of State for Wales what is the total per capita public spending on housing in *(a)* Wales and *(b)* each district authority area in Wales; and what are the corresponding figures for each year since 1979.

Mr. Grist: The total per capita public spending on housing by local authority, excluding housing benefit, any expenditure by the Housing Corporation and advances under the Housing and Small Dwellings Acquisition Act, for each local authority and for Wales, for each financial year since 1979-80 is shown in the following table:

Local authority gross expenditure on housing per capita

	1979-80 £/head	1980-81 £/head	1981-82 £/head	1982-83 £/head	1983-84 £/head	1984-85 £/head	1985-86 £/head	1986-87 £/head	Provisional 1987-88 £/head

Health Service

Dr. Thomas: To ask the Secretary of State for Wales what is the total amount of money raised towards the work of each hospital in Wales from voluntary and charitable sources since 1979.

Mr. Grist: The information requested is not collected centrally.

Dr. Thomas: To ask the Secretary of State for Wales how much money has been raised through public appeals, donations and other voluntary and charitable sources towards the cost of each whole body scanner purchased for National Health Service use in Wales since 1979.

Mr. Grist: This information is not held centrally.

Dr. Thomas: To ask the Secretary of State for Wales which National Health Service hospitals in Wales at present have whole body scanner facilities; when the equipment was installed in each case; and which hospitals are planned to be provided with such facilities anew or to replace obsolete facilities.

Mr. Grist: The following hospitals in Wales have whole body scanning facilities installed as shown:

Hospital	*Year of installation*
East Glamorgan Hospital, Church Village	1988
Llandough Hospital, Penarth	1988
Morriston Hospital, Swansea	1986
Nevill Hall Hospital, Abergavenny	1987
Royal Gwent Hospital, Newport	1987
Singleton Hospital, Swansea	1989
University Hospital of Wales	1984 and 1987
Velindre Hospital, Cardiff	1988
West Wales General Hospital, Carmarthen	1987
Ysbyty Glan Clwyd, Rhyl	1987
Ysbyty Gwynedd, Bangor	1988
Ysbyty Maelor, Wrexham	1987

The Welsh Office has at present no plans to provide additional whole body scanning facilities although their availability and disposition is to be reviewed. It will be for health authorities to make appropriate arrangements for the replacement of equipment.

Dr. Thomas: to ask the Secretary of State for Wales whether all outstanding disputes with developers and contractors engaged in work on ysbyty Gwynedd have now been resolved satisfactorily; and if he will make a statement.

Mr. Grist: All disputes with the designers for this hospital scheme have been resolved but there remain outstanding disputes with contractors for the works.

The Welsh Health Common Services Authority continues to withhold £130,000 from IDC Ltd. to pay for remedial work to windows and cavities in the residential buildings, where further remedial work may be necessary to modify some staircase balustrades and to repair defective wall ties. Liability for these items has not yet been determined.

In the main hospital buildings there are items in dispute associated with the quality of the floor screeds in ground floor circulation areas and with the adequacy of fixings for suspended ceilings. These items are the subject of negotiations presently with the main building contractor Kyle Steward Ltd.

Welsh Language

Dr. Thomas: To ask the Secretary of State for Wales what measures he is undertaking to ensure that a sufficient number of qualified teachers are available in Wales in order to implement the provisions of the Education Act 1988 relating to the teaching of the Welsh language.

Mr. Wyn Roberts: Work is in hand to estimate the number of teachers who will be needed to teach Welsh in the national curriculum. Officials have met local education authority representatives to discuss how the Welsh language provisions of the national curriculum are to be delivered and these discussions will continue. It is clear that the teaching capacity which will be needed must be met, to a large extent, by a programme of in-service training for existing teachers. Teachers training colleges will play an important part in delivering this in-service training programme.

The local education authorities training grant scheme includes a national priority category for Welsh language training. In 1989-90 grant is available towards expenditure of £223,000 under this category. Further funding is also being provided from other Welsh Office programmes to assist authorities to increase their present in-service training provision.

The teaching as a career unit (TASC) and its Welsh-speaking field officer for Wales are making particular efforts to persuade more Welsh speakers to train as teachers. This includes young people leaving school or colleges, and also more mature people seeking a change of career or married women wishing to take up employment.

Dr. Thomas: To ask the Secretary of State for Wales what assessment he has made of whether the financial resources allocated for the coming year to the Welsh language education development committee will be sufficient to allow it to undertake its work during that period; and if he will make a statement.

Mr. Wyn Roberts: The resources allocated for 1989-90 are sufficient to meet the Welsh language education development committee's running costs and to undertake a programme for the development of Welsh language education which accords with educational needs. The grant offer has been accepted by the committee. In so far as the committee's proposals were not consistent with the needs of the national curriculum, or would have duplicated activity already being undertaken, or were deficient in other respects, they did not receive support. Other proposals needed further development taking account of work being undertaken by other bodies and of the extent of existing provision. Proposals for research are still receiving consideration.

Dr. Thomas: To ask the Secretary of State for Wales what plans he has to increase funding for the Welsh language development committee; and if he will make a statement.

Mr. Wyn Roberts: The funding for the Welsh language education development committee and for its proposed work programme increased from £248,000 last year to £669,000 this year. As previously announced, additional resources are available to support further work on the development of Welsh language education, and discussions on this are continuing. Funding for future years will be decided taking account of the merits of future proposals and the availability of resources.

Roads

Dr. Thomas: To ask the Secretary of State for Wales if he will make a statement on the progress and future plans for the improvement of the A470.

Mr. Wyn Roberts: This information is set out in "Roads in Wales 1989: Progress and Plans for the 1990s", which was published on 10 April.

Dr. Thomas: To ask the Secretary of State for Wales what was his Department's total expenditure on roads in each year since 1979 in *(a)* each parliamentary constituency in Wales and *(b)* each district authority area.

Mr. Wyn Roberts: This information is not available in the form requested.

Homelessness

Dr. Thomas: To ask the Secretary of State for Wales if he will list the numbers of people presented as homeless and accepted as homeless in each district authority in Wales.

Mr. Grist: The latest available information relates to the final quarter of 1988. The number of households presented as homeless and accepted as homeless in that period are given in the table:

Number of households presented and accepted as homeless October—December 1988

(a) under part III of the Housing Act 1985.

North-South Transport Links

Dr. Thomas: To ask the Secretary of State for Wales if he will make a statement on his Department's progress and plans to improve transport links between north and south Wales.

Mr. Wyn Roberts: Information on road links is set out in "Roads in Wales 1989: Progress and Plans for the 1990s" published on 10 April. Public transport services are a matter for British Rail and for the county councils and public service operators.

Labour Statistics

Dr. Thomas: To ask the Secretary of State for Wales what is the average annual salary of *(a)* all men in full-time employment, *(b)* all women in full-time employment and *(c)* all in full-time employment in (i) Wales, (ii) each county in Wales and (iii) each district in Wales.

Mr. Peter Walker: Information for annual average earnings is not collected. The new earnings survey results giving data for average gross weekly earnings are given in the following table. District data are not available.

Average gross weekly earnings of full-time employees on adult rates —whose earnings were not affected by absence. April 1988

	Male £	Female £	All £
Clwyd	220·0	139·1	195·9
Dyfed[1]	200·4	145·7	181·2
Gwent	218·8	150·7	197·8
Gwynedd	204·0	147·7	187·3
Mid Glamorgan	221·5	149·4	198·5
Powys	191·2	[3]	182·2
South Glamorgan	224·9	161·3	203·1
West Glamorgan[2]	220·7	145·9	199·6
Wales	217·8	150·3	196·5

[1] Excluding Llanelli.
[2] Including Llanelli.
[3] Data not publishable due to low sample numbers giving a high standard error.
Source: New earnings survey April 1988.

Dr. Thomas: To ask the Secretary of State for Wales what is the current rate of unemployment in *(a)* Wales, *(b)* each travel-to-work area in Wales and *(c)* each district authority area in Wales.

Mr. Peter Walker: The seasonally adjusted unemployment rate for Wales at 9 February 1989 was 8·9 per cent.

Information on the travel-to-work areas in Wales is shown in the following tables:

Travel-to-work area	Unemployment rate (Per cent.)[1]
Aberdare	17·5
Aberystwyth	8·1
Bangor and Caernarfon	13·3
Blaenau Gwent and Abergavenny	13·8
Brecon	6·1
Bridgend	10·5
Cardiff	9·1
Cardigan	18·0
Carmarthen	6·7
Conwy and Colwyn	11·6
Denbigh	8·0
Dolgellau and Barmouth	11·1
Fishguard	16·1
Haverfordwest	14·0
Holyhead	17·7
Lampeter and Aberaeron	13·2
Llandeilo	9·7
Llandrindod Wells	7·3
Llanelli	12·3
Machynlleth	11·9
Merthyr nd Rhymney	14·1
Monmouth	10·5
Neath and Port Talbot	10·1
Newport	9·5
Newtown	6·0
Pontypool and Cwmbran	10·9
Pontypridd and Rhondda	12·1
Porthmadoc and Ffestiniog	10·8
Pwllheli	19·0
Shotton, Flint and Rhyl	10·6
South Pembrokeshire	17·6
Swansea	11·8
Welshpool	5·9
Wrexham	10·0

[1] Unemployment rates quoted are as at 9 February 1989, which are the latest available and are on a basis which does not take into account the self-employed, Her Majesty's forces and those on Government-related training schemes. The corresponding rate for Wales on this basis is 11·0 per cent.
Unemployment rates are not calculated for districts.

Lakes (Pollution)

Dr. Thomas: To ask the Secretary of State for Wales what is the total number of lakes in each county in Wales in which fish life is affected by acidification from acid rain and other sources.

Mr. Grist: No categoric answer can be given. Provisional results from a Welsh water authority pilot survey of 37 lakes in Gwynedd located in class I and II catchments (that is, vulnerable to acidification) show that between 8 and 21 per cent. are thought to have suffered fishery decline which could be acid water related.

Dairy Processing Industry

Dr. Thomas: To ask the Secretary of State for Wales if he will list those representations which he has received concerning the dairy processing industry in Wales since 1983; and if he will make a statement.

Mr. Peter Walker: Since 1983 I have received a number of representations about a range of issues affecting the dairy processing industry in Wales.

Open-cast Coal Sites

Dr. Thomas: To ask the Secretary of State for Wales how many of the planning applications to develop open-cast coal sites submitted in 1987-88 in Wales were for *(a)* land, which at the time of the application, was being used for agriculture, *(b)* land which at the time of the application, was being used for forestry, *(c)* previously undisturbed countryside, *(d)* land which had previously been mined and *(e)* land which was already derelict due to previous industrial activity; and, in each case, if he will name the sites and the acreage involved.

Mr. Grist: This information is not available centrally.

Property Sales

Dr. Thomas: To ask the Secretary of State for Wales what role his Department played in the sales of former Dairy Crest creameries in Wales, closed since 1979.

Mr. Peter Walker: In addition to encouraging bodies such as the Welsh Development Agency and Mid Wales Development actively to seek alternative uses for the plants involved, my Department provided assistance, under section 7 of the Industrial Development Act 1982, to the new owners of the former Dairy Crest creameries at Llangefni, Felinfach and Newcastle Emlyn.

In the case of the creamery at Johnstown, the Welsh Development Agency sought and obtained my Department's approval to offer the new enterprise support under the rural conversion grant scheme.

Dr. Thomas: To ask the Secretary of State for Wales what steps are taken by his Department to ensure that property sold in Wales by publicly-owned companies is sold to the buyer most likely to bring the greatest economic advantages to the area; and if he will make a statement.

Mr. Peter Walker: The Government's policy is that surplus land should be sold promptly at the current best price.

WINvest

Dr. Marek: To ask the Secretary of State for Wales if he will give the number of inquiries received by WINvest for the nine last quarters for which figures are available.

Mr. Peter Walker: WINvest has received many inquiries in the period under question, although the number involved has not been recorded. Inquiries are not considered to be a useful indicator of the genuine level of interest in Wales as a location for investment.

Woodlands

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list all woodlands for each county in Wales which have been sold by the Forestry Commission in each of the last seven years indicating for each such woodland the *(a)* acreage, *(b)* grid reference and *(c)* species composition.

Mr. Peter Walker *[holding answer 9 March 1989]:* The information is given in the following tables:

* The species composition is not available in any more detail than B for mainly broadleaves, C for mainly conifers and U for unplanted.

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list all woodlands currently proposed for sale in Wales by the Forestry Commission and state for each such woodland the *(a)* acreage, *(b)* map reference and *(c)* species composition.

Mr. Peter Walker *[holding answer 9 March 1989]* The information is given in the following table:

Name	Area (hectares)	Grid Reference	Species*

HEALTH

Schizophrenia

Mr. Allen: To ask the Secretary of State for Health if he will publish in the *Official Report* the number of patients with a diagnosis of schizophrenia eligible for after-care under section 117 of the Mental Health Act 1983 and discharged after detention under *(a)* section 3, *(b)* section 37 and *(c)* sections 47 and 48 of the Act.

Mr. Freeman: Central statistics for 1986, the most recent year for which figures are held, show the following numbers of discharges with a main diagnosis of schizophrenia from National Health Service mental illness hospitals and units in England immediately subsequent to a period of formal detention under these sections of the Mental Health Act 1983: *(a)* section 3, 933; *(b)* section 37, 236; *(c)* section 47 and 48, 6. The numbers do not relate to individuals as the same patients may be discharged and readmitted more than once during the year.

All patients discharged following detention under these sections are eligible for after-care under section 117 of the Act.

Abortions

Mr. Redmond: To ask the Secretary of State for Health if he will list by year from April 1986 to the latest available date the total number of abortions performed under ground five of the Abortion Act 1967 in the Trent regional health authority; and what percentage this represents by year of all abortions performed.

Mr. Freeman: I regret that the information requested is not readily available and could be provided only at a disproportionate cost. I will write to the hon. Member with the figures for the most recent year available.

Mr. Redmond: To ask the Secretary of State for Health if he will list the total number of abortions performed by year in the Trent regional health authority from April 1968 to the latest available date.

Mr. Freeman: The information is shown in the table for residents of England and Wales.

Number of terminations performed under the Abortion Act 1967 in Trent regional health authority[1] to usual residents of England and Wales, 27 April 1968 to 30 June 1988.

Year	Number
1968[1 3]	715
1969[1]	2,035

[4] Provisional figure for 1 January to 30 June.

Health Service Expenditure

Mr. Knox: To ask the Secretary of State for Health what percentage of the gross domestic product was spent on the National Health Service in each year since 1959.

Mr. Freeman: The table shows the percentage of GDP spent on the National Health Service for the years 1959 to 1988. The expenditure figures for 1959 to 1964 have been taken from the report of the Royal Commission on the National Health Service. Figures from 1965 have been derived from the United Kingdom national accounts prepared by the Central Statistical Office.

Gross expenditure on the NHS as a percentage of GDP

1988	5·2

General Practitioner Services

Mr. Hannam: To ask the Secretary of State for Health what is the average cost per patient per annum for general practitioner services.

Mr. Freeman: In 1987-88, the latest year for which full information is available, the total cost of the general medical services in England represented an average cost per patient per annum of about £26·50. Including the cost of drugs and appliances prescribed by general medical practitioners, the average cost rises to about £59. These figures exclude any element for the costs of hospital referrals initiated by general medical practitioner, or for the administrative costs of family practitioner committees which manage these and other family practitioner services.

Benzodiazepines

Ms. Primarolo: To ask the Secretary of State for Health what is his estimate of the percentage of those currently taking benzodiazepines in the United Kingdom who are addicted to the drug.

Mr. Freeman: We do not hold this information centrally.

Ms. Primarolo: To ask the Secretary of State for Health if he will introduce a compensation system for people whose lives have been damaged by benzodiazepine addiction.

Mr. Freeman: We have no plans to do so.

Bolvidon

Ms. Primarolo: To ask the Secretary of State for Health how many prescriptions were dispensed for the drug Bolvidon by community pharmacists in the last year for which figures are available.

Mr. Mellor: Bolvidon is a branded form of Mianserin hydrochloride. In England in 1987 community pharmacists dispensed 150,200 prescriptions written for Bolvidon. In the same period, community pharmacists dispensed a further 412,100 prescriptions written for Mianserin, in a proportion of which cases they will have supplied Bolvidon.

Methicillin-resistant Staphylococcus Aureus

Mr. Ashley: To ask the Secretary of State for Health how many hospital patients were infected with methicillin-resistant staphylococcus aureus in the last year for which figures are available; how many died; and if he will make a statement.

Mr. Freeman: In the year to 31 December 1988, 625 hospital patients were infected with methicillin-resistant staphylococcus aureus (MRSA) with 24 deaths attributable or partly attributable to the infection. High standards of hygiene for both patients and staff, and the thorough cleaning of infected wards, are important for the control of MRSA. A national survey of MRSA is in continual progress conducted jointly by the hospital infection division of the public health laboratory service and the Communicable Disease Surveillance Centre with results being available to microbiologists on request.

Neurosciences Centres (South East Thames Region)

Mr. Gerald Bowden: To ask the Secretary of State for Health when he will announce a decision on the future siting of a neurosciences centre in the South East Thames region.

Mr. Mellor: I have today approved the proposal by South East Thames regional health authority to build a new neurosciences centre on Denmark hill, costing more than £27 million. It will bring together the two existing neurosciences units at the Brook hospital, Greenwich and at the Maudsley hospital, thus husbanding highly specialised professional expertise in order to improve the standard of treatment to patients. The centre will be on the Maudsley hospital site, but linked by a bridge to King's College hospital. The future siting of a neurosciences centre has been the subject of many years of study, with resulting uncertainty for the existing units at the Brook and the Maudsley. This decision will bring those years of uncertainty to an end. The health authorities want to improve the services now provided at the Brook hospital and I have asked the region to come back to me at the end of this year with their proposals for a range of hospital provision in the Greenwich district which will meet the needs of local people.

SOCIAL SECURITY

Disabled People

Mr. Pawsey: To ask the Secretary of State for Social Security when sections 2, 3, 7, 8(ii) and 11 of the Disabled Persons (Services, Consultation and Representation) Act 1986 are likely to be implemented.

Mr. Scott: We plan to implement section 11 later this year. We have accepted the local authority associations' view that the next priority should be section 7, and detailed work on this is well under way. It will be followed by work on the remaining sections of the Act.

Mr. Alfred Morris: To ask the Secretary of State for Social Security what account will be taken of the need of some people with disabilities for more space or extra rooms in deciding notional market rents for the purpose of housing benefit claims; and if he will make a statement.

Mr. Peter Lloyd: The Government do not believe that the Exchequer should in general subsidise spare accommodation through the housing benefit scheme but we accept that some housing benefit claimants, such as the disabled, may need a spare room.

Under the arrangements from 1 April 1989 for assessment of reasonable market rents, rent officers will indicate whether or not housing benefit claimants are living in accommodation with an excessive number of rooms and, if so, will assess a notional rent for accommodation of an appropriate size. They will take account of the number of people in the household, including any carer living with a disabled person.

The decision whether to restrict the rent eligible for housing benefit is one for the local authority but, after 13 weeks, it will generally receive subsidy on benefit only up to the level of the rent officer's assessment. However, in the case of a disabled person, the local authority may restrict the eligible rent only if it is satisfied that suitable cheaper alternative accommodation is available and it is reasonable to expect the claimant to move. If the authority cannot restrict the rent, it will receive full, 97 per cent., subsidy up to the level of the rent officer's assessment and 50 per cent. sbsidy on benefit paid above that level. Benefit expenditure not met by direct subsidy is reflected in the rates support grant arrangements.

Industrial Injuries and Diseases

Mr. Wigley: To ask the Secretary of State for Social Security if he will list the lung diseases which are currently recognised as industrial diseases for the purposes of workers' compensation legislation.

Mr. Scott: The lung diseases prescribed for defined occupations under the Social Security (Industrial Injuries) (Prescribed Diseases) Regulations are:—

Extrinsic allergic alveolitis (including farmer's lung)
Poisoning by oxides of nitrogen
Poisoning by beryllium or a compound of beryllium
Poisoning by cadmium
Primary carcinoma of a bronchus or of a lung
Pneumoconiosis
Byssinosis
Diffuse mesothelioma (primary neoplasm of the mesothelium of the pleura or of the pericardium or of the peritoneum)
Occupational asthma (due to exposure to specified agents)
Primary carcinoma of the lung where there is accompanying evidence of one or both of the following *(a)* asbestosis; *(b)* bilateral diffuse pleural thickening
Bilateral diffuse pleural thickening
Lung cancer

Community Care (Grants and Loans)

Mr. Cohen: To ask the Secretary of State for Social Security if he will indicate the number of cases in the year end 31 March for the Walthamstow, Leytonstone and Woodrange park offices of his Department in which applications for *(a)* community care grants and *(b)* community care loans were turned down.

Mr. Peter Lloyd: Such information is available in the Library for the period April 1988 to February 1989. Information for March 1989 will be placed in the Library later this month.

Central Pensions Office

Mr. Peter Griffiths: To ask the Secretary of State for Social Security (1) what is the average waiting time for a

telephone call to the central pensions office in Newcastle after it has been received at the switchboard before it is answered by the appropriate office;

(2) what plans there are to improve the speed of response to telephone calls by the appropriate departments at the central pensions office at Newcastle after they have been received at the switchboard.

Mr. Peter Lloyd: The average time when the required extension is free is 10 seconds. Information is not collected showing how long it takes to connect to an extension when it is engaged.

A new telephone exchange and additional lines are to be installed at Newcastle central office later this year which will help to improve response times particularly through automatic re-routing of calls.

Grants and Loans

Dr. David Clark: To ask the Secretary of State for Social Security, what are the staff to claimant ratios for social fund departments *(a)* nationally, *(b)* in the Northern region, *(c)* in South Tyneside, *(d)* in Gateshead, *(e)* in Newcastle, *(f)* in Sunderland and *(g)* in North Tyneside, respectively.

Mr. Peter Lloyd: The information is not available in the format requested. Details are recorded monthly of the staff days spent on social fund activity. Information to 28 February 1989, the latest available date, is given in the table.

February 1989

	Staff days spent on Social Fund	*Income Support Load*
National	67,300	4,395,046
North Eastern Region	12,442	708,675
North Tyneside		
Gateshead	276	21,072
Newcastle St. James	206	14,926
Newcastle East	285	14,514

North Shields	160	10,438
South Shields	285	12,006
Sunderland North	374	18,823
Sunderland South	238	15,389

Dr. David Clark: To ask the Secretary of State for Social Security how many applications were received in each month since 1 April 1988 for (i) community care grants, (ii) budgeting loans and (iii) crisis loans *(a)* nationally, *(b)* in the Northern region, *(c)* in South Tyneside, *(d)* in Gateshead, *(e)* in Newcastle, *(f)* in Sunderland and *(g)* in North Tyneside, respectively.

Mr. Peter Lloyd: Details of the Department's local offices both nationally and in the north-eastern region are given in this information held in the Library. Details of the offices in the North Tyneside and South Tyneside areas were given in my reply to the hon. Member on 23 March at column *787*.

Changes to the social fund on 11 April 1988 introduced community care grants, budgeting loans and crisis loans. Information on the numbers of applications processed for social fund loans and grants, listed by local office, is in the Library.

Dr. David Clark: To ask the Secretary of State for Social Security what is the average time taken by social fund officers to reach a decision on crisis or budgeting loans or community care grants *(a)* nationally, *(b)* in the Northern region, *(c)* in South Tyneside, *(d)* in Gateshead, *(e)* in Newcastle, *(f)* in Sunderland and *(g)* in North Tyneside, respectively, for each month from April 1988.

Mr. Peter Lloyd: The average for budgeting loans clearance times includes the time taken by the applicant to accept or refuse the loan offer. This time may vary from as little as a few minutes up to 14 calendar days.

The information available is shown in the table:

Average clearance time (in whole working days)

All figures are provisional and subject to amendment.

Ms. Walley: To ask the Secretary of State for Social Security (1) if he will publish a breakdown of the money spent from the latest social fund figures for community care grants, in percentage terms;

(2) what are the latest social fund figures for the community care grants with regard to *(a)* the allocated budget, *(b)* the amount spent from the budget and *(c)* the proportion of successful claims in percentage terms.

Mr. Peter Lloyd: Total expenditure on community care grants to the end of February 1989, was £34·1 million, and represented 56·8 per cent. of the budget, arising from 127,121 successful awards. Expenditure in February was over £6 million, representing 110 per cent. of anticipated monthly expenditure.

Approximately 50 per cent. of all applications received to the end of February were successful. The average success rate has gradually improved from the early months of the scheme and in February was 56 per cent. The largest identifiable reason for refusal is that the applicant is not in receipt of income support.

Incomes

Sir Ian Gilmour: To ask the Secretary of State for Social Security if he will publish a table, based on the 1979 and most recently available family expenditure surveys, showing the average weekly net incomes, that is, gross income including non-means-tested state benefits less income tax and national insurance contribution, of each of the following family types *(a)* one adult, non-retired, *(b)* one man, one woman, non-retired, single wage, *(c)* one man, one woman, non-retired, two-wage, *(d)* lone parents, *(e)* one man, one woman, one child, single-wage, *(f)* one man, one woman, one child, two-wage, *(g)* one man, one woman, two children, single-wage and *(h)* one man, one woman, two children, two-wage.

Mr. Peter Lloyd: The figures requested are as follows:

Average net income

£ per week

	1979	*1986*
(a) One adult, non-retired	48	89
(b) One man, one woman, non-retired, single wage	84	176
(c) One man, one woman, non-retired, two wages	121	251
(d) Lone parents	53	106
(e) One man, one woman, one child, single wage	94	175
(f) One man, one woman, one child, two wages	113	248
(g) One man, one woman, two children, single wage	100	197
(h) One man, one woman, two children, two wages	121	255

Notes:

1. Net income is defined as gross income from all sources less income tax and national insurance.
2. "Wage" has been defined as any earnings from employment and self-employment.
3. Categories *(a)* and *(d)* differ from the other categories in that they include all people in these family types; both earners and non-earners.
4. Figures are given in cash terms rounded to the nearest pound.
5. Figures are derived from the FES which is a sample survey and are subject to sampling error.

Statutory Sick Pay

Dr. Cunningham: To ask the Secretary of State for Social Security if he will give an estimate of the average number of people receiving statutory sick pay at any one date in the year, for each financial year from the introduction of the scheme in 1983-84 to the most recently available year.

Mr. Peter Lloyd: Information to enable such an estimate to be made is not collected. However, I refer the hon. Member to my reply to the hon. Member for Crewe and Nantwich (Mrs. Dunwoody) on 23 March at columns *790-91*, which gives the recorded payments of statutory sick pay in each year since its introduction. The average length of a statutory sick pay spell is about three weeks.

International Peto Foundation

Mr. Fearn: To ask the Secretary of State for Social Security what proposals exist to provide finance for an international Peto foundation in Hungary for the purposes of rehabilitation of the brain-injured; and if he will make a statement.

Mr. Scott: I refer the hon. Member to my reply to my hon. Friend the Member for Newbury (Sir McNair-Wilson) on 17 March at column *394*.

National Insurance

Mr. Gordon Brown: To ask the Secretary of State for Social Security if he will publish in the *Official Report* a table showing his estimates of the number of male and female employees expected to pay national insurance contributions *(a)* in a full year under the April 1989 regime, and *(b)* in a full year under the proposed October 1989 regime, together with the forecast number of employees and the amount of their contributions at each rate; and if he will divide the figures between those contracted-in and those contracted-out.

Mr. Peter Lloyd *[holding answer 7 April 1989]:* The information is as follows:

Average number of Class 1 contributors for the full year 1989-90 under both April 1989 and October 1989 regimes (millions)

Rate per cent.	*Male*	*Female*	*Total*
STANDARD RATE			
Contracted-in			
5	0·3	1·4	1·7
7	0·5	1·3	1·8
9	3·8	1·7	5·5
Total	4·6	4·4	9·0
Contracted-out			
5	—	0·1	0·1
7	0·1	0·2	0·3
9	6·8	2·8	9·6
Total	6·9	3·1	10·0
Total standard rate	11·5	7·5	19·0
REDUCED RATE (MARRIED WOMEN)			
Contracted-in			
3·85	—	0·5	0·5
Contracted-out			
3·85	—	0·3	0·3
Total reduced rate	—	0·8	0·8

Rate per cent.	Male	Female	Total
Total Class 1 contributors	11·5	8·3	19·8

Estimated Full-year yield under the April 1989 regime (£ billions)

Rate per cent.	Male	Female	Total
STANDARD RATE			
Contracted-in			
5	—	0·2	0·2
7	0·2	0·4	0·6
9	3·9	1·3	5·2
Total	4·1	1·9	6·0
Contracted-out			
5	—	—	—
7	—	0·1	0·1
9	6·5	2·2	8·7
Total	6·5	2·3	8·8
Total standard rate	10·6	4·2	14·8
REDUCED RATE (MARRIED WOMEN)			
Contracted-in			
3·85	—	0·1	0·1
Contracted-out			
3·85	—	0·1	0·1
Total reduced rate	—	0·2	0·2
Total Class 1 contributions	10·6	4·4	15·0

Contracted-out yields are net of the 2 per cent. incentive payments which are payable under the 1986 Social Security Act.

Estimated Full-year yield under the October 1989 regime (£ billions)

	Male	Female	Total
STANDARD RATE[1]			
Contracted-in	3·4	1·5	4·9
Contracted-out[2]	5·5	1·9	7·4
Total standard rate	8·9	3·4	12·3
REDUCED RATE			
Contracted-in	—	0·1	0·1
Contracted-out	—	0·1	0·1
Total reduced rate	—	0·2	0·2
Total Class 1 contributors	8·9	3·6	12·5

[1] All Class 1 contributors paying NIC at the standard rate will pay 2 per cent. of the lower earnings limit and 9 per cent. of earnings in excess of the lower earnings limit (or 7 per cent. if contracted-out) up to the upper earnings limit.

[2] Contracted-out yields are net of the 2 per cent. incentive payments which are payable under the 1986 Social Security Act.

DEFENCE

Navy Retention Rates

8. **Mr. Clay:** To ask the Secretary of State for Defence what plans he has to improve retention rates in the Royal Navy.

37. **Mr. Harry Barnes:** To ask the Secretary of State for Defence what plans he has to improve retention rates in the Royal Navy.

47. **Mr. Tony Banks:** To ask the Secretary of State for Defence what plans he has to improve retention rates in the Royal Navy.

50. **Mr. Ron Brown:** To ask the Secretary of State for Defence what plans he has to improve retention rates in the Royal Navy.

Mr. Neubert: Present emphasis is on alleviating the effects of time spent at sea. We introduced last October a long service at sea bonus—now to become a monthly allowance—and are giving the seagoer financial help so that he can get home more often. Maximum notice of impending seagoing appointments and drafts is given, to help domestic and personal planning, and we prescribe minimum periods ashore between sea drafts.

More generally, a tri-service review was recently conducted aimed at making allowances more relevant to current and prospective needs. The effect, over a period, should be beneficial to retention.

Gulf Operations

17. **Mr. Tony Lloyd:** To ask the Secretary of State for Defence how many Royal Navy vessels are currently deployed in the Gulf; and what impact this has on their availability for other duties.

46. **Dr. Godman:** To ask the Secretary of State for Defence how many Royal Navy vessels are currently deployed in the Gulf; and what impact this has on their availability for other duties.

Mr. Archie Hamilton: I refer the hon. Members to the reply that I gave earlier today to the hon. Members for Eccles (Miss Lestor) and for Wallsend (Mr. Garrett).

Nuclear Submarines

18. **Mr. John Evans:** To ask the Secretary of State for Defence if he will make a statement about the role of emergency planning units in relation to the operation of the British nuclear submarine fleet and Royal Navy procedures for dealing with a nuclear submarine accident in a near port.

Mr. Archie Hamilton: The response to a serious accident involving the reactor of a Royal Navy submarine in or near port would be a joint one, including local authority emergency planning units, the Ministry of Defence nuclear accident response organisation, the civil emergency services, and other government departments. The procedures for dealing with accidents are discussed in local liaison committees by the various authorities involved, and are embodied in public and special safety schemes.

Mr. Harry Greenway: To ask the Secretary of State for Defence how many nuclear-powered submarines are currently held by Warsaw Pact and North Atlantic Treaty Organisation countries; at what rate these stocks are being increased; and if he will make a statement.

Mr. Archie Hamilton: There are currently 210 nuclear-powered submarines in service with the Warsaw Pact and 165 with NATO. Since 1980, NATO and Warsaw Pact production rates for nuclear-powered submarines have been broadly similar, averaging five to six vessels per year.

Conventional Forces

19. **Mr. Evennett:** To ask the Secretary of State for Defence what are the implications for United Kingdom forces levels in western Europe of progress being made at the conventional force limitation negotiations in Vienna.

Mr. Archie Hamilton: The negotiations on conventional armed forces in Europe opened in Vienna on 6 March. It is therefore too early to say what will be the implications for our armed forces of any reductions which may be agreed.

42. **Mr. Paice:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on conventional defences since 1978-79.

55. **Mr. Carrington:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on conventional forces since 1978-79.

Mr. Younger: I refer my hon. Friends to the answer given today to my hon. Friend the Member for Boswell (Mr. Tredinnick).

Mr. Carttiss: To ask the Secretary of State for Defence whether he now intends responding to Mr. Gorbachev's announcement of a unilateral cut in conventional forces.

Mr. Archie Hamilton: We welcome the announced reductions, responding to NATO's long-standing concerns. If implemented, they will be a major step towards removing conventional imbalances in Europe. However, significant imbalances will still remain, and we shall need to maintain our capability to deter aggression while pursuing our goal of conventional stability.

Exercise North Star

20. **Mr. McWilliam:** To ask the Secretary of State for Defence what lessons have been learnt as a result of the recent North Star exercise.

58. **Ms. Mowlam:** To ask the Secretary of State for Defence what lessons have been learnt as a result of the recent North Star exercise.

62. **Mr. Patchett:** To ask the Secretary of State for Defence what lessons have been learnt as a result of the recent North Star exercise.

Mr. Archie Hamilton: Exercise North Star 89, a United States national maritime exercise with multinational participation, including the United Kingdom, took place from 6 to 15 March 1989. Detailed assessment and evaluation of the exercise is currently being undertaken by the United States authorities and the NATO countries which participated. From a United Kingdom viewpoint, early indications are that the exercise was a success.

Soviet Union (Nuclear Submarines)

21. **Mr. Anthony Coombs:** To ask the Secretary of State for Defence what assessment his Department has made concerning Soviet submarine nuclear fleet modernisation.

Mr. Archie Hamilton: The Soviet Union continues to modernise its nuclear submarine fleet. Five Typhoon and five Delta IV nuclear-powered ballistic missile submarines (SSBNs) have been completed and further units are expected. Typhoon, the world's largest SSBN, is armed with 20 8,000 km range, SS-N-20 submarine launched ballistic missiles (SLBNs). The Delta IV is equipped with 16 SS-N-23 SLBNs. Five units of the Oscar class of cruise missile firing submarine (SSGN) have been completed so far, each equipped with 24 SS-N-19 anti-ship cruise missiles with a range of 550 km. More advanced and quieter nuclear attack submarines (SSNs) are being produced, such as the Akula and Sierra classes. The Akula will probably carry the SS-N-21, 2,500 km range, sea-launched cruise missile.

33. **Mr. Redwood:** To ask the Secretary of State for Defence what assessment his Department has made concerning Soviet short-range nuclear forces modernisation.

61. **Mr. David Shaw:** To ask the Secretary of State for Defence what assessment his Department has made concerning Soviet short-range nuclear forces modernisation.

Mr. Archie Hamilton: The Soviet Union has modernised some 95 per cent. of its SNF systems in the course of the last five years and it has begun the process of transferring these new systems to its Warsaw Pact allies. The extent of this modernisation and the large number of weapons which the Soviet Union has available in this category enable it to fill any gaps in its capabilities which will be created by the elimination of missile systems under the INF Treaty. In Europe at present the Warsaw Pact has some 1,450 SNF missile launchers and some 7,000 artillery systems which are capable of firing nuclear as well as conventional and chemical munitions, compared with 88 NATO SNF launchers and some 2,500 NATO artillery systems which are assigned to the nuclear role.

Defence Policy (Representations)

Mr. Robert G. Hughes: To ask the Secretary of State for Defence what representations he has received from Scotland on defence policy since 11 March; and if he will make a statement.

22. **Mr. Summerson:** To ask the Secretary of State for Defence what representations he has received from Scotland on defence policy since 11 March; and if he will make a statement.

Mr. Younger: I refer my hon. Friends to the answer I gave earlier to my hon. Friend the Member for Waveney (Mr. Porter).

RAF Bruggen

23. **Mr. Heffer:** To ask the Secretary of State for Defence what plans he has to visit Royal Air Force Bruggen.

44. **Mr. Hoyle:** To ask the Secretary of State for Defence what plans he has to visit Royal Air Force Bruggen.

60. **Mr. Galloway:** To ask the Secretary of State for Defence what plans he has to visit RAF Bruggen.

Mr. Younger: I refer the hon. Members to the reply that I gave today to the hon. Member for Barnsley, Central (Mr. Illsley).

Royal Navy (Expenditure)

24. **Mr. Knapman:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on the Royal Navy since 1978-78.

32. **Mr. Irvine:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on the Royal Navy since 1978-79.

Mr. Younger: Up to the end of 1987-88, £4·5 billion more had been spent on the Royal Navy, in real terms, than would have been spent if spending had remained at the 1978-79 level. This takes into account GDP inflation and excludes expenditure on both the Falklands garrison and nuclear strategic forces.

British Army of the Rhine

25. **Mr. Clelland:** To ask the Secretary of State for Defence what plans he has to visit the British Army of the Rhine.

35. **Mr. Cohen:** To ask the Secretary of State for Defence what plans he has to visit the British Army of the Rhine.

38. **Mr. Frank Cook:** To ask the Secretary of State for Defence what plans he has to visit the British Army of the Rhine.

51. **Mr. Ron Davies:** To ask the Secretary of State for Defence what plans he has to visit the British Army of the Rhine.

Mr. Archie Hamilton: My right hon. Friend the Secretary of State has plans to visit BAOR in the autumn; part of this visit will be in the company of his German colleague, Dr. Scholz.

Army (Expenditure)

26. **Mr. Amess:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on the Army since 1978-79.

48. **Mr. David Davis:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on the Army since 1978-79.

Mr. Younger: Up to the end of 1987-88, £5 billion more had been spent on the Army, in real terms, than would have been spent if spending had remained at the 1978-79 level. This takes into account GDP inflation and excludes expenditure on the Falklands garrison.

European Fighter Aircraft

27. **Mr. Strang:** To ask the Secretary of State for Defence when he last met his West German counterpart to discuss progress on the European fighter aircraft project; and if he will make a statement.

Mr. Sainsbury: I have nothing to add to the answer that I gave the hon. Member on 7 February at column *657*.

29. **Mr. McAllion:** To ask the Secretary of State for Defence what consultations he has had with the North Atlantic Treaty Organisation European fighter aircraft management agency in the last three months.

59. **Mr. Loyden:** To ask the Secretary of State for Defence what consultation he has had with North Atlantic Treaty Organisation European fighter aircraft management agency in the last three months.

Mr. Sainsbury: MOD officials have frequent meetings with representatives from NEFMA to discuss all aspects of the European fighter aircraft development programme.

Defence Export Services Organisation

28. **Mr. Day:** To ask the Secretary of State for Defence what representations he has received on the work of the Defence Export Services Organisation.

40. **Mr. Gerald Howarth:** To ask the Secretary of State for Defence what representations he has received on the work of the Defence Export Services Organisation.

Mr. Sainsbury: A considerable number of letters and representations are received from hon. Members and members of the public covering many different viewpoints including, of course, appreciation of the good work of the Defence Export Services Organisation (DESO) in helping to secure significant defence exports.

Non-provocative Defence

30. **Mr. Boswell:** To ask the Secretary of State for Defence whether he intends adopting a strategy of non-provocative defence.

Mr. Archie Hamilton: NATO's military strategy, to which the United Kingdom is committed, is entirely defensive.

Sea Harriers

31. **Mr. Cran:** To ask the Secretary of State for Defence when he expects work to commence on the conversion of the Royal Navy's fleet of Sea Harrier FRS 1 air defence fighters to FRS 2 standard.

Mr. Sainsbury: Work to update the Sea Harrier began in 1983 at British Aerospace for the aircraft conversion and Ferranti for the Blue Vixen radar. The first FRS 1 aircraft will be delivered to British Aerospace for conversion to FRS 2 standard in 1990.

Defence Efforts (Western Europe)

34. **Mr. Ian Taylor:** To ask the Secretary of State for Defence what discussions he has had with his west European counterparts on the need to improve upon existing levels of defence efforts.

Mr. Archie Hamilton: My right hon. Friend has regular bilateral and multilateral discussions with his western European colleagues on NATO's defence plans and the contributions made by each ally. For example, the equitable sharing of roles, risks and responsibilities within the Alliance was dicussed at the meetings of the Eurogroup and defence planning committee between 30 November and 2 December 1988.

British Forces (NATO)

36. **Mr. Corbyn:** To ask the Secretary of State for Defence what proportion of British forces are under North Atlantic Treaty Organisation command.

Mr. Archie Hamilton: Most British forces are committed to NATO, but in peacetime they normally operate under national command. However, some RAF squadrons are under NATO command in peacetime and details of these are given in annex C of volume 1 of the "Statement on the Defence Estimates 1988" (Cm. 344-I).

AOR Programme

39. **Mr. Nicholas Brown:** To ask the Secretary of State for Defence if he will make a statement on the auxiliary oiler replenishment programme.

Mr. Sainsbury: I have nothing to add to the reply I gave to the hon. Member on 10 January at column *675*.

Belgian Defence Minister

41. **Mr. Flannery:** To ask the Secretary of State for Defence what plans he has to meet the Belgian Defence Minister; and what matters will be discussed.

53. **Mr. Dunnachie:** To ask the Secretary of State for Defence what plans he has to meet the Belgian Defence Minister; and what matters will be discussed.

Mr. Younger: I refer the hon. Members to the reply that I gave the hon. Members for Glasgow, Maryhill (Mrs. Fyfe) and for Birmingham, Ladywood (Ms. Short) earlier today.

Free Fall Nuclear Bomb

43. **Mr. Menzies Campbell:** To ask the Secretary of State for Defence what is Her Majesty's Government's policy on a replacement for the free fall nuclear bomb.

Mr. Archie Hamilton: For credible deterrence, nuclear weapons must be kept effective and up to date. The United Kingdom's free-fall bombs are no exception, and we are continuing to study a number of options for their replacement around the turn of the century.

Nuclear Test Veterans

45. **Mr. Ashley:** To ask the Secretary of State for Defence when he expects a decision to be reached regarding the claim for compensation from the nuclear test veterans.

Mr. Sainsbury: I refer the right hon. Member to the answer that I gave him on 7 February at column *672*.

Westland plc

49. **Mr. Colvin:** To ask the Secretary of State for Defence when he last met the chairman of Westland plc; and what was discussed.

Mr. Sainsbury: My right hon. Friend's last meeting with Sir Leslie Fletcher at the Ministry of Defence was on 22 February this year. Their discussions at this meeting are treated as confidential, as are all private discussions between the Secretary of State and senior representatives of our contractors.

RAF (Expenditure)

52. **Mr. Bill Walker:** To ask the Secretary of State for Defence how much more in real terms his Department has spent on the Royal Air Force since 1978-79.

Mr. Younger: Up to the end of 1987-88, £9 billion more had been spent on the Royal Air Force, in real terms, than would have been spent if spending had remained at the 1978-79 level. This takes into account GDP inflation and excludes expenditure on the Falklands garrison.

Defence Expenditure

54. **Mr. Gill:** To ask the Secretary of State for Defence whether he intends to bring the United Kingdom defence expenditure in line with the NATO average.

Mr. Archie Hamilton: Both in money terms and as a percentage of GDP, United Kingdom defence expenditure is substantially above the NATO median. The United Kingdom defence budget is planned to rise over the period to 1991-92; taking into account the latest reported budgetary plans of other members of the Alliance, the United Kingdom is likely to remain among the highest-spending nations.

US Defence Secretary

56. **Mr. Roy Hughes:** To ask the Secretary of State for Defence when he intends to meet his new United States counterpart; and what issues he plans to discuss with him.

Mr. Younger: I refer the hon. Member to the reply that I gave to the hon. Member for Dunfermline, West (Mr. Douglas) and my hon. Friend the Member for Sheffield, Hallam (Mr. Patnick) today.

Fishing Boats

57. **Mr. Foulkes:** To ask the Secretary of State for Defence what representations he has received concerning incidents involving fishing boats and submarines.

Mr. Archie Hamilton: Letters continue to be received from fishermen's organisations and from other interested groups and individuals about a number of incidents in which submarines are alleged to have been involved.

Nuclear-free Zones

63. **Mr. David Nicholson:** To ask the Secretary of State for Defence what weight he gives to declarations of local authorities that their areas are to be regarded as nuclear-free zones in deciding on disposition of naval vessels.

Mr. Archie Hamilton: The disposition of naval vessels is a matter which affects national security, and as such it must remain the responsibility of central rather than local Government. A defence policy can be effective only if applied on a national basis.

Arms Control

Mr. Martyn Jones: To ask the Secretary of State for Defence what is the policy of Her Majesty's Government on seeking arms control agreements in those areas where NATO has a technological lead over the Warsaw Pact.

Mr. Archie Hamilton: The principal cause of instability in Europe is the imbalance between the conventional forces of NATO and the much larger conventional forces of the Warsaw Pact. Relative advantages in particular technologies are difficult to assess, subject to change, and

do not themselves necessarily compensate for such numerical imbalances. NATO's objective is to eliminate imbalances in the most threatening systems in Europe, thus enhancing security at a lower level of forces.

Amazonia (Forest Fires)

Mr. Tam Dalyell: To ask the Secretary of State for Defence if he will meet the Minister of Defence of Brazil, General Leonidas, to discuss the feasibility of British military aircraft and their pilots being loaned to Brazil for participation in forest fire fighting in Amazonia.

Mr. Archie Hamilton: My right hon. Friend the Secretary of State for Defence has no plans to seek a meeting with General Leonidas, who met Ministers for talks at the Ministry of Defence in the course of his visit to the United Kingdom in November 1987. The British armed forces have no aircraft suitable for fighting forest fires.

Royal Arsenal, Woolwich

Mr. John Cartwright: To ask the Secretary of State for Defence if he will list the sums spent on maintenance, repairs and improvements to his Department's land and buildings at the Royal Arsenal, Woolwich, during each of the past 10 years.

Mr. Neubert: The sums spent on maintenance, repairs and improvements by my Department within the Royal Arsenal, Woolwich (the Directorate General of Defence Quality Assurance and MOD lodger units) during the last 10 years were as follows:

Year	*Maintenance and Repair* £000	*Improvements* £000
1979-80	1,125	188
1980-81	1,083	277
1981-82	1,212	300
1982-83	1,552	357
1983-84	1,802	471
1984-85	2,272	715
1985-86	1,785	1,593
1986-87	1,846	1,584
1987-88	1,749	2,427

The improvements from 1985-86 include expenditure needed to house DGDQA units moved from Harefield, Middlesex and Garland road, Plumstead.

Mr. Cartwright: To ask the Secretary of State for Defence if he will set out the total area of the Royal Arsenal, Woolwich, already declared surplus to requirements and the area of *(a)* the Royal Arsenal west and *(b)* the Royal Arsenal east to be released for redevelopment after the relocation of the Directorate General of Defence Quality Assurance.

Mr. Sainsbury: The total area of Royal Arsenal, Woolwich is approximately 94 acres; 12 acres in Royal Arsenal west have already been declared surplus to requirements. A further 67 acres in Royal Arsenal west and 15 acres in Royal Arsenal east would be released for redevelopment after the relocation of the Directorate General of Defence Quality Assurance.

Mr. Cartwright: To ask the Secretary of State for Defence if he will make a statement on the progress of his Department's discussions with the London borough of Greenwich about the future redevelopment of that area of the Royal Arsenal, Woolwich, already declared to be surplus to requirements.

Mr. Neubert: Preliminary discussions with the London borough of Greenwich have now been held on site and we plan to have a further meeting shortly where the discussion will widen to include possible uses of the entire area of potentially surplus land at Royal Arsenal west. This follows the decision announced on 9 March 1989 to move the Director General of Defence Quality Assurance from Woolwich to Teesside, a proposal at present the subject of consultation with the trade unions.

I will keep the hon. Member informed of progress.

Directorate General of Defence Quality Assurance

Mr. Cartwright: To ask the Secretary of State for Defence (1) what is the total estimated cost of transferring the Directorate General of Defence Quality Assurance from Woolwich Arsenal to Stockton on Tees and the individual costs of the major elements in the relocation package;

(2) what was the total estimated cost of relocating the Directorate General of Defence Quality Assurance at Woolwich Arsenal.

Mr. Sainsbury: Competitive contracts will be let in connection with these proposals and therefore it would not be prudent to disclose departmental estimates of costs. Nevertheless a recent investment appraisal revealed that the net present values after 25 years and of the costs and benefits that vary with the three options studied were:

	£ million
Continuation on two sites at Woolwich and one at Bromley	212
Collocation at Royal Arsenal west, Woolwich	188
Collocation at Teesside	178

Mr. Cartwright: To ask the Secretary of State for Defence what estimates he has made of the numbers of *(a)* mobile and *(b)* non-mobile staff likely to transfer from Woolwich to Stockton on Tees with the Directorate General of Defence Quality Assurance and the numbers he expects to recruit on Teesside.

Mr. Sainsbury: All staff who wish to transfer with their work would be given the opportunity to do so. Our current impression is that up to about 600 staff, mainly mobile, might transfer from Woolwich and Bromley and other MOD sources and that 900 staff, mainly non-mobile and including 250 apprentices, would be recruited on Teesside.

Mr. Cartwright: To ask the Secretary of State for Defence if he will set out the other departments currently located with the Directorate General of Defence Quality Assurance at Woolwich Arsenal, indicating the numbers currently employed at each.

Mr. Sainsbury: The other departments currently located with the Directorate General of Defence Quality Assurance at Woolwich Arsenal and the numbers currently employed at each are as follows:

Department	*Number of employees*
Naval Publications Store	92
Air Publications and Forms Store	109
RAF Movements Unit (London)	33

Department	Number of employees
RAF Signals Unit	194
Ministry of Defence Police	50
British Library	25
Her Majesty's Customs and Excise	49
National Maritime Museum	4
Civil Service Catering Organisation	12
Property Services Agency	66

Mr. Cartwright: To ask the Secretary of State for Defence how much has been spent on the design of a new headquarters building and on other preparations for the relocation of the Directorate General of Defence Quality Assurance at Woolwich Arsenal.

Mr. Sainsbury: As I indicated in my answer to the hon. Member on 20 April 1988 at columns *503-4*, £300,000 was spent on sketch plans for a new headquarters building at the Royal Arsenal, Woolwich, for the Quality Assurance Directorate (Ordnance). The identified costs of doing studies on other buildings are £120,000. The departmental costs of the staff carrying out a feasibility study and an investment appraisal on the future location of the Directorate General of Defence Quality Assurance were incurred in the normal course of their work and have not been separately identified.

Bristol University (Research)

Ms. Primarolo: To ask the Secretary of State for Defence if he will list *(a)* past, *(b)* present and *(c)* future planned research projects at Bristol university funded wholly or in part by his Department.

Mr. Sainsbury: It is not our policy to list details of these arrangements; it is for the universities themselves to give details of any involvement that they might have.

Military Vehicles (Explosives)

Mr. Flynn: To ask the Secretary of State for Defence if he will provide details of the location of, ammunition carried, injuries suffered, and damage to vehicles sustained in the collisions and breakdowns of military vehicles carrying explosives that occurred on 13 December 1982, 11 January 1983, 11 December 1983, 3 December 1984, 13 May 1985, 3 December 1986, 22 July 1986 and 27 April 1988, as listed in his answer of 10 May 1988, *Official Report*, columns *103-4*.

Mr. Neubert: None of the collisions or breakdowns listed resulted in injury. Minor damage was, however, sustained by vehicles involved in four of the incidents. Details of the locations are as follows:

Date	Route	Location
13 December 1982	A17	Lincolnshire
21 June 1983	A17	Lincolnshire[1]
11 July 1983	M4	Near Junction 13[1]
19 October 1984	Not known	Tidworth to Bulford[1] Range Road, Hampshire
13 May 1985	Not known	Not known
3 December 1985	Not known	Cardigan, Dyfed[1]
22 July 1986	A38	Haldon Hill, Devon
27 April 1988	A38	St. Budeaux, Devon

[1] The dates of these incidents were previously incorrectly recorded.

It is not our practice to provide details of ammunition carried. The remainder of the information requested is not available.

Mr. Flynn: To ask the Secretary of State for Defence if he will provide details of the locations, type of amunition carried and measures taken to extinguish the fires on lorries loaded wih ammunition listed in his answer of 10 May 1988, *Official Report*, column *104*, that occurred on 24 October 1984, 1 May 1986 and 30 January 1988.

Mr. Neubert: The incident listed on 24 October 1984 occurred near RAF Chilmark in Wiltshire and the incident listed on 1 May 1986 on the M25 20 miles west of Chelmsford. Details of the measures taken to extinguish the fires are not recorded.

For the details of the incident on 30 January 1988, I refer the hon. Member to the answer on 27 April 1988 at column *204*. It is not our practice to provide details of ammunition carried.

RAF Upper Heyford

Mr. Baldry: To ask the Secretary of State for Defence when, pursuant to his answer of 7 March 1989, *Official Report*, column *515*, he next expects to visit RAF Upper Heyford.

Mr. Neubert: I intend to visit RAF Upper Heyford on 19 April to announce the results of the full study into the costs and implications of realigning the runway there.

Women

Mr. Menzies Campbell: To ask the Secretary of State for Defence if he has any plans to alter the rules which prevent women serving in the Army from doing so in combat zones.

Mr. Neubert: It remains our policy that women should not be employed in direct combat roles.

Mr. Menzies Campbell: To ask the Secretary of State for Defence what is his policy towards women serving in Her Majesty's Forces who have had children; and if he will make a statement.

Mr. Neubert: Women with children may apply to join the armed forces. They will be accepted provided that they can satisfy the normal recruitment criteria and show that adequate provision has been made for the care of their children while on duty.

Recruitment (Advertising)

Mr. Menzies Campbell: To ask the Secretary of State for Defence if he will give for the last five years for which information is available, the cost of advertising campaigns for recruitment into all three branches of the armed forces.

Mr. Neubert: The information is as follows:

	£
1984-85	[1]7,351,000
1985-86	8,202,000
1986-87	9,109,000
1987-88	9,402,400
1988-89	[2]14,854,200

[1]The figures for 1984-85 includes not only expenditure on the services' recruitment advertising but also expenditure on some civilian recruiting, range firing notices and defence sales advertising. It is not possible, given the passage of time, to identify the service element alone.

[2]This figure is an estimate as final figures for 1988-89 have not yet been brought to account.

Note:

All figures are at outturn prices.

Mr. Menzies Campbell: To ask the Secretary of State for Defence what are the estimates for the cost in the current year of the advertising campaigns for recruitment into all three branches of the armed services.

Mr. Neubert: The figures for the current financial year (1989-90) have yet to be finalised. I shall write to the hon. and learned Member when they become available.

Privatisation

Mr. Menzies Campbell: To ask the Secretary of State for Defence if he has any plans to privatise his Department's research facilities at Aldermaston and Porton Down; and if he will make a statement.

Mr. Sainsbury: No.

Next Steps Initiative

Mr. Menzies Campbell: To ask the Secretary of State for Defence if he has any plans to turn any other of his Department's research establishments into executive agencies under the Government's next steps initiative.

Mr. Sainsbury: I refer the hon. and learned Member to the reply that I gave to my hon. Friend the Member for Norwich, North (Mr. Thompson) on 16 March, column *274*, which defined our current plans for executive agencies within the research establishments. In common with other Departments we shall be looking for further opportunities to gain increased efficiency and value for money under the Government's next steps initiative.

Safety Critical Systems

Mr. Bermingham: To ask the Secretary of State for Defence whether his Department's new standards for safety critical systems, DefStan 0055, will require mandatory adherence to formal methods for written software; and if he will make a statement.

Mr. Sainsbury: The draft defence standard (DefStan 0055) covering the use of software in safety critical applications in defence equipment has yet to be issued for consultation. The extent to which formal methods will be mandatory will be resolved as part of the consultation process.

Safety-related Software

Mr. Bermingham: To ask the Secretary of State for Defence what discussions are taking place between his Department and the Health and Safety Commission in relation to safety-related software; and if he will make a statement.

Mr. Sainsbury: In formulating our approach to safety-related software, officials from the MOD have been —and are—involved in discussions with a wide range of agencies, including the Health and Safety Executive which is the operating arm of the Health and Safety Commission.

Live Submarine Projectiles

Dr. Cunningham: To ask the Secretary of State for Defence if he will make a statement on the recent finding of a live submarine projectile on St. Bees beach; and what instructions are issued to submarine commanders in respect of practising with live projectiles.

Mr. Archie Hamilton: I understand that the object found on St. Bees beach, Cumbria, was not a submarine projectile but a submarine smoke float. This is a small pyrotechnic device released by a submarine during an exercise which emits smoke upon reaching the surface, thereby indicating the position of the submarine.

Live projectiles, such as missiles or torpedoes, are fired by submarines only on the high seas and a notice of intent is always issued beforehand. Such ammunition is never fired if any surface vessel or aircraft is in the area.

Irish Sea (Incidents)

Dr. Cunningham: To ask the Secretary of State for Defence how many incidents have been reported in the Irish sea involving submarines and fishing boats in each of the last five years.

Mr. Archie Hamilton: The number of incidents involving Royal Navy submarines and fishing vessels in each of the last five years is as follows:

	Number
1984	1
1985	0
1986	0
1987	1
1988	[1]4

[1] Includes 2 yachts.

There have been no incidents so far this year.

Written Answers to Questions

Wednesday 12 April 1989

NATIONAL FINANCE

MEPs

Mr. Steinberg: To ask the Chancellor of the Exchequer what payments are made to European Members of Parliament for *(a)* salary, *(b)* office, research and secretarial allowances, *(c)* daily allowances for attending meetings on parliamentary business and *(d)* allowance per mile for travel on parliamentary business, expressed in (i) pounds sterling and (ii) European currency units.

Mr. Brooke: The European Assembly (Pay and Pensions) Act 1979 stipulates that salary payable to United Kingdom Members of the European Parliament shall be the same as a member of this Parliament's ordinary salary (currently £24,107) except that, where an MEP is also a member of this Parliament, he or she will receive only one third of that salary in addition to his or her Member of Parliament's salary. The Act also stipulates that the salary be paid into a United Kingdom bank account in sterling.

The European Parliament has laid down a number of allowances for its Members to defray the expenses which they incur in the performance of their parliamentary duties. These allowances are as follows at 1 January 1989 (sterling rates are approximate and will vary with exchange rate fluctuations; the rates used here are based on the average for 1988: £1·0=ecu 1·51):

(1) *General Expenditure Allowances*

Ecu 2,246 per month (£ sterling 1,487). This allowance is intended to defray, for example, Members' expenses on office management costs, telephone, postage and travel within their member state. In respect of Members who, for no valid reason, have failed to attend half the number of plenary sittings, the allowance is halved.

(2) *Secretarial-Assistance Allowance*

Up to ecu 3,635 (£ sterling 2,407) per month. This allowance is intended to defray the expenses arising from the employment or the engagement of the services of one or more assistants. It is paid only upon production of supporting contracts.

(3) *Subsistence Allowance*

The daily allowances are:

(a) For travel within the Community 156 ecu (£ sterling 103).

(b) For travel outside the Community 78 ecu (£ sterling 52).

(4) *Travel Allowance*

(a) For official travel within the Community:
0·6 ecu (40 pence) per km (1 km=0·62 miles) for the first 400 km of both inward and outward journeys; and
0·32 ecu (21 pence) per km thereafter.

(b) For official travel outside the Community:
return air fare by the most direct route on presentation of the ticket, plus a lump sum travel allowance (as at *(a)* above) in respect of the journey between the point of departure and the nearest international airport.

Children

Mr. Frank Field: To ask the Chancellor of the Exchequer how many people in work and responsible for children will have earnings below the tax threshold in the current year.

Mr. Norman Lamont: In 1989-90, it is estimated that some 1·8 million people in work (including part-time workers and self-employed) with children earn less than the weekly equivalent of the personal allowance to which they are entitled. Of these, 1·4 million are married women. This suggests that there are 400,000 tax units with children, where the head of the household is in work and has earnings below the tax threshold.

These estimates are based on projections to 1989-90 of weekly earnings recorded in the 1986 family expenditure survey.

Mr. Frank Field: To ask the Chancellor of the Exchequer how many tax-paying units in the current year will contain children; and how many will be *(a)* married couples with the wife earning and *(b)* single-parent families with earned income.

Mr. Norman Lamont: In 1989-90, it is estimated that there are some 5·3 million taxpaying tax units with children. Of these 3·4 million are married couples where the wife has earned income and 0·3 million are working single-parent families. These estimates are based on projections of data collected in the 1986-87 survey of personal incomes and 1986 family expenditure survey.

Retirement Pensions (Tax)

Mr. Cox: To ask the Chancellor of the Exchequer what is the percentage of income tax revenue received from income tax paid on retirement pensions.

Mr. Norman Lamont: I refer the hon. Member to the reply which I gave the hon. Member for Great Grimsby (Mr. Mitchell) on 14 November 1988 at column 525.

Age Allowance

Mr. Andrew Bowden: To ask the Chancellor of the Exchequer (1) how many people will benefit by the extension of the higher rate of age allowance to those aged 75 and over;

(2) if he will estimate the number of people who will benefit from the extension of the higher age allowance to those aged 75 and over in *(a)* the Brighton travel-to-work area, *(b)* the parliamentary constituency of Brighton, Kemptown and *(c)* the parliamentary constituency of Brighton, Pavilion.

Mr. Norman Lamont: It is estimated that in 1989-90 about 400,000 single people and married couples, will benefit from the proposed extension of the higher level of age allowance to those aged 75 and over. Estimates are based on a projection of the 1986-87 survey of personal incomes and are provisional. I regret that corresponding information for Brighton and the surrounding area is not available.

Scottish Grand Committee

Mr. Steel: To ask the Chancellor of the Exchequer what was the cost to public funds of the visit of a Lords

Commissioner of Her Majesty's Treasury, the hon. Member for Penrith and the Border (Mr. Maclean) to the meeting of the Scottish Grand Committee in Edinburgh on Monday 20 March; and from which vote the expense was met.

Mr. Lawson *[holding answer 4 April 1989]:* I understand that the visit in question was made in connection with ministerial business. Consequently, the cost will be borne on the Cabinet Office (OMCS) Vote. Details of the cost of the visit are not yet available.

EDUCATION AND SCIENCE

Medical Research Council

Mr. Goodlad: To ask the Secretary of State for Education and Science how much of the Medical Research Council's 1988-89 and 1989-90 budgets were committed to research on *(a)* mental health and *(b)* schizophrenia; and what percentages these figures represent of the total budgets.

Mr. Jackson: The most recent information available is for 1987-88, and I refer my hon. Friend to the reply that I gave to him on 28 November at column *82-83*.

Polytechnics

Mr. Cartwright: To ask the Secretary of State for Education and Science what is his Department's policy on the re-location of existing polytechnics from Inner London.

Mr. Jackson: It is for the institutions in the first instance, in collaboration with the Polytechnics and Colleges Funding Council, to consider whether relocation would assist them in meeting their aims and objectives, and help secure more effective and economical provision of higher education in London, the south-east region and nationally. The PCFC is responsible for the effective investment in higher education of the substantial sums of public money available to the sector, and the Government look to the council to help secure, through its arrangements for the allocation of grant to institutions, higher education which meets the needs of students both regionally and nationally.

Dyslexia

Mr. Alton: To ask the Secretary of State for Education and Science how many specialist teachers are provided for dyslexic children by Liverpool local education authority; what is the number per thousand pupils; what are the comparable figures in other local education authorities in England and Wales; and if he will make a statement.

Mr. Butcher: This information is not collected by the Department.

Mr. Alton: To ask the Secretary of State for Education and Science (1) if his Department has recommended that local education authorities provide a minimum standard of specialist teaching for dyslexic children; and if he will make a statement;

(2) if he will make a statement on the provision of specialist teaching for dyslexic children.

Mr. Butcher: Under the 1981 Education Act, local education authorities are required to identify children with special educational needs and to make appropriate educational provision for them. In the exercise of these statutory duties, it is for individual local education authorities to decide on the level of employment of teachers and their deployment.

National Union of Students

Mr. Andrew Smith: To ask the Secretary of State for Education and Science how many responses he has received concerning his inquiry into the status of the National Union of Students; what was the balance of opinion in these responses; and if he will list the organisations and institutions that have responded, and place their responses in the Library.

Mr. Jackson: My Department has conducted a survey on student unions and their links with the National Union of Students. Factual information was sought and received from 70 institutions of further and higher education. In addition, since the announcement of the survey in April 1988, we have received 109 separate representations about the National Union of Students, either in correspondence from the general public or forwarded by hon. Members on behalf of their constituents. Of these, 66 (60·6 per cent.) were in favour of a change in the status of the National Union of Students, 43 (39·4 per cent.) against.

As I explained to my hon. Friend the Member for Basildon (Mr. Amess) on 10 June 1988 at column 691, I do not consider it appropriate to deposit such correspondence in the Library.

Academics (Earnings)

Mr. Andrew Smith: To ask the Secretary of State for Education and Science, pursuant to his reply of 4 April, *Official Report*, column 7, what evidence he has that the earnings of academics have increased in the same way as the earnings of other people.

Mr. Jackson: The Department does not collect information about the levels of non-pay earnings among academics.

Parent Registers

Mr. Blunkett: To ask the Secretary of State for Education and Science if he will list all those organisations who are to be allowed access to the parent registers presently being compiled by local education authorities; and if he will make a statement.

Mrs. Rumbold: There is no legal requirement for local education authorities to compile parent registers. Access by local education authorities to school admission registers is governed by section 80 of the Education Act 1944 and the Pupils Registration Regulations 1956, as amended, which limit access to authorised officers and for the purposes of the Education Acts. Legislation and regulations on the community charge require local education authorities to supply information about individuals to community charge registration officers only where it is within their possession or control.

National Curriculum

Mr. Gareth Wardell: To ask the Secretary of State for Education and Science on what date his Department's document "National Curriculum: From Policy to Practice" was made available to schools in England.

Mrs. Rumbold: "From Policy to Practice" was published on 23 February and copies were sent directly to maintained schools in England during the first week in March.

Expenditure

Mr. Straw: To ask the Secretary of State for Education and Science what information he has as to the proportion of gross domestic product in 1975, 1979, 1983, and the latest available year which was represented by public expenditure on *(a)* schools for ages 5 to 16 years; *(b)* pre-five education; *(c)* further education and training; *(d)* higher education by each of the countries of the European Community, other Organisation for Economic Co-operation and Development countries, Korea, Taiwan and Singapore, on the best available and most comparable data.

Mr. Kenneth Baker: Some relevant data are given in the "UNESCO Statistical Yearbook" for 1988, tables 4.1 and 4.3 (pages 4.5 to 4.22 and 4.44 to 4.55). A copy is in the Library. Some care is needed in interpreting the figures, because countries have differing procedures for allocating expenditure between the various levels of education, and these procedures may have changed over the years.

Teacher Training

Mr. Straw: To ask the Secretary of State for Education and Science what was the total cost in 1988-89 of (i) initial teacher training and (ii) in-service training, of teachers.

Mr. Kenneth Baker: Funding for higher education institutions is not allocated according to subject. However, an estimated £145 million, including fees, was made available to institutions in England and Wales for initial teacher training in the financial year 1988-89. It will be for institutions to decide on how they spend the resources at their disposal. In addition, the total cost of the maintenance element of mandatory awards in respect of students on initial teacher training courses is estimated at around £49 million. In the same year, local education authorities in England planned to spend £290 million on in-service training for teachers and others employed in the education service.

Systemic Lupus Erythematosus

Mr. Ashley: To ask the Secretary of State for Education and Science if his Department has conducted any research into *(a)* the cause and *(b)* the treatment of systemic lupus erythematosus.

Mr. Jackson: The Medical Research Council, which receives its grant-in-aid from this Department, is the main agency through which the Government support medical research. It is funding research into the cause of systemic lupus erythematosus at its clinical research centre and at the clinical science laboratory of Guy's medical school. Other relevant research may also be supported by university medical schools from their general funding.

Higher Education (Access)

Mr. Greg Knight: To ask the Secretary of State for Education and Science what steps the Government are taking to widen access to higher education; and if he will make a statement.

Mr. Kenneth Baker: Access courses provide an important means of increasing the participation in higher education of mature students without the traditional qualifications for entry to degree courses. My Department has encouraged the Council for National Academic Awards and the Committee of Vice-Chancellors and Principals to devise a national framework for the recognition of such courses, and a steering committee was established to oversee this work. That committee has now proposed a transbinary framework to be administered by a central body which will invite higher education institutions and consortia validating access courses to apply for a franchise through which their courses will acquire a 'kitemark' of national recognition. I have written to the chairman of the CNAA, Sir Bryan Nicholson, and to the chairman of the CVCP, Sir Mark Richmond, to invite the CNAA and CVCP jointly to administer the recognition scheme on behalf of both the universities and the polytechnics and colleges. The establishment of a national framework marks an important step towards improving access opportunities for mature students.

Nursery and Primary Education

Ms. Armstrong: To ask the Secretary of State for Education and Science how many nursery school places have been available in each local authority for each of the last 10 years both as a total number and as a percentage of all three and four-year-olds.

Mrs. Rumbold *[holding answer 23 March 1989]:* Information on nursery school places is not collected centrally. The number of pupils under five in maintained nursery schools and the percentage of the estimated three and four-year-old population in January of each year from 1979 to 1988 in each local education authority in England is given in the table. The figures do not include pupils in nursery classes in primary schools.

Number of pupils under five in maintained nursery schools January each year

	1979	
	pupils	*percentage of estimated population aged 3 and 4*

TRADE AND INDUSTRY

Tropical Forests

Dame Peggy Fenner: To ask the Chancellor of the Duchy of Lancaster whether he has reached a conclusion on the proposals put forward by the Timber Trade Federation to help countries with tropical forests to adopt practical forest management policies.

Mr. Alan Clark: Officials in Whitehall are still considering the proposal put forward by the Timber Trade Federation for a levy on imports of timber from the

tropical forests, particularly in the context of the effectiveness and cost of such a scheme, GATT and generalised scheme of preference tariff levels, and its acceptability on an international level.

Spirits

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster if he has received a copy of the European Community Spirits Producers Association's submission to the European Community Commission detailing the European Community spirit industry's objectives for the removal of tariff and non-tariff barriers facing their products during the current Uruguay round of general agreement on tariffs and trade negotiations; and if he will make it his policy to give maximum support to these objectives.

Mr. Alan Clark: Yes. We have urged the Commission to give full weight in the Community's negotiating objectives to this submission and other representations from United Kingdom interests.

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster whether during the recent visit of the Minister for Trade, the hon. Member for Plymouth, Sutton (Mr. Clark), to Austria, he raised with the Austrian authorities the problem of the proposed definition and labelling requirements for Scotch whisky; and if he will make a statement.

Mr. Alan Clark: Yes, I raised it with the Austrian Minister for Economic Affairs on 7 March. The Austrian authorities are actively pursuing this matter and I am optimistic that they will reach a solution that will satisfy the concerns of the United Kingdom industry.

LINK Initiatives

Mr. Patnick: To ask the Chancellor of the Duchy of Lancaster what resources were devoted to the LINK initiatives in 1988; and what resources are being committed in 1989.

Mr. Forth: Total Government funding authorised under the 10 LINK programmes announced in 1988 amounted to £59·3 million; additional support for programmes to be launched in 1989 is expected to exceed £70 million.

House of Fraser

Mr. Dalyell: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on his urgent and thorough investigation of the leaking of the departmental inspectors' report on the acquisition of the House of Fraser.

Mr. Maude: The investigation is continuing.

Inner Cities

Dr. Twinn: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on recent developments in the inner cities initiative.

Mr. Newton: Since the launch of Action for Cities in March 1988 progress in the inner cities has been immensely encouraging. Unemployment has fallen by more than 20 per cent. major improvements in training, housing and the infrastructure are taking place and the Government's commitment to its Action for Cities programmes has increased to £3·5 billion for 1989-90.

Particularly encouraging are the increasing involvement and commitment of the private sector, and the growing extent of partnership between public authorities, the private sector, voluntary bodies and local people.

On 9 March this year I launched the report "Progress on Cities", which gives a more detailed picture of recent achievements in inner city areas.

Post Office

Mr. John Marshall: To ask the Chancellor of the Duchy of Lancaster what representations he has received about the future of the Post Office monopoly.

Mr. Forth: I have received a number of representations in recent months from Members of Parliament and from organisations and individuals proposing changes in the Post Office letter monopoly, including proposals to lower the monopoly price level or temporarily to suspend the monopoly. We keep the monopoly under review taking account of the representations received and have made clear that we would seriously consider suspending the monopoly in the event of a cessation or serious decline in the quality of the letter service.

Airbus Industrie

Mr. Jack: To ask the Chancellor of the Duchy of Lancaster what are the future financial prospects for Airbus Industrie; and if he will make a statement.

Mr. Atkins: Airbus Industrie has more than 700 orders, options and commitments for its new A320 aircraft. It has some 250 orders, options and commitments for its planned A330 and A340 aircraft. A new management structure was inaugurated from 1 April 1989, with the aim of improving Airbus Industrie's efficiency and profitability. The future prospects of the consortium seem as bright now as at any time during its existence.

Petrol Sales

Mr. Vaz: To ask the Chancellor of the Duchy of Lancaster if he will refer to the Director General of Fair Trading the practice of petrol companies of putting up the price of leaded petrol rather than cutting the price of unleaded petrol in the light of the Budget tax changes.

Mr. Maude: No. The Government take the view that the level of petrol prices is a commercial matter for the companies involved. The Director General of Fair Trading has referred the wholesale supply of petrol to the Monopolies and Mergers Commission. The Commission is due to report by 8 November.

Privatisation (Accounting Practices)

Mr. John Garrett: To ask the Chancellor of the Duchy of Lancaster which of the accounting practices employed on privatisation schemes since 1979 have been criticised in Department of Trade and Industry reports.

Mr. Maude: None.

Ford Sierra (Manufacture)

Mr. Hoyle: To ask the Chancellor of the Duchy of Lancaster, pursuant to his answer to the hon. Member for Barking (Ms. Richardson) of 6 February, *Official Report*, columns *458-59*, whether he has received any information from the Ford Motor company relating to the effect on the balance of payments of the transfer of the manufacture of Sierra vehicles.

Mr. Atkins: My Department has regular discussions with Ford about its manufacturing strategy and has recently discussed the transfer of Sierra production to Genk and the associated increase of Fiesta production at Dagenham. However, as my hon. Friend the Minister for Trade replied to the hon. Member for Barking (Ms. Richardson) on 6 February at columns *458-59*, the balance of payments impact of these changes will depend on a large number of variables.

Manufacturing Productivity

Mr. Barry Field: To ask the Chancellor of the Duchy of Lancaster what is the increase in productivity in manufacturing industry per employee from 1979 to the latest figures available, expressed as a percentage.

Mr. Forth: In the three months to January 1989 manufacturing productivity, as measured by output per person employed, was 49 per cent. higher than the 1979 average level.

Visual Display Units

Sir John Farr: To ask the Chancellor of the Duchy of Lancaster what was the total number of visual display units marketed in Britain in each of the past three years; and in each year, what percentage was also manufactured in Britain.

Mr. Forth: The information available is shown in the table:

Visual display units

£ million

	1986	*1987*	*[3]1988*
Manufacturers' sales[1]	388	339	253
Exports (fob)	56	72	50
Imports (cif)	189	225	227
United Kingdom market[2]	521	492	431
United Kingdom manufacturers' share of market per cent.	64	54	47

Source: DTI.

[1] The sales data refer primarily to units in the United Kingdom with a minimum employment of 50.

[2] United Kingdom market is defined as manufacturers' sales plus imports less exports.

[3] January to September.

North-East (Inward Investment)

Mr. Hague: To ask the Chancellor of the Duchy of Lancaster if there are any new developments in inward investment in the north-east; and if he will make a statement.

Mr. Newton: I am very pleased to say that Fujitsu, the Japanese electronics company, is today announcing that it will be setting up its first European semiconductor manufacturing plant at Newton Aycliffe, near Durham. My Department will be providing £30 million regional selective assistance for Fujitsu to become established in this development area.

The project will cost at least £400 million and will be one of the largest of its kind in Europe. It is expected to create more than 1,500 jobs by the end of 1994. The Fujitsu semiconductor plant will undertake full wafer fabrication, assembly and final test of dynamic random access memories for applications such as mainframe and personal computers and computerised equipment. The company will also be expanding its United Kingdom design capability as part of this investment. Both the United Kingdom and European industry will benefit from the increased access to the semiconductors that this project will provide.

National Engineering Laboratory (Pollution Research)

Dr. Cunningham: To ask the Secretary of State for the Environment if he will make a statement on research being carried out by the national engineering laboratory into the elimination of pollution at source.

Mr. Atkins *[holding answer 11 April 1989]:* I have been asked to reply.

Research at the national engineering laboratory addresses three major environmental concerns. These are the deterioration of the ozone layer, acid rain and the greenhouse effect.

NEL is able to do this because it is a major centre of research into heat transfer, the properties of fluids and flow measurement. Research into these areas is necessary to achieve the elimination of pollution at source. The work is concerned with acquiring the data, developing analysis and design techniques, and providing the specialist test facilities needed to optimise pollution-reduction strategies. Furthermore it is evident that much of this research is of value in enabling industrial processes to become inherently more efficient and less hazardous.

Ozone layer

NEL is determining the physical properties of replacements for chlorofluorocarbons (CFCs). This data is essential in order that equipment, particularly refrigeration/air conditioning plant, operates as efficiently using these replacement fluids as current equipment using CFC refrigerant.

Acid rain

NEL research on internal combustion engines is expanding the understanding of processes occurring within an engine. This will enable stricter emission targets to be met by improvements in engine design rather than by installing cleaning devices in the exhaust system.

Greenhouse effect

Research at NEL is concerned with understanding and improving both heat transfer and combustion of gaseous fluids. Increasing atmospheric carbon dioxide from the burning of fuel is recognised as the major contributor to the greenhouse effect. A reduction in emissions of carbon dioxide can be achieved by improving the efficiency of the extraction and transfer of thermal energy.

NEL also manages the national wind turbine centre and has expertise in tidal power and water turbines.

Glass

Dr. Cunningham: To ask the Chancellor of the Duchy of Lancaster if he will publish in the form of a table *(a)* the

amount of glass recycled by each west European country in 1988 and *(b)* the amount of glass recycled as a percentage of the total amount of glass used for packaging for each country.

Mr. Atkins *[holding answer 11 April 1989]:* Figures for the amount of glass recycled by each western European country in 1988 will not be available until June. The amount recycled in the United Kingdom increased to 275,000 tonnes, 16 per cent. of the total amount of glass used in packaging. Figures for the amounts recycled in 1987 in western Europe are recorded in the table.

	Amount recycled (thousand tonnes)	*Percentage of total amount of glass used for packaging*
Austria	85	44
Belgium	127	39
Denmark	35	32
France	646	26
West Germany	1,102	37
United Kingdom	233	13
Eire	7	8
Italy	580	38
Netherlands	320	62
Portugal	29	14
Spain	261	22
Switzerland	140	47
Turkey	34	27

Figures supplied by FEVE—the European Glass Containers Federation.

British Shipbuilders

Mr. Dobson: To ask the Chancellor of the Duchy of Lancaster how much was paid by his Department under a single contract in 1986-87 in connection with the sale of certain British Shipbuilders' yards.

Mr. Forth *[holding answer 7 April 1989]:* I refer the hon. Member to my answer to him on 13 March 1989 at column *100*. The information is commercially confidential. The amounts involved do not, however, add significantly to the total of privatisation expenses that I quoted on 13 March.

Beverage Containers Directive

Dr. Cunningham: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on his Department's progress on implementing the requirements of the 1985 European Economic Community directive on beverage containers.

Mr. Atkins *[holding answer 10 April 1989]:* The United Kingdom programme for implementing this directive was submitted by the DTI in November 1987 following consultations with other Government Departments, local authority associations and 28 trade and industry organisations. It consisted of sub-programmes for containers made of glass, metals, plastics and paper composites and a cross-material submission on the soft drinks industry. Copies of the programme are available from the Libraries of both Houses.

The United Kingdom programme is based on voluntary agreements and in line with the Commission's assurance to the Government when the directive was adopted in June 1985, there is not discrimination between different types of container systems or between different types of packaging.

Good progress is being made in the recycling of beverage containers. There was agreement at a glass recycling commitment conference in July 1986 to double the number of bottle banks to 5,000 over the next five years, equivalent to one bottle bank per 10,000 people. Nationally we are on course to reach this target and the one per 10,000 figure has already been reached in the north of England. With more retailers agreeing to bottle banks being sited on their car parks, the amount of glass recycled is increasing rapidly and reached 275,000 tonnes in 1988.

The amount of metal recovered from cans is also increasing. "Save-a-Can" run by the can makers operates nearly 200 skips in England and Wales whilst the newly formed Aluminium Can Recycling Association hopes to have 100 recovery centres operating nationally by this summer. British Steel is encouraging local authorities to become involved in recovering steel cans from incinerated household waste and about 900 million cans a year are now being recovered this way.

A full progress report will be submitted by the Government to the Commission later this year, four years after the original programme was drawn up, and every subsequent four years thereafter.

HOME DEPARTMENT

Immigration

Mr. Leighton: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to what have been the results of enlisting the assistance of managers of hotels used by homeless persons on establishing their residents' immigration status.

Mr. Renton: Under the Immigration (Hotel Records) Order, as amended, the keepers of hotels or similar establishments are required to keep a record of all persons aged 16 or over who stay at their premises. As part of their normal duties, the police may need to inspect these records in order to establish the immigration status of any of the residents of such an establishment. We have no plans to seek any special report on the operation of these arrangements.

Mr. Evennett: To ask the Secretary of State for the Home Department how many illegal immigrants were detected, other than at airports and seaports, in the last year for which figures are available.

Mr. Renton: Information for 1988 on the numbers of illegal entrants detected and of persons dealt with under the deportation process is published in tables 13 and 14 of Home Office statistical bulletin 10/89 "Control of Immigration: Statistics—Fourth Quarter and Year 1988", a copy of which is in the Library. The great majority of persons dealt with under enforcement powers are identified after entry to the United Kingdom.

The information in these tables does not include persons refused entry to and removed from the United Kingdom at airports and seaports: information on such persons is published in table 1 of the annual volume "Control of Immigration: Statistics United Kingdom".

Fire Authorities

Mr. Bill Michie: To ask the Secretary of State for the Home Department if he will list for each fire authority

(a) the date of first appointment of a brigade emergency planning officer and *(b)* the expenditure incurred on fire service civil defence activities and the amount of grant aid paid towards that expenditure for each year from 1979 to 1989.

Mr. John Patten: The dates of first appointments of brigade emergency planning staff officers are shown in the table.

Figures for the expenditure incurred by each fire authority on civil defence activities and the amount of grant aid paid towards that expenditure for each year since 1979 could be provided only at disproportionate cost. Amounts for 1986-87, the last year for which all audited claims have been received, are in the second table.

Mr. Bill Michie: To ask the Secretary of State for the Home Department if he will give the dates of all regional fire advisers meetings since 1979; if he will give details of the topics discussed at such meetings; and what is the date of, and the topics to be covered at, the next regional fire advisers meeting.

Mr. John Patten: The dates of regional fire advisers' conferences since 1979 were as follows:

18 May 1979	27 October 1982
11 December 1979	27 January 1983
19 October 1981	13 April 1983
13 April 1982	13 October 1983
13 July 1982	12 January 1984

3 May 1984	24 November 1986
14 November 1984	28 April 1987
24 April 1985	20 October 1987
8 October 1985	26 April 1988
29 April 1986	18 October 1988

The next such conference is today, 12 April. These conferences cover a range of matters concerning civil defence planning and training. In addition, regional fire advisers attend various other meetings concerned with civil defence planning.

Mr. Bill Michie: To ask the Secretary of State for the Home Department if he will list *(a)* the name, present employment, date appointed and terms of reference of the regional fire adviser for each year from 1984 to 1989, *(b)* the name, present employment and date appointed of the staff officer to the regional fire adviser for each year from 1979 to 1989 and *(c)* the expenditure incurred by the regional fire adviser and his staff on civil defence duties and the amount of grant aid paid toward that expenditure for each year from 1979 to 1989, for each civil defence region.

Mr. John Patten: A list of regional fire advisers by region in England and Wales from 1984 to the present is given in the table.

There are no formal terms of reference but a regional fire adviser is responsible for the co-ordination of emergency fire service planning in his region. The appointment of his staff officer is a matter for each regional fire adviser. Expenditure incurred in connection with regional fire advisers' responsibilities is not grant-aided, but is directly reimbursed by the Home Office.

Figures for individual claims and those prior to 1984 could be calculated only at disproportionate cost but the total reimbursed expenditure since 1984 was:

	£
1984-85	7,206
1985-86	6,194
1986-87	7,170
1987-88	6,467
1988-89	5,169

		Employment		
Region	*Regional Fire Adviser*	*At time of appointment*	*Now*	*Date of appointment*
2.	T. F. Elton	CFO Tyne and Wear	CFO Tyne and Wear	November 1981
3.	P. H. Wilson	CFO Nottinghamshire	Retired	December 1981
	E. Patterson	CFO Nottinghamshire	CFO Nottinghamshire	February 1989
4.	R. C. Paramor	CFO Essex	CFO Essex	February 1979
5.	R. A. Bullers	CFO London	Retired	April 1981
	G. D. Clarkson	CFO London	CFO London	August 1987
6.	J. R. Pearson	CFO Hampshire	CFO Hampshire	September 1984
7.	J. Killoran	CFO Devon	Retired	April 1984

10.	M. Killoran	CFO Greater Manchester	Retired	April 1981
	D. T. Davis	CFO Cheshire	CFO Cheshire	September 1986

Latchmere House

Mr. Hanley: To ask the Secretary of State for the Home Department what are the estimated additional annual net costs for the immigration and nationality department of moving immigration detainees from Latchmere house, Ham, to Haslar, Hampshire.

Mr. Renton: All aspects of the possible move, including costs, are being examined. The main additional cost for the immigration and nationality department would probably be some £60,000 a year for additional transport and escorts.

Data Protection

Mr. Cohen: To ask the Secretary of State for the Home Department whether he will seek to amend the Rehabilitation of Offenders Act to make it an offence for a third party to require a data subject to seek subject access under the terms of the Data Protection Act to personal data held by the police in order to show that third party the data subject's criminal record; and whether he will make a statement.

Mr. Renton: No. The Rehabilitation of Offenders Act 1974 protects rehabilitated persons by providing that, unless a post is exempted from the provisions of the Act, an employer may not refuse an applicant employment on the grounds of a spent conviction.

Official Secrets Bill

Mr. Ron Brown: To ask the Secretary of State for the Home Department if he has received any recent representations from the National Union of Journalists about the Official Secrets Bill; and if he will make a statement.

Mr. Hurd: The most recent such representation which I received was sent in January.

Mental Illness (Prisoners)

Mr.Goodlad: To ask the Secretary of State for the Home Department what information he has on the mental illness history of current occupants of Her Majesty's prisons in England and Wales; and if he will make a statement.

Mr. Douglas Hogg: I refer the hon. Member to the reply I gave to a question by the hon. Member for The Wrekin (Mr. Grocott) on 8 December 1988 at column *283*.

Mr. Goodlad: To ask the Secretary of State for the Home Department what information is collected by his Department about *(a)* the medical and *(b)* the mental illness history of persons found guilty of crimes by the courts; and if he will make a statement.

Mr. Douglas Hogg: Information is not collected centrally about the medical history, physical or mental, of persons found guilty by the courts.

Woolwich (Court and Prison)

Mr. Cartwright: To ask the Secretary of State for the Home Department when he expects construction of the new prison at Woolwich and the associated court complex to be completed; and when each is now planned to come into operation.

Mr. Douglas Hogg: The contract for construction of the prison is expected to be completed in December 1990. The target date for arrival of the first inmates is April 1991. The court complex is the responsibility of my right hon. and noble Friend the Lord Chancellor. I understand that it is currently estimated that the court complex will be completed towards the end of 1991 and come into operation shortly thereafter.

Mr. Cartwright: To ask the Secretary of State for the Home Department what is the latest estimated cost of *(a)* the new prison at Woolwich and *(b)* the associated court complex; and what were the original estimates.

Mr. Douglas Hogg: The original estimated cost for constructing the prison was £59·94 million (at second quarter 1986 prices). Associated advance works were estimated at an additional £4·08 million (at third quarter 1985 prices). The latest estimate for the project as a whole is £88·90 million, at 1988-89 prices. This is subject to adjustment, in the light of further cost increases in the construction industry.

The construction of the court complex is the responsibility of my right hon. and noble Friend, the Lord Chancellor. I understand that tenders for this project are being currently evaluated. The provisional pre-tender estimate at second quarter 1988 prices was about £17·5 million. This did not allow for any additional cost arising from the incorporation of the changes subsequently recommended by the Royal Fine Arts Commission.

Animal Experiments

Sir John Farr: To ask the Secretary of State for the Home Department what efforts are being made to discourage international and foreign regulatory bodies from requiring precise LD50 values.

Mr. Douglas Hogg: The Home Secretary is not responsible for the conditions under which LD50 tests are required: but I understand that the Departments concerned are making representations at EC, OECD and UN levels. In particular, the Department of Health is co-ordinating an international study on an alternative British approach to acute toxicity testing, which does not involve the generation of precise LD50 figures.

Sir John Farr: To ask the Secretary of State for the Home Department how effectively the project licensing system is being used to reduce and restrict performance of the classical LD50 test in Britain.

Mr. Douglas Hogg: Applications to use animals for this purpose in this country are authorised only in strict accordance with the requirements of the Animals (Scientific Procedures) Act 1986. Before granting a licence, my right hon. Friend is required to consult an inspector appointed under the Act.

Football Grounds (Arrests)

Mr. Allen: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to what crowd trouble occurred inside and outside the ground at the Littlewoods Cup Final on 9 April; how many people were arrested, distinguishing between those arrested by mounted officers and others; how many people have subsequently been charged; and if he will make a statement.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that no significant crowd trouble occurred inside Wembley stadium, but that there were incidents of crowd trouble outside the ground, the most serious of which happened at approximately 3 pm and required the assistance of mounted officers in order to separate rival supporters. Mounted officers were involved in 26 of the 66 arrests made. Sixty five people were subsequently charged. Such incidents demonstrate that further action is necessary in respect of football hooliganism. The Government believe that the proposed national membership scheme will help to break the link between violence and football by excluding from grounds, and thereby deterring from travelling to matches, those who cause trouble.

Police Cells

Mr. Hague: To ask the Secretary of State for the Home Department if he will list the number of prisoners held in police cells at the end of each of the last six months; and if he will make a statement.

Mr. Douglas Hurd: The information requested is as follows. The number of prisoners held in police cells continues downwards and the situation is better than it has been since the end of 1986.

Prisoners held in Police cells at unlocking on the last day of each month

	Number
1988	
October	1,531
November	1,025
December	87
1989	
January	349
February	219
March	71

Prison Escapes

Mr. Latham: To ask the Secretary of State for the Home Department what further measures have been taken

following his review of the circumstances which led to the escape by helicopter of two prisoners from Gartree prison in December 1987.

Mr. Hurd: In my reply to my hon. Friend the Member for Harborough (Sir J. Farr) on 21 January 1988 at columns *785-86* I said that a vigorous review of security measures had been carried out immediately at all establishments holding category A prisoners, and that a number of practical measures were taken quickly.

I have now approved a number of other lines of action, including plans for the future shape of the dispersal system, and these are contained in a detailed statement of intention issued to the prison service by the deputy director general. A copy has been placed in the Library.

Diplomatic Passports

Mr. Neil Hamilton: To ask the Secretary of State for the Home Department whether foreigners holding diplomatic passports, but not accredited in the United Kingdom, are exempt from normal entry procedures when visting this country.

Mr. Renton *[holding answer 6 April 1989]:* Possession of a diplomatic passport does not, in itself, afford the holder any special status or entitlement.

Under the Immigration Act 1971, certain persons, including members of diplomatic missions in the United Kingdom who meet the requirements of section 8(3) of that Act as amended by the Immigration Act 1988, are entitled to exemption from immigration control. Members of the family forming part of the household of such members similarly benefit.

Certain members of diplomatic missions which are not based in the United Kingdom who are passing through this country while proceeding to take up or return to their posts, or who are returning to their own countries are, with their families, treated as being exempt from immigration control in order to meet the requirements of article 40 of the Vienna convention on diplomatic relations.

London Underground

Mr. Harry Greenway: To ask the Secretary of State for the Home Department what assistance his Department has given towards reducing crime on the London Underground; and if he will make a statement.

Mr. John Patten: The primary responsibility for reducing crime on the London Underground rests with the British Transport police and London Underground Ltd. The Home Office provides guidance and advice to BTP and LUL, as it does in this context to the Department of Transport. My right hon. Friend has approved arrangements under which Metropolitan police officers have been lent to help police the Underground while BTP recruit and train new officers to fill their increased establishment.

Rape

Ms. Richardson: To ask the Secretary of State for the Home Department what action he has taken on the Women's National Commission's 1985 recommendation that the question of consent should be reconsidered with the aim of reforming the law on rape to make it clear that the alleged rapist's assumptions about the complainant's consent should be reasonable according to modern interpretations of women's rights to choose.

Mr. John Patten *[holding answer 23 March 1989]:* The law on rape provides that a man is not guilty if he believes that the woman was consenting to intercourse. Section 1(2) of the Sexual Offences (Amendment) Act 1976 provides that any jury considering a defence based on consent should have regard to the presence of absence of reasonable grounds for such a belief. In R *v.* Pigg (1982), Lord Lane CJ also ruled that a man who was reckless as to whether the woman consented should also be held guilty. I am not persuaded that the recommendations of the Women's National Commission would improve the present law.

FOREIGN AND COMMONWEALTH AFFAIRS

El Salvador

15. **Mr. Ieuan Wyn Jones:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the conduct and outcome of the recent election in El Salvador.

46. **Mr. Haynes:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he is satisfied that the last presidential election in El Salvador was held under free and fair conditions.

54. **Mr. Maxton:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he is satisfied that the recent presidential election in El Salvador was held under free and fair conditions.

Mr. Eggar: Her Majesty's Government's official observer, Dr. David Browning, attended the presidential elections in El Salvador. He is currently preparing his report, a copy of which will be deposited in the Library in due course.

40. **Mr. Wray:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Government of the United States of America in relation to El Salvador.

Mr. Eggar: We have regular discussions with the United States on a wide range of topics, including El Salvador.

51. **Mr. Dunnachie:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit El Salvador.

Mr. Eggar: My right hon. and learned Friend has no present plans to visit El Salvador.

55. **Mr. Andrew Smith:** To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to meet representatives of the new El Salvadorean Government.

Mr. Eggar: My right hon. and learned Friend has no plans at present to meet representatives of the new Government of El Salvador.

Anglo-French Relations

16. **Mr. Cash:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Anglo-French relations.

Mrs. Chalker: Anglo-French relations are excellent.

My right hon. Friend the Prime Minister had useful talks with President Mitterrand at the Anglo-French summit meeting in Paris on 27 February. The two Governments consult closely on a wide range of issues. There are numerous ministerial and other contacts between the two countries.

Middle East

17. **Mr. Bowis:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next intends to meet the Secretary of State of the United States of America to discuss the middle east.

Mr. Waldegrave: My right hon. and learned Friend will be visiting Washington on 16-17 April and looks forward to discussing a wide range of issues, including the middle east, with Mr. Baker.

27. **Sir Dennis Walters:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress towards a middle east peace settlement.

Mr. Waldegrave: There have been a number of positive developments; the PLO's renunciation of terrorism; Israel's recognition that the status quo is untenable; the constructive attitude of the Soviet Union and the determination of the United States to work actively for a settlement. We continue to believe that an international conference remains the most suitable framework for negotiations between the parties.

Horn of Africa

18. **Mr. Andrew F. Bennett:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement about political developments in the Horn of Africa.

Mrs. Chalker: We remain in contact with the Governments of the Horn about the problems of the region, both bilaterally and with our partners in the Twelve. We are also in touch with other Governments. My right hon. and learned Friend discussed the Horn with Mr. Shevardnadze on 6 April and urged the Soviet Union to use its considerable influence in the area in a positive direction.

Prime Minister Bhutto

19. **Mr. Sayeed:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to meet Prime Minister Bhutto of Pakistan.

Mr. Eggar: My right hon. and learned Friend met Miss Bhutto on 27 March during his visit to Islamabad. She has accepted an invitation to visit Britain later this year. We look forward to her visit.

EC (Social Dimension)

20. **Mr. McAllion:** To ask the Secretary of state for Foreign and Commonwealth Affairs if he will now make it his policy to support the social dimension in European Community affairs.

Mrs. Chalker: It has always been our policy to ensure, by avoiding unnecessary regulation, that the single market programme generates additional economic growth, and so more jobs.

31. **Mr. Norman Hogg:** To ask the Secretary of State for Foreign and Commonwealth Affairs what response he has made to calls among the United Kingdom European Community partners for greater emphasis on the social sphere in the run up to 1992.

Mrs. Chalker: We strongly support the single market programme, which, by reducing barriers to enterprise, will mean higher economic growth, and so more jobs.

Conventional Force Levels

21. **Mr. Ian Taylor:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the outcome of recent negotiations on conventional force levels in Europe.

Mr. Waldegrave: Two negotiations—one on conventional armed forces in Europe and one on confidence and security-building measures—began in Vienna on 6 March. The discussions have got off to a good businesslike start. My right hon. and learned Friend presented radical western proposals for both sets of talks on 6 March. We now look for a response from the east.

Mexican Foreign Minister

22. **Mr. Gregory:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met his Mexican counterpart; and what was discussed.

Mr. Eggar: I met Mr. Solana in Caracas in January when we had a useful exchange of views on bilateral and international issues. I saw him again at the San Jose V conference in San Pedro Sula in February, and hope to continue our exchanges during my visit to Mexico later this month.

Northern Ireland

23. **Mr. David Evans:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the United States Government to help stem the flow of funds and weapons to terrorist organisations in Northern Ireland.

Mr. Waldegrave: The Government of the United States share our abhorrence of the activities of terrorist organisations in Northern Ireland. There is constant and continuing co-operation with them and this has significantly inhibited the flow of funds and arms into the Province. Our joint vigilance will not be relaxed as long as the terrorist threat remains.

Cyprus

24. **Mr. Cox:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has recently had with the President of Cyprus; and if he will make a statement.

Mrs. Chalker: My right hon. and learned Friend had a brief discussion with President Vassiliou on the telephone when he passed through London on 4 April, on his way to New York for his meeting with the United Nations Secretary-General and Mr. Denktash on 6 April. We welcome the agreement reached at that meeting to prepare a draft outline of an overall settlement by the end of May. We urge both sides to work constructively towards that end.

United States Government

25. **Mr. Adley:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the new United States Administration concerning foreign policy matters in particular in the middle east; and if he will make a statement.

Mr. Waldegrave: My right hon. and learned Friend last met Mr. Baker in Vienna on 6 March. He looks forward to further discussions with him in Washington next week.

Hungarian Foreign Minister

26. **Mr. Michael Marshall:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Hungarian Foreign Minister; and what matters were discussed.

Mr. Waldegrave: My right hon. and learned Friend and I both had talks with the Hungarian Foreign Minister on Wednesday 15 March during his visit to the United Kingdom. We had a useful discussion on bilateral matters, including trade, and on international issues. We also discussed developments in the internal situation in Hungary.

Third World Debt

28. **Mr. Skinner:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent meetings he has had with other Foreign Affairs Ministers regarding Third world debt; and if he will make a statement.

Mrs. Chalker: I refer the hon. Member to the written reply I gave him on 8 February at column *739*.

Tibet

29. **Mr. McKelvey:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Government of China concerning recent events in Tibet.

30. **Mr. Mullin:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last discussed Tibet with a representative of the Chinese Government.

Mr. Eggar: My right hon. and learned Friend discussed Tibet when he met the Chinese Foreign Minister in Tokyo in February. My noble Friend the Minister of State also discussed Tibet with Mr. Zhou Nan, the Chinese Vice Foreign Minister during the latter's visit in March.

32. **Mr. Graham:** To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has received on the subject of human rights in Tibet.

Mr. Eggar: I refer the hon. Member to the answer I gave on 23 March to the late hon. Member for Glasgow, Central, Mr. McTaggart, at column *728*.

Israeli Foreign Minister

34. **Mr. Ernie Ross:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next expects to meet the Israeli Foreign Minister of State; and what matters will be discussed.

41. **Mr. Macdonald:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next expects to meet his counterpart in the Israeli Government; and what matters will be discussed.

Mr. Waldegrave: My right hon. and learned Friend hopes to visit Israel later this year, and looks forward to discussing bilateral and regional issues with Professor Arens then.

Angola

35. **Mr. Neil Hamilton:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he has received any representations about the economic prospects for Angola.

Mrs. Chalker: No.

South American Debt

36. **Mr. Sheerman:** To ask the Secretary of State for Foreign and Commonwealth Affairs in the light of recent events in Venezuela, what new initiatives he is planning to help south American democracies with their debt problems.

Mrs. Chalker: At the recent spring meetings of the IMF and World Bank in Washington, Finance Ministers of the leading industrialised countries, including the United Kingdom, agreed that the key principles of the case-by-case growth-oriented debt strategy remain valid. They encouraged the IMF and World Bank to take appropriate steps to support efforts to reduce the debt burdens of countries which are committed to substantial economic reforms, while emphasising that concrete negotiations are a matter for the debtor countries and the commercial bank.

EFTA and Eastern Bloc Countries (EC Links)

37. **Mr. Gill:** To ask the Secretary of State for Foreign and Commonwealth Affairs what encouragement he will give to member countries of EFTA and Eastern bloc countries to forge closer links with the European Community.

Mrs. Chalker: We welcomed the agreement of EC and EFTA Ministers meeting in Brussels on 20 March, to consider jointly the promotion of closer and more extensive EC/EFTA co-operation. We also supported the establishment last year of official EC relations with all Eastern European countries except Romania, and are in favour of the trade or trade and co-operation agreements currently concluded or under negotiation with these countries.

EC (Fraud)

38. **Mr. Hague:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent proposals he has made to combat fraud in the European Community.

Mr. Chalker: I refer my hon. Friend to the anti-fraud proposals endorsed by the Economic and Finance Council on 13 March and reported by my right hon. Friend the Paymaster General in his reply to my hon. Friend the Member for Mid-Kent (Mr. Rowe) on 15 March at

column *245*. Those measures were based on suggestions put forward by the United Kingdom in the run-up to the Council.

Pakistan

39. **Mr. Hanley:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he will make a statement concerning relations between Britain and Pakistan.

Mr. Eggar: Britain and Pakistan enjoy a warm and friendly relationship based on strong historical ties. These have been reinforced by the restoration of democracy in Pakistan. My right hon. and learned Friend the Secretary of State paid a useful visit to Islamabad from 27 to 28 March. We look forward to welcoming Prime Minister Bhutto to Britain later this year.

Portugal

42. **Mr. Ron Brown:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about relations with Portugal.

Mrs. Chalker: Our relations with Portugal are excellent. Portugal is our oldest ally, and we work closely together within NATO and the European Community. We are delighted that Portugal has also acceded to the WEU and that this took place under the British presidency.

South-West Africa

43. **Miss Widdecombe:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to make representations to the South African Government on its policy towards South-West Africa.

Mrs. Chalker: My right hon. Friend the Prime Minister discussed Namibia when she met the South African Foreign Minister in Windhoek on 1 April. Subsequently we have been in daily, often hourly, contact with the South African Government in support of the United Nation's efforts to restore peace to Namibia.

South Africa (Political Detainees)

44. **Mr. Pike:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations Her Majesty's Government have made to the Government of the Republic of South Africa for the release of political detainees.

Mrs. Chalker: We have made frequent high level representations on behalf of those detained without charge in South Africa. We believe all those so detained should be charged or released unconditionally.

Official Information

45. **Mr. Patnick:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made in achieving better targeting and improved dissemination of official information to overseas media.

Mr. Eggar: Our posts abroad are required regularly to report back on the impact of official information on the overseas media, in particular through a full annual return which reviews output against objectives. We are refining posts' annual information reporting procedures to give greater emphasis to the definition of targets and objectives.

The performance of suppliers is also monitored to ensure that services provided and resources used support FCO information objectives.

Central America

47. **Mr. Irvine:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Her Majesty's Government's relations with the countries of central America.

Mr. Eggar: We have normal diplomatic relations with all the countries of central America. Our policy towards the region is based on support for democracy and respect for human rights and the need for a peaceful, negotiated settlement of regional conflicts. We have therefore consistently supported the efforts of the central American states to resolve their problems within the framework of the Esquipulas II peace process.

Spain

48. **Mr. Burns:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Her Majesty's Government's relations with Spain.

Mrs. Chalker: We enjoy excellent relations with Spain, which is a valued partner and ally in the European Community, NATO and the Western European Union. The importance and strength of our relations was well demonstrated by the visits to Spain by Her Majesty the Queen and my right hon. Friend the Prime Minister last autumn.

Drug Trafficking

49. **Mr. Paice:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent steps have been taken to help counteract international drug trafficking.

Mr. Eggar: A United Nations convention against illicit traffic in narcotic drugs and psychotropic substances was adopted in December 1988. The United Kingdom has signed subject to ratification. We have also signed bilateral asset seizure agreements with five countries, the most recent with Switzerland on 8 March. Similar arrangements have also been concluded with Bermuda.

Mr. Jacques Delors

50. **Mr. Wallace:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met M. Jacques Delors to discuss developments within the European Community; and what specific matters were discussed.

Mrs. Chalker: My right hon. and learned Friend and I last met M. Delors at the meeting of the Council of Ministers on 20 March. I refer the hon. Gentleman to the reply of my hon. Friend the Under-Secretary of 22 March to my hon. Friend the Member for Wyre Forest (Mr. Coombs) at column *623-24*.

Southern Africa

52. **Mr. Riddick:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last discussed southern African affairs with the South African ambassador; and what specific matters were discussed.

Mrs. Chalker: My right hon. and learned Friend the Secretary of State last met the South African ambassador during the visit of the South African Foreign Minister, Mr. Pik Botha, on 15 March. They discussed a wide range of issues.

Hong Kong

53. **Mr. David Marshall:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit Hong Kong.

Mr. Eggar: My right hon. and learned Friend the Secretary of State has at present no plans to visit Hong Kong.

58. **Mr. Tony Lloyd:** To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has recently received concerning the future of Hong Kong.

Mr. Eggar: We regularly receive representations from organisations and individual members of the public, both in this country and in Hong Kong, about a wide range of issues connected with the future of Hong Kong. We are also in close contact with the Hong Kong Government, who have their own channels for consultation and monitoring of public opinion in Hong Kong.

East Timor

56. **Mrs. Clwyd:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on human rights in East Timor.

Mr. Eggar: We believe that respect for human rights in East Timor has significantly improved in recent years.

Turkey

57. **Mr. Jessel:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on United Kingdom relations with Turkey.

Mrs. Chalker: I cannot add to the answer I gave on this subject to my hon. Friend on 8 March at column *556*.

Council of Ministers

59. **Mr. Boyes:** To ask the Secretary of State for Foreign and Commonwealth Affairs what issues he will raise at the next meeting of the Council of Ministers.

Mrs. Chalker: I refer the hon. Gentleman to my reply of 23 March to the hon. Member for Kilmarnock and

Loudoun (Mr. McKelvey) and to my hon. Friend the Member for Cambridgeshire, South-East (Mr. Paice) at columns *728-29*.

Zimbabwe

60. **Mr. Ian Bruce:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on relations with Zimbabwe following the Prime Minister's recent visit.

Mrs. Chalker: We enjoy excellent relations with Zimbabwe. This was clearly evident during the Prime Minister's recent, highly successful visit.

Gulf States

61. **Mr. Page:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he will make a statement on the current state of relations with the Gulf states.

Mr. Waldegrave: Our relations with the Arab states of the Gulf are, without exception, excellent.

Syria (Terrorism)

62. **Mrs. Dunwoody:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether, during his meetings with Soviet leaders last week, the continuation of Syrian involvement in international terrorism was discussed.

Mr. Waldegrave: Yes. And as at previous meetings we encouraged the soviet authorities to support our firm line.

Turkey (Human Rights)

14. **Sir Russell Johnston:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last made representations to the Turkish Government regarding human rights abuse in Turkey.

Mrs. Chalker: I last raised the matter of human rights in Turkey with the Turkish ambassador on 2 February. He readily accepted the need for Turkey to abide by the terms and conditions of the human rights conventions to which Turkey is a party, and reaffirmed the determination of his Government to secure further improvements in the respect for human rights in Turkey.

Pakistan (Afghan Refugees)

33. **Mr. Holt:** To ask the Secretary of State for Foreign and Commonwealth Affairs what steps Her Majesty's Government are taking to help relieve the Afghan refugee problem in Pakistan.

Mr. Eggar: Refugees in Pakistan benefit from British humanitarian aid to the Afghans through international and non-governmental organisations. This totalled £10·5 million last year. We have so far announced a contribution of £2 million this year and are ready to provide further assistance as the need is established.

USSR (Human Rights)

Mr. Harry Greenway: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Soviet Foreign Minister on the question of human rights.

Mr. Waldegrave: Human rights questions are a part of the regular agenda for our discussions with the Soviet authorities. My right hon. and learned Friend the Secretary of State made our views clear when he met Mr. Shevardnadze last week. A list of cases of public concern was handed over.

NATO

Mr. Madel: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Secretary General of NATO; and what issues he discussed with him.

Mr. Waldegrave: The Secretary General of NATO and my right hon. and learned Friend both participated in the ministerial meeting of the North Atlantic Council, held in Brussels on 8-9 December, at which a full range of Alliance security and arms control issues was discussed.

Brazil

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what proposals he has for Ministers in his Department to visit Brazil.

Mr. Eggar: There are no immediate plans for any Foreign and Commonwealth Office Ministers to visit Brazil. I visited Brazil in November 1988, and my right hon. and learned Friend the Foreign Secretary visited in July 1985.

Israel

Mr. Dykes: To ask the Secretary of State for Foreign and Commonwealth Affairs if he plans to hold further discussions with the Israeli authorities on middle east peace problems following the recent visit by the Minister of State.

Mr. Waldegrave: Yes. The next move will be the visit of Mr. Shamir next month. We shall continue to play our full part in efforts to prepare for negotiations. We have an active dialogue with all the parties.

AGRICULTURE, FISHERIES AND FOOD

Strychnine

Mr. Redmond: To ask the Minister of Agriculture, Fisheries and Food if he will list by year since 1979 for each of the three counties of Yorkshire the number of cases of abuse of pesticides involving strychnine; and if he will identify the domestic farm and wild animal species involved.

Mr. Ryder: The information requested is as follows:

Year	*Number of incidents*	*Animals involved*	*County*
1979	Nil	—	—
1980	1	1 dog	North Yorkshire
1981	1	1 dog	South Yorkshire
	2	1 dog, 1 cat	North Yorkshire
1982	1	1 dog	South Yorkshire
	1	1 dog	North Yorkshire
1983	2	2 dogs, 1 cat	North Yorkshire
1984	4	4 dogs	North Yorkshire
1985	1	1 fox	North Yorkshire
1986	1	1 dog	North Yorkshire
1987	1	1 dog	South Yorkshire

Year	Number of incidents	Animals involved	County
1988	1	1 woodpigeon	North Yorkshire
1989	Nil	—	—

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food on how many occasions during each of the last three years he has initiated action following illegal use of strychnine-based pesticides.

Mr. Ryder: The information requested is as follows:

	Number
1986	10
1987	7
1988	8

White Willow Watermark Disease

Mr. Allen: To ask the Minister of Agriculture, Fisheries and Food what research his Department is undertaking on White Willow Watermark disease and its impact upon cricket bat manufacture; and if he will make a statement.

Mr. Ryder: Research into the watermark disease of cricket bat willow is being carried out at the university of East Anglia and the Forestry Commission has provided some of the funding for this. It is not, however, undertaking any additional in-house research into the disease.

Meetings held recently between growers of willow and the cricket bat manufacturers, which have been attended by a representative from the Forestry Commission, seem likely to result in a voluntary levy being applied to the clefts from which the bats are made. This will enable further research to be carried out.

There has been a significant reduction in the number of diseased trees found in Britain over the last 15 years, largely because of control measures carried out under the Watermark Disease (Local Authorities) Order 1986 and its predecessors.

Forestry Commission (Yorkshire)

Mr. Redmond: To ask the Secretary of State for the Environment if he will list the names, locations and purchase dates of blocks of land of areas greater than 100 hectares in the three counties of Yorkshire, which were newly planted by the Forestry Commission in 1987-88.

Mr. Ryder: I have been asked to reply.
There were none.

Potatoes

Mr. John Marshall: To ask the Minister of Agriculture, Fisheries and Food what information he has as to how many European Economic Community countries impose quantitative restrictions upon the level of potato production.

Mr. Ryder: The United Kingdom is the only member state to impose quantitative restrictions. These are operated by the Potato Marketing Board, which controls production in Great Britain by regulating plantings under a quota system.

Mr. John Marshall: To ask the Minister of Agriculture, Fisheries and Food what studies have been made of the impact of the intervention policies of the Potato Marketing Board upon *(a)* the prices paid by the consumer and *(b)* profitability for growers.

Mr. Ryder: I am not aware of any studies on these specific points, but I refer my hon. Friend to two more general studies: "Potatoes in Surplus" by L. Hinton (Occasional Paper No. 37, Department of Land Economy, Cambridge University, 1987) and "An Econometric Model of the Maincrop Potato Market in Great Britain", by C. Ennew and B. White (Report No. 1/88, Department of Agricultural Economics and Food Marketing, University of Newcastle-upon-Tyne.).

Mr. John Marshall: To ask the Minister of Agriculture, Fisheries and Food what was the level of imports of potato products during each of the past five years.

Mr. Ryder: The following tonnages of potato products were imported into the United Kingdom:

Crop year (June/May)	'000 tonnes
1983-84	411
1984-85	369
1985-86	348
1986-87	377
1987-88	430

Source: Customs and Excise Overseas Trade Statistics.

Organic Farming

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he has made any financial appraisal of organic farming vis-á-vis existing production systems.

Mr. Ryder *[holding answer 11 April 1989]:* No, but I am considering whether and how best to obtain the information required for such appraisals.

TRANSPORT

M40

Mr. Redwood: To ask the Secretary of State for Transport when the M40 from west London to Oxford was available for use along its complete length for the first time.

Mr. Peter Bottomley: On 28 March 1974.

Mr. Redwood: To ask the Secretary of State for Transport how many miles of the M40 are concrete and how many miles tarmac.

Mr. Peter Bottomley: The answer is:

	Miles
Concrete	15·3
Tarmac	13·8

Mr. Redwood: To ask the Secretary of State for Transport what has been the total cost of repair and maintenance of (a) the tarmac sections and *(b)* the concrete sections of the M40 since the motorway was first opened for use.

Mr. Peter Bottomley: The answer is:

	£
Tarmac	1,888,000
Concrete	3,629,000

Mr. Redwood: To ask the Secretary of State for Transport, since the M40 was first opened for use, how many months have been taken up with one or more lanes on the concrete sections closed for repairs.

British Transport Police

Mr. Leighton: To ask the Secretary of State for Transport how many British Transport police have been in post in each year since 1979.

Mr. Portillo: BTP figures for officers in post are as follows:

End years	*Total*
1979	1,899
1980	1,948
1981	2,138
1982	2,128
1983	2,052
1984	1,961
1985	1,817
1986	1,834
1987	1,846
1988	1,830
[1]1989	1,820

[1] At 31 March 1989.

The change in the total between 1984 and 1985 reflected the termination of arrangements between Associated British Ports and the BTP.

Road Standards

Mr. Snape: To ask the Secretary of State for Transport what assumptions are made about minimum road standards serving conurbations of more than 25,000 inhabitants.

Mr. Peter Bottomley: It is Government policy that communities with more than 100,000 inhabitants should have easy access although not necessarily direct connection to a trunk road. The justification for trunk road schemes is based on a comprehensive appraisal of costs and benefits. Selection of the appropriate carriageway standards forms a part of the process.

London Underground (Fires)

Mr. Cohen: To ask the Secretary of State for Transport what instructions are given to drivers on underground trains in the event of a fire occuring in the middle of the train with particular regard to helping passengers *(a)* between the driver and the fire and *(b)* between the fire and the end of the train; and if he will make a statement.

Mr. Portillo: Every effort is made to design underground rolling stock so that the risk of fire breaking out is minimised—or, if fire does occur, that it will not disable the train. In the event of a fire the driver's first responsibility is to get the train to the nearest station and inform the line controller by radio. No passenger has been injured by a fire on a train within the period 1984 to date. I understand from London Underground Ltd. that a programme to remove inflammable material from rolling stock has begun.

London Underground (Heart Attacks)

Mr. Cohen: To ask the Secretary of State for Transport what facilities are available on the London Underground in the event of an individual suffering a heart attack on a train; and what instructions are given to staff on whether or not to move the sufferer.

Mr. Portillo: I understand that stretchers and first aid kits are available on the Underground but that staff are instructed to summon expert medical assistance in the event of someone being taken seriously ill. Staff are advised not to move any passenger suspected of suffering a heart attack.

Central Line (Communications)

Mr. Cohen: To ask the Secretary of State for Transport what consideration has been given to the age and adequacy of current radio communications between drivers and guards on Central line underground trains; and if he will make a statement.

Mr. Portillo: Communication between driver and guard on the Central line is by "Loudaphone". This is a microphone and loudspeaker system, operated by a push button, which is built into trains. The railway inspectorate is investigating reports of poor quality voice transmissions. As an added safety measure, the driver is also in radio communication with the line controller.

Heavy Goods Vehicles

Mr. Moate: To ask the Secretary of State for Transport what was the increase in the numbers of heavy goods vehicles taxed of the 38 tonne limit, expressed both numerically and as a percentage, as at year end 1988 compared with 1987; and how he measures the objective of reducing the numbers of heavy lorries in the light of these figures.

Mr. Peter Bottomley: The stock of 38 tonne goods vehicles increased by 9,900 (24 per cent.) between the end of 1987 and the end of 1988. It is estimated that the introduction of 38-tonne vehicles since 1983 has led to a saving of about 9,000 other heavy goods vehicles that would have been required to cope with the current level of haulage activity. This saving is estimated by assuming that a 38 tonne vehicle has a 20 per cent. greater payload, by weight, than a 32·5 tonne vehicle, that in other respects, eg journey length, load factors, etc. the vehicles operate in the same way, and that no new traffic is generated by 38-tonners.

Motor Car Statistics

Mr. Spearing: To ask the Secretary of State for Transport what information he possesses concerning the numbers of motor cars registered in Great Britain in the years 1959, 1969, 1979, and 1989, respectively, together with the estimated cumulative motor car miles run in each year and his projections of both figures for the year 2000 and beyond.

Mr. Peter Bottomley: The available information is as follows:

Year	Cars[1] currently licensed: (million)	Vehicle kilometres (miles) Cars[3] and taxis: (billion)
1959	5·2	54·7 (34·0)
1969	11·0	132·0 (82·0)
1979	14·5	184·9 (114·9)
1988	18·9	270·4 (168·0)
Forecasts[2]		
2000	21·1—22·7	294—335 (183—208)
2005	22·0—23·9	304—356 (189—221)
2010	22·7—25·0	315—377 (196—234)
2015	23·4—26·1	325—395 (202—245)

[1]Figures are for vehicles with a car body type. Figures for years before 1988 are not available on this basis and estimates have been made from the number of cars taxed as private in those years.
[2]Upper and lower forecasts are taken from the assumptions for car ownership used in the national road traffic forecasts.
[3]The definition of cars is slightly broader than that used for cars currently licensed.

The forecasts of car ownership and vehicle mileage are based on the national road traffic forecasts of 1984. It is expected that revised forecasts will be issued shortly.

Transport Planning (Greater London)

Mr. Spearing: To ask the Secretary of State for Transport what statutory powers were possessed by the former Greater London council in respect of transport planning in Greater London which are not now possessed by Her Majesty's Government.

Mr. Peter Bottomley: The Greater London council had a duty under section 2 of the Transport (London) Act 1969 to prepare transport plans for Greater London. This duty was revoked by the London Regional Transport Act 1984 which established London Regional Transport and charged it with the duty of planning and providing passenger transport services for Greater London.

The highways and traffic powers of the council in respect of roads in London were reallocated to the London boroughs under the provisions of the Local Government Act 1985, apart from 70 miles of former metropolitan roads which were transferred to my right hon. Friend the Secretary of State under the Metropolitan Roads Trunking Order 1986. At the request of the London boroughs, he is also responsible for the control, management, development and extension of London's traffic signals and urban traffic control system.

Normans Heath (Bypass)

Mr. Goodlad: To ask the Secretary of State for Transport when he expects to be able to announce his decision about a bypass scheme on the A41 at Normans Heath.

Mr. Peter Bottomley: This is among the many candidates nationally for possible inclusion in the trunk road programme following the current review. We hope to make an announcement later this spring.

Motorways (Noise Barriers)

Mr. Hunter: To ask the Secretary of State for Transport what is his policy on the provision of noise barriers alongside motorways close to a new housing development.

Mr. Peter Bottomley: When a motorway is built near to houses, the Department provides barriers in circumstances where these are cost-effective and cheaper and more effective than providing secondary glazing under the Noise Insulation Regulations.

We will also, in appropriate cases, agree to a developer siting a noise barrier on motorway land, subject to our being satisfied on details and the developer bearing the cost.

Any proposal for a barrier alongside a motorway, but on other land, is a matter for decision by the local planning authority, which may consult the Department about its effects on the highway.

East London River Crossing

Mr. Cartwright: To ask the Secretary of State for Transport if he will make a statement about the current position of the east London river crossing, indicating when he expects to announce the revised design of the new bridge and when he now expects construction to begin.

Mr. Channon: Further progress with the scheme is dependent on the outcome of the review of the River Thames bridge design being undertaken by consultants. I refer the hon. Member to my reply to the hon. Member for Newham, South (Mr. Spearing) on 23 March at columns *708-9* for the current position on that study.

Airport Security

Mr. Alfred Morris: To ask the Secretary of State for Transport what consideration his Department has given to the report entitled "Airport Security: the Experience of Manchester Airport", a copy of which has been sent to him; what action he will be taking; and if he will make a statement.

Mr. Peter Bottomley: We received a copy of the report from the hon. Member on 7 April. It has been read with interest. The report was prepared by the TGWU branch at Manchester airport. The Union's representative on the National Aviation Security Committee (NASC) will be asked whether the union as a whole endorses the recommendations made by its Manchester branch, and if so whether, as a result, it intends to put forward proposals for consideration by the National Aviation Security Committee.

Automatic Ticket Barriers (London Underground)

Mr. Evennett: To ask the Secretary of State for Transport what representations he has received concerning the safety implications of installing automatic ticket barriers on the London Underground; and if he will make a statement.

Mr. Portillo: In addition to three early-day motions, about 30 representations have been received from members of Parliament and members of the public since 1 January.

Mr. Evennett: To ask the Secretary of State for Transport what information he has concerning the failure rate of those automatic ticket barriers which have been installed on the London Underground; and if he will make a statement.

Mr. Portillo: I understand from London Underground Ltd. that, on average, gates fail once for every 79,000 passengers using them. This represents approximately 16 single gate failures per day, each of which takes between 10 and 15 minutes for a fitter to rectify.

Ms. Ruddock: To ask the Secretary of State for Transport (1) if he is aware of any circumstances in which, in the event of a power failure, any of the new automatic ticket gates in London Underground stations would remain closed; and if he will make a statement;

(2) if London Underground Ltd. has informed him of any occasion on which difficulties occurring in the new automatic ticket gates at King's Cross station on the day of their official inauguration, 27 February, which would lead him to reconsider his assurances that in the event of a power failure, all the gates would open automatically;

(3) if London Underground Ltd has informed him of any occasion on which an actual or simulated power failure has resulted in any of the new automatic ticket gates in London Underground stations remaining closed.

Mr. Portillo: As I told the hon. Lady in my letter of 4 April 1989, London Underground Ltd. (LUL) told me recently that in certain most unlikely circumstances failure of a single phase in the power supply would mean that not all the ticket gates would open automatically. It has assured me that, should such a failure occur, staff have been instructed to open all gates immediately by using the emergency opening arrangements which are unaffected by single-phase power failures. LUL is rectifying this problem by a programme of modification which will be complete within three months.

I can add that the problem was first identified at King's Cross.

Explosives (Carriage by Road)

Mr. Flynn: To ask the Secretary of State for Transport if the planned new regulations for Conveyance of Explosives by Road Regulations will *(a)* restrict traffic movements during severe weather or during periods of peak traffic, *(b)* introduce new standards to strengthen gas-carrying vehicles to withstand roll-over accidents, *(c)* insist on third party insurance that will be adequate to cover accidents such as the one at the Los Alfaques campsite, San Carlos, Spain, *(d)* impose new requirements for advance warning of planned journeys and routes to emergency services and *(e)* require escorts for vehicles paid by commercial companies.

Mr. Peter Bottomley *[holding answer 11 April 1989]:* The Road Traffic (Carriage of Explosives) Regulations laid before Parliament cover the transport of substances and articles classified as "explosives" only. The flammable gases are not covered. The regulations do not cover the matter of insurance.

The regulations require that where more than 5 tonnes of particular explosives are carried on a vehicle, the route must be agreed with the appropriate chief officer of police. An approved code of practice which gives practical guidance on methods of compliance accompanies the regulations. Vehicle operators undertaking journeys involving explosives should take care in selecting routes, and consider security, roadworks, congestion and weather. Routes through built-up areas should not be used except when necessary to make a delivery. A two-man crew is required on the vehicle. A separate escort vehicle is not.

Hazardous Cargoes

Mr. Bermingham: To ask the Secretary of State for Transport if his Department is monitoring the incidence with which containers of hazardous goods are lashed to the decks of cargo vessels when the hold is full; and if he will make a statement.

Mr. Portillo *[holding answer 11 April 1989]:* The Department does not monitor the incidence with which cargoes are carried on the decks of cargo vessels, but in the course of their inspections marine surveyors in the Department may check that deck cargoes have been lashed and stowed correctly.

Perishable Goods

Mr. Roger King: To ask the Secretary of State for Transport if he will make a statement on the enforcement of standards within road haulage vehicles used for the conveyance of perishable goods.

Mr. Freeman: I have been asked to reply.

The carriage of all foodstuffs within the United Kingdom is subject to the requirements of the Food Hygiene (Markets, Stalls and Delivery Vehicles) Regulations, 1966, as amended. Responsibility for the enforcement of these regulations rests entirely with local authorities. Wider application of the storage temperature controls in these regulations is currently being considered and revised draft regulations will be issued for consultation shortly.

SOCIAL SECURITY

Family Credit

Mr. Robin Cook: To ask the Secretary of State for Social Security if he will deposit in the Library the results of BMP Davidson Pearce's market research on attitudes to family credit.

Mr. Peter Lloyd: We are arranging with the Central Office of Information for a copy of the results of the research, and some other background material relating to the family credit advertising campaign, to be placed in the Library.

Mr. Andrew Smith: To ask the Secretary of State for Social Security how many family credit claimants are also in receipt of housing benefit; how much of each £1 gained in family credit by these claimants is lost in housing benefit; and what effects he estimates this will have on the propensity of low income families to claim family credit.

Mr. Peter Lloyd: Information on the number of family credit recipients who also get housing benefit is not available.

Up to the point that housing benefit is extinguished, rate rebate recipients will lose 20p housing benefit for each £1 gained in family credit. Similarly, rent allowance and rebate recipients would lose 65p for each £1 gained in family credit.

Some families may not realise that, although their housing benefit might change, they will nevertheless be better off overall if they qualify for family credit. This is one of the points which our forthcoming advertising campaign will address.

Chief Adjudication Officer (Annual Report)

Mr. Redmond: To ask the Secretary of State for Social Security if he will make a statement about the Chief

Adjudication Officer's annual report for 1987-88 in respect of his comments on supplementary benefit claims, urgent need payments, sickness benefits and industrial disablement benefit.

Mr. Peter Lloyd: The chief adjudication officer's annual report for 1987-88 makes it clear that there were certain areas of the supplementary benefit scheme which were complicated to administer and to understand. The advent of income support in April 1988 has resulted in a simplification of the benefit system. Furthermore under income support the urgent cases provisions referred to are no longer present. A direct result of the changes is that the chief adjudication officer has noted that he finds that the overall level of performance on income support is encouraging.

The chief adjudication officer's report also identified that there is still room for improvement in the standard of adjudication on sickness benefit and disablement benefit. Further guidance will be issued where it is considered appropriate.

Industrial Injuries and Diseases

Mr. Wigley: To ask the Secretary of State for Social Security if he will widen the definition of industrial diseases, for the purposes of pneumoconiosis and workers' compensation legislation, so as to include associated lung diseases such as chronic bronchitis where there is evidence that such a condition exists in a person who has evidence of any dust whatsoever on his lungs.

Mr. Scott: We are advised on the list of prescribed industrial diseases by the Industrial Injuries Advisory Council. Its report on bronchitis and emphysema published in May last year (Cm. 379) concluded that it is at present impossible to distinguish airflow limitation caused by dust from that due to other causes such as smoking (the most common cause of bronchitis and emphysema) and that the available evidence is that the scale of the effects of dust is in any case relatively small. It did not recommend any extension of the current prescribed industrial diseases provisions, and we agree with that view.

Pensions

Mr. John Marshall: To ask the Secretary of State for Social Security if he will make a statement about the percentage of gross domestic product devoted to pensioners; and what is the percentage in other countries.

Mr. Peter Lloyd: The latest information available indicates that in 1983 spending on the elderly in the United Kingdom was third highest in the European Community as a share of GDP (9·6 per cent.), just behind Denmark and France. Partial figures for 1984 show increased spending in the United Kingdom, while spending in other states has decreased.

Income Support

Mr. Redmond: To ask the Secretary of State for Social Security how many claimants in the Doncaster and Mexborough area of South Yorkshire, currently placed in board and lodging accommodation by local authorities and entitled to income support, will *(a)* have to make a second, separate, claim for living expenses from the local Department of Social Security offices and *(b)* have to claim money for their housing costs from local authority housing benefits sections after April.

Mr. Peter Lloyd: Claimants in this group already receiving income support will not have to make a new claim for income support in April. Local offices are sending them the necessary forms to claim housing benefit from April. The number placed in board and lodging accommodation by local authorities is not available.

Mr. Redmond: To ask the Secretary of State for Social Security how many young people who have been in local authority care during the previous two years in Doncaster and Mexborough have lost entitlement to income support.

Mr. Peter Lloyd: I regret that the information is not available.

Mr. Allen: To ask the Secretary of State for Social Security how many of those on income support will receive *(a)* a partial increase and *(b)* no increase at all in their incomes because of being in receipt of transitional protection and in the current year (i) for the United Kingdom as a whole and (ii) for the social security area covering Nottingham.

Mr. Peter Lloyd: I regret that the information is not available. The estimated number of income support claimants in Great Britain who will benefit from a partial increase at this year's up-rating is 610,000. An estimated 600,000 will remain at the same level of benefit. No estimates are available on a regional or local basis.

Information for Northern Ireland is a matter for my right hon. Friend the Secretary of State for Northern Ireland.

Training (Refusals)

Mr. Redmond: To ask the Secretary of State for Social Security how many young people in Doncaster and Mexborough in the county of Yorkshire have been referred to an adjudication officer for consideration of refusal of approved training during the last 12 months.

Mr. Peter Lloyd: During the 12 months ended 31 March 1989, a total of 106 claims for benefit have been referred to the adjudication office covering the Doncaster and Mexborough area for consideration of the question of refusal of approved training. Thirty two of the references were decided in the claimant's favour and 74 against. These figures, which are based on a 100 per cent. count of adjudication officer decisions, refer to the number of claims rather than to the number of individuals claiming. Some individuals may have had more than one claim referred for adjudication.

Staff Statistics

Mr. Cox: To ask the Secretary of State for Social Security what is the present number of staff at his Department's offices at Irene house, Tooting; Arndale house, Wandsworth, and Crown house, Streatham; and what was the number of vacancies at each of these offices on 31 March.

Mr. Peter Lloyd: The information requested is as follows:

	Complement 1988-89	*Staff in post 31 March 1989*
Irene house, Tooting	121	118·5
Arndale house, Wandsworth	172	179·0
Crown house, Streatham	120	121·5

Community Care

Mr. Cohen: To ask the Secretary of State for Social Security if he will provide figures for the Walthamstow, Leytonstone and Woodgrange Park offices of his Department for the year ended 31 March of *(a)* their social fund amounts allocated sub-divided between community care grants and loans, *(b)* the amounts paid out, similarly sub-divided, *(c)* the amount which was paid out by each office in the previous year and *(d)* their allocation for the forthcoming year, similarly sub-divided.

Mr. Peter Lloyd: Information about local office budgetallocations is available in the Library.

Information about the numbers of social fund applications processed and amounts paid is available in the Library for the period April 1988 to February 1989. Information for March 1989 will be placed in the Library later this month.

Information about local office expenditure on single payments for the period 1987-88 is also available in the Library.

Mr. Ashley: To ask the Secretary of State for Social Security what additional publicity his Department is giving to the availability of community care grants, following the low initial take-up of such grants.

Mr. Peter Lloyd: Local office managers have been asked to improve and maintain liaison with local statutory and voluntary organisations since these are often best placed to identify people who may be eligible for help. We also intend to produce additional information material on the social fund aimed at potential applicants. This will supplement the information already available in leaflet SB16 "A Guide to the Social Fund" as well as a variety of other leaflets and forms.

Mr. Ashley: To ask the Secretary of State for Social Security what is the percentage of take-up of community care grants from the social fund.

Mr. Peter Lloyd: Take-up of community care grants has continued to rise steadily. In February 1989, 42,000 applications were received compared with 24,000 in August 1988. Expenditure over the same period rose from £2 million to just over £6 million, representing 110 per cent. of anticipated monthly expenditure. Total expenditure to the end of February was £34·1 million.

Disabled Persons

Mr. Ashley: To ask the Secretary of State for Social Security what consultations he has had with local authority associations and voluntary organisations on the implementation of sections 1, 2 and 3 of the Disabled Persons (Services, Consultation and Representation) Act 1986; and if he will make a statement.

Mr. Scott: We agreed with the local authority associations last year that sections 1, 2 and 3 should be implemented together, and that detailed work on these should follow the conclusion of discussions on the implementation of section 7. Work on section 7 is still under way.

Disability Benefits

Mr. Ashley: To ask the Secretary of State for Social Security when he plans to introduce legislation to reform the system of disability benefits.

Mr. Scott: We need to wait until all the reports have been published on the OPCS surveys of disability, and their findings considered, before deciding whether and when to introduce legislation to reform disability benefits.

Mr. Ashley: To ask the Secretary of State for Social Security if he has any plans to introduce a partial incapacity benefit following the publication of all Office of Population Censuses and Surveys surveys on disability.

Mr. Scott: We shall look at the need for a partial incapacity benefit when we examine existing benefit provision against the findings of the OPCS surveys.

Grants and Loans

Dr. Godman: To ask the Secretary of State for Social Security how many applications were received in each month since 11 April 1988 for *(a)* community care grants, *(b)* budgeting loans and *(c)* crisis loans in (i) Greenock and Port Glasgow, (ii) Strathclyde and (iii) Scotland as a whole.

Mr. Peter Lloyd: Details of the numbers of social fund applications received are not recorded. However, information on the numbers of applications for social fund loans and grants processed and awarded, listed by local office, including information on budget allocations and expenditure, may be obtained from the details held in the Library.

Social Fund (Staff Ratios)

Dr. Godman: To ask the Secretary of State for Social Security what are the staff-to-claimant ratios for social fund departments in *(a)* Greenock and Port Glasgow, *(b)* Strathclyde and *(c)* Scotland as a whole.

Mr. Peter Lloyd: Information is not available in the format requested. Details of the staff days spent on social fund activity are, however, recorded monthly. The information available to 28 February 1989 is given in the table.

	February 1989	
	Staff days spent on social fund	*Income support load*
Scotland	10,839	512,671
Strathclyde	6,884	276,125
Greenock	211	11,394
Port Glasgow	147	4,890

Young Persons (Benefits)

Dr. Godman: To ask the Secretary of State for Social Security how many 16 and 17-year-olds in *(a)* Greenock and Port Glasgow, *(b)* Strathclyde and *(c)* Scotland as a whole have lost benefits since September 1988 because they are unemployed or have been unable to take advantage of guaranteed YTS places; and if he will make a statement.

Mr. Peter Lloyd: The guaranteed offer of a YTS place to all 16 and 17-year-olds not in full-time education or employment means that there is now no need for young people to be unemployed. We are satisfied that the training agency has more than sufficient YTS places available in Greenock and Port Glasgow, Strathclyde, and in Scotland as a whole.

Disability (Survey)

Mr. Hannam: To ask the Secretary of State for Social Security when the third report by the Office of Population Censuses and Surveys on disability in Great Britain will be published.

Mr. Scott: The Office of Population Censuses and Surveys (OPCS) has today published the third report on the findings of the surveys of disability in Great Britain carried out between 1985 and 1988. The report covers the prevalence of disability among children. It is the third of six reports on the surveys' findings which will be published by the OPCS over the next three months.

The report provides prevalence estimates from the OPCS surveys of disabled children under 16 in private households and communal establishments. OPCS estimates that 360,000 children in Great Britain have disabilities. Five thousand six hundred of the children live in communal establishments, the remainder in private households.

We will welcome comments on this and the further OPCS reports as they are published.

ENVIRONMENT

Trichlorophenols

Mr. Fearn: To ask the Secretary of State for the Environment what plans his Department has to prevent the contamination of water supplies with trichlorophenols.

Mr. Moynihan: It is currently the responsibility of the water authorities to take steps to prevent drinking water sources becoming contaminated with phenolic compounds which can be transformed by the chlorination process into trichlorophenol. The Water Bill will transfer this function to the National Rivers Authority and will provide strengthened powers of pollution control.

Catalytic Converters

Mr. Thurnham: To ask the Secretary of State for the Environment if he has received any representations concerning the fitting of catalytic converters to all new vehicles in order to reduce air pollution; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 6 April 1989]:* We have received a number of representations on the matter of catalysts to reduce motor vehicle pollution. The so-called Luxembourg package of vehicle exhaust emission standards was adopted by the Council of Ministers in December 1987 and last year we played a major role in the achievement of a common position on tighter standards for small cars. The common position now awaits further consideration by the European Parliament under the co-operation procedure. The directives specify the tightest standards that may be applied by Member states and, subject to confirmation of the common position on small cars, we have decided to apply them all in the United Kingdom. We expect them to result in almost all cars in the United Kingdom requiring catalysts and to lead to a substantial improvement in air quality. It will, however, be possible for cars of less than 2 litres to meet these standards with lean-burn engines coupled with simple and robust oxidation catalysts. Lean-burn engines offer the prospect of significant fuel savings.

Sewage Outfalls

Mr. Redmond: To ask the Secretary of State for the Environment if he will list, by location, the sewage outfalls to the sea in *(a)* the Yorkshire water authority and *(b)* the Severn-Trent water authority; and of these, if he will show in his answer (i) those that are primary treatment works and (ii) those that are long outfall.

Mr. Moynihan: The Yorkshire water authority currently has the following outfalls which discharge direct to the North Sea:

Scarborough (Northern, Southern, Wheatcroft)
Bridlington
Filey (Brigg)
Whitby
Hornsea
Scalby (Scarborough)
Staithes
Robin Hood's Bay
Runswick Bay
Sandsend
Ravenscar
Withernsea

At Withernsea, sewage currently receives primary treatment before discharge. There are long sea outfalls at Bridlington and Hornsea and a new long sea outfall is under construction at Scarborough to replace the existing outfalls. There are new sewage outfalls to the sea in the Severn-Trent water authority area.

Employee Share Ownership

Mr. Ian Taylor: To ask the Secretary of State for the Environment what discussions have taken place as to the feasibility of introducing an employee share ownership scheme in any future privatisation that his Department may sponsor.

Mr. Ridley: In his reply on 15 March to a written question by my hon. Friend the Member for Gainsborough and Horncastle (Mr. Leigh), at column *238*, my hon. and learned Friend the Minister for Water and Planning announced that there will be special share offer arrangements for the employees of the new water plcs when the present water authorities are floated later this year. Discussions are in progress between my Department and the Water Authorities Association on the establishment of share schemes, approved by the Inland Revenue, as part of those share arrangements.

In his statement to the House on 3 February 1988 at column *983* my hon. Friend the Under-Secretary of State, the Member for Southampton, Itchen (Mr. Chope) made it clear that in evaluating private sector bids for the Crown Suppliers he would pay particular attention to proposals for the involvement of the staff in the success of the enterprise.

Housing Associations

Mr. George Howarth: To ask the Secretary of State for the Environment what assessment he has made of the differences in standards of construction between dwellings constructed and completed wholly by the housing association grant system and those either planned or completed through mixed housing association grant and private finance; and if he will make a statement.

Mr. Trippier: To receive housing association grant from the Housing Corporation all schemes must meet appropriate standards of construction and provide accommodation appropriate for the intended use. The same design and contracting requirements are specified by the Housing Corporation, irrespective of whether the schemes are financed wholly by public funds or by a mixture of HAG and loans from the private sector.

Community Charge

Mr. Cohen: To ask the Secretary of State for the Environment to what extent section 11(7) of the proposed Community Charges (Administration and Enforcement) Regulations allows a community charge registration officer to provide the police, immigration authorities and the Inland Revenue with a copy of the publicly available extract of the register.

Mr. Gummer: Not to any extent whatsoever.

Mr. Allen: To ask the Secretary of State for the Environment what timetable for implementation of the Community Charge (Administration and Enforcement) Regulations 1989, (S.I., 1989, No. 438) his Department is working to.

Mr. Gummer: The operative dates of the regulations are set out at the beginning of the statutory instrument. The regulations are all now in force except for regulations 4 and 5, which will come into effect on 22 May. These two regulations will enable registration officers to require information from individuals for the purpose of compiling their registers.

Mr. Blunkett: To ask the Secretary of State for the Environment whether young people over the age of 18 years who are either *(a)* studying on a discretionary grant or *(b)* on employment training or a similar scheme will have their income adjusted to take account of their obligation to pay the community charge from April 1989 in Scotland and from April 1990-91 in England and Wales; and if he will make a statement.

Mr. Gummer *[holding answer, 6 April 1989]:* Full-time students wil pay only 20 per cent. of the community charge, and people undertaking employment training will be entitled to claim rebates of up to 80 per cent. The level of discretionary grants is a matter for local education authorities and the level of training allowances is a matter for my right hon. Friend the Secretary of State for Employment.

Rights of Way

Mr. Andrew F. Bennett: To ask the Secretary of State for the Environment if he has any plans to seek powers to enable him to charge for public inspection of definitive maps and statements of public rights of way, contained in section 57(5) of the Wildlife and Countryside Act 1981.

Mrs. Virginia Bottomley: No.

Beaches

Mr. Redmond: To ask the Secretary of State for the Environment what will be the cost of bringing beaches in Yorkshire up to European Economic Community standards; and from what date he is expects the standards to be met.

Mr. Howard: The costs and completion date of capital works currently planned by Yorkshire water authority for improving bathing waters are set out below:

Water	*Cost £ million*	*Completion*
Robin Hood's Bay	1·3	Spring 1993
Scarborough (North and South Bays)	26·2	Summer 1991
Flamborough South Landing	1·0	Spring 1992
Withernsea	3·8	Spring 1992

Only one of these waters—that at Flamborough south landing—failed to comply with EEC standards in 1988. However, it is expected that all Yorkshire Water bathing waters will reliably meet those standards once the improvement works have been completed.

Dog Registration Scheme

Mr. Allen: To ask the Secretary of State for the Environment (1) if he will list the considerations which caused him to incorporate section 37 into the Local Government Act 1988;

(2) pursuant to his answer to the hon. Member for Uxbridge (Mr. Shersby) of 14 February, on dog registration, *Official Report*, column *186*, if he has any plans to repeal section 37 of the Local Government Act 1988;

(3) if he has consulted local authorities and other organisations on the question of dog registration, as required by section 37 of the Local Government Act 1988.

Mrs. Virginia Bottomley: Section 37 was inserted into the Act by another place against Government advice. We accepted it so as not to delay Royal Assent. We have no plans to repeal section 37. We do not intend to introduce a dog registration scheme so that the requirement to consult local authorities does not arise.

Rates

Mr. Allen: To ask the Secretary of State for the Environment what percentage of total personal disposable income was expended on domestic rates in the years 1959-60, 1979-80, 1984-85 and 1987-88.

Mrs. Virginia Bottomley: Domestic rate payments as a percentage of total personal disposable income in the United Kingdom are estimated to be 2 per cent. in 1979-80, 2·4 per cent. in 1984-85 and 2·6 per cent. in 1987-88. Information for 1959-60 is not available.

Mr. David Nicholson: To ask the Secretary of State for the Environment if he will estimate what the level of the uniform business rate in England would have been *(a)* in 1987-88 and *(b)* in 1988-89, if introduced on existing business rateable valuations.

Mrs. Virginia Bottomley: A uniform business rate for England set at the average level for 1987-88 would have been 224p in the pound. For 1988-89 it would have been 239·5p in the pound.

Strategic Planning (London)

Mr. Spearing: To ask the Secretary of State for the Environment if he will list those statutory powers in respect of strategic planning in the Greater London area which were formerly held by the Greater London council which are now not possessed by Her Majesty's Government.

Mr. Chope: The Local Government Act 1985 replaced the Greater London council's responsibility for preparing a structure plan under the former two-tier development plan system by providing that London borough councils prepare unitary development plans. Each plan, when it becomes operative will, for the area covered by the plan, supersede the Greater London developement plan. Since 1 April 1986 the boroughs have been responsible for handling all planning applications for which the former GLC held statutory responsibility.

Rating Reform

Mr. Allen: To ask the Secretary of State for the Environment if, further to his answer of 2 February, *Official Report*, columns *359-64*, to the hon. Member for Leeds, West (Mr. Battle), he will update the information provided where appropriate.

Mr. Gummer: The information I provided on 2 February remains the latest available.

Pesticides

Mr. Ron Davies: To ask the Secretary of State for the Environment (1) if he will publish a list of those pesticides which he views as persistent and toxic and with a liability to bio-accumulate;

(2) if he will publish a list of those pesticides which are on his Red List for priority review.

Mrs. Virginia Bottomley: I refer the hon. Member to the answer I gave on 10 April, which included the initial list of priority substances posing a particular risk for the aquatic environment (the Red List) selected primarily on the basis of their toxicity, persistence, and liability to bio-accumulate. Of the substances on that list, the following have been or can be used as pesticides:

Some Mercury compounds
gamma-Hexachlorocyclohexane
DDT
Pentachlorophenol
Hexachlorobenzene
Aldrin
Dieldrin
Endrin
Dichlorvos
Atrizine
Simazine
Tributyltin and triphenyltin compounds
Trifluralin
Fenitrothion
Azinphos-methyl
Malathion
Endosulfan

Loughborough and Angell Town Estates

Mr. Fraser: To ask the Secretary of State for the Environment how he intends to conduct a ballot of the tenants of the Angell town and Loughborough estates in Lambeth in relation to a housing action trust.

Mr. Trippier: Tenants in proposed housing action trust areas will be fully consulted before any ballots are held. We have already announced that the Electoral Reform Society has agreed to conduct ballots under the terms of section 61(3)(a) of the Housing Act 1988.

New Dwellings

Mr. Norman Hogg: To ask the Secretary of State for the Environment how many dwellings were completed by local authorities and new towns in England and Wales in 1988.

Mr. Trippier: It is provisionally estimated that there were 15,400 local authority and new town completions in England for 1988. For information on housebuilding in Wales, I refer the hon. Member to my right hon. Friend the Secretary of State for Wales.

Empty Houses

Mr. Norman Hogg: To ask the Secretary of State for the Environment how many local authority voids there were in England at the latest available date; and of this total, how many were *(a)* actually available for letting, *(b)* in various stages of repair and *(c)* empty for over 12 months.

Mr. Trippier: The information for April 1988 was reported by local authorities in the annual housing investment programme return (HIP 1) and appears in the "Housing Needs Appraisal: HIP 1 for 1988, Grossed for England", a copy of which is in the Library.

Stocken Hall, Rutland

Mr. Latham: To ask the Secretary of State for the Environment when a representative of his Department or of the Historic Buildings and Monuments Commission last visited Stocken hall, Rutland, to investigate the condition of that grade 2 listed building; and what action was taken as a result of those visits.

Mrs. Virginia Bottomley: An inspector from the Historic Buildings and Monuments Commission visited Stocken hall in April 1988, at which time certain wind and weather-proofing works were being carried out. Officials from the Department carried out a brief external inspection of the building in January 1989 following discussions with the local planning authority on future action in connection with Stocken hall. We understand that the building is being offered for sale.

Mr. Latham: To ask the Secretary of State for the Environment whether he intends to use the statutory powers available to him, or encourage the use of similar powers by the local planning authority, to bring about the immediate protection and preservation of Stocken hall, Rutland, a grade 2 listed building; and whether he will make a statement.

Mrs. Virginia Bottomley: The Department has held discussions with the local planning authority about the possibility of serving a notice under section 101 of the

Town and Country Planning Act 1971 on the owner of Stocken hall. My right hon. Friend will consider whether he should authorise the Historic Buildings and Monuments Commission to serve such a notice when the outcome of present attempts to sell the building is known.

Mr. Latham: To ask the Secretary of State for the Environment whether he will list the specific action which has been taken since the reply by my hon. Friend the Member for Bristol, West (Mr. Waldegrave) to the hon. Member for Rutland and Melton on 3 December 1986, *Official Report*, column *688*, to repair and restore the grade 2 listed building, Stocken hall, Rutland; and whether he will make a statement.

Mrs. Virginia Bottomley: We understand that since December 1986 the owners have carried out urgent repairs to wind and weather-proof Stocken hall. These works include patching a large hole in the roof with bitumen felt secured with wooden battens and boarding up and covering with plastic sheeting windows which were broken. These are the type of repairs which would in many circumstances meet the requirements of section 101 of the Town and Country Planning Act 1971.

Berne Convention

Mrs. Rosie Barnes: To ask the Secretary of State for the Environment whether it is possible to keep, breed, sell, and kill for commercial purposes those animals listed in appendix 2 of the convention on the conservation of European wildlife and natural habitats known as the Berne convention.

Mrs. Virginia Bottomley: In certain circumstances. I have written to the hon. Member with full details.

Boreholes (Drinking Water)

Mr. John Garrett: To ask the Secretary of State for the Environment if he will list the public buildings in Whitehall and Westminster in the care of the Property Services Agency which take drinking water from boreholes.

Mr. Chope *[holding answer 22 March 1989]:* Thames house south, Church house.

Amazonia

Mr. Dalyell: To ask the Secretary of State for the Environment, pursuant to the statement made on 13 March, *Official Report*, column 168 if he will make a further statement on the role Her Majesty's Government are playing in the intergovernmental panel on the climate change, and their work on clarifying the climatic consequences of deforestation in eastern Amazonia.

Mrs. Virginia Bottomley *[holding answer 10 April 1989]:* The United Kingdom's delegate to the UNEP/WMO intergovernmental panel on climate change is Dr. John Houghton, Director General of the Meteorological Office. The IPCC has set up three working groups, on the science of climate change, on the impacts of climate and on formulation of response strategies. All are to report by mid-1990. Dr. Houghton leads the science working group. The Government are supporting a central unit for this group, based on the Meteorological Office, and is funding working and plenary meetings. It is also supporting Dr. Martin Parry of the university of Birmingham, an internationally recognised expert on the impact of climate change, to contribute to the working group on impacts. Officials and experts from several Government Departments are contributing to the working group on response strategies. We have been assured that change in vegetation cover, which includes tropical deforestation, is one of the climate forcing factors being reviewed by the science working group.

EMPLOYMENT

Training Agency (Computer Information)

Mr. Baldry: To ask the Secretary of State for Employment what information is available to employers on computer assisted local labour information, developed by the Training Agency; what is the extent of the use of the system by employers; and if he will make a statement.

Mr. Cope: The key information, in the main collected from employers, held on the computer assisted local labour market information system (CALLMI), includes work force characteristics, recruitment practices and difficulties, use of new technology, and training-related data. The system itself is not directly accessible to employers, but summary analyses and reports by the Training Agency are readily available to employers and employer organisations. It is not possible to say how many employers have received copies of these reports nor to what use they have been put.

My Department, through the Training Agency and the establishment of training and enterprise councils, is committed to ensuring that all concerned with training, vocational education and enterprise have access to relevant and readily available information. CALLMI is a key tool in this process. We shall continue to seek ways of developing effective means of co-operation with other collectors and users of local labour market information, at the same time respecting the need for confidentiality concerning individual employers' data.

Agriculture (Accidents)

Mrs. Fyfe: To ask the Secretary of State for Employment whether he will estimate the number of accidents that go unreported in the agriculture industry.

Mr. Nicholls: All cases of fatal injury in the course of agricultural work activities are reported to the Health and Safety Executive's Her Majesty's agricultural inspectorate. It is not known what proportion of other reportable accidents from agricultural activities go unreported, but it is thought to be more than 50 per cent.

Career Development Loans

Mr. Carrington: To ask the Secretary of State for Employment how many people have taken up career development loans since the launch of the scheme in 1986; and if he will make a statement.

Mr. Cope: Since April 1986, 2,740 career development loans have been approved, 655 during the pilot phase and 2,085 since the scheme was launched nationally in July 1988. The total approved loan value is currently some £6·5 million.

The growth in the number of career development loans since they became available nationally last year has been

very encouraging. It has shown that many people both employed and unemployed, are willing to invest in their own future by paying for vocational training of their own choice to improve their job prospects.

Advertising

Mr. Pike: To ask the Secretary of State for Employment what is the cost to his Department of producing the information leaflet "You and Your Union: The Employment Act 1988", and what has been the cost of advertising this package.

Mr. Nicholls: The cost to the Department of Employment of producing the information booklet "You and Your Union: the 1988 Employment Act" was £9,395. A further reprint of the booklet has been ordered to meet demand but the cost of this is not known yet. The total media cost was £277,337, excluding VAT.

Labour Statistics

Mr. Rathbone: To ask the Secretary of State for Employment what is the latest measurement of long-term unemployment in East Sussex.

Mr. Lee: The information is available from the Library. In January 1989 the number of unemployed claimants in East Sussex who had been unemployed for 12 months or more was 5,143.

Mental Illness

Mr. Goodlad: To ask the Secretary of State for Employment what information he has about the loss of working time resulting from mental illness; and if he will make a statement.

Mr. Nicholls: There are no firm figures but the booklet "Mental Health at Work", published by the Health and Safety Executive, estimated that some 30-40 per cent. of all sickness absence from work is attributable to some form of mental or emotional disturbance.

University College of Wales

Mr. Gareth Wardell: To ask the Secretary of State for Employment if he will give his support to the application by the University College of Wales Swansea (Computeraid Ltd.) for European social fund grant funding.

Mr. Cope: My Department supports all European social fund applications which meet the European Commission's eligibility criteria.

Although my Department has not yet received formal notification of the European Commission's decision on United Kingdom social fund applications for 1989, we understand that the scheme to which the hon. Member refers was refused funding on what appears to be a technicality. A request therefore has been forwarded to the European Commission to review its decision.

Disabled People

Mr. Ashley: To ask the Secretary of State for Employment when he expects to publish his Department's internal review of employment services for disabled people; and if he will make a statement.

Mr. Lee: I refer the right hon. Member to the reply that I gave to my hon. Friend the Member for Exeter (Mr. Hannam) on 7 November 1988 at column *54*.

Tourism (Bristol)

Mr. Stern: To ask the Secretary of State for Employment if he has any plans further to assist Bristol city council to increase employment in tourism-related industries.

Mr. Lee: The English Tourist Board, on behalf of the Department of Employment, will be running one of its "Vision for the Cities" seminars in Bristol on 20 April 1989, as part of the Government's action for cities campaign. The aim of the seminar is to stimulate further development and investment which will expand tourism employment within the city.

Accidents

Mr. Andrew F. Bennett: To ask the Secretary of State for Employment what percentage of reported accidents were investigated by the factories inspectorate in 1988.

Mr. Nicholls: In 1987-88, 4·9 per cent. of reportable accidents reported to the factory inspectorate were investigated. All accidents involving fatal injuries were investigated. Reported accidents are selected for investigation after considering the gravity of the apparent breach, the need to give advice and the value of any information that would be obtained to prevent similar accidents.

EC Labour and Social Affairs Council

Dr. Goodson-Wickes: To ask the Secretary of State for Employment if he will make a statement on the European Community Labour and Social Affairs Council held in Luxembourg on 5 April.

Mr. Cope: It was a very constructive meeting. The Council reached agreement on a common position on three draft directives concerning the minimum safety and health requirements in the workplace. These cover the workplace; the use by workers of machines, equipment and installations; and the use by workers of personal protective equipment. There was some discussion of a proposal for social measures to assist workers in the shipbuilding industry who are made redundant or threatened with redundancy; and family benefits for migrant workers. The Commissioner gave an oral presentation on a possible community charter of fundamental social rights. Finally, the Council reached agreement on a text of a resolution on continuing vocational training.

WALES

Baglan Road

Mr. John Morris: To ask the Secretary of State for Wales what representations he has received regarding the congestion along the Baglan road; and what further urgent work will be put in hand, in addition to the work on traffic lights to be installed by the West Glamorgan county council.

Mr. Wyn Roberts: A petition has been received from the Port Talbot Ratepayers Association regarding congestion at Baglan. The scheme to install part-time traffic lights at Baglan roundabout which will start in the summer, includes provision for increased carriageway widths.

Domestic Rates

Mr. Rogers: To ask the Secretary of State for Wales what percentage of total personal disposable income in Wales was expended on domestic rates in the years 1959-60, 1979-80, 1984-85 and 1987-88.

Mr. Grist: The estimated percentages of total personal disposable income in Wales expended on domestic rates in the years 1979-80, 1984-85 and 1987-88 are as follows. Information is not available for the year 1959-60.

	Percentage
1979-80	1·47
1984-85	1·61
1987-88	1·90

Pollution

Mr. Ron Davies: To ask the Secretary of State for Wales if he will publish a table showing for each county in Wales for each of the last three years the number of pollution incidents caused by *(a)* silage liquor, *(b)* farmyard slurry and *(c)* other pollutants.

Mr. Grist: This information is not held by the Welsh Office. I will ask the chairman of the Welsh Water Authority to write to the hon. Gentleman.

Homelessness

Mr. Norman Hogg: To ask the Secretary of State for Wales how many households were accepted as homeless in Wales in the calendar years 1987 and 1988; and how many applications by households there were in those years.

Mr. Grist: The numbers of households accepted as homeless in Wales in the calendar years 1987 and 1988 were 5,683 and 6,818 respectively. The numbers of cases presented during those years were 8,423 and 10,018, respectively.

Bathing Water Survey

Mr. Gareth Wardell: To ask the Secretary of State for Wales if he is now in a position to place in the Library the results of the 1988 bathing water survey.

Mr. Grist: The results of the 1988 bathing water survey have already been placed in the Library. I refer the hon. Gentleman to the statement made by my hon. and learned Friend the Minister of State for the Environment to the House on 21 February.

Sewage (Sea Discharges)

Mr. Gareth Wardell: To ask the Secretary of State for Wales if the project on research that would determine the fate of viruses discharged into the sea in sewage has now started.

Mr. Grist: Yes.

Inward Investment (Report)

Mr. Gareth Wardell: To ask the Secretary of State for Wales when he intends to publish his response to the Select Committee on Welsh Affairs' report on inward investment.

Mr. Peter Walker: Shortly.

Tony Ball Associates

Mr. Alex Carlile: To ask the Secretary of State for Wales what payments have been made by his Department, in each of the financial years 1987-88 and 1988-89, to Mr. Tony Ball and Tony Ball Associates, respectively; and in respect of what work or services.

Mr. Peter Walker: Mr. Tony Ball undertook a study of the craft industry free of fees. He was paid £2,154 in 1987-88 and £350 in 1988-89 to meet his expenses. In addition, Tony Ball Associates were paid £63,269 in 1987-88 and £21,673 in 1988-89 exclusive of VAT in respect of the craft industry, the enterprise Wales and the Wales land of quality initiatives. All of this work was undertaken following a competitive tender, except for the craft industry element (£3,269 in 1987-88) which was paid for at cost.

National Curriculum

Mr. Gareth Wardell: To ask the Secretary of State for Wales when his Department will make available to schools in Wales, the document "National Curriculum: From Policy to Practice."

Mr. Peter Walker: Because there are some differences in the content and implementation of the national curriculum in Wales, my right hon. Friend does not intend to circulate the Department of Education and Science document, "National Curriculum: From Policy to Practice" to schools in Wales. An equivalent Welsh Office document is being produced and will be issued to schools in the current term.

Community Nursing Services (Report)

Mr. Gwilym Jones: To ask the Secretary of State for Wales when he will publish his response to the report of the review of community nursing services in Wales.

Mr. Grist: A circular is being issued today giving the Departmental reaction to the Community Nursing Review (CNR) report "Nursing in the Community—A Team Approach for Wales" and guidance and information as to what the next steps are to be. A copy has been placed in the Library of the House.

The report was, in my view, an excellent one and reaction to it has been overwhelmingly favourable. I am very grateful to Mrs. Noreen Edwards CBE, under whose chairmanship the review was conducted, and to her team for providing such a thorough analysis of community nursing in Wales and I am glad to be able to respond favourably to almost all the report's recommendations.

I have been made particularly aware of the importance of proper training and education for community nurses in Wales and we will be making additional funding available for this and for specific support for them in the operational context.

I am sure that the work stimulated by the report will have a major beneficial impact on the community nursing service in Wales for many years to come.

Population Movement

Dr. Thomas: To ask the Secretary of State for Wales what information he has on the numbers of people who have moved to live *(a)* into and *(b)* out of each district authority area in Wales in each year since 1979.

Mr. Grist *[holding answer 11 April 1989]:* Data from the National Health Service central registers (which relate to movements of persons on National Health Service doctors' lists) give an indication of migration into and out of Welsh counties. These are shown in the following table. Information is not available at district authority level.

Movements between family practitioner committee areas

(in thousands)

Year ended September	*1979*	*1980*	*1981*	*1982*	*1983*	*1984*	*1985*	*1986*	*1987*	*1988*

Note: Figures are derived from re-registration of patients with National Health Service general practitioners; for 1979 to 1983 they are based on a 10 per cent. analysis of re-registrations. Movements to or from overseas are excluded.

ENERGY

Nuclear Tax

Mr. Martyn Jones: To ask the Secretary of State for Energy (1) whether, in setting the nuclear tax level at 10 per cent., he took into account the cost of reprocessing, decommissioning of plant and the disposal of waste;

(2) on what basis the nuclear tax of 10 per cent. is expected to drop to 3 per cent. by the year 2000;

(3) what difference in the price of generation between nuclear power and fossil fuel the nuclear tax of 10 per cent. represents;

(4) whether the nuclear tax will take effect as soon as National Power begins operation as a private company.

Mr. Michael Spicer: The fossil fuel levy is not a nuclear tax but an allocation of existing nuclear costs. It will be levied on all sales of fossil-generated power by licensed suppliers and set at a level to recover any difference in price between the costs of meeting the non-fossil obligation and what would have been the cost of purchasing that electricity if it had been generated by fossil-fuel generating stations. Negotiations on contracts for generating capacity will not be completed until later this year. It is too early to say what the prices in these contracts will be or the implications for the level of the levy, either in 1990 or later in the decade.

The contracts for nuclear generating capacity will take into account the anticipated costs of reprocessing, decommissioning of plant and the disposal of waste.

The timing of the introduction of the levy will be dealt with in regulations made by the Secretary of State under clause 31 of the Electricity Bill.

OVERSEAS DEVELOPMENT

Angola

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what specific aid has been given to the Angolan Government by Her Majesty's Government in the last two years; and for which specific projects.

Mr. Chris Patten: In 1987, the most recent year for which final figures are available, expenditure was £211,000 on English language training projects and scholarships requested by the Angolan Government.

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the current value in pounds sterling of British Government aid to Angola.

Mr. Chris Patten: Final expenditure figures for 1988 are not yet available. In addition to continuing projects, we pledged £750,000 for emergency relief through international and non-Government organisations.

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the current value of European Community aid to Angola; and how this aid is managed and deployed.

Mr. Chris Patten: Some £66 million has been allocated to Angola's country programme under Lomé III, which runs from 1985 to 1990. Commitments so far have been made to agriculture, fisheries, industry and health.

Following the recent peace agreement, the Community plans to use some of the money which remains uncommitted to help with job creation and reintegrating former military personnel into civilian life. It also plans to give another £26 million for humanitarian, refugee and other assistance. In 1988 it gave some £6 million of food aid to Angola.

Proposals for aid allocations are approved by the Community member states. The Commission and its delegation in Luanda are responsible for managing projects and programmes, along with the Angolan authorities.

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the value of British Government aid to individuals and agencies in Angola not associated with the MPLA-PT Government of Angola.

Mr. Chris Patten: In 1987, we provided £50,000 for relief purposes through international and non-governmental agencies.

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what guarantees and mechanisms are in place to ensure that British Government aid to Angola is not used for military purposes.

Mr. Chris Patten: In common with our aid to other developing countries, our aid is provided for specific purposes. In Angola these are English language training projects and scholarships.

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations Her Majesty's Government have received from the Angolan Government concerning aid to Angola in the last two years.

Mr. Chris Patten: There are regular contacts between the two Governments about our aid programme. I had friendly discussions with President dos Santos and Ministers during my visit to Angola in February.

Developing Countries (Privatisation)

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to the reply to the hon. Member for Monklands, West on 6 February, *Official Report*, column *470*, (1) if he will name those developing nations which *(a)* reacted positively and *(b)* reacted negatively to that part of his Department's private sector development exercise relating specifically to the possibility of Britain offering assistance with the privatisation of nationalised industries;

(2) what were the terms, financial or otherwise, offered to developing countries in exchange for British assistance *(a)* in the promotion of private sector development and *(b)* relating directly to the privatisation of nationalised industries; and if he will make a statement.

Mr. Chris Patten: The exercise comprised an instruction to British posts in developing countries encouraging closer consultation with their United States counterparts with a view to being able to respond more effectively to developing country needs in relation to private sector development, including privatisation.

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if his Department has had any discussions with *(a)* bankers, *(b)* brokers and *(c)* management consultants concerning the possibility of Britain assisting with the privatisation of developing nations' nationalised industries; and if he will make a statement;

(2) whether officials from his Department have had meetings with representatives of the overseas privatisation unit of NM Rothschild; and if he will make a statement.

Mr. Chris Patten: A variety of discussions have taken place over time. It is widely recognised that Britain' private sector has a special expertise in this field.

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has established a unit within his Department to examine the possibility of Britain offering privatisation expertise to developing nations.

Mr. Chris Patten: I see no reason to establish such a unit. The Overseas Development Administration's arrangements for managing bilateral aid already enable it fully to consider proposals related to all aspects of private sector development including privatisation.

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs what has been the cost to date of the exercise undertaken to identify opportunities for assisting developing countries with the promotion of private sector development, including privatisation.

Mr. Chris Patten: The exercise has not resulted in significant additional expense. Providing the information requested would involve disproportionate cost, far exceeding any costs which the exercise itself has incurred.

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to conclude agreements with developing countries which would include Her Majesty's Government assisting with the privatisation of nationalised industries; and if he will make a statement.

Mr. Chris Patten: There are no immediate plans for the conclusion of such agreements, but we have always made clear that we are ready to consider helping where we can.

USAID

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the dates and locations when his officials have met representatives of the organisation USAID over the past two years.

Mr. Chris Patten: Foreign and Commonwealth Office officials, both at home and overseas, are in frequent touch with USAID officials.

NORTHERN IRELAND

Urban Development Grants

Mr. John Taylor: To ask the Secretary of State for Northern Ireland in which urban areas applications for urban development grants are now being accepted.

Mr. Needham: Applications for urban development grant funded by the Government are being accepted in Belfast and Londonderry. Under the second urban development programme funded by the international monetary fund for Ireland the advertised closing date for applications was 28 February 1989. Consequently, only in Belfast and Londonderry are applications now being accepted.

Dwellings (Valuation)

Mr. William Ross: To ask the Secretary of State for Northern Ireland how many dwellings in Northern Ireland have a net annual valuation of less than £60.

Mr. Ian Stewart: The information is not readily available and could be obtained only at disproportionate cost.

Schizophrenia

Mr. Goodlad: To ask the Secretary of State for Northern Ireland how much was spent in Northern Ireland in the last year on the care and treatment of patients suffering from schizophrenia; and what percentage that figure represented of total expenditure on *(a)* mental and *(b)* all health services.

Mr. Needham: The information is not available.

Mr. Goodlad: To ask the Secretary of State for Northern Ireland what is the current annual cost per patient to the National Health Service in Northern Ireland of the care and treatment of patients with a main diagnosis of schizophrenia psychoses.

Mr. Needham: The information is not available.

Knackeries

Mr. Maginnis: To ask the Secretary of State for Northern Ireland what study his Department has made of the Group Public Health Committee's report "The Unfit Meat Trade in Northern Ireland, Law and Enforcement Review" and if he will make a statement.

Mr. Needham: The Departments of Agriculture and Health and Social Services are considering the detailed recommendations made in the report and will issue a response shortly.

Mr. Maginnis: To ask the Secretary of State for Northern Ireland if he intends to bring forward new measures for the control of licensed knackeries to prevent unfit meat entering the human food chain.

Mr. Needham: A draft order in Council is being prepared by the Department of Agriculture for Northern Ireland which will provide for prescription in regulations of the standards to be met by knackeries, before such premises are licensed by district councils.

Mr. Maginnis: To ask the Secretary of State for Northern Ireland how many prosecutions have been brought against those operating illegal knackeries or trading in unfit meat during the last five years; what convictions have been obtained; and what penalties have been imposed.

Mr. Needham: The information is as follows:

Offence	*Prosecutions*	*Convictions*	*Total fines (plus costs)* £
(i) Operating illegal knackery	11	10	350
(ii) Trading in unfit meat	42	42	1,965

Mr. Maginnis: To ask the Secretary of State for Northern Ireland what specific and formal advice and assistance is available for those wishing to set up properly licensed and supervised knackeries to deal with fallen and casualty animals.

Mr. Needham: Any person wishing to set up a knackery can obtain advice from the environmental health department of the district council in whose area the proposed knackery would be situated. The advice would include information on licensing arrangements, siting and standards of premises and conditions to be observed in handling, treatment and movement of any unfit meat and the keeping of records.

Mr. Maginnis: To ask the Secretary of State for Northern Ireland if he will list existing licensed knackeries, with the location of each and the service each offers to farmers.

Mr. Needham: There are two licensed knackeries in Northern Ireland—Lisburn By-Products Ltd., Moira road, Lisburn and Ulster Farm By-Products Ltd., Glenavy. Both knackeries provide farmers with an essential means of disposal of casualty and dead animals.

Computer Consultants

Mr. Tim Smith: To ask the Secretary of State for Northern Ireland what was the total amount spent by his Department in 1988 on management and computer consultancy contracts, excluding hardware and software purchases; and if he will list each management or computer consultancy contract awarded by his Department in 1988, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Ian Stewart *[holding answer 4 April 1989]:* The total amount spent on management and computer consultancy in 1988 was £4,402,979. The remainder of the information is as follows:

Mr. William Strathearn

Mr. Livingstone: To ask the Secretary of State for Northern Ireland if he will publish in the *Official Report* the text of the letter from the Minister of State, the hon. Member for Hertfordshire, North (Mr. Stewart) to the hon. Member for Brent, East on 4 September 1988 about Mr. William Strathearn.

Mr. Ian Stewart *[holding answer 4 April 1989]:* No. It is not our usual practice to publish correspondence of this kind.

Regional Rates

Mr. Clifford Forsyth: To ask the Secretary of State for Northern Ireland if he will explain the methodology employed in striking the regional rate for Northern Ireland.

Mr. Ian Stewart *[holding answer 10 April 1989]:* I refer the hon. Member to the explanation of the regional rate methodology given in the information note "Northern Ireland Regional Rate 1989-90" which is available in the House of Commons Library in support of the Rates (Regional Rate) Order (Northern Ireland) 1989 which was laid before Parliament on 7 March 1989.

SCOTLAND

"Working for Patients"

Mr. Galbraith: To ask the Secretary of State for Scotland what consideration he is giving to the number of overseas patients that can be treated in the self-managing hospitals proposed in the White Paper "Working for Patients".

Mr. Michael Forsyth: We are considering how treatment of overseas patients in National Health Service hospitals, including self-governing hospitals, might best be administered in the context of the White Paper and the associated working papers.

Mr. Galbraith: To ask the Secretary of State for Scotland how many representations he has received on the White Paper "Working for Patients".

Mr. Michael Forsyth: Some 600 letters have been received, offering comments and suggestions in relation to various aspects of the White Paper.

Private Secretary (Under-Secretary of State)

Mr. Galbraith: To ask the Secretary of State for Scotland when he expects a new private secretary for the Parliamentary Under-Secretary for Health and Education, the hon. Member for Stirling, (Mr. Forsyth) to be in post.

Mr. Rifkind: There are no immediate plans to replace my hon. Friend's private secretary.

Conifers

Mr. Steel: To ask the Secretary of State for Scotland whether he will seek to alter the different tree-planting grants to eliminate the 300 per cent. differential between farm schemes and commercial schemes in the planting of conifers.

Lord James Douglas-Hamilton: No. Farmers have a choice as to which scheme they apply to enter.

Edinburgh-Carlisle Trunk Road

Mr. Steel: To ask the Secretary of State for Scotland if he will list the schemes approved and their expected completion dates for improvements to the A7 Edinburgh-Carlisle trunk road.

Mr. Rifkind: The major A7 schemes in the trunk road programme are the north Middleton diversion, the Dalkeith bypass and the Langholm bypass. Works started on the north Middleton bypass in March. Advance works on the Dalkeith bypass are expected to start in May or June and the main works in October. The contract period for both schemes is 24 months and they should therefore be completed during 1991. The Langholm bypass will not complete its statutory and design stages before the mid-1990s.

Mental Illness

Mr. Goodlad: To ask the Secretary of State for Scotland how many local authority residential places are currently available for those discharged from mental illness hospitals in Scotland; what is the current rate of occupancy; and what are the projected figures for the next two years.

Mr. Michael Forsyth: Information about the provision of residential places is given in annual statistical returns from local authorities. At 31 March 1988 the provisional number of residential places in local authority establishments was 167; the occupancy rate was 61 per cent. The local authorities' returns do not extend to planned provision.

University Grants

Mr. Andrew Welsh: To ask the Secretary of State for Scotland what plans he has to review the Scottish Education Department grant regulations which prohibit individuals who hold a higher national diploma qualification from receiving a full grant for a university course.

Mr. Michael Forsyth: Under present rules, eligible students who complete a course leading to a higher national diploma may qualify for a student's allowance for the third and any subsequent year of a full-time degree or comparable course.

With effect from session 1989-90, my right hon. and learned Friend has decided that those higher national diplomates who wish to proceed to undertake full-time studies at degree level in the sciences, technology, or certain teacher shortage subjects will, exceptionally, be entitled to grant assistance for the second and any subsequent year of a degree or comparable course.

Housing

Mr. Norman Hogg: To ask the Secretary of State for Scotland how many dwellings were completed by local authorities and new towns in Scotland in 1988.

Lord James Douglas-Hamilton: Although a number of returns have yet to be received, we estimate that almost 2,000 dwellings were completed by local authorities in Scotland in 1988. Returns submitted by new town development corporations indicate that 257 dwellings were completed during the year.

Homelessness

Mr. Norman Hogg: To ask the Secretary of State for Scotland how many households were accepted as homeless in Scotland in the calendar years 1987 and 1988; and how many applications by households there were in those years.

Lord James Douglas-Hamilton: Returns submitted by local authorities indicate that during 1987, 23,882 households applied to be considered under the homelessness legislation. Of these, authorities assessed 9,317 as being homeless. A comparable figure for 1988 cannot be provided at present as most local authorities still have returns outstanding.

Enterprise Allowance Scheme

Dr. Godman: To ask the Secretary of State for Scotland what is the number of unemployed people in *(a)* Greenock and Port Glasgow, *(b)* Strathclyde and *(c)* Scotland who have been helped to start a business through the enterprise allowance scheme in each year since its inception; and how many of these schemes have failed in each year.

Mr. Lang: The number of unemployed people who started their own business with the help of the enterprise allowance scheme in each year since its inception in August 1983 in the areas requested is set out in the table.

Enterprise allowance scheme

Year	*Entrants*		
	Greenock and Port Glasgow	*Strathclyde*	*Scotland*
1983-84 (August to March)	26	585	2,249
1984-85	48	1,352	3,794
1985-86	79	1,601	5,311
1986-87	105	2,386	8,260
1987-88	122	2,779	9,894
1988-89	101	2,558	8,494

Information on the number of these businesses which have subsequently failed is not available. However, the latest national survey shows that of those businesses completing 12 months on the scheme 74 per cent. were still trading 18 months after start-up with 65 per cent. still trading three years after start-up.

Working Women

Dr. Godman: To ask the Secretary of State for Scotland what was the annual number of *(a)* full-time and *(b)* part-time working women for each year since 1979 in (i) Greenock and Port Glasgow, (ii) Strathclyde and (iii) Scotland as a whole.

Mr. Lang: The table gives the number of *(a)* full-time and *(b)* part-time women employees in employment in Scotland for September each year since 1979, and the available information on women employees in employment for Strathclyde region and Greenock and Port Glasgow parliamentary constituency.

Information for Strathclyde and Greenock and Port Glasgow is available only from the 1981 and 1984 census of employment. For 1981 analyses for parliamentary constituencies do not distinguish full-time from part-time employees.

The figures for Scotland for 1984 onwards may be revised when the results of the 1987 census of employment available later this year.

Employees in employment full and part-time women workers at September

	Thousands	
	Full-time	*Part-time*
Scotland		
1979	571·6	330·8
1980	558·9	331·5
1981	534·2	337·8
1982	508·0	340·4
1983	503·6	336·8
1984	505·1	346·0
1985	504·9	363·2
1986	499·7	366·6
1987	503·3	380·7
1988	528·7	381·9
Strathclyde		
1981	252·3	146·9
1984	233·4	144·4
Greenock and Port Glasgow		
1981	13·7	
1984	8·3	4·6

General Practitioners (Contract)

Mr. Allan Stewart: To ask the Secretary of State for Scotland what representations he has received from general practitioners in the Eastwood constituency about a new contract for general practice in the National Health Service in Scotland.

Mr. Michael Forsyth: In addition to the discussions with my hon. Friend and the representations he has received on behalf of general practitioners in his constituency my right hon. and learned Friend and I have received representations from general practitioners throughout Scotland many of which have been helpful to us in drawing up a new contract for general practice in the National Health Service in Scotland. That new contract has been sent to the General Medical Services Committee and I am sending a personal copy to every general practitioner in Scotland. The document is being published in Scotland today and copies have been placed in the Library.

DEFENCE

Alcohol Consumption

Mr. Sillars: To ask the Secretary of State for Defence what is his policy with regard to the supply and consumption of alcohol on board Royal Navy vessels as it applies to *(a)* officers and *(b)* ratings.

Mr. Neubert: Ratings on board Royal Navy vessels are limited in their daily onboard alcohol consumption. No specific limits are placed on officers but it is the responsibility of commanding officers to ensure that alcohol consumption of all personnel is not excessive. Drunkenness, even off duty and ashore, is an offence under the Naval Discipline Act, which can attract a punishment of up to two years imprisonment.

Mr. Sillars: To ask the Secretary of State for Defence if submarines carrying nuclear weapons carry alcohol for consumption by the crew while the vessel is on active duty.

Mr. Neubert: Yes.

Mr. Sillars: To ask the Secretary of State for Defence if he will list the navies which contribute to the North Atlantic Treaty Organisation; and if he will indicate which do and do not permit alcohol consumption on board vessels.

Mr. Neubert: As far as I am aware only the United States Navy does not permit alcohol consumption on board.

Mr. Sillars: To ask the Secretary of State for Defence what is his estimate, by type, of the alcohol consumed on board Royal Navy vessels in the latest available year; and if he will indicate consumption differences between the wardroom and lower deck.

Mr. Neubert: Records are not maintained centrally. To obtain the information requested would involve disproportionate cost and effort, requiring individual returns from Royal Navy ships worldwide.

Mr. Sillars: To ask the Secretary of State for Defence if, in view of the recent court martial of the commanding officer of a submarine, who because of alcohol consumption was unable to be on board at the time of sailing and whose intake of alcohol started on board, he will review the policy of allowing alcohol consumption on board Royal Navy vessels.

Mr. Neubert: No. The policy on alcohol consumption aboard Royal Navy vessels takes full account of operational safety and efficiency while allowing those who so desire a moderate level of alcohol consumption during off-duty hours. By virtue of being at sea, frequently for long periods, Royal Navy personnel are already severely restricted in their freedom of choice of off-duty activity without considering further curtailment.

Specialist Staff

Mr. Cartwright: To ask the Secretary of State for Defence what evidence he has to suggest that it will be easier to recruit specialist staff for the directorate general of defence quality assurance in Teesside than in south east England.

Mr. Sainsbury: The directorate general of defence quality assurance is currently experiencing difficulty in recruiting specialist staff to work in south-east England, despite the higher pay allowances offered.

The level of unemployment in the likely travel-to-work area for the proposed site is considerably higher than in the south-east. We would expect to be able to recruit or train people with the technical skills and expertise we require from Teesside which has a strong heavy engineering, process and chemical engineering tradition.

Northern Ireland

Mr. Trotter: To ask the Secretary of State for Defence how many units of battalion or equivalent size, are currently serving in an infantry role in Northern Ireland, and as part of the permanent garrison are on short-term detachment; and what have been the figures in each year since 1969.

Mr. Archie Hamilton: I shall write to my hon. Friend.

Soldiers (Costs)

Mr. Trotter: To ask the Secretary of State for Defence what is the current annual cost of a Regular Army soldier and of a Territorial Army soldier.

Mr. Archie Hamilton: The estimated annual cost at 1987-88 prices of a regular soldier is £14,100, and of a Territorial Army soldier £2,500. These figures cover pay and allowances, personal equipment and other support costs and in the case of the Regular Army soldier, elements for training and non-effective benefits. Training cost figures for Territorial Army soldiers are not separately identifiable without disproportionate cost and effort.

Nuclear Convoys

Mr. McFall: To ask the Secretary of State for Defence (1) what prior warning was given to local authorities, both district and region, in the Clydeside area of the passage of nuclear convoys during the three weeks beginning Monday 20 March.

(2) what is his policy for alerting local authorities to the imminent passage of nuclear naval convoys through their area.

Mr. Archie Hamilton: It has been the long-standing practice of successive Governments neither to confirm nor to deny the presence of nuclear weapons at any particular location, and it is not our policy to inform local authorities of nuclear weapon movements. We do, however, inform local police forces, who are responsible for road traffic control.

Anti-tank Weapons (Movements)

Mr. Menzies Campbell: To ask the Secretary of State for Defence whether light anti-tank weapons en route by rail and road from Royal Ordnance, Chorley to Ministry of Defence establishments are guarded by an armed escort.

Mr. Archie Hamilton: It would not be in the interests of security to divulge the arrangements for the physical protection of military stores during transit.

Mr. Menzies Campbell: To ask the Secretary of State for Defence what assessment has been made of the danger of theft of light anti-tank weapons in transit from Royal Ordnance, Chorley, to Ministry of Defence establishments; and if he will make a statement.

Mr. Archie Hamilton: The danger of theft of these stores is constantly reviewed in the light of the security threat assessment. It would not be in the interests of security to divulge the current assessment.

Rolls-Royce

Mr. Nellist: To ask the Secretary of State for Defence if he will list in the *Official Report* the value of headquarter contracts awarded to Rolls-Royce Ltd. and Rolls-Royce plc by his Department for goods and services destined for the British armed services in each of the five years to 31 March 1988.

Mr. Sainsbury *[holding answer 4 April 1989]:* The value of headquarters contracts awarded to Rolls-Royce Ltd. and Rolls-Royce plc. for goods and services destined for the British armed forces in each of the five years to 31 March 1988 were as follows:

	£ million
1983-84	370·00
1984-85	390·00
1985-86	445·00
1986-87	300·00
1987-88	220·00

HEALTH

Meningitis

Mr. Redmond: To ask the Secretary of State for Health how much funding has been made available by his Department for research into the causes of clusters of meningitis; and if he will make a statement on what results have so far been obtained.

Mr. Jackson: I have been asked to reply.

The Medical Research Council, which receives its grant-in-aid from this Department, is the main agency through which the Government support medical research. The council is funding a range of research into meningitis, and details are available in the reply that I gave to my hon. Friend the Member for Uxbridge (Mr. Shersby) on 21 December 1988 at column *291-92*. The Council is not, however, funding research into the causes of clusters of meningitis.

The council is always ready to consider soundly based scientific proposals for funding of new research, in competition with other applications.

Griffiths Report

Mr. Ashley: To ask the Secretary of State for Health when his Department expects to publish the Government's response to the Griffiths report on community care.

Mr. David Alton: To ask the Secretary of State for Health when he now intends to implement the terms of the Griffiths report "An Agenda for Action."

Mr. Mellor: I refer the hon. Member and the right hon. Member to my reply to the hon. Member for Livingston (Mr. Cook) on 6 April 1989 at column *291*.

Eye and Dental Examinations

Mr. Allen: To ask the Secretary of State for Health what information his Department has on the numbers of people who currently have eye tests and dental examinations *(a)* in England and *(b)* in the appropriate area covering Nottingham.

Mr. Mellor: I refer the hon. Member to my reply to him on 24 November at column *261*. I regret that the local information requested is not available.

Air Conditioning

Mr. Redmond: To ask the Secretary of State for Health which Trent regional health authority buildings have wet-air cooling air conditioning systems fitted; what action is being carried out to have them replaced by a different type of air conditioning system; and if he will make a statement.

Mr. Freeman: Information available centrally shows that the following buildings in the Trent region had wet-spray cooling towers in July 1986:

Leicester Royal Infirmary
Leicester General Hospital
Glenfield General Hospital
Groby Road Hospital
Derby Royal Infirmary
Derby City Hospital
Bassetlaw District General Hospital
Doncaster Royal Infirmary
Nottingham City Hospital
Queens Medical Centre
Q M C University Hospital
Grantham Hospital
Pilgrim Hospital
Lincoln County Hospital
Balderton Hospital
Barnsley District General Hospital
Northern General Hospital
Royal Hallamshire Hospital
Rotherham District General Hospital
Chesterfield and North Derbyshire Royal Hospital
Scarsdale Hospital

The Department issued preliminary guidance in May 1987 and a detailed code of practice on the control of legionellae in health care premises in July 1988. Both the preliminary guidance and the code of practice recommended against premature replacement of wet-spray systems, unless these cannot be operated safely in accordance with specified technical criteria.

Chiropody

Mr. Allen: To ask the Secretary of State for Health, further to his reply to the hon. Member for Nottingham, North, of Tuesday 29 November, *Official Report*, column *187-88*, whether all patients on the home treatment list for chiropody have received written confirmation of continuing home treatment; and if he will make a statement.

Mr. Freeman: Responsibility for the management of local health services rests with the district health authority concerned (in this case Nottingham health authority). I suggest that the hon. Member contacts the chairman of Nottingham health authority for the information he seeks.

Birth Statistics

Mr. Redmond: To ask the Secretary of State for Health if he will list by year from 1979 the estimated percentage of women delivering in the Trent regional health authority whose deliveries were *(a)* spontaneous, including abnormal presentation of head and breech spontaneous, *(b)* instrumental, including forceps, vacuum and for breech extraction, *(c)* caesarean section and *(d)* other unspecified means.

Mr. Freeman: The information is not available in precisely the form requested. The table shows the mode of delivery for women normally resident in Trent RHA.

The estimates are derived from the hospital in-patient enquiry (HIPE) data collection which closed 1985. Data from 1981 is unreliable and has been excluded from the table.

Mode of delivery for women normally resident in Trent RHA

Percentages

Year	*Spontaneous*[1]	*Instrumental*[2]	*Caesarean*	*Other and unspecified*
1979	77·0	14·8	7·8	0·4
1980	75·1	15·7	9·1	0·1
1981	n/a	n/a	n/a	n/a
1982	75·5	14·3	10·2	0·0
1983	75·7	14·3	10·0	0·0
1984	76·0	13·8	10·2	0·0
1985	78·6	12·6	8·7	0·0

[1] Includes abnormal presentation of head and breech spontaneous.
[2] Includes forceps, vacuum and breech extraction.
n/a = Data not available.

Mr. Redmond: To ask the Secretary of State for Health if he will list by year from 1979 to date the estimated percentage of women delivering in the Trent regional health authority *(a)* whose labours were induced, *(b)* whose labours were of spontaneous onset and *(c)* who had elective caesarean section.

Mr. Freeman: The information is not available in precisely the form requested. The table shows the mode of delivery for women normally resident in Trent RHA.

The estimates are derived from the hospital in-patient enquiry (HIPE) data, collection around in 1985. Data from 1981 is unreliable and has been excluded from the table.

Induction of labour (with mode of delivery) for women normally resident in Trent RHA

Percentages

Year	*Induced labours*	*Labours of spontaneous onset*	*Elective caesarean sections*
1979	25·1	70·5	4·4
1980	23·4	72·9	3·7
1981	n/a	n/a	n/a
1982	20·5	75·0	4·5
1983	21·6	74·2	4·2
1984	18·3	77·1	4·6
1985	18·1	78·4	3·5

n/a = Data not available.

Disabled Persons

Mr. Hannam: To ask the Secretary of State for Health what progress has been made in implementing section 5 of the Disabled Persons (Services, Consultation and Representation) Act 1986 in respect of its obligation to place duties upon educational authorities and social services authorities to identify, assess and provide for the needs of people with mental handicaps at the time that they move out of full-time education; and what arrangements have been made to ensure that these facilities are being monitored in respect of their implementation in terms of quality of life.

Mr. Mellor: Section 5 of the Act, which came into force on 1 February 1988, requires local authorities to identify all disabled school leavers, including those with mental handicaps, and assess their needs for welfare services. Although children leaving school in 1990 will be the first

group to fall within these provisions, we have asked local authorities to undertake similar functions for as many disabled children leaving school before that date as possible. The Department's social services inspectorate is undertaking two inspections of the implementation of sections 5 and 6 of the Act.

Mr. Hannam: To ask the Secretary of State for Health what plans he has to implement sections 1 and 2 of the Disabled Persons (Services, Consultation and Representation) Act 1986; and whether he will meet the cost implications required to appoint authorised representatives for all people with mental handicaps in connection with the provision of services and the right to obtain relevant information to facilitate an informed choice of a selection of appropriate support services.

Mr. Mellor: We have accepted the view of the local authority associations that detailed work, including costings, on sections 1, 2 and 3 of the Act should follow implementation of section 7.

Immunopathology

Mr. Redmond: To ask the Secretary of State for Health if he will give for the Trent regional health authority *(a)* the number and *(b)* the locations of consultants in immunopathology; and if he will make a statement.

Mr. Mellor: The total number of consultants in post for immunopathology in the Trent region as at 30 September 1987 is five (3·3 whole-time equivalent). This includes permanent paid, honorary and locum staff.

Consultant contracts are held by the employing regional health authority and teaching districts, so information is not available centrally on locations of those working in one or more districts.

Mental Health Act 1983

Dr. Twinn: To ask the Secretary of State for Health when the code of practice required under section 118 of the Mental Health Act 1983 will be laid before the House.

Mr. Freeman: There has been extensive consultation on two drafts of the code. I have established a small working group of people with wide experience of mental health matters to consider the comments received and produce a final draft, which we expect to lay before the House this autumn. The composition of the working group is as follows:

Chairman:

Mr. A. J. Collier, CB—formerly deputy secretary, Department of Health and Social Security;

Members:

Mr. M. Brown—Director of nursing (mental health) west Lambeth health authority;
Mrs. J. Miles—General manager, priority care services unit, Aylesbury Vale health authority;
Professor E. Murphy—Consultant psychiatrist and deputy chairman, mental health act commission;
Mr. N. Welch—Principal social worker, Oxfordshire county council social services department;

Secretary:

Mr. W. Bingley—Legal director of MIND, on secondment to the Department of Health while acting as secretary;

Assistant secretary:

Mrs. M. Houston—Department of Health.

Census Information

Mr. Brandon-Bravo: To ask the Secretary of State for Health whether he will authorise any extension to the release of information from censuses more recent than 1881.

Mr. Freeman: Public access to individual census returns less than 100 years old is not generally permissible. However, I am prepared to extend the existing special arrangements which apply to the censuses of 1891 and 1901 and allow, subject to the consent of the person concerned or of direct descendant, for the release to researchers of the information recorded about that person's age and place of birth. This information may now be released also in respect of persons who die childless, provided the consent of the next of kin is given, and it will be available additionally to public trustee administrators seeking to trace possible beneficiaries to the estate of a deceased person. A charge for this service, approximating to the cost of providing it, will be made by the registrar general.

"Working for Patients"

Mr. Ashley: To ask the Secretary of State for Health what representations he has had from disability organisations on the National Health Service White Paper "Working for Patients."

Mr. Mellor: We have received representations so far from three different organisations in the disability field. We are taking the opportunity of the response to emphasise to them that the continued provision of services for disabled and chronically sick people will be ensured by the White Paper proposals.

Rheumatologists

Mr. Ashley: To ask the Secretary of State for Health what percentage of health districts do not have a rheumatologist in post.

Mr. Mellor: Figures for September 1987 show than 34 per cent. of the 191 health districts in England did not have a rheumatologist in post.

Systemic Lupus Erythematosus

Mr. Ashley: To ask the Secretary of State for Health what steps his Department is taking to publicise the effects of systematic lupus erythematosus.

Mr. Freeman: The Department is not involved directly in publicising the effects of this disease, but welcomes the important work done by organisations such as Arthritis Care.

Artificial Limbs and Appliances

Mr. Alfred Morris: To ask the Secretary of State for Health if he will list all the bodies which have a statutory duty or powers to provide orthoses, prostheses or special equipment to people with disabilities; if he will specify in each case the particular circumstances in which such equipment can be provided and any restrictions on its use; if he has any plans to rationalise the provision of these services; and if he will make a statement.

Mr. Mellor: A wide range of bodies provide equipment to disabled people for purposes including education and

employment. Detailed responsibility in fields of health and social services with regard to equipment for disabled are as follows.

The duty to provide the facilities in question for people with disabilities arises from the duty of the Secretary of State under the National Health Service Act 1977 to promote the establishment in England and Wales of a comprehensive health service. This duty is discharged through various bodies.

District health authorities may provide orthotic appliances, footwear and certain types of prosthesis, when the patient has been examined and the appliance etc. prescribed by or under the direction of a consultant, either at a hospital, or at a clinic or on the occasion of a domiciliary visit.

Where provision or renewal of such appliances is recommended, the consultant may, if satisfied that the condition has reached stability, decide that supply be continued for a stated period of up to five years. In the case of breast prostheses and wigs, there is no such limit.

Following referral from a general practitioner to a consultant ophthalmologist, low vision aids may be prescribed through the hospital eye service's low vision clinic.

Hearing aids may be prescribed by a hospital consultant following referral from a general practitioner they are supplied and fitted on free loan by NHS hearing centres.

Communication aids may be prescribed by a hospital consultant to help with speech and language impairment.

Equipment to enable people to be nursed in their own home may be supplied free to out-patients being actively treated or to discharged in-patients, for as long as it is required. This equipment may be on loan and returnable; or consumable.

General practitioners may prescribe certain equipment as items on the drug tariff. This includes some incontinence equipment (but not pads and garments which are obtainable, if necessary, through the community nursing services). People with stomas requiring ostomy equipment are permanently exempt from the usual charges.

The Disablement Services Authority supplies artificial limb prostheses. Its doctors assess people who are referred by their surgeon or general practitioner.

The Disablement Services Authority supplies on loan a range of wheelchairs on the recommendation of any NHS doctor. It will also meet the cost of repair to wheelchairs except in the case of misuse or neglect. Such equipment should be returned when no longer needed.

The Disablement Services Authority also has powers to provide a range of services to war pensioners, including orthopaedic footwear, surgical appliances, hearing aids, wigs and home nursing equipment. (War pensioners may also obtain these services through their local district health authority.)

The Department of Health provides certain services directly.

The Artificial Eye Service provides artificial eyes, cosmetic shells and orbital facial prostheses through its clinics.

Environmental control equipment for severely disabled people may be provided on free loan to people meeting specific criteria as assessed by certain doctors acting on the authority of regional medical Officers (this authority is devolved to district medical officers in some regions).

Where they are satisfied of need, local authority social services departments have a duty which includes the provision of facilities to meet the needs of a disabled person. Local authorities may make a charge for such services and, where appropriate, equipment should be returned when no longer required. This equipment includes wheelchairs for temporary use.

The services of the Disablement Services Authority will pass to district health authorities on 1 April 1991 and negotiations are well in hand on the best way of carrying these services forward in future, in the light of local circumstances in each region and district.

Ambulance Services

Mr. Evennett: To ask the Secretary of State for Health what information he has regarding the arrangements which exist for the interchange of information between ambulance services in England; and if he will make a statement.

Mr. Freeman: Regional ambulance officers are responsible for ensuring co-operation and co-ordination of ambulance services within their region and they hold regular meetings for that purpose with the chief ambulance officers of these services. Regional ambulance officers themselves form a group which meets regularly with departmental officials to facilitate the exchange of information between services. In addition, ad hoc seminars and conferences are held when necessary to discuss matters of national import.

Mr. Evennett: To ask the Secretary of State for Health if he will make a statement on the current standards of training provided for ambulance crews in England.

Mr. Freeman: The National Health Service Training Authority is the body responsible for devising the programme of training and syllabi for ambulance staff and in addition it also monitors extended training in the skills of advanced resuscitation. Training is carried out by regional ambulance training schools.

All grades of employees must attend appropriate courses as determined by their employing authority. To attain the grade of qualified ambulanceman, an employee must undertake a six-week approved course in ambulance aid; a two-week driver course; complete at least 12 months on operational duties and be assessed by the employing authority as competent over the whole range of duties. Qualified and leading ambulancemen must attend a two-week post-proficiency course in ambulance aid at intervals of no more than five years.

NHS Finance

Ms. Harman: To ask the Secretary of State for Health when he expects district health authorities and any National Health Service self-governing hospitals to be paying market rates of interest under the proposals on his capital charges working paper on the National Health Service on their land building and equipment; and if he will make a statement.

Mr. Mellor: The rate of interest used in the calculation of capital charges will be set in line with the discount rate for the non-trading part of the public sector. The Chief Secretary recently announced that this rate will be 6 per cent. The capital charges scheme will not apply to

self-governing hospitals. Self-governing hospitals will have an intitial debt equal to the value of the capital assets transferred; the total arrangements for servicing the capital of self-governing hospitals will be consistent with the capital charging scheme.

Benzodiazepine

Ms. Primarolo: To ask the Secretary of State for Health if he will commission the Institute of Psychiatry to carry out research into *(a)* the number of children in the United Kingdom addicted to benzodiazepines, *(b)* the number of adults in the United Kingdom addicted to benzodiazepines, *(c)* the number of people placed in psychiatric hospitals in the United Kingdom in order to withdraw from benzodiazepines and *(d)* the number of people on sick or invalidity benefit in the United Kingdom following benzodiazepine withdrawal; and if he will make a statement.

Mr. Mellor *[holding answer 11 April 1989]:* There are no plans at present for the Department to commission research in the specific areas referred to by the hon. Member. However, the Department has sponsored a significant body of research relevant to benzodiazepines, mainly through the Institute of Psychiatry. In addition, the Medical Research Council, which is the main agency through which the Government support medical research in the United Kingdom and which receives its grant from the Department of Education and Science, is supporting a team at the Institute of Psychiatry which is examining the effects of benzodiazepines on mental function.

Ms. Primarolo: To ask the Secretary of State for Health what figures are available showing the trend of benzodiazepine prescriptions in 1988.

Mr. Mellor *[holding answer 11 April 1989]:* The number of prescriptions for benzodiazepines dispensed by community pharmacists in Great Britain in the period January to June 1988 compared with 1987 was as follows:

	Number of prescriptions millions
January to June 1987	12·7
July to December 1987	12·8
January to June 1988	11·9
July to December 1988	n/a

n/a—Not available.

Ms. Primarolo: To ask the Secretary of State for Health if he will introduce legislation to prevent the prescription of benzodiazepines to children under the age of 16 years.

Mr. Mellor *[holding answer 11 April 1989]:* No. The benzodiazepines are clinically useful in treating children. Some of the drugs are essential for the treatment of epilepsy and they are valuable for short-term use to relieve acute anxiety. Occasional use of the drugs to treat night terrors and somnambulism may also be justified. It is up to doctors to prescribe the drugs properly in accordance with the guidance available to them.

Ms. Primarolo: To ask the Secretary of State for Health (1) whether he will request the Committee on Safety of Medicines to issue further advice to doctors in the light of the increase in prescriptions for benzodiazepines in 1987;

(2) what advice the Committee on Safety of Medicines is issuing to doctors about the prescription of benzodiazepines to children;

(3) whether he will meet the Committee on Safety of Medicines to discuss the increase in benzodiazepine prescriptions in 1987.

Mr. Mellor *[holding answer 11 April 1989]:* The Committee on Safety of Medicines published advice on the prescribing of benzodiazepines in Current Problems No. 21, issued to all doctors in January 1988; a copy is in the Library. Its advice, which is still valid, is directed towards the treatment of all patients and is also summarised in the latest edition of the British National Formulary (BNF) which the Department issues to all doctors. The BNF also warns that hypnotics, the most common of which are benzodiazepines, should rarely be prescribed for children. I have no present plans to meet the Committee or to ask it to issue further advice on this subject.

Ms. Primarolo: To ask the Secretary of State for Health what steps he intends to take following the increase in the number of prescriptions for benzodiazepines dispensed by community pharmacists in 1987.

Mr. Mellor *[holding answer 11 April 1989]:* Since 1979 the overall trend in the number of prescriptions for benzodiazepines has been downwards. We estimate that in Great Britain, 25·4 and 25·5 million prescriptions were dispensed for benzodiazepines during 1986 and 1987 respectively. These estimates are based on a sample of approximately one in 200 prescriptions dispensed by retail chemists and appliance contractors in England and Wales. For Scotland, the sample is one in 100. The difference between 1986 and 1987 figures is within sampling error and is not statistically significant.

Ms. Primarolo: To ask the Secretary of State for Health what is his estimate of the number of people put on benzodiazepines during 1988 who have taken them for longer than the period advised by the Committee on Safety of Medicines.

Mr. Mellor *[holding answer 30 January 1989]:* This information is not collected centrally.

Medicines (Safety)

Ms. Primarolo: To ask the Secretary of State for Health (1) if he will list all issues of the Committee on Safety of Medicines bulletin entitled "Current Problems" which have been withheld from publication after initial preparation in the last 12 months, giving the reasons in each case;

(2) what steps he intends to take to ensure that the Committee on Safety of Medicines is able to issue advice to doctors on Bolvidon.

Mr. Mellor *[holding answer 11 April 1989]:* Only one article approved for issue by the Committee on Safety of Medicines was withheld from publication in this period. This article entitled "Mianserin and White Blood Cell Disorders in the Elderly" was withheld from Current Problems Bulletin No. 24 (published in January 1989) because of a High Court injunction. An article on this subject was subsequently published in Current Problems No. 25, in March 1989, and sent to all doctors. Bolvidon is referred to in this article since mianserin is its active ingredient.

Optical Equipment (Non-qualified Staff)

Mr. Thurnham: To ask the Secretary of State for Health what representations he has received about auto refractors and auto optitesters being used by non-qualified optician staff; and if he will make a statement.

Mr. Mellor *[holding answer 11 April 1989]:* We have received representations from a number of organisatons and individuals about the use of auto refractors and auto optitesters by non-qualified staff. The Opticians Act 1958 provides that sight tests using such instruments may be conducted only by a registered medical practitioner or a registered ophthalmic optician. We have no plans at present to change this requirement.

BM Test BC Strip

Dr. Thomas: To ask the Secretary of State for Health whether he will consider making BM test BC strip available on prescription; and if he will make a statement.

Mr. Mellor *[holding answer 11 April 1989]:* I would consider any application from the suppliers for the inclusion of this strip on the list of chemical reagents prescribable by general practitioners. Whether such an application would be successful would depend on the likely level of demand and the price. The strips currently prescribable meet the needs of most diabetics. Other types of strip are available through the hospital service.

Brain Injuries (Rehabilitation)

Mr. Fearn: To ask the Secretary of State for Health what plans he has made to evaluate the services available within Britain for the rehabilitation of the brain-injured, including the centre for brain injury rehabilitation and development; and if he will make a statement.

Mr. Mellor *[holding answer 11 April 1989]:* I understand that the Centre of Brain Injury Rehabilitation and Development is located in Wales and that my right hon. Friend the Secretary of State for Wales has provided funds for an evaluation of the centre. Officials from this Department are considering the scope for sponsoring research related to services in England for those suffering from traumatic brain injury.

Drugs (Safety)

Ms. Primarolo: To ask the Secretary of State for Health what adverse reports have been received by the Committee on Safety of Medicines about the effect of the drug Bolvidon on patients.

Mr. Mellor *[holding answer 11 April 1989]:* There are two branded medicinal products containing the active ingredient mianserin; one of these is Bolvidon. To date, the Committee on Safety of Medicines has received just over 1,700 reports of adverse reactions which may be associated with mianserin. These reports describe more than 360 separate reactions. A report of a suspected adverse drug reaction does not necessarily mean a causal relationship. The Committee carefully monitors all issues of drug safety, and where necessary, issues advice by means of their bulletin "Current Problems" to doctors, dentists and pharmacists. In the case of mianserin, "Current Problems" has drawn attention to various adverse reactions in December 1981 (No. 7), October 1982 (No. 8) April 1983 (No 10) and March (No. 25). Copies are in the Library.

Written Answers to Questions

Thursday 13 April 1989

CIVIL SERVICE

Civil Service Commission

Mr. Higgins: To ask the Minister for the Civil Service what plans he has for further changes in the role of the Civil Service Commission.

Mr. Luce: In 1982, the Civil Service Order in Council was changed so as to divide responsibility for recruitment between the Civil Service Commissioners on the one hand and Ministers on the other. The commissioners retained responsibility for the selection of middle and senior level staff—about 15 per cent. of the Civil Service. Departments assumed full responsibility for the majority of recruitment —85 per cent.—subject to certain rules laid down by the Minister for the Civil Service.

In the light of current developments in Civil Service management, including the recent Next Steps initiative, it is now proposed to extend the area of recruitment which is the responsibility of Departments. It is proposed that from 1 April 1991, Departments and agencies should be free to carry out their own recruitment to grades and posts below grade 7, except for fast stream entrants. The Civil Service Commissioners would remain responsible for the recruitment and certification of staff at grade 7 and above —the more senior grades—and of their fast stream feeder entries. Departments and agencies, which will then be responsible for over 95 per cent. of recruitment, will act under rules laid down by the Minister for the Civil Service, which will reflect the principle of selection on merit by fair and open competition. The Civil Service Commissioners will advise the Minister on these rules, and will also be required to monitor, independently, their application by Departments, and to report accordingly. The commissioners will be free to publish their advice and reports.

The commission will continue to make arrangements for recruitment to posts which remain the responsibility of the commissioners, and will support their new advisory and monitoring responsibilities. In addition, the Commission will be prepared to undertake, on repayment, recruitment of other grades on behalf of Departments, agencies and other bodies. A new executive agency will be created within the commission to carry out recruitment functions. Departments and agencies, however, will be free to make alternative arrangements for recruiting staff to the grades for which they are responsible, provided they observe the rules that will be promulgated.

A considerable amount of detailed work remains to prepare for the transfer of responsibilities, to establish the executive agency on a repayment basis, and to make the necessary financial and legislative adjustments. In carrying this forward in the period up to 1991 and beyond, the objective will be to secure a smooth transition. There will be full discussion and consultation as appropriate with all concerned, including the staff of the Commission and their trades union representatives.

My right hon. Friend the Secretary of State for Foreign and Commonwealth Affairs is considering the application of the proposed changes to the diplomatic service.

In due course it will be necessary to replace or amend the Civil Service Order in Council and the associated general regulations, to give effect to these proposals.

NATIONAL FINANCE

Taxes and Benefits

Mr. Nigel Griffiths: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* up-to-date figures on the same basis as those provided to the hon. Member for Hornchurch (Mr. Squire) in the *Official Report*, 10 January, columns *633-56*.

Mr. Norman Lamont: I have arranged for tables giving the information requested to be placed in the Library of the House.

Pay and File

Mr. Wilshire: To ask the Chancellor of the Exchequer when it is planned to implement the new system of pay and file for companies, introduced in the Finance (No. 2) Act 1987, and the new interest rules for employers' PAYE deductions, introduced in the Finance Act 1988.

Mr. Norman Lamont: The implementation of pay and file for companies, and the general interest charge on employers' PAYE deductions delayed beyond the end of the tax year, have to be fitted in with the other major changes in direct taxation which are in hand. When the enabling legislation for these measures was before the House in 1987 and 1988 respectively, Ministers said that on present plans they would not be implemented until 1992 at the earliest. The detailed timetable has been revised since then to take account of new initiatives such as independent taxation.

Under this revised timetable, the starting dates for these two measures will not be until 1993 at the earliest. I cannot be more precise at this stage. Firm starting dates will be announced in due course, and the likely starting date for pay and file will be announced in sufficient time to allow companies and their advisers to complete their preparations for the change. Companies which would, at present, have difficulty in meeting the time limits under pay and file for estimating their tax liability and filing their return, will be able to bring themselves up to date gradually over the period from now up to 1993.

European Economic Interest Groupings

Mr. Robert G. Hughes: To ask the Chancellor of the Exchequer if he will make a statement on the tax rules for European economic interest groupings.

Mr. Norman Lamont: Under the terms of European Council regulation EEC No. 2137/85, European economic interest groupings may be set up. The regulation is directly applicable under Community law throughout the European Community and has effect from 1 July 1989. However, certain articles are not completely self-executing, and in order to make the regulation fully effective in the United Kingdom, domestic legislation will be required. For taxation purposes, EEIGs will be fiscally transparent; profits will be taxable and losses allowable only at the level

of their members. After consultations with interested parties, my right hon. Friend the Chancellor of the Exchequer intends to bring forward proposals covering the tax position of EEIGs in the 1990 Finance Bill. However, these will be effective from 1 July 1989.

Other rules, for example on the method of registering EEIGs, which will be needed to make the regulation fully effective in Great Britain will be contained in regulations which my right hon. and noble Friend the Secretary of State for Trade and Industry intends to lay before the Houses of Parliament on 19 April 1989.

Income Tax

Sir Ian Gilmour: To ask the Chancellor of the Exchequer whether unmarried couples who are living together and are treated for Department of Social Security purposes like married couples will be able to claim married couple's income tax allowance after April 1990.

Mr. Lawson *[holding answer 11 April 1989]:* No. The married couple's allowance will be given only if the couple are both married and living together. As at present, however, an unmarried couple looking after one or more children will be able to claim an additional personal allowance between them. The additional personal allowance will be equal in amount to the married couple's allowance.

Incomes

Sir Ian Gilmour: To ask the Chancellor of the Exchequer if he will update to 1989-90 the figures given in reply to the right hon. Member for Chesham and Amersham, *Official Report*, 1 December 1988, column *361*, showing net incomes in 1979-80 and 1988-89 at *(a)* two-thirds average earnings, *(b)* average earnings, *(c)* twice average earnings and *(d)* three times average earnings, of single-wage married couples with two children, as percentages of the net incomes at the same earnings level of (i) single people and (ii) two-wage married couples, where the combined wage comes to the specified total and the husband earns two thirds and the wife one third.

Mr. Lawson *[holding answer 11 April 1989]:* The information is in the table.

Net income of one earner married couple with 2 children as a percentage of net income of (a) single person and (b) 2 earner married couple with no children on same level of earnings

(a) As percentage of net income of single person

	Multiples of average earnings[1]			
	Two thirds	*One*	*Two*	*Three*
1979-80	121·9	115·3	108·0	106·7
1988-89	117·4	112·0	107·4	105·4
[2]1989-90	116·2	111·3	107·0	104·9

(b) As percentage of net income of married couple with 2 earners and no children

	Multiples of average earnings[1]			
	Two thirds	*One*	*Two*	*Three*
1979-80	101·9	100·7	103·4	[3]99·3
1988-89	99·8	100·1	102·6	[3]99·7
[2]1989-90	98·8	99·1	101·6	99·0

The amounts of income (£ per week) are as follows:

Net income after income tax, national insurance contributions and child benefit (£ per week)

	Multiples of average earnings[1]			
	Two-thirds	One	Two	Three
	Married couple with one earner and 2 children			
1979-80	65·46	88·60	163·44	226·55
1988-89	145·99	201·89	379·14	531·60
[2]1989-90	158·71	218·79	409·35	573·21
	Single			
1979-80	53·71	76·85	151·30	212·29
1988-89	124·33	180·23	353·18	505·64
[2]1989-90	136·56	196·64	382·61	546·47
	Married couple with 2 earners and no children			
1979-80	64·24	88·02	158·14	[3]228·15
1988-89	146·27	201·62	369·43	533·41
[2]1989-90	160·62	220·69	402·89	579·26

[1] Average earnings are those for full time males working a full week at adult rates in all occupations. They are £109·30 per week in 1979-80 and assumed to be £254·10 in 1988-89, an increase of 8¼ per cent. on average earnings in 1987-88 and £273·10 in 1989-90, and increase of 7½ per cent on 1988-89 (the increases used by the Government Actuary in assessing the level of the National Insurance Fund as described in paragraph 3·02 of the Autumn Statement 1988).

[2] Income tax rates and allowances used for 1989-90 are those proposed in the 1989 Budget. The calculations also assume post-October NIC rates; before October people earning more than £115 per week will pay an additional £3·01 per week.

[3] Corrected from the reply of 1 December 1988.

Sir Ian Gilmour: To ask the Chancellor of the Exchequer if he will publish a table showing the net incomes in 1989-90, after taking into account income tax, national insurance contributions, child benefit and basic state retirement pensions, of a pensioner couple aged 65 to 74 years, a pensioner couple aged over 75 years and a single-earner couple with two children, assuming weekly gross incomes, excluding basic state retirement pension where appropriate, of £100, £150, £200, £250 and £300.

Mr. Lawson *[holding answer 11 April 1989]:* Information is given in the tables. The income tax rates and allowances used for 1989-90 are those proposed in the Budget.

Net income after income tax, national insurance contributions and child benefit, 1989-90

Gross income[1] £ per week	*Pensioner couples aged 65-74*	*Pensioner couples aged 75 or over*
169·80	153·24	154·10
219·80	190·67	191·53
269·80	223·38	223·38
319·80	260·88	260·88
369·80	298·38	298·38

[1] Including basic state retirement pension of £69·80 per week paid to the husband.

Gross income £ per week	*One earner married couple with two children[1]*
100	104·54
150	137·54
200	170·54
250	203·54
300	236·54

[1] Assuming post-October rates of NIC, and child benefit of £7·25 per week (per child).

OVERSEAS DEVELOPMENT

Sudan

Mr. David Nicholson: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will detail the United Kingdom aid provided to the Sudan in 1988-89, under the following headings *(a)* food, *(b)* medical supplies, *(c)* transport and *(d)* water supplies-equipment; and if he will give the amounts provided by the United Kingdom for the provinces of Equatoria, Bahr Ghazal and Upper Nile.

Mr. Chris Patten: Final expenditure figures for 1988-89 are not yet available. Provisional figures for Britain's emergency and relief aid to Sudan include the following:

(a) Food: £6·908 million (including the United Kingdom share of European Community food aid).
(b) Medical supplies: £0·173 million.
(c) Transport: £0·169 million.
(d) Water supplies-equipment: £0·040 million.

Of these, about £4·5 million was for the southern provinces of Equatoria, Bahr el Ghazal and upper Nile. Figures for the individual provinces are not available.

In addition to emergency and relief aid, our programme of long-term development assistance and programme aid included:

(a) Food production: £1·2 million.
(b) Medical supplies: £2·3 million.
(c) Transport: £2·7 million.
(d) Water supplies-equipment: £2·0 million.

Southern African Development Co-ordination Conference

Miss Lestor: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list United Kingdom contributions to each of the member states of the Southern African Development Co-ordination Conference through multilateral agencies, in each year from 1979 onwards *(a)* in cash and *(b)* in 1988 prices.

Mr. Chris Patten: The information is as follows. Figures for 1987 are not yet available from all multilateral agencies.

United Kingdom
Share of multilateral aid to SADCC countries 1980—1986

Miss Lestor: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list British contributions to the Southern African Development Co-ordination Conference for each year since its foundation.

Mr. Chris Patten: Since the Southern African Development Co-ordination Conference was founded, the United Kingdom has committed the following amounts:

£10 million in 1980-81
£2 million in 1982-83
£13 million in 1985-86
£10 million in 1986-87
£10 million in 1987-88
£15 million in 1988-89

Expenditure is recorded within the figures for the country where individual projects are based.

Miss Lestor: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will list the level of British bilateral aid to each of the member states of the Southern African Development Co-ordination Conference for each year from 1979 to 1987;

(2) if he will list the level of British bilateral aid to each of the member states of the Southern African Development Co-ordination Conference for each year from 1979 to 1987 inclusive, at 1987 prices.

Mr. Chris Patten: I refer the hon. Lady to the answer which my right hon. Friend the Minister of State, Foreign and Commonwealth Office, gave her on 13 May 1988 at column 250.

EDUCATION AND SCIENCE

Teachers

Mr. Thornton: To ask the Secretary of State for Education and Science (1) if, further to his reply to the hon. Member for Crosby of 21 March, *Official Report*, column *495*, he will publish a similar table of information about re-entrant teachers for the year ended 31 March 1984;

(2) if, further to his reply to the hon. Member for Crosby of 21 March, *Official Report*, column *496*, he will publish a similar table of qualified teachers returning to employment in maintained secondary schools in the years ended 31 March 1984 and 1985; to what extent in each of 1984, 1985 and 1986 the numbers of teachers identified reflect a return to *(a)* full-time and *(b)* part-time and *(c)* supply teaching; and if he will make a statement;

(3) further to his reply to the hon. Member for Crosby of 21 March, *Official Report*, column *495*, if he will now publish an analysis by age and sex of the numbers of re-entrant teachers to maintained secondary schools, in each of the years 1984, 1985 and 1986; what further information is available to his Department in relation to the length of time such re-entrant teachers had spent out of service; what further information is available to his Department in relation to re-entry to *(a)* full-time, *(b)* part-time and *(c)* supply teaching, where this can be differentiated by age, sex or length of time out of service; and if he will make a statement.

Mr. Butcher: Figures for the years ending March 1984, 1985 and 1986 of re-entrants to teaching in maintained schools in England are as follows:

	Year ending		
	1984	*1985*	*1986*
Re-entrants to maintained nursery, primary and secondary schools by sector			
Re-entrants to nursery and primary schools			
number	6,470	6,890	7,670
as a percentage of all entrants to these schools	65	65	63
Re-entrants to secondary schools			
number	6,380	6,210	6,480
as a percentage of all entrants to these schools	41	45	47
Re-entrants to nursery, primary and secondary schools			
number	12,860	13,100	14,150
as a percentage of all entrants to these schools	50	53	55
Re-entrants to maintained secondary schools by graduate status and degree subject			
Graduate re-entrants	3,250	3,130	3,420
Of which, number whose degree subject is:			
Mathematics	230	200	240
Physics	90	110	110
Other sciences	500	450	530
Geography	210	190	210
Economics and other social sciences	250	250	270
English	530	480	510
History	240	230	280
Modern languages	360	400	420
Other subjects	840	810	850
Non-graduate re-entrants	3,140	3,080	3,070
Re-entrants to maintained secondary schools by sex and age			
Men re-entrants	1,440	1,280	1,280
Of which, number aged:			
less than 30	350	270	230
30-34	390	330	310
35-39	310	290	290
40-44	160	160	180
45-49	100	110	130
50 and over	130	110	140
Women re-entrants	4,950	4,930	5,210
Of which, number aged:			
less than 30	780	610	600
30-34	1,210	1,150	1,150
35-39	1,470	1,590	1,780
40-4	860	890	980
45-49	410	450	410
50 and over	220	240	290

These figures relate to qualified teachers re-entering full-time service. Comprehensive information on re-entry to supply teaching is not held centrally. Information on re-entry to part-time teaching, and on the length of time out of service of those re-entering full-time service, could only be extracted at disproportionate cost.

Mr. Thornton: To ask the Secretary of State for Education and Science (1) further to his reply to the hon. Member for Crosby of 21 March, *Official Report*, column *496*, in relation to qualified teachers returning to employment in maintained secondary schools, how many *(a)* full-time, *(b)* part-time and *(c)* supply teachers (i) return to and (ii) leave such employment, in circumstances where they leave for reasons other than retirement; what trends are discernible in the net position between such leavers and all returners in each year; and if he will make a statement;

(2) further to his reply to the hon. Member for Crosby of 21 March, *Official Report*, column *496*, in relation to qualified teachers returning to employment in maintained secondary schools, what comparable information is available to his Department from the database of teacher records, or any other source, in relation to the numbers and degree subjects of teachers leaving employment in maintained secondary schools, in circumstances where they leave for reasons other than retirement; if he will make it his policy to publish comparable analyses of such leavers and all returners in each recent year; and if he will make a statement.

Mr. Butcher: Figures from the Department's database of teacher records, of full-time teachers in maintained secondary schools in England leaving full-time service in the maintained sector before normal retirement age (60) are given in the table. Also shown are the numbers of re-entrants to full-time service in these schools.

	Year ending in March:		
	1984	*1985*	*1986*
All leavers below normal retirement age	13,350	14,620	15,150
Graduate leavers	7,900	8,880	9,130
Of which, number whose degree subject is:			
Mathematics	620	650	750
Physics	250	280	320
Other sciences	1,240	1,420	1,520
Geography	470	570	540
Economics and other social sciences	660	750	770
English	1,130	1,230	1,210
History	590	670	690
Modern languages	1,030	1,140	1,160
Other subjects	1,910	2,180	2,340

	Year ending in March: 1984	1985	1986
Non graduate leavers	5,450	5,740	5,840
Re-entrants	6,380	6,210	6,480

The figures for leavers below normal retirement age includes teachers retiring early, as well as those leaving for reasons other than retirement. The precise numbers and characteristics of those retiring early can not be readily identified, but their overall number is of the order of 4,000 per year.

All figures relate to qualified teachers leaving or re-entering full-time service. Comprehensive information on departures from and re-entry to supply teaching is not held centrally, while information relating to part-time teaching could only be extracted at disproportionate cost.

Mr. Bradley: To ask the Secretary of State for Education and Science over each of the 10 years from 1978 to 1988 how many *(a)* male and *(b)* female head-teachers of schools in England have left for the following reasons: *(a)* normal retirement, *(b)* early retirement, specifying the various reasons for this, *(c)* death in service, and *(d)* death within five years of retirement; and how many in each category were from (i) primary schools, (ii) secondary schools, (iii) special schools and (iv) other schools.

Mr. Butcher: The information requested is provided in the following tables.

Table providing numbers of head teacher retirements/deaths in respect of English primary schools, between 1978 and 1988

	Normal retirements	Early retirements: Infirmity	Premature	Deaths in service	Deaths within 5 years of retirement

Tulse Hill School

Mr. Fraser: To ask the Secretary of State for Education and Science how quickly he will come to a conclusion on the application under section 12 of the Education Act for the closure of Tulse Hill school and the amalgamation with William Penn boys school in Red Post hill, London SE24.

Mr. Butcher: The proposals concerning Tulse Hill and William Penn schools are under consideration by my right hon. Friend. On 6 February, the Department wrote to the Inner London education authority and the boroughs of Lambeth and Southwark to consult them on a possible modification to the proposals. The responses to that letter are being considered and a decision is expected shortly.

Student Grants

Mr. Atkinson: To ask the Secretary of State for Education and Science how he proposes that 1990's student grant will reflect the community charge; and if he will make a statement.

Mr. Jackson: The Government will take into account all factors affecting students' financial circumstances in setting

the level of the student grant for 1990-91. The community charge will not necessarily lead to an increase in outgoings: students will no longer have to pay domestic rates.

Research Grants

Mr. Andrew Smith: To ask the Secretary of State for Education and Science how much research money has been granted by the Government to non-United Kingdom universities in each of the last 10 years; and what was the nature of the research for which money was granted in each instance.

Mr. Jackson: This information is not readily available and could be provided only at disproportionate cost.

Vice-Chancellors

Mr. Andrew Smith: To ask the Secretary of State for Education and Science what was the annual increase in the average salary of university vice-chancellors in each of the last 10 years, expressed *(a)* in cash terms *(b)* real terms and *(c)* as a percentage of the average rise in non-manual earnings.

Mr. Jackson: This information is not collected.

Tuition Fees

Mr. Andrew Smith: To ask the Secretary of State for Education and Science what was the average cost of tuition fees per student for (i) medical courses, (ii) science courses and (iii) arts courses for each of the last 10 years in *(a)* cash terms and *(b)* real terms, with 1979 = 100, for (1) undergraduates and (2) postgraduates.

Mr. Jackson: Tuition fees for full-time home and EC students are not differentiated by subject area. The standard maximum tuition fees eligible for reimbursement under the student awards arrangements have been:

	Undergraduates		*Postgraduates*	
	£	[1]*Index*	£	[1]*Index*
1979-80	595	100	890	100
1980-81	740	105	1,105	105
1981-82	900	116	1,320	113
1982-83	480	58	1,413	114
1983-84	480	55	1,494	115
1984-85	500	55	1,569	115
1985-86	520	54	1,632	114
1986-87	536	54	1,680	113
1987-88	556	53	1,730	111
1988-89	578	52	1,800	108

[1] Measured in real terms using the GDP deflator.

Mr. Andrew Smith: To ask the Secretary of State for Education and Science what was the total local authority spending on university tuition fee in each of the last 10 years in *(a)* cash terms and *(b)* real terms, with 1979 = 100, for (i) undergraduates and (ii) postgraduates.

Mr. Jackson: The available data are listed below. The figures represent the total amount local education authorities pay in fees for students in receipt of a mandatory or discretionary award. The indexed figure is based on real terms 1978-79 prices.

LEA expenditure on postgraduate and undergraduate fees[1] 1978-79 to 1986-87—England and Wales

£ million

Year	*Undergraduate*		*Postgraduate*	
	Cash terms	[3]*Real terms*	*Cash terms*	[3]*Real terms*
1978-79	121·1	100	3·0	100
1979-80	136·1	96	3·3	95
1980-81	175·4	105	4·4	106
1981-82	201·0	109	5·3	116
[2]1982-83	121·6	62	2·7	56
1983-84	122·2	59	2·7	53
1984-85	124·3	58	2·8	52
1985-86	130·0	57	2·8	50
1986-87	133·5	57	3·0	51

[1] Excludes sandwich students in placement year.
[2] In 1982-83 the rate of fees set for first degree and diploma courses were reduced from £900 to £480 with compensating increases in direct funds to institutions.
[3] Indexed 1978-79 = 100.

Grant-Maintained Schools Trust

Mr. Fatchett: To ask the Secretary of State for Education and Science, further to his reply of 4 April, *Official Report*, column *121*, what steps his Department took on learning that the literature of the grant-maintained schools trust had incorrectly described it as a registered charity.

Mrs. Rumbold: None. The grant-maintained schools trust is an independent body and it was for it to decide what steps to take. The trust was not described as a charity in any document issued by my Department.

Mr. Fatchett: To ask the Secretary of State for Education and Science, further to his reply to the hon. Member for Leeds, Central, 4 April, *Official Report*, column *121*, when the discussions with the chairman and director of the grant-maintained schools trust were held; and what matters were discussed.

Mrs. Rumbold: My right hon. Friend and I met the chairman and director of the trust in October last year and in February this year. Matters discussed included the number of schools making inquiries to the trust about grant-maintained status and a possible future role for the trust in helping any schools approved for grant-maintained status prepare for their new role.

HM Inspectors

Mr. Straw: To ask the Secretary of State for Education and Science (1) what was the total establishment of Her Majesty's inspectors of education; and how many were in post, in the years 1979, 1983 and 1988;

(2) how many *(a)* full individual school inspections, *(b)* other individual inspections and *(c)* whole authority inspections were carried out by Her Majesty's inspectors in each of the years 1983 to 1988; and what proportion of the total number of (i) primary and (ii) secondary schools were so inspected by category in each year;

(3) if he will publish a table for each local education authority in England showing the number of inspectors and advisers employed by each authority, and the ratio of that number to the number of the pupils in that authority's area, with national totals and the ratio for England as a whole.

Mr. Kenneth Baker: The total complement of Her Majesty's inspectorate, and the numbers of staff in post (including inspectors of further and higher education), were as follows, on 1 January in the year in question:

	1979	*1983*	*1988*
Complement	430	440	485
Staff in post	404	386	477

Inspections which resulted in published reports on individual institutions and whole authorities in the calendar years 1983 to 1987 are listed in the following table. The proportion of schools inspected relative to the total number of schools in England in those years is shown in brackets. Figures for 1988 cannot be provided as a number of reports arising from inspections begun in that year have yet to issue.

	Primary		*Secondary*		*Whole*
	Number	*per cent.*	*Number*	*per cent.*	*authority*
1983	95	(0·5)	88	(2·0)	3
1984	74	(0·4)	76	(1·7)	5
1985	99	(0·5)	83	(1·9)	1
1986	102	(0·5)	68	(1·6)	1
1987	90	(0·5)	59	(1·4)	1

These figures exclude inspections of schools relating to some 300 district and national survey reports which issued over the period in question, and all inspections of youth and community work and further and higher education institutions.

Her Majesty's inspectorate does not undertake "other individual inspections", but makes thousands of visits to schools in the course of its day-to-day business. Estimated figures for the academic years requested are provided in the following table. The proportion of schools visited relative to the total number of schools in England in those years is shown in brackets.

	Primary		*Secondary*	
	Number	*per cent.*	*Number*	*per cent.*
1983-84	3,600	(18)	3,400	(77)
1984-85	3,000	(15)	2,200	(50)
1985-86	3,000	(15)	2,100	(49)
1986-87	3,200	(16)	2,300	(54)
1987-88	3,300	(17)	2,400	(58)

Thus, on average, each secondary school is visited about every two years and each primary school about every five years.

I regret that information in the form requested relating to local authority advisers and inspectors is not collected centrally.

School Governors

Mr. Madden: To ask the Secretary of State for Education and Science how many school governors in the last two years have *(a)* been dismissed, *(b)* resigned and *(c)* had their nomination withdrawn by an appropriate nominating body; and if he will make a statement.

Mrs. Rumbold: The information requested is not available.

Mr. Madden: To ask the Secretary of State for Education and Science what rights of appeal he provides for school governors *(a)* against dismissal and *(b)* against their nomination being withdrawn; and if he will make a statement.

Mrs. Rumbold: It is for local authorities to decide whom to appoint to the places on school governing bodies reserved for them. It also falls to them to decide whether a governor appointed by them should be removed from office. But they must exercise their powers reasonably, and we would consider very carefully any complaint that an authority had not done so in a particular instance.

Appointing bodies other than local authorities have similar powers. A complaint that such a body has exercised its powers unreasonably may be pursued through the courts. There is no provision for the dismissal of elected or co-opted governors.

Collective Worship

Mr. Fatchett: To ask the Secretary of State for Education and Science whether his Department will issue guidance to local education authorities setting out a definition of a collective act of worship under the terms of the Education Reform Act 1988.

Mrs. Rumbold: The Department's circular 3/89, issued in January this year, contains guidance on the new requirements for religious education and collective worship in schools. It also explains that one of the functions of local standing advisory councils on RE may be to advise LEAs on matters connected with religious worship in schools. Copies of the circular were sent to all local education authorities and schools in England and to other bodies, and a copy has been placed in the Library. The Department does not intend to issue further guidance in this area.

Ethnically Based Statistics

Mr. Hague: To ask the Secretary of State for Education and Science what is the result of consultation on the draft circular on the collection of ethnically based statistics on school teachers; and if he will make a statement.

Mr. Kenneth Baker: My Department and the Welsh Office issued a draft circular on the collection of ethnically based statistics on school teachers as a basis for consultation in October 1987. Comments were received from 58 bodies and individuals. The great majority were sympathetic to the principle of such collection. Issues of concern included the classification scheme to be adopted; monitoring of applicants for teaching posts; and timing. In the light of these responses my right hon. Friend the Secretary of State for Wales and I have today issued a revised circular. Copies will be placed in the Library. Complete data from all authorities will be required in January 1990. The collection of this data is essential to measure the success of our efforts to secure an increase in the number of school teachers from ethnic minority backgrounds.

TRADE AND INDUSTRY

Research and Development (Yorkshire)

Mr. Redmond: To ask the Chancellor of the Duchy of Lancaster what are the latest figures on distribution for his Department's budget for research and development in Yorkshire.

Mr. Atkins: In 1988-89 my Department's spending on eligible research and development projects in the Yorkshire and Humberside region amounted to £3·75 million. This figure does not include some elements of expenditure which it was not possible to break down on the basis required.

Furniture and Furnishings (Safety)

Mr. Andrew F. Bennett: To ask the Chancellor of the Duchy of Lancaster what discussions in applying Furniture and Furnishing (Fire) (Safety) Regulations 1988 to baby products he or his officials have had with the Baby Products Association; and what steps he has taken to ensure these regulations will be compatible with the need for baby fabrics to allow air to pass through them to ensure a child's breathing is not restricted when the fabric comes into contact with a baby's face, particularly if it gets wet.

Mr. Forth: Officials in my Department discussed the application of the Furniture and Furnishings (Fire) (Safety) Regulations with the Baby Products Association and the British Association of Nursery and Pram Retailers on 22 February.

The only padded nursery products where air permeability appears to be a significant factor are pillows and baby nests. The regulations apply to the fillings of pillows but not to their covers. Baby nests are outside the scope of the regulations. There would thus appear to be no conflict between these regulations and the need for permeability in nursery products.

However, I am considering whether babies may be harmed by exposure to fire retardant chemicals likely to be used on the cover fabrics of some nursery products in order to make them match resistant and thereby meet the requirements in the regulations. If the medical advice I am seeking suggests that there may be such a danger, I shall consider amending the regulations in order to provide a limited exemption.

Manufacturing Productivity

Mr. Thurnham: To ask the Chancellor of the Duchy of Lancaster if he will make a statement about productivity levels in British manufacturing industry.

Mr. Atkins: In the three months to January 1989, manufacturing productivity, as measured by output per person employed, was at a record level, 6 per cent. higher than a year earlier and 49 per cent. higher than the 1979 average level. During the 1980s, manufacturing productivity in the United Kingdom has grown faster than in all other major industrialised countries.

Internal Market

Mr. Harry Barnes: To ask the Chancellor of the Duchy of Lancaster what plans he has for the east midlands area to benefit from the operation of the European internal market from 1992.

Mr. Atkins: The completion of the single market means greater freedom for trade, and many studies have demonstrated the benefits of that. The single market will bring opportunities for business in all parts of the country. DTI is seeking to ensure that business in the east midlands, as in other regions, takes the necessary action to respond effecitively to the opportunities and challenges ahead, and the "Europe open for business" campaign has stimulated great interest throughout the country.

Spirits

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster if he has received a copy of the representations of the European Community Commission by the European Community Spirits Producers Association to seek the early elimination of the remaining customs duties and frontier taxes levied on European Community spirits in certain EFTA markets; what action his Department has taken to support the United Kingdom spirits industry in achieving the removal of these duties and taxes; and if he will make a statement.

Mr. Alan Clark: My Department has received a copy of the representations to the European Commission by the European Community Spirits Producers Association. The Government strongly support the opening up of the EFTA markets to Community producers, and we shall press the Commission to react positively to the proposals in the association's paper.

Import Quotas

Mrs. Fyfe: To ask the Chancellor of the Duchy of Lancaster how quotas imposed on goods imported into the United Kingdom are achieved in circumstances where more than one company wishes to import and their desired total imports would exceed the quota.

Mr. Alan Clark: Except when arrangements are made for the country of origin to administer a quota by dividing it amongst its exporters, quota shares are normally allocated to applicants on the basis of their past trade in the product concerned.

Estate Agents

Mr. McCrindle: To ask the Chancellor of the Duchy of Lancaster if he has received proposals for the regulation of estate agencies from the National Association of Estate Agents; and if he will make a statement.

Mr. Forth: I have received proposals from the National Association of Estate Agents and others on the regulation of estate agents.

I am currently considering whether it might be appropriate to supplement the existing consumer protection provisions of the Estate Agents Act 1979, perhaps with an effective self-regulatory system incorporating a code of practice. I hope to be in a position to announce the conclusion of my review fairly soon.

Timeshare

Mr. McCrindle: To ask the Chancellor of the Duchy of Lancaster what representations he has received about timeshare mail shots; if he has any plans to seek to make them illegal; and if he will make a statement.

Mr. Forth: I receive a number of complaints about the use of prize-draw mail shots by certain timeshare companies and the Department's leaflet—"Your Place in the Sun"—warns consumers to be particularly wary of such offers.

I have no plans to legislate. The Timeshare Developers Association lays down standards for the kind of

promotions undertaken by its members in its code of ethics. The Advertising Standards Authority considers complaints about promotional material which does not comply with the British Code of Sales Promotion Practice and the Control of Misleading Advertisements Regulations 1988, administered by the Director General of Fair Trading, apply to misleading advertising.

Mr. McCrindle: To ask the Chancellor of the Duchy of Lancaster if he has received any representations concerning the introduction of a cooling-off period for timeshare buyers; and if he will make a statement.

Mr. Forth: I do receive complaints about some timeshare companies not providing a cooling-off period. It is an important safeguard for consumers, and an increasing number of timeshare companies recognise this. The Timeshare Developers Association's code of ethics requires its members to provide a minimum cooling-off period of five days. The Department's leaflet—"Your Place in the Sun"—advises those interested in timeshare not to sign anything unless a cooling-off period is allowed.

House of Fraser

Mr. Campbell-Savours: To ask the Chancellor of the Duchy of Lancaster on what dates since 1979 he or any of his Ministers have met Mr. Harry Landy to discuss the case for an inquiry into the affairs of the El Fayeds or House of Fraser holdings.

Mr. Maude *[holding answer 12 April 1989]:* None.

ATTORNEY-GENERAL

Public Defender Schemes

Mr. Austin Mitchell: To ask the Attorney-General what inquiry has been made by the Government into the effectiveness of public defender schemes; and if he will make a statement.

The Attorney-General: The Government have not initiated any inquiry into the effectiveness of public defender schemes and have no immediate plans to do so.

FOREIGN AND COMMONWEALTH AFFAIRS

Sapphire Investigations Bureau

Mr. Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what contracts his Department has placed over the past 10 years with the Sapphire Investigations Bureau.

Mr. Eggar: We have no record of any such contract.

Freedom of Information (Conference)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will give details of the British delegation to attend the Helsinki process conference on freedom of information; who drew up the delegation list; and how the list was compiled.

Mr. Waldegrave: Lord Rees-Mogg has accepted my invitation to lead the British delegation to the London Information Forum. Following are the names of the personalities who have accepted his invitation to join the delegation.

They will be supported by Sir Anthony Williams, formerly Her Majesty's ambassador to the Madrid CSCE review conference, and by a small number of officials.

Bruce Anderson—*Sunday Telegraph*
Neal Ascherson—*The Observer*
Jonathan Eyal—Royal United Services Institute
John Grant—EETPU
John Harper—Consultant in telecommunications/IT
Geoffrey Hosking—Professor of Russian History, School of Slavonic and East European Studies, University of London
Paul Johnson—Author
Austen Kark—formerly Managing Director, BBC External Broadcasting
Mrs. Helen Liddell—Maxwell Publications, Scotland
Edwina Moreton—*The Economist*
Dr. Janet Morgan—Director, Cable and Wireless
David Nicholas—Chairman, ITN
David Puttnam—Enigma Productions
Malcolm Rutherford—Assistant Editor, *Financial Times*
Adam Scott—Director, International Affairs, British Telecom
John Vincent—Professor of Modern History, University of Bristol
George Wedell—Professor of Communication Policy, University of Manchester, and Director, European Institute for the Media
Andreas Whittam-Smith, *The Independent*

Diplomatic Service (Women)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs how many women currently hold the position of ambassador, high commissioner or chargé d'affaires within Her Majesty's diplomatic service.

Mr. Eggar: Six: five ambassadors and one chargée d'affaires.

Fishing Conference (South American States)

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs in what circumstances he sent out invitations to south American states to participate on 16 March in a conference on fishing; how many acceptances he received; and what were the reasons given by those who declined.

Mr. Eggar: Diplomatic missions from countries with vessels licensed in the Falklands fishery, together with others with a regional or general interest in conservation and fishery matters in the south-west Atlantic, were invited to a technical presentation in the FCO on conservation and management aspects of the Falklands fishery on 16 March. The presentation explained and expanded on the Falkland Islands Government's report, published on 9 March, a copy of which is being placed in the Library. Twenty two missions attended; 11 regretted that they were unable to send representatives.

SAAD-16 Contract

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will approach the BBC to obtain a copy of the SAAD-16 contract relating to the export of rocket laboratories to Egypt, Iraq and Argentina.

Mr. Waldegrave: Yes.

Condor Project

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs on what basis the hon. Member for Bristol, West (Mr. Waldegrave) asserted that the Condor 2 missile could start a new arms race.

Mr. Waldegrave: The introduction of missile systems such as Condor 2 into areas of tension and instability risks encouraging other states to obtain similar weapons.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he will seek to discuss with the Israeli Government, the involvement of MBB in the Condor project.

Mr. Waldegrave: No.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has about the Argentina/Egypt Condor contract.

Mr. Waldegrave: Since the early 1980s, Argentina has been developing a rocket known as Condor 2. Egypt has been linked to the project by Argentine military spokesman and by the press. Officially, however, Egypt denies any involvement.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Governments of Germany, Italy and France on the involvement of their citizens and scientists in the development of Condor 2 missile in Argentina.

Mr. Waldegrave: The possible involvememt of both companies and individuals in various ballistic missile programmes which fall within the parameters of the missile technology control regime is regularly discussed among members of the regime.

Chile

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Chile as to civil rights in that country; and if he will make a statement.

Mr. Eggar: My right hon. and learned Friend the Foreign Secretary and I have discussed these matters in previous meetings with the Chilean Foreign Minister, and Her Majesty's ambassador in Santiago frequently does so with the Chilean Government. During his visit to Chile in January 1989, and FCO Assistant Under-Secretary of State held talks with Chilean Ministers and senior Government officials, which included the issues of human and civil rights.

TRANSPORT

A6 Bypass

Mr. John Carlisle: To ask the Secretary of State for Transport whether he will consider the provision of a footbridge over the A6 bypass at Barton-le-Clay, Bedfordshire.

Mr. Peter Bottomley: Provision cannot be justified on the basis of known pedestrian/cyclist movements and expected traffic flows.

The situation will be reviewed following completion of the bypass.

Channel Tunnel Link

Dame Peggy Fenner: To ask the Secretary of State for Transport what discussions he has had with the chairman of British Rail on the appropriateness of private Bill procedures for British Rail's proposals for a Channel tunnel rail link.

Mr. Portillo: The private Bill procedure is the only procedure available for the promotion of new railway works. Objectors have the opportunity to petition against the Bill to Select Committees of both Houses of Parliament, who have the power to amend the Bill in response to the petitions received. This provides an appropriate mechanism for objections to British Rail's proposals to be considered if they have not been resolved in consultations prior to the Bill's introduction.

M4 Improvements (Berkshire)

Sir Michael McNair-Wilson: To ask the Secretary of State for Transport what discussions his officials have had with the highways department of Berkshire county council about improving and modernising the road system in the county and about improvements to the London end of the M4; and if he will make a statement.

Mr. Peter Bottomley: Officials of the Department and Berkshire county council have discussed the 1989-90 transport supplementary grant and transport capital allocations.

The county council is aware that the national trunk road programme includes schemes for widening the M4 to dual four-lane standard between the M25 interchange and junction 8/9 (Maidenhead) and for improving junction 8/9. We expect to appoint design agents very shortly. The county council will be consulted during the preparation of these schemes.

Rail Link (Channel Tunnel)

Mr. Snape: To ask the Secretary of State for Transport what financial criteria he instructed the British Railways Board to employ when evaluating a high speed rail link from the Channel tunnel to London; and how these criteria differ from those applied to tunnel-linked road schemes in Kent.

Mr. Portillo: The Government's criteria for approving investment by British Rail were discussed in the Government's observations on the third report of the House of Commons Transport Committee, Session 1986-87, which were published in the first special report of the Committee for the 1987-88 Session (HC420). These observations also addressed the question of comparability with the investment criteria used for new road schemes, and whether the difference in the methods used results in any significant distortion between the modes. Rail and road investments in connection with the Channel tunnel will be appraised using the normal criteria employed for rail and road investments.

Public Transport (Safety)

83. **Mr. O'Brien:** To ask the Secretary of State for Transport what plans he has to improve safety of the citizens on public transport; and if he will make a statement.

Mr. Portillo: In general, safety standards on public transport are already high; but they must be kept under regular review and steps taken to rectify problems revealed by the investigations into recent accidents. I am taking steps to strengthen the role of the railway inspectorate.

British Transport Police (Report)

84. **Mr. Patnick:** To ask the Secretary of State for Transport when he expects to receive and publish the report on the British Transport police from Her Majesty's inspectorate of constabulary.

Mr. Portillo: The report on the inspection by Her Majesty's inspectorate of constabulary will be made to the British Transport police committee which is responsible for the administration of the force. I understand that HMIC expects to report to the committee later this spring.

Pedestrian Crossings (Auditory Signals)

Mr. Alfred Morris: To ask the Secretary of State for Transport what co-operation exists between European countries concerning compatibility of auditory signals at pedestrian crossings; and if he will make a statement.

Mr. Peter Bottomley: In 1984, a survey of the audible signals being used in Europe was undertaken for the European conference of Ministers of Transport. A wide variation in the types of audible signals in use was noted. No standard system was proposed.

The United Kingdom leads a working group of the ECMT on transport and disability. We keep in close touch on a wide range of policy and technical issues in this field.

Three-car Trains (Replacement)

Mrs. Mahon: To ask the Secretary of State for Transport why, in British Rail's provincial sector, many life-expired three-car trains are being replaced by two-car units.

Mr. Portillo: Investment in modern two-car units offering an improved level of service has been approved as the most cost-effective way of replacing old diesel multiple units. Earlier this year I approved a further 194 express vehicles for provincial services.

Traffic Noise

Mr. Speed: To ask the Secretary of State for Transport what recent tests have been carried out to test the noise level and frequency of traffic passing on *(a)* brushed concrete and *(b)* blacktop; and what has been the result.

Mr. Peter Bottomley: The Transport and Road Research Laboratory, in its report 896 in 1979 and supplementary report 696 in 1981, published work on the noise and frictional properties of various types of road surface. Peak noise levels from vehicles varied with the texture, depth and type of surface material. Surfaces of equivalent skidding resistance produced similar noise levels. These results were further confirmed in 1987, following further comparisons between brushed concrete and black top surfaces.

M20 (Hollingbourne-Ashford)

Mr. Rowe: To ask the Secretary of State for Transport (1) what will be the peak hour capacity of the Hollingbourne-Ashford stretch of the M20 when it is completed;

(2) when he estimates peak hour capacity on the Hollingbourne-Ashford stretch of the M20 will be reached.

Mr. Peter Bottomley: Motorways are designed for the average daily traffic predicted 15 years after opening. Peak hour flows are just one of the factors taken into account when designing the appropriate carriageway standard.

Average flows of 80,000 to 100,000 vehicles a day are not uncommon on dual three-lane motorways and can be accommodated comfortably. The current forecasts for the Hollingbourne-Ashford section of the M20 in the design year 2005 are 35,000 to 40,000 vehicles a day.

Elderly People (Drivers' Licences)

Sir Eldon Griffiths: To ask the Secretary of State for Transport whether he has any plans to require the volunteer drivers of vehicles used by charities to convey elderly and frail people to hospitals and day centres to obtain public service vehicle licences; what is the current position with regard to proposals from the European Community; and what estimate he has made of *(a)* the cost of training such drivers to meet public service vehicle licence standards and *(b)* the numbers likely to withdraw from such voluntary activities rather than undertake the necessary training courses.

Mr. Peter Bottomley: We have no such plans. We consider there is no reason on road safety grounds for doing so. We are pressing the European Commission at every level to avoid placing unnecessary restrictions on volunteer drivers.

We believe that its proposals would have significant social and cost consequences for non-commercial voluntary transport operations, not least because of their deterrent effect on volunteer drivers.

We aim to protect our present arrangements in the negotiations in the Council of Ministers.

Practical driver training for minibus drivers by local authorities and voluntary groups is already widespread. We fully support that.

Settle-Carlisle Railway

Mr. Cryer: To ask the Secretary of State for Transport what consultations he has held with local authorities regarding any proposals to permit privately operated services over the Settle-Carlisle section of British Rail; and if he will make a statement.

Mr. Portillo: None. Such consultations are British Rail's responsibility.

Mr. Cryer: To ask the Secretary of State for Transport if he will list the organisations, other than British Rail, with whom he has had discussions about providing railway services on the Settle-Carlisle section of British Rail, during the last eight weeks; and if he will make a statement.

Mr. Portillo: My right hon. Friend and I have had no such discussions.

Mr. Cryer: To ask the Secretary of State for Transport if he will make a statement on his proposal to support a company 51 per cent. owned by British Rail, 49 per cent. owned by Cumbrian Railways Ltd., to operate the Settle-Carlisle section of British Rail.

Mr. Portillo: Negotiations with any private organisations interested in the Settle-Carlisle railway are British Rail's responsibility. However, such negotiations must now be reviewed in the light of my right hon. Friend's answer to the hon. Member for Skipton and Ripon (Mr. Curry) on 11 April at columns 411-12.

Motorways (Diversions)

Mr. Roy Hughes: To ask the Secretary of State for Transport how many times traffic has been diverted off motorways for each of the last three years in England and Wales.

Mr. Peter Bottomley: This information is not available. The police take decisions on day to day traffic control including when to divert traffic in the event of accidents or other incidents obstructing traffic flow.

ENERGY

Sapphire Investigations Bureau

Mr. Cohen: To ask the Secretary of State for Energy what contracts his Department has placed over the past 10 years with the Sapphire investigations bureau.

Mr. Peter Morrison: We have no record of any such contract.

Electricity (Privatised)

Mr. Hardy: To ask the Secretary of State for Energy when he expects to announce the price of shares in the flotation of the various companies which are to be involved in electricity generation and supply; and at what date he expects publicity campaigns in support of these flotations to commence.

Mr. Michael Spicer: No decisions on the pricing of the offers for sale will be announced until just before the time of the sales. Similarly, there will be no expenditure on publicity incurred by the Government in support of the flotations until much nearer the time of the sales.

DEFENCE

Challenger FV Tanks

Mr. Andrew F. Bennett: To ask the Secretary of State for Defence what is the total number of Challenger FV tanks purchased for service with British forces; and what is the total cost of these tanks.

Mr. Sainsbury: I refer the hon. Member to the answer I gave him on 22 March 1989 at column *616;* the number of Challenger tanks purchased for service with the British forces remains classified.

Helicopters

Mr. Andrew F. Bennett: To ask the Secretary of State for Defence what is the total number of Westland-Augusta EH101 helicopters currently in service with British forces; and what is the number on order and the expected total cost of the order.

Mr. Sainsbury: There are no Anglo-Italian EH101 helicopters currently in service with the British armed forces. The EH101 project is still in its development phase, and production orders are yet to be placed.

Exercise Mallet Blow

Mr. Beith: To ask the Secretary of State for Defence whether any aircraft taking part in Exercise Mallet Blow was authorised to cause a sonic boom over inhabited areas of Northumberland on Tuesday, 4 April; whether any aircraft did so; and if he will make a statement.

Mr. Neubert: I shall write to the hon. Member.

Pilots (Discipline)

Mr. Home Robertson: To ask the Secretary of State for Defence how many military pilots have been subject to disciplinary proceedings for breaches of the regulations concerning the height and speed of flights over the United Kingdom during the past two years.

Mr. Neubert: One military pilot has been subject to formal disciplinary proceedings for breach of the regulations concerning the height of flights during the past two years. This was a Royal Air Force pilot who was charged with unlawful low flying. Less severe infringements of low flying regulations, which have provisions covering both the height and speed of low level flights, are dealt with by informal procedures.

Nuclear Material (Imports)

Mr. George Howarth: To ask the Secretary of State for Defence when the 1958 Anglo-American mutual defence agreement on atomic energy matters was last amended; when nuclear material was last imported from the United States under this agreement; in what quality; and in what quantity.

Mr. Sainsbury: The United Kingdom/United States bilateral agreement for co-operation on the uses of atomic energy for mutual defence purposes was last amended in 1984. Details of times of delivery, quantity and quality of materials are classified and, in the national interest, must remain so.

Sapphire Investigation Bureau

Mr. Cohen: To ask the Secretary of State for Defence what contracts his Department has placed over the past 10 years with the Sapphire investigation bureau.

Mr. Sainsbury: We have no record of any headquarters contract having been placed with a company of this name during the past 10 years.

Sea Mammals

Mr. Tony Banks: To ask the Secretary of State for Defence to what extent his Department has used or is using or training sea mammals for any purposes.

Mr. Archie Hamilton: Sea mammals are not used or trained for any purpose, and there is no record of their use in the recent past.

Nuclear Submarines

Dr. Thomas: To ask the Secretary of State for Defence how many accidents *(a)* at sea or *(b)* in dock, involving Royal Navy nuclear powered submarines, involved (i) the death of submariners, (ii) the deaths of Royal Naval port workers, or (iii) the release of radioactivity.

Mr. Archie Hamilton: Since 1980, one accident involving a Royal Navy nuclear-powered submarine has resulted in the death (by drowning at sea) of a naval rating. There were no such accidents involving deaths of workers in Royal dockyards. Details of any accidents before 1980 could not be provided without disproportionate effort and cost. No Royal Navy nuclear-powered submarine has ever been involved in an accident involving a radiological hazard to service men, base personnel or members of the public.

Dr. Thomas: To ask the Secretary of State for Defence what assistance from the Royal Navy or other North Atlantic Treaty Organisation forces has been offered to the Soviet Union in the rescue or recovery of the nuclear powered submarine lost off the north Norwegian coast on 7 April.

Mr. Archie Hamilton: No request for assistance from Her Majesty's forces has been made. In response to any such request, we would lend whatever support we could. Any discussions between the Soviet Union and other NATO countries are a matter for those countries. I understand, however, that an offer of assistance from Norway was declined.

Greenham Common

Sir Michael McNair-Wilson: To ask the Secretary of State for Defence whether he has discussed the future of Royal Air Force, Greenham Common with representatives of the United States Air Force; and whether there have been any talks with any official organisation with responsibilities for civil aviation about possible uses for the base, after the cruise missiles are withdrawn.

Mr. Archie Hamilton: RAF Greenham Common has been designated as a stand-by operating base for many years and we envisage that this role will continue after the cruise missiles have been withdrawn. No decisions have yet been taken on possible additional roles thereafter, but we envisage that the base will remain available to the United States authorities for military use. There have been no discussions with any official organisation with responsibilities for civil aviation about possible future uses of the base.

Condor Missile

Mr. Dalyell: To ask the Secretary of State for Defence what assessment he has made of the threat posed to the Falkland Islands by development of the Condor missile.

Mr. Archie Hamilton: We are concerned about the potential destabilising effect which Condor could have in any area of the world where it might eventually be deployed. As far as the threat to the Falkland Islands is concerned, we keep this constantly under review. At its present stage of development, Condor appears to lack the accuracy to pose a realistic military threat, and it would be politically counter-productive for Argentina to threaten to use it against the Falklands. If she were ill-advised enough to do so, we are confident that it would not prevent reinforcement of the islands.

Mr. Dalyell: To ask the Secretary of State for Defence what assessment he has made of *(a)* chemical and *(b)* high explosive warheads for the Condor 2 missile.

Mr. Archie Hamilton: In principle, both high explosive and chemical warheads could be developed for a missile of this type. Any step in the direction of developing a chemical warhead would of course be a serious further enhancement of Condor's destabilising potential.

PRIME MINISTER

Mountain Ash

Q12. **Mrs. Clwyd:** To ask the Prime Minister when she next expects to visit Mountain Ash.

The Prime Minister: I have at present no plans to do so.

Crime

Q14. **Mr. William Powell:** To ask the Prime Minister what representations she has received regarding the fight against crime.

Q105. **Mr. Leigh:** To ask the Prime Minister what representations she has received regarding the fight against crime.

Q131. **Mr. Alexander:** To ask the Prime Minister what representations she has received regarding the fight against crime.

The Prime Minister: I receive a range of representations about crime and the Government's action to combat it.

Environment

Q22. **Mr. Malins:** To ask the Prime Minister what representations she has received regarding improvements to the environment.

Q44. **Sir Anthony Grant:** To ask the Prime Minister what representations she has received regarding improvements to the environment.

Q124. **Mr. John Browne:** To ask the Prime Minister what representations she has received regarding improvements to the environment.

The Prime Minister: I have received a number of representations, many of which echo this Government's concern to maintain and improve environmental standards.

Free Trade

Q80. **Mr. Fishburn:** To ask the Prime Minister what representations she has received regarding the importance of free trade.

Q99. **Mr. Cash:** To ask the Prime Minister what representations she has received regarding the importance of free trade.

Q128. **Mr. Marland:** To ask the Prime Minister what representations she has received regarding the importance of free trade.

The Prime Minister: I am pleased to note an increasing body of opinion supporting liberal trade policies, to which the Government are committed, both in relation to the European single market and to the GATT Uruguay round. It is encouraging that a firm basis has now been laid for the completion of the GATT Uruguay round negotiations.

Tropical Hardwoods

Q151. **Mr. Corbyn:** To ask the Prime Minister what action she is taking to control the importing of tropical hardwoods.

The Prime Minister: My hon. Friend the Minister for Trade has had useful and constructive discussion with Dr. Freezailah, executive director of the International Tropical Timber Organisation, in which he has strongly emphasised the importance we attach to ensuring that trade in these products is conducted in a manner consistent with the needs of conservation.

Ozone Layer

Q164. **Mr. Dalyell:** To ask the Prime Minister if she will take the initiative in organising an international conference on the dangers to the world of climatological flip resulting in another ice age, as a consequence of destruction of rain forest, along the lines of the conference on the ozone layer; and if she will make a statement.

The Prime Minister: The whole question of climate change, including the impact of rain forest destruction, is being reviewed by the inter-governmental panel on climate change set up under the auspices of the World Meteorological Organisation and the United Nations Environment Programme and is fully supported by the Government. They will assess the scientific information available, and likely impacts of climate change, and possible policy responses and will report to the second world climate conference in 1990. I do not propose to organise an international ministerial conference at this stage.

Bilton, Rugby

Q166. **Mr. Pawsey:** To ask the Prime Minister if she has any plans to make an official visit to Bilton near Rugby.

The Prime Minister: I have at present no plans to do so.

Consultants and Special Advisers

Mr. Tony Banks: To ask the Prime Minister what was the amount spent by her office on outside consultants and special advisers attached to, or working for, No. 10 Downing street in 1988-89.

The Prime Minister: There has been no expenditure by my office on fees on outside consultants in 1988-89. The latest estimate of the amount spent by my office on advisers in 1988-89 is £261,600.

10 Downing Street and Chequers (Costs)

Mr. Tony Banks: To ask the Prime Minister if she will provide the final figure for 1988-89 for *(a)* the cost of maintaining and running 10 Downing street and additional cost at Chequers, *(b)* the grant in aid to the Chequers Trust and *(c)* the costs on a consistent basis and expressed at constant 1984-85 prices.

The Prime Minister: Final figures for 1988-89 are not available. The latest estimates of the figures requested are:

	£
(a) cost of maintaining and running 10 Downing street and additional costs at Chequers[1 2 3]	6,262,672
(b) grant-in-aid to Chequers Trust	238,000
(c) figures at *(a)* and *(b)* in 1984-85 price terms	*(a)* 5,099,888
	(b) 193,810

[1] The figures include costs at both 10 Downing street and Chequers; the information is not available by location.

[2] Salaries and wages, notional pension liability, administration costs, the costs of office services and the grant-in-aid to the Chequers Trust are included. The salary of the Prime Minister is excluded.

[3] This total is calculated on a consistent basis with the total for 1986-87 in sub-paragraph *(a)* of the reply to the hon. Member on 23 October 1987 at column *846*. If office services costs are excluded (to produce a figure consistent with those at sub-paragraph *(c)* of that reply) the total for 1988-89 is £5,756,942. (£4,688,056 at 1984-85 prices).

Disabled Staff

Mr. Tony Banks: To ask the Prime Minister what was the staff complement of No. 10 Downing street in 1988-89; and how many staff were registered disabled.

The Prime Minister: The total staff complement of 10 Downing street in 1988-89 was 67. None was registered disabled.

Official Entertainment

Mr. Tony Banks: To ask the Prime Minister what was the total cost of official entertainment associated with the office of Prime Minister in 1988-89.

The Prime Minister: Final figures for 1988-89 are not yet available. The latest estimate of the total cost is £21,979.

Costs

Mr. Tony Banks: To ask the Prime Minister what was the total cost to public funds of all her offices, duties, accommodation and expenses in the year 1988-89.

The Prime Minister: Final figures for 1988-89 are not yet available. The latest estimate of the total cost of all my offices in 1988-89 is £6,297,151.

(Note.—Salaries and wages, notional pension liability, administration costs, and the grant in aid to the Chequers Trust are included. My salary as a Cabinet Minister is also included. My pay and allowances as a Member of this House are excluded.)

Overseas Visits (Media Representatives)

Mr. Tony Banks: To ask the Prime Minister how much is currently outstanding from media organisations for charges arising from their representatives who accompanied her on official transport on overseas visits; and if she will make a statement.

The Prime Minister: I have nothing to add to the answer I gave to the hon. Member on 10 January 1989 at column 495.

Mr. Tony Banks: To ask the Prime Minister how many journalists accompanied her on her recent visit to various African countries using official transport; and what was the charge per capita.

The Prime Minister: Twenty-three representatives of the media travelled with me. The per capita charge was £1,700.

Mr. Tony Banks: To ask the Prime Minister if she will give the names and the organisations of those media representatives who accompanied her on official transport during her recent visit to various African countries.

The Prime Minister: A wide range of media representatives accompanied me on my visit.

Appointments (Women)

Mr. Tony Banks: To ask the Prime Minister how many women she has appointed to public bodies since 1979: and what percentage this represents of total appointments for which she is responsible.

The Prime Minister: I have appointed or reappointed 65 women to public bodies since 1979. This represents 14 per cent. of such appointments since that date for which I have been responsible.

African Visit

Mr. Tony Banks: To ask the Prime Minister if she will provide a breakdown by category of the cost to public funds of her recent visit to various countries in Africa.

The Prime Minister: The estimate of the cost of this visit, which I gave the hon. Member for Holborn and St. Pancras (Mr. Dobson) on 7 April 1989, can be broken down as follows: travel costs £41,000; other costs £25,000.

Mr. Tony Banks: To ask the Prime Minister what functions were carried out by each of the 11 accompanying officials on her recent visit to Africa; what was her method of travel; and who was the carrier.

The Prime Minister: I travelled to Africa in an RAF VC10. As regards the functions carried out by those accompanying me, I have nothing to add to the answers I gave the hon. Member for Holborn and St. Pancras (Mr. Dobson) on 7 April at column 303.

Official Gifts

Mr. Tony Banks: To ask the Prime Minister how much was expended from public funds for the provision of official gifts by her office in 1988-89.

The Prime Minister: Final figures for 1988-89 are not yet available. The latest estimate of expenditure by my office on official gifts in 1988-89 is £13,653.

Travel (Costs)

Mr. Tony Banks: To ask the Prime Minister what was the total cost to public funds of travel by her and accompanying officials in 1988-89.

The Prime Minister: Final figures for 1988-89 are not yet available and cannot be provided in the precise form requested. The latest estimate of the total cost of my travel and that of my staff in 1988-89 is £902,952.

Civil Service Relocation (Clwyd)

Mr. Barry Jones: To ask the Prime Minister (1) if she will meet Alyn and Deeside district council at its Hawarden headquarters to discuss the relocation of civil service departments in the county of Clwyd and specifically at *(a)* St. David's business park, Ewloe, on the A55 and A483 and *(b)* Warren Hall business park, Broughton, near Chester, on the A55;

(2) if she will visit the Warren Hall and St. David's business parks to see construction work in progress and to assess the suitability of these landscaped sites for the relocation of Whitehall Civil Service departments; and if she will make a statement.

The Prime Minister: I have no plans to do so. Under the policy announced by my right hon. Friend the Paymaster General on 31 March 1988 at columns 610-11, it is for individual Departments to review the location of their work in accordance with clear guidelines with a view to finding locations which offer advantages in terms of recruitment and retention of staff, value for money and increased operational efficiency; and to make their own inquiries about the most suitable sites. When Departments decide to relocate some of their work they will include among the locations they consider areas, such as the hon. Member's constituency, which are the focus of the Government's regional and urban policies. Departmental Ministers will announce their own decisions on significant relocations, including their chosen venues.

Torness power station

Mr. Home Robertson: To ask the Prime Minister if she has any plans to visit Torness power station.

The Prime Minister: I hope to visit Torness power station in the course of the year.

Secretary of State for Wales (Speech)

Mr. Winnick: To ask the Prime Minister if the speech made on 10 April by the Secretary of State for Wales on the economy was totally in accordance with the Government's policy; and if she will make a statement.

The Prime Minister: The policies being pursued in Wales by the present Secretary of State, as with his distinguished predecessor, are those of the Government as a whole.

Non-oil Balance of Payments

Mr. Barry Jones: To ask the Prime Minister what policy proposals she has to tackle the adverse non-oil balance of payments.

The Prime Minister: The rise in the non-oil current account deficit has primarily reflected the strength of domestic demand. The Government have responded appropriately by tightening monetary policy and the effects of this are already apparent—for example in recent figures for MO, retail sales and the housing market.

Wales TUC

Mr. Barry Jones: To ask the Prime Minister (1) if she will meet the Wales Trades Union Congress in Cardiff to discuss the needs of Wales's industrial infrastructure;

(2) if she will meet the Wales Trade Union Congress in Cardiff to discuss Her Majesty's Government's industrial and regional policy; and if she will make a statement.

The Prime Minister: Under this Government, the economy of Wales has been revitalised: economic performance continues to improve; output is growing; and unemployment if falling.

Since 1987, Wales has attracted inward investment of nearly £1,450 million; grants for regional industrial assistance total some £255 million, with an associated forecast of 68,000 new jobs. Seasonally adjusted unemployment has fallen for 34 consecutive months and by some 52,000 in the last two years. The Welsh Development Agency continues to maintain a high level of factory lettings with 2·3 million sq ft in 1988, the best year yet. Since 1979-80, over £1 billion has been spent on roads in Wales. Future plans are described in "Roads in Wales 1989" published on April 10 1989.

I see no need to meet the Wales TUC.

Engagements

Mr. Barry Field: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

Mr. Macdonald: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

Mr. Andrew F. Bennett: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

Mr. Pike: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

Mr. Baldry: To ask the Prime Minister if she will list her official engagements for Thursday 13 April.

The Prime Minister: This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today.

ENVIRONMENT

Rating Reform

Mr. Allen: To ask the Secretary of State for the Environment what response he has had from *(a)* the Confederation of British Industry and *(b)* the Small Businesses Association to his criticisms of their submissions on the poll tax and business rate to hon. Members.

Mr. Gummer: None.

Air Pollution

Sir Michael McNair-Wilson: To ask the Secretary of State for the Environment what steps he is taking to reduce air pollution from airliners flying into Heathrow, Gatwick and Stansted; and what powers are available to him to improve limits on the amount of aviation fuel airliners are enabled to jettison over land.

Mr. Peter Bottomley: I have been asked to reply.

The Government introduced regulations in May 1986 to limit smoke emissions from aircraft. Regulations to limit the emission of unburned hydrocarbons came into effect in January 1989. These cover all airlines using United Kingdom airports. The United Kingdom is playing a full part in international discussions as to what further steps may be required.

The Air Navigation Order 1985, made under the Civil Aviation Act 1982, prohibits the jettisoning of fuel by aircraft over the United Kingdom, except in an emergency. In such an event air traffic controllers will recommend that the fuel be dumped over the sea if at all possible, or in excess of 10,000 ft above ground level, when the fuel would vaporise in the slipstream.

Personal Data

Mr. Cohen: To ask the Secretary of State for the Environment whether he will amend the next edition of the booklet, "You and the Community Charge", to inform community charge payers that *(a)* the Secretary of State for Social Security can breach a duty of confidentiality in disclosing information to community charge officers and *(b)* the electoral registrar can take a copy of the community charge register and subsequently sell their names and addresses without their knowledge or consent.

Mr. Gummer: No, since neither is true. Regulations will specifically empower my right hon. Friend to pass information to registration officers without breaching any duty of confidentiality. Electoral registration officers may inspect community charges registers, but they have no power to copy and sell them.

Water Authorities (Advertising)

Mr. Redmond: To ask the Secretary of State for the Environment if he will list, for each of the 10 national water authorities, how much has been spent to date on advertising purposes in respect of the water industry and its image; what is the expected planned total expenditure for each water authority; and if he will make a statement.

Mr. Howard: This is a matter for the water authorities.

Radon Gas

Mr. Redmond: To ask the Secretary of State for the Environment if he will list by year for the last 10 years the allocation of resources for programmes of radiological protection *(a)* from nuclear reprocessing plants and *(b)* from indoor exposure to radon; what additional research and resources are being planned to reduce exposure from indoor radon gas; and if he will make a statement.

Mrs. Virginia Bottomley: Information in the form requested is not readily available. Expenditure figures for the Department over the past two years and planned expenditure for this financial year are as follows:

£ thousand

	1987-88	*1988-89*	*1989-90*
Radiation monitoring programmes and associated research in respect of the Sellafield plant	480	532	340
Radon research and surveys	210	250	300

In addition, the Department will contribute to local authority costs in providing home improvement grants for radon remedial work.

Toxic Waste

Mr. Redmond: To ask the Secretary of State for the Environment how many representations to date he has received from residents living in or near Doncaster metropolitan borough concerning the proposed toxic waste site application by Leigh Environmental at Kirk Sandell; and if he will make a statement.

Mrs. Virginia Bottomley: My right hon. Friend has received 16 such representations. It would not be proper for me to comment on this proposal as the application could come before the Secretary of State for decision.

Sports Clubs (Rate Relief)

Mr. Pendry: To ask the Secretary of State for the Environment if he will take steps to provide rate relief for sports clubs similar to that provided in Scotland.

Mrs. Virginia Bottomley: No. We propose to ensure that authorities are accountable for their decisions to grant discretionary relief to non-profit-making sports clubs by requiring their community charge payers to bear a proportion of the cost.

Housing Act 1988

Mr. George Howarth: To ask the Secretary of State for the Environment how many organisations have applied to the Housing Corporation to become approved landlords under the provisions of the Housing Act 1988 in the categories of *(a)* private landlords, *(b)* housing associations, *(c)* registered housing co-operatives, *(d)* trusts and *(e)* other categories; and if he will list them.

Mr. Trippier: I have asked the corporation to reply to the hon. Member.

Mr. David Nicholson: To ask the Secretary of State for the Environment if he will make a statement on progress made in reviving the private rented sector of housing since the Housing Act 1988 came into force.

Mr. Trippier: The measures contained in part I of the Housing Act 1988 have been in force for less than three months, and it is therefore too soon to draw any firm conclusions as to their impact. Nevertheless, the initial response is encouraging. Recent research suggests that many owners of empty property regard the freedom to charge a market rent as a powerful incentive to let, and that a number of existing landlords are already expanding their rented property portfolios. It is further estimated tht over £300 million has so far been raised under the business expansion scheme which provides generous tax relief for those investing in property to be let on assured tenancies. We shall carry out detailed evaluations of their impact in due course.

Loughborough and Angell Town Estates

Mr. Fraser: To ask the Secretary of State for the Environment what has been the combined total cost of moneys paid to consultants and the cost to his Department in relation to proposed housing action trusts for the Loughborough and Angell Town estates.

Mr. Trippier: We expect that the costs in relation to the proposed Lambeth housing action trust will amount to less than £185,000. including VAT, when all bills have been paid. This figure covers consultants' fees and the costs of producing reports and leaflets about the proposals.

Mr. Fraser: To ask the Secretary of State for the Environment what estimates he has received of the cost of the rehabilitation of Angell Town and Loughborough estates from his consultants on housing action trusts.

Mr. Trippier: The consultants produced an illustrative scheme for costing purposes which estimated the costs of improving the housing action trust area at between £54 million and £93 million approximately for Loughborough estate, and £39 million for Angell Town. Local residents will now be consulted about the proposals for their estates.

Right-to-Buy Legislation

Mr. Cartwright: To ask the Secretary of State for the Environment when he expects council tenants to be able to benefit from the proposed increase in the maximum discount under the right-to-buy legislation.

Mr. Trippier: The maximum discount allowable in right-to-buy sales was increased to £50,000 by the Housing (Right to Buy) (Maximum Discount) Order 1989 which came into effect on 11 April. The increased limit applies to all right-to-buy sales in England and Wales completed from that date.

Housing (EC)

Mr. Meale: To ask the Secretary of State for the Environment what proposals have been made by the EEC Commission about housing rents and housing costs.

Mr. Trippier: I am not aware of any such proposals.

Insulation

Sir Michael McNair Wilson: To ask the Secretary of State for the Environment, pursuant to his answer of 4 April to the hon. Member for Newbury, what are his reasons for not making inspection of loft roof, cavity wall and under floor insulation statutory requirements.

Mr. Trippier: The building regulations already require reasonable precautions to be taken to prevent toxic fumes from cavity insulation materials from permeating into the building. It is the statutory function of the relevant local authority to enforce this requirement. There are no similar requirements about how loft roof and under floor insulation work is carried out, because these operations are not thought to pose potential risks to the health and safety of subsequent users of the building. There are however requirements in the regulations relating to the thermal insulation of the exposed fabric of the building, and the enforcement of these requirements may involve the building control officer in the inspection of loft roof and underfloor insulation work.

Housing and Business Development (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what advice he is giving to the London boroughs on the fringes of central London as to the priority they should give to housing and business development; and if he will make a statement.

Mr. Chope: My right hon. Friend's guidance proposes that the boroughs surrounding the City of London should make every effort to accommodate business development within the broader planning objectives for their areas. Boroughs may adopt policies to retain sites and buildings in residential use, but in so doing they should demonstrate that they have made reasonable provision to accommodate demand for business development within their area.

New Dwellings (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what steps he proposes to ensure the provision of an extra 260,000 dwellings in London between 1987 and 2001.

Mr. Trippier: My right hon. Friend accepted the figure of 260,000 extra dwellings on the advice of the London Planning Advisory Committee, with the agreement of the boroughs. It is for the boroughs to make provision in their unitary development plans.

Shop Floorspace

Mr. Tony Banks: To ask the Secretary of State for the Environment what analysis he has carried out to estimate the need for additional shopping floorspace in London up to 2001; and if he will make a statement.

Mr. Chope: The Department has not made such estimates. It is not the Government's policy to attempt to regulate volume changes in supply and demand for retail services. Guidance on how boroughs should take account of the implications of retail forecasts in their UDPs is given in PPG 6.

Retail Services (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what proposals he has for the future of retailing services in central London.

Mr. Trippier: None.

London Docklands

Mr. Tony Banks: To ask the Secretary of State for the Environment what steps he is taking to ensure compliance of the London Docklands Development Corporation with his draft planning guidance.

Mr. Chope: The London boroughs will produce unitary development plans in line with the Secretary of State's guidance. LDDC will be required to have regard to these plans in exercising its planning powers.

Public Expenditure Estimates

Mr. Tony Banks: To ask the Secretary of State for the Environment what figures have been used in the relevant public expenditure estimates for the utilisation of non-prescribed capital receipts by local authorities in their housing capital expenditure in the years 1987-88, 1988-89 and 1989-90 tabulated separately for district councils and metropolitan authorities, excluding London boroughs, inner London boroughs, and outer London boroughs.

Mrs. Virginia Bottomley: The estimates of local authority non-prescribed capital expenditure used in public expenditure plans are made on a national basis and are not broken down by source of finance, by service, or by class of authority. The estimates of non-prescribed expenditure used in determining the total of capital allocations for England consistent with public expenditure plans for 1987-88, 1988-89, 1989-90 are given:

	£ million
1987-88	430
1988-89	725
1989-90	850

Housing Stock

Mr. Tony Banks: To ask the Secretary of State for the Environment what average percentage of the total housing stock of *(a)* councils, *(b)* housing associations and *(c)* private landlords was vacant at the last recorded date.

Mr. Chope: The information as reported by English local authorities in their housing investment programme returns for 1988 is as follows:

	Vacant dwellings as a percentage of stock
Local authorities[1]	2·4
Housing associations	2·5
Private[2]	4·1

[1] Includes dwellings which are closed or have been acquired for demolition and dwellings on overspill estates.
[2] Includes owner-occupied as well as private rented dwellings.

Rents

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has on the average percentage of the net rent roll uncollected by *(a)* councils and *(b)* housing associations for the last recorded period.

Mr. Trippier: English local authorities reported cumulative rent arrears (including arrears of former tenants) of £226 million at 1 April 1988: equivalent to 5·7 per cent. of rents collectable for 1987-88.

Information on rent arrears in respect of housing associations is available in chapter 5 of a report by the centre for housing research, university of Glasgow titled "The Nature and Effectiveness of Housing Management in England", a copy of which is in the Library.

Housing Repairs

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has on the comparative costs of the repairs service for tenants of *(a)* housing associations and *(b)* councils; and if he will make a statement.

Mr. Trippier: Information on the repairs services provided by housing associations and local authorities, including data on comparative costs, is contained in section 6 of "The Nature and Effectiveness of Housing Management in England", by the centre for housing research, university of Glasgow. Copies of the report, which was published earlier this year, are available in the Library.

Housing Associations

Mr. Tony Banks: To ask the Secretary of State for the Environment how the Housing Corporation assesses the management performance of housing associations.

Mr. Trippier: Under part I of the Housing Associations Act 1985, the securing of proper management in the affairs of registered housing associations is the responsibility of the Housing Corporation. I am therefore arranging for the corporation to write to the hon. Member.

Development Plans

Mr. Tony Banks: To ask the Secretary of State for the Environment what levels of new business floorspace and new industrial floorspace he is advising each borough should plan for in their unitary development plans for the year 2001.

Mr. Chope: It is for each borough to draw up its unitary development plan having regard to strategic guidance. The extent of new business and industrial floorspace is primarily an issue for individual boroughs.

Planning Guidance (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what estimates he has made of public and private resources required to fulfill the policies and proposals within his planning guidance for London.

Mr. Chope: My right hon. Friend has taken account of the resource implications of the policies proposed in the draft guidance. The guidance will set the framework for the preparation of unitary development plans. In preparing these, the boroughs are required to have regard to the resources likely to be available to ensure that their policies are realistic.

Population

Mr. Tony Banks: To ask the Secretary of State for the Environment what population level for Greater London in 2001 will result from the policies and proposals in his strategic guidance; and if he will make a statement.

Mr. Chope: It is not possible at this stage to predict what the population of London will be in 2001.

King's Head Meadow Pipeline

Mr. Burns: To ask the Secretary of State for the Environment when he expects to inform Chelmsford borough council of his decision on the King's Head Meadow pipeline scheme; and if he will make a statement.

Mrs. Virginia Bottomley: The Department wrote to Chelmsford borough council on 21 February 1989 inviting a fresh application under the in-and-out scheme because the information contained in the original application had been made invalid by my right hon. Friend's decision on the associated compulsory purchase order. A revised application with up-to-date details was received by the Department on 10 April. A decision on this application will be made as soon as possible.

Defective Homes

Mr. Jack Ashley: To ask the Secretary of State for the Environment if he will publish in the *Official Report* the formula that was used to allocate to individual authorities the £15 million package for repairs to defective homes.

Mr. Trippier: As in previous years, the £15 million set aside for 1989-90 to help authorities meet their housing defects obligations was first divided between regions in proportion to the number of owners still eligible for assistance as at 1 April 1988. We then looked at the circumstances of individual authorities, and the proposals that they put forward.

Drinking Water

Mr. Bermingham: To ask the Secretary of State for the Environment what methods are being considered by water authorities to monitor drinking water supply for the presence of waterborne parasitic protozoa such as cryptosporidium; and if he will make a statement.

Mr. Howard: The Department's standing committee of analysts initiated work during 1988 on the development of methods for isolating, identifying and quantifying cryptosporidium in water supplies. These methods which have now been tested and other methods for similar waterborne parasitic protozoa are well advanced. When finalised they will be published by HMSO. The need for and form of monitoring by water undertakers for cryptosporidium in water supplies will be considered by the expert group being chaired by Sir John Badenoch which was announced in my reply of 2 March at column *286*.

Mr. Bermingham: To ask the Secretary of State for the Environment what proposals exist for joint research projects with water authorities to examine risks posed by cryptosporidium in public water supplies.

Mr. Howard: The need for research projects is being examined by the group of experts established by the Government under the chairmanship of Sir John Badenoch to advise on cryptosporidia in water supplies. I refer the hon. Member to the answer that I gave on 2 March 1989 to my hon. Friend the Member for Delyn (Mr. Raffan) at column *286*.

Mr. Bermingham: To ask the Secretary of State for the Environment when he expects to make a decision on the application for a research grant by Thames Water and the Robens Institute in relation to work on the parasitic protozoa cryptosporidium in the water supply; and if he will make a statement.

Mr. Howard: Neither Thames Water Authority nor the Robens Institute has applied to the Department for a research grant in relation to work on cryptosporidia in water supplies.

Sports Council (Chairmanship)

Mr. Patnick: To ask the Secretary of State for the Environment if he will make an announcement about the chairmanship of the Sports Council.

Mr. Moynihan: I have today written to Peter Yarranton appointing him to the chairmanship of the Sports Council

for a three-year period commencing from 20 May 1989. I am delighted that Mr. Yarranton has accepted my invitation to become chairman and am sure that his many years of experience in the sporting world eminently qualify him for the task. I should like to thank John Smith, the outgoing chairman, for the valuable contribution that he has made to the work of the council over the past nine years. I know that this has been greatly appreciated by both members and staff of the council and by everyone involved in sport.

Sebastian Coe, who has been a member of the council since November 1983 and a vice-chairman since July 1986, has decided to resign from the council at the end of April to concentrate on a career in broadcasting. His international standing in the world of sport has been particularly valuable to the council and I am very grateful to him for the commitment he has shown throughout his appointment.

I have also written today to Trevor Brooking to appoint him as a member of the Sports Council with effect from 20 May 1989. Mr. Brooking will bring to the council experience not only from his footballing career but also from his chairmanship of the Eastern Regional Council for Sport and Recreation and his more recent business career.

Amazonia

Mr. Dalyell: To ask the Secretary of State for the Environment, pursuant to the statement made on 13 March, *Official Report*, column 168, to which general circulation models on climate the Parliamentary Under-Secretary of State, the hon. Member for Enfield, North (Mr. Eggar) was referring, pertaining to Amazonia, which do not allow us to predict regional change with certainty; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 10 April 1989]:* The statement made by my hon. Friend the Member for Enfield, North (Mr. Eggar) is true of all the general circulation models currently in use in the major climate change research centres of the world, including the Meteorological Office and various institutions in the United States. Developing the ability to make regional climate change prediction within reasonable limits of confidence is a principal research objective of general circulation modelling. The current status of research on this, and the possibilities for progress, are among the topics being reviewed by working group I of the UNEP/WMO intergovernmental panel on climate change, chaired by Dr. John Houghton of the Meteorological Office.

Forestry Commission (Yorkshire)

Mr. Redmond: To ask the Secretary of State for the Environment what was the cost of the Forestry Commission's planting operations in 1987-88 for the three counties of Yorkshire, in terms of *(a)* direct costs of the planting in the year and *(b)* supervisory costs and overheads related to that planting.

Mr. Ryder: I have been asked to reply. The information is as follows:

£ thousands

	New planting	*Restocking*
Direct (forest) costs	40	217
Supervisory costs and Overheads	16	89
Total costs	56	306

Mr. Redmond: To ask the Secretary of State for the Environment what areas of land the Forestry Commission proposed to newly plant in the year 1988-89 in the three counties of Yorkshire; and if he will list, by Forestry Commission conservancies, the total area to be planted and the names and locations of the blocks over 100 hectares.

Mr. Ryder: I have been asked to reply.

The Forestry Commission's North England Conservancy carried out a total of 31 hectares of new planting in Yorkshire in the year ended 31 March 1989.

NORTHERN IRELAND

"Harmony"

Mr. William Ross: To ask the Secretary of State for Northern Ireland if, further to his answer to the hon. Member for Londonderry, East of 21 March, *Official Report*, column *517*, he will publish in the *Official Report* a breakdown of all the costs borne by the Department of Education (Northern Ireland) of the recording of the song "Harmony" at the Giant's Causeway on Friday 10 March.

Dr. Mawhinney: A breakdown should be available shortly and I shall write to the hon. Gentleman as soon as possible.

Head Teachers

Mr. Bradley: To ask the Secretary of State for Northern Ireland over each of the 10 years from 1978 to 1988 how many *(a)* male and *(b)* female head teachers of schools in Northern Ireland have left for the following reasons *(a)* normal retirement, *(b)* early retirement, specifying the various reasons for this, *(c)* death in service, and *(d)* death within five years of retirement; and how many in each category were from (i) primary schools, (ii) secondary schools, (iii) special schools and (iv) other schools.

Dr. Mawhinney: Information on deaths within five years of retirement for the 10-year period, and on retirements for the years before 1987, is not readily available and could be provided only at disproportionate cost.

Available information for 1987 and 1988 is set out in the table.

		Primary	*Secondary*	*Special*	*Other (Nursery)*	*Total*
1987						
Age retirements	Male	1	3	—	—	4
	Female	4	—	—	—	4
Early retirements						
Redundancy	Male	1	—	—	—	1

		Primary	Secondary	Special	Other (Nursery)	Total
	Female	—	—	—	—	—
Efficient discharge	Male	2	1	—	—	3
	Female	—	2	—	—	2
Ill health	Male	3	—	—	—	3
	Female	—	—	—	—	—
Death in service	Male	1	—	—	—	1
	Female	—	—	—	—	—
1988						
Age retirements	Male	17	7	—	—	24
	Female	11	2	—	1	14
Early retirements						
Redundancy	Male	4	5	—	—	9
	Female	1	1	—	—	2
Efficient discharge	Male	9	5	—	—	14
	Female	3	—	—	2	5
Ill health	Male	1	—	—	—	1
	Female	—	1	—	—	1
Death in service	Male	1	—	—	—	1
	Female	—	—	—	—	—

Obstetrics and Gynaecology

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland what are the present obstetrics and gynaecological facilities available in the Eastern health board area carried out in accordance with other than Roman Catholic teachings; and what are his future proposals for these services in the Eastern health and social services board area.

Mr. Needham *[holding answer 4 April 1989]:* The information requested is as follows.

Available beds for obstetrics and gynaecology in the Eastern health and social services board are:

	Gynaecology	Obstetrics
Ulster hospital	37	45
Mater hospital	15	24
Royal Victoria hospital	32	—
Royal Maternity hospital	—	95
Belfast City hospital	38	68
Downe/Down Maternity	14	24
Lagan Valley hospital	29	45
Bangor hospital	16	—
Ards hospital	26	26

Under the terms of the lease by which the Mater hospital is leased by the trustees to the Department of Health and Social Services the teaching and practice of medicine, the provision of specialist services and nursing are to be carried out in accordance with Roman Catholic moral and ethical principles.

The Eastern board is currently considering recommendations relating to the provision of obstetric and gynaecological services in the Belfast area, which arose from the recent complementarity study. When the board reaches conclusions, I shall wish to discuss their implications with the chairman of the board before any final decisions are taken.

WALES

Deeside Waterfront Scheme

Mr. Barry Jones: To ask the Secretary of State for Wales if he will make a statement on the Deeside waterfront scheme; if he will visit and meet Alyn and Deeside district council to discuss the waterfront project; and if he will make a statement.

Mr. Peter Walker: I shall reply to the hon. gentleman as soon as possible.

Civil Service Relocation (Clwyd)

Mr. Barry Jones: To ask the Secretary of State for Wales if he will visit the St. David's business park, Ewloe, and Warren Hall business park, Broughton, to observe construction work and landscaping; if he will meet Alyn and Deeside district council at its Hawarden headquarters to discuss the suitability of the two business parks for the relocation of Whitehall Departments; and if he will make a statement.

Mr. Peter Walker: I have regular discussions with the hon. Gentleman and met representatives of Alyn and Deeside district council as recently as 20 March. In addition, I have made numerous visits to north-east Wales. I therefore know the constituency well—and its attractions—and he can be assured that the council would be contacted immediately if any Government Department expressed a particular interest in relocating to Alyn and Deeside. Under the relocation guidelines, it is for individual departmental Ministers to decide whether to proceed with relocation and, if so, to where.

Elderly People

Mr. Barry Jones: To ask the Secretary of State for Wales what proposals he has to provide additional services in Wales for the benefit of the elderly.

Mr. Grist: The provision of services for the elderly is for local and health authorities to decide in the light of their own local circumstances.

Nonetheless in recognition of the rise in the elderly population and changes in the pattern of services for the elderly the local authority capital allocation for social services in 1989-90 has been increased by 15 per cent. over that for the previous year.

In addition central funding continues under the elderly initiative, urban programme and health/local authority joint finance.

Roads

Mr. Barry Jones: To ask the Secretary of State for Wales what proposals he has to invest further sums in the roads systems of Wales additional to that outlined in his White Paper, "Roads in Wales"; and if he will make a statement.

Mr. Wyn Roberts: "Roads in Wales 1989" sets out the intentions for road improvements for the future.

Provision for implementing the programme has been set out in the Welsh commentary on the public expenditure White Paper.

Public Transport

Mr. Barry Jones: To ask the Secretary of State for Wales what proposals he has to direct investment to public transport systems in Wales; and if he will make a statement.

Mr. Wyn Roberts: Investment in public transport systems is a matter for public transport operators, in association where appropriate with local authorities.

Industrial Investment

Mr. Barry Jones: To ask the Secretary of State for Wales what plans he has to improve investment in the industrial infrastructure of Wales; and if he will make a statement.

Mr. Peter Walker: Over the last two years I have secured a substantial increase of over 50 per cent. in new resources for my industry programme, and planned net spending in this sector over the next two financial years will contribute a further £410 million to the industrial regeneration of Wales. This figures rises to over £530 million when account is taken of the gross spend planned for the development agencies in Cm 617. My industry resources are complemented directly by the £152 million to be invested this year alone on the key motorway and trunk road network as described in "Roads in Wales 1989". Future years' provision for all my programmes will be reviewed periodically in the normal way.

Railway Electrification

Mr. Barry Jones: To ask the Secretary of State for Wales if he proposes to meet the chairman of British Rail to discuss any proposals for the electrification of the Crewe-Holyhead, Swansea-Paddington railway; and if he will make a statement.

Mr. Wyn Roberts: Regular meetings are held with the Chairman to discuss a range of issues; the electrification of these lines is a matter for British Rail.

Health Service

Mr. Barry Jones: To ask the Secretary of State for Wales when he proposes to allocate additional cash to improve the Health Service in Wales; and if he will make a statement.

Mr. Peter Walker: I announced on the 21 December 1988 that, subject to parliamentary approval I proposed to allocate £1,315 million in 1989-90 to central Government health and personal social services in Wales. On the 27 January 1989 I announced the current and capital allocations to health authorities in Wales, and gave details of allocations for centrally funded developments. Further details of proposed expenditure were given in the 1989-90 supply estimates, presented to Parliament by the Financial Secretary to the Treasury on 14 March 1989 (HC 231-XVII).

In addition to these record allocations, I propose to make a special allocation of £10 million in 1989-90 to the health service in Wales, towards the costs of the review body awards which were announced on 16 February 1989.

We are now spending £36 per week per household on the Health Service compared with £11 per week per household in 1978-79, when the hon. Gentleman was a Minister in the Welsh Office.

Schools

Mr. Barry Jones: To ask the Secretary of State for Wales when he proposes to provide extra money for the schools service in Wales so as to improve the educational service; and if he will make a statement.

Mr. Wyn Roberts: Public expenditure White Papers show that provision for the education service in Wales has increased since this Government came to office. The increase in provision for current expenditure is particularly significant because in this period pupil numbers have fallen by over 13 per cent. The increase in capital provision in recent years has provided local education authorities with the opportunity to rationalise their schools provision to obtain the financial and educational benefits offered by falling schools rolls.

Credit Boom

Mr. Barry Jones: To ask the Secretary of State for Wales what assessment he has made of the consequences for the Welsh economy of the credit boom; and if he will make a statement.

Mr. Peter Walker: The Welsh economy is sound and confidence in its capacity to develop further remains high.

Wales has experienced double the increase in the growth in output for the United Kingdom overall. United Kingdom production and construction grew by 4·2 per cent. between the third quarters of 1987 and 1988; the comparable figure for Wales was 8·4 per cent.

Regional Policy

Mr. Barry Jones: To ask the Secretary of State for Wales what plans he has to make the implementation of regional policy in Wales more effective; and if he will make a statement.

Mr. Peter Walker: I have at my disposal a wide range of policy mechanisms to stimulate and sustain economic

activity in Wales, principally regional industrial assistance, the activities of the Welsh Development Agency and Mid Wales Development and support for urban aid. The fact that seasonally adjusted unemployment has fallen for 34 consecutive months, factory lettings are at record levels and that Wales continues to attract significant inward investment testifies to the success of the commitment which the Government have to economic regeneration in the Principality.

Head Teachers

Mr. Bradley: To ask the Secretary of State for Wales over each of the 10 years from 1978 to 1988 how many *(a)* male and *(b)* female head teachers of schools in Wales have left for the following reasons *(a)* normal retirement, *(b)* early retirement, specifying the various reasons for this, *(c)* death in service, and *(d)* death within five years of retirement; and how many in each category were from (i) primary schools, (ii) secondary schools, (iii) special schools and (iv) other schools.

Mr. Butcher: I have been asked to reply.

The information requested is provided in the following tables.

Table providing numbers of head teacher retirements/deaths in respect of Welsh primary schools, between 1978 and 1988

Valleys Initiative

Mr. Rowlands: To ask the Secretary of State for Wales what additional allocations he made to the Housing Corporation in Wales to implement the objectives of the valleys initiative; and whether he instructed them to allocate this sum specifically to valley housing association initiatives.

Mr. Grist: An additional £4·5 million was allocated to the Housing Corporation in Wales in 1988-89 and £8·6 million to Housing for Wales (Tai Cymru) for 1989-90 for the provision of housing under the programme for the valleys. The sums are being targeted specifically on the programme area.

Mr. Barry Jones: To ask the Secretary of State for Wales what requests he has received to address a conference of the 15 valleys initiative local authorities in south Wales on the subject of regional policy and investment in the infrastructure; what response he has made; and if he will make a statement.

Mr. Peter Walker: I have received no request to address this specific conference. Welsh Office officials are of course in regular touch with valleys local authorities on many aspects of the valleys programme.

Mr. Flynn: To ask the Secretary of State for Wales if, pursuant to his answer to the hon. Member for Newport,

West on 21 March, *Official Report*, column *502*, he will define the areas included in his calculations and the percentage of the population covered by the valleys programme that is included in the total.

Mr. Peter Walker *[holding answer 11 April 1989]:* The area used to calculate the unemployment figures for the hon. Gentleman's question of 21 March 1989 is shown in the following tables:

District	*Wards*	*District*	*Wards*
Blaenau Gwent	Nos. 1-18	Ogwr	Nos. 3-11, 17
Torfaen	Nos. 1, 7-11	Lliw Valley	Nos. 1, 4-8
Islwyn	Nos. 1-10, 12	Neath	Nos. 4, 5, 7-16
Rhymney Valley	Nos. 3-20	Port Talbot	Nos. 5, 9-11
Merthyr Tydfil	Nos. 1-9	Brecknock	Nos. 29-33
Cynon Valley	Nos. 1-12, 14	Llanelli	Nos. 7, 8, 11
Rhondda	All wards	Dinefwr	Nos. 2-6, 9, 14, 15
Taff Ely	Nos. 1-7, 10-13		

The latest available total resident population covered by the valleys programme area on the above basis is 696,720 according to the 1981 census of population. Official estimates of population for more recent years are not available at a Ward level.

The figure of 35,675 unemployed in May 1988 quoted in the previous answer if 5·1 per cent. of that number, but the two figures are obviously not on a comparable basis either in terms of the period or population covered.

SCOTLAND

Employee Share Ownership

Mr. Ian Taylor: To ask the Secretary of State for Scotland what discussions have taken place as to the feasibily of introducing an employee share ownership scheme in any future privatisation that his Department may sponsor.

Mr. Lang: In relation to the flotation of the successor companies to the Scottish electricity boards, we shall be discussing with the boards measures to encourage the participation of employees in the share offer. Proposals already submitted by the trade unions will be taken into account in these discussions.

The Scottish Bus Group is to be sold in a number of units and it will be for prospective purchasers to determine the share ownership structure of their bids. My right hon. and learned Friend has, however, indicated that bids involving a high level of employee participation will be given preference.

Agricultural Income

Mr. Steel: To ask the Secretary of State for Scotland what is his latest available estimate of the income per agriculture holding in Scotland *(a)* including non-agricultural income and *(b)* excluding such income.

Information about non-agricultural income is available only from a 1 per cent. sample of the tax records of individuals registered as having a self-employment income from agriculture and horticulture. For the 1985-86 assessment year, the latest available, the average total income per farmer was £11,845, and the average agricultural and horticultural income was £6,368.

Holiday Cottages

Mr. Steel: To ask the secretary of state for Scotland if he will make a statement about the effect on any local authority finances of choosing to levy the poll tax on holiday cottages at a multiplier of one instead of two.

Mr. Rifkind: The effect would be to halve that authority's potential income from dwellings which are subject to the standard charge. A lower multiplier might still, for some authorities, yield as much income from such properties as did domestic rates. Each local authority is free to take such a decision in the light of its assessment of all the circumstances.

Schizophrenia

Mr. Goodlad: To ask the Secretary of State for Scotland how many of those imprisoned in Scotland in 1988 have been admitted to National Health Service mental illness hospitals and units with a main diagnosis of schizophrenia psychoses.

Lord James Douglas-Hamilton: This information is not readily available in the form requested. In 1987, the latest year for which figures are available, 62 inmates in Scottish penal establishments were treated for psychoses.

Licensing Law

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) when he expects to complete his current review of licensing law in Scotland;

(2) what consultations he proposes to undertake after the review of licensing law in Scotland is completed; and if he will make a statement.

Lord James Douglas-Hamilton: The review of the licensing law in Scotland has revealed a large measure of support for a number of the reforms canvassed in the consultation paper issued in 1986. I hope soon to announce the Government's intentions, once we have reached conclusions on these matters.

Mr. Kirkwood: To ask the Secretary of State for Scotland whether he expects to publish the evidence as well as conclusions submitted to the current review of licensing law in Scotland.

Lord James Douglas Hamilton: No. The comments received in response to the consultation document on the review of the licensing law have, except where respondents have requested confidentiality, been placed on public file which is open to inspection by appointment at St. Andrew's house.

"Nuclear Accidents and the Farmer"

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will distribute copies of the Ministry of Agriculture leaflet "Nuclear Accidents and the Farmer", together with its technical supplement to all farmers within a 25-mile radius of all nuclear installations in Scotland; and if he will make a statement on the availability of these documents.

Mr. Michael Forsyth: These documents are at present being recast slightly to reflect Scottish circumstances. They will be distributed as soon as possible to all farmers in Scotland in the vicinity of major nuclear installations, as was done in England.

Rating Reform

Mrs. Fyfe: To ask the Secretary of State for Scotland what steps he is taking to ensure that any private landlord who collects the poll tax from his tenants keeps an accurate record of payments made by each tenant; and how the money will be recovered if any such landlord fails to pay in these sums in full by the date of enforcement action for recovery taking place.

Mr. Lang: Payment of the personal community charge is, as its name implies, a personal responsibility and individuals are not required to make payments to private landlords but directly to the levying authority. Contributions to the collective community charge may, however, be collected by private landlords from people who at any time have their sole of main residence in premises, which have been designated by a community charge registration officer as subject to the collective community charge. Under sections 11(13) and (14) of the Abolition of Domestic Rates Etc. (Scotland) Act 1987, as amended, landlords are required to issue receipts in respect of any such contributions made to them, showing the amounts paid and the days to which the contributions relate. They are also required to keep a record of all persons who have been solely or mainly resident in the premises, the period during which they were so resident and the amounts paid in contributions. The landlords themselves are liable to pay to the local authority the collective community charge determined in respect of their premises. Any shortfall in the amount due may be recovered by the levying authority by diligence as provided for in the 1987 Act.

Animal Disease

Mr. Ron Davies: To ask the Secretary of State for Scotland if he will list for each of the last three years the number of confirmed cases of animal disease the incidence of which is notifiable.

Mr. Michael Forsyth: The information requested is as follows:

Disease	*1986*	*1987*	*1988*
Anthrax	2	2	Nil
Bovine Spongiform Encephalopathy	Nil	Nil	49
Paramyxovirus in Pigeons	8	67	10
Sheep Scab	Nil	1	1

National Health Service (Consumer Attitudes)

Mr. Bill Walker: To ask the Secretary of State for Scotland if he will publish the full report of the survey of consumer attitudes to the National Health Service in Scotland; and if he will make a statement.

Mr. Michael Forsyth: Yes. The report of survey findings is published today, and copies are available in the House of Commons Library. This report, by Research Surveys of Great Britain Ltd., contains more comprehensive and detailed results than were published in the summary report on 7 March 1989.

The report shows that the Health Service is generally highly regarded by its patients and by the public at large and that patients have a particularly high regard for the medical and nursing care which they receive.

The report identifies a number of areas where improvements were wanted and of these the most frequently mentioned were reduced waiting time—for admission and treatment, hospital food, transport arrangements, reluctance of doctors to make home visits and information from health personnel about the patient's condition.

Two interesting consumer views were *(a)* that many of the services which required attendance at hospital out-patients departments could be more conveniently provided at local health clinics and *(b)* that three in 10 hospital in-patients would be willing to travel to a hospital further away (one in six over 50 miles) if this would reduce the waiting time for admission.

By obtaining the views of recent patients and other members of the public the Government is seeking to take full account of consumer views when considering future Health Service priorities. The report of the survey will be sent to all health board general managers and the main messages contained in it will be discussed with them in order to secure action in response to the expressed views of consumers.

Bathing Waters

Sir Hector Monro: To ask the Secretary of State for Scotland if he will announce the results for 1988 of monitoring Scottish bathing waters in accordance with the European Council bathing waters directive; and if he will make a statement.

Lord James Douglas-Hamilton: My Department's assessment of the results of the monitoring undertaken by the river purification boards in 1988 is set out in the table following, based on the standards for coliforms.

The results are disappointing compared with those in 1987, the first year in which waters were identified in terms of the EC directive. However, the monitoring in 1988 was more intensive, the minimum number of samples analysed for each water having been increased from 12 in 1987 to 20 in 1988. This is in consequence of the European Commission's strict interpretation of the directive: that unless at least 20 samples are taken in the season, a member state cannot establish the 95 per cent. necessary to discount a single failure.

The Government is aware of public concern about the quality of bathing waters and is determined that they should comply with the directive's standards as quickly as possible. To this end, my right hon. and learned Friend announced last November an additional allocation of £5·5

million for water and sewerage in the last financial year and has increased the allocation for this year by some 14 per cent. over planned expenditure. This should allow the sewerage authorities to make faster progress towards compliance with the directive. I have also had discussions with Fife, Lothian and Strathclyde regional councils and some district councils about the quality of waters in their areas.

I have placed in the Library a paper which summarises the 1988 results and sets out the plans to improve the quality of those waters which do not comply with the directive. We shall also be sending the results to the European Commission.

	Result
Nairn (East Beach)	Fail
Cullen	Pass
Fraserburgh	Fail

EMPLOYMENT

Health and Safety

Mr. Cox: To ask the Secretary of State for Employment what was the number of work places inspected by the health and safety inspectorate in the Greater London area during the year 1988.

Mr. Nicholls: The information requested is not readily available. I will write to the hon. Member in due course.

Training Managers

Mr. Leighton: To ask the Secretary of State for Employment if he will list the private sector firms who are acting as employment training training managers, naming the number of places they have each been allocated, how many filled placed each has and what percentage the latter is of the former.

Mr. Nicholls: Due to the unusual length of the reply, I am sending the hon. Member the available information, which has also been placed in the Library. Employment training is a locally planned and delivered programme. Information on contracted and filled places for particular training managers is not therefore held centrally, and may only be obtained at disproportionate costs.

Disabled People

Mr. Barry Field: To ask the Secretary of State for Employment how many disabled people have been placed in employment through the sheltered placement scheme; and if he will make a statement.

Mr. Lee: As at 28 February 1989, 4,821 people with severe disabilities were being supported in employment through the sheltered placement scheme. I am pleased to say that the number of jobs supported in this way is set to rise to 6,900 by the end of March 1990. Since the scheme was introduced in April 1985, it is estimated that around 5,870 people with severe disabilities have been placed in sheltered placements. The scheme succeeded the sheltered industrial groups scheme which was already supporting 1,049 jobs.

YTS

Dr. Reid: To ask the Secretary of State for Employment if he will give details of the obligations of companies within the YTS scheme to provide holiday pay for YTS trainees.

Mr. Cope: YTS managing agents must ensure that non-employed YTS trainees are granted paid holidays at a minimum rate of one and a half days per completed month of training. Such trainees are also entitled to bank and public holidays or days off in lieu with due payment of training allowance. Employed trainees receive holiday pay in accordance with their contract of employment.

Television and Film Making (Report)

Mr. Jacques Arnold: To ask the Secretary of State for Employment when the report of the Monopolies and Mergers Commission on labour practices in television and film making is to be published; and if he will make a statement.

Mr. Fowler: The MMC report, made under section 79 of the Fair Trading Act 1973, is published today and has been laid before the House. Copies are available in the Vote Office. The Government welcome the evidence of changes for the better in employment and working practices that have occurred in the industry during the course of the commission's investigations. These are attributed to increased competition, advances in technology and changes in employment law. The commission expects further change to continue as a result of current or intended negotiations, or management decisions, though they record their concern about whether change will be sufficiently radical or rapid. The Government will be examining ways of monitoring the necessary further progress in consultation with the major parties concerned in the industry. We note and agree with the commission's concern about the problem of repeat fees and performers' rights regarding consent to repeats of original performances. We are considering the possibility of further study of these issues. We also note the commission's findings and conclusions regarding the union membership agreements with Equity and the Musicians Union. These do not conflict with the Government's case, set out in the Green Paper "Removing Barriers to Employment", for giving individuals the right to complain that they have been refused a job because they are not union members.

SOCIAL SECURITY

Community Care (Grants and Loans)

Mr. Cohen: To ask the Secretary of State for Social Security if he will indicate the number of cases in the year ended 31 March for the Walthamstow, Leytonstone and Woodgrange park offices of his Department in which loans were not allowed because *(a)* the claimant's inability to repay was considered a factor and *(b)* other reasons, and in which a grant was also not provided to the claimant.

Mr. Peter Lloyd: Information is not collected in a format which identifies applications where both a loan and a community care grant are refused for the same item or service.

A reason for decision is used once on each application, but more than one reason for decision can be given in a particular application. Because a record is kept of the total number of times each reason is used, the count of the total number of reasons does not equate to the total of applications to which they were applied.

The table contains the available information:

Office	*Inability to repay considered a factor in loan refusal*	*Other reasons considered*
Walthamstow	45	773
Leytonstone	27	450
Woodgrange Park	23	599

Housing Benefit

Mr. Andrew Bowden: To ask the Secretary of State for Social Security what steps his Department is taking to publicise the extension until 30 June of the deadline for claiming housing benefit transitional payments; and what steps his Department is taking to encourage take-up of housing benefit transitional payment.

Mr. Peter Lloyd: The extension of the closing date for housing benefit transitional payments to 30 June was announced in the reply to my hon. Friend the Member for Broxbourne (Mrs. Roe) on 3 March at column *365* and publicised in a press release issued on the same day. A guidance circular was issued to each local authority and local social security office on 6 March, and this has also been sent to the major advice agencies. Leaflets (RR4 Housing Benefit—New Rules), which contain an application form, for anyone still wishing to apply for transitional protection are available from a wide variety of outlets, for example local council offices, local social security offices, from the freephone and freepost service at the transitional payments unit and advice agencies.

Mr. Hinchliffe: To ask the Secretary of State for Social Security (1) what is the average waiting time between a claim for housing benefit transitional payment and its subsequent payment to the claimant;

(2) how many outstanding claims for housing benefit transitional payments are still awaiting process at the Glasgow transitional payments office;

(3) what steps are being taken to expedite the processing of claims for housing benefit transitional payment.

Mr. Peter Lloyd: Up to 10 April, 467,419 applications for housing benefit transitional payments had been received, of which 422,029 have been assessed. Of the 45,390 applications outstanding, 41,153 are cases where an inquiry form is still awaited from the local authority. The clearance time for applications varies considerably from case to case and depends on how long local authorities take to return inquiry forms and whether further inquiries have to be made from the transitional payments unit (TPU). For straightforward cases, it takes two days from receiving an application in the TPU to sending the inquiry form to the local authority, 30 days for the local authority to return the inquiry form to the TPU, a further five days from receiving that inquiry form at the TPU to deciding whether a payment can be made, and depending upon the point in the payment cycle the first payment will be made within two to four weeks and at four weekly intervals thereafter. The TPU has contacted all those local authorities who have had inquiry forms outstanding for more than eight weeks requesting an urgent response.

Mr. Kirkwood: To ask the Secretary of State for Social Security (1) if he will estimate the number of single parent families on family credit who suffered a net loss in income as a result of the housing benefit changes in 1988;

(2) if he will estimate the average weekly amount lost by a single-parent family as a result of family credit being included in the calculations in order to determine elegibility to housing benefit; and what savings have accrued to his Department's annual budget as a result.

Mr. Peter Lloyd: The estimated effects on claimants of the April 1988 changes were set out in the "Impact of the Reformed Structure of Income-Related Benefits" published in October 1987. Further information is not available.

Mr. Kirkwood: To ask the Secretary of State for Social Security whether he has any plans to increase financial assistance to single-parent families who have suffered increased housing costs as a result of changes in the housing benefit rules.

Mr. Peter Lloyd: We have no plans to do so. An enhanced premium was included within the housing benefit applicable amounts for all lone parents last April in recognition of their special needs and transitional protection was offered to all those who had lost more than £2·50 per week as a result of the changes in the rules. Since then there have been no changes in the housing benefit rules for single parent families which would have resulted in increased housing costs.

Unemployed Couples (Earnings Disregard)

Mr. McCrindle: To ask the Secretary of State for Social Security if he has any plans to increase the £15 earnings disregard for unemployed couples annually in line with the rise in earnings of those in full-time work; and if he will make a statement.

Mr. Peter Lloyd: No. Earnings disregards have never been increased in line with the rise in earnings. However, we are monitoring the earnings rules and we will consider whether any change is necessary.

Transitional Protection

Mr. Kirkwood: To ask the Secretary of State for Social Security what representations he has received regarding the financial impact suffered by claimants whose annual uprating has been nullified by loss of transitional protection.

Mr. Peter Lloyd: Various representations have been received on this subject.

Mr. Kirkwood: To ask the Secretary of State for Social Security if he will estimate the numbers of claimants in each benefit category expected to receive no cash increase after the payment of their annual benefit uprating in the current year.

Mr. Peter Lloyd: We estimated that some 3,840,000 income support claimants will receive an increase at this year's uprating. The estimated number of claimants receiving no increase, by client group, is as follows:

	Number
Pensioners 80+	40,000
Pensioners 60-79	180,000
All pensioners	220,000
Sick or disabled	20,000
Lone parents	40,000
Couples with children	10,000
Others	300,000
TOTAL	[1]590,000

[1] Figures do not sum due to rounding.

Mr. Kirkwood: To ask the Secretary of State for Social Security what savings will accrue to public funds by clawing back benefit uprating by withdrawal of transitional protection.

Mr. Peter Lloyd: Precise information is not available. Had income support transitional additions not been reduced by increases at uprating, the estimated additional cost in the year 1989-90 would have been around £100 million.

Mr. Kirkwood: To ask the Secretary of State for Social Security what research his Department has undertaken to investigate the effect of the loss of transitional protection on claimants; and if he will make a statement.

Mr. Peter Lloyd: We are monitoring all aspects of the reformed social security system. Information about transitional protection will be available from our usual stastistical returns.

Disabled Children (Attendance Allowance)

Mr. Alfred Morris: To ask the Secretary of State for Social Security in how many cases his Department has issued demands for repayment of attendance allowance to the parents of disabled children who have had to spend periods in hospital; what is the average amount involved and highest amount in any particular case; if he intends to insist on the repayments ; and if he will make a statement.

Mr. Scott: The requested information is not available. The question of whether an overpayment of benefit is recoverable is a matter for the independent statutory authorities to decide. Our policy is to seek repayment of recoverable overpayments where possible, but repayment may be waived depending on the circumstances of the individual case.

Benefits

Mr. Redmond: To ask the Secretary of State for Social Security if he will list for the Doncaster and Mexborough areas of South Yorkshire to date what percentage of the total number of applications made to date for *(a)* budgeting loans were (i) full or part awards and (ii) nil awards and *(b)* community care grants were (1) full or part awards and (2) nil awards.

Mr. Peter Lloyd: The monthly figures to date of the numbers of applications for budgeting loans and community care grants processed are available in the Library. There is no information available on part awards.

Ms. Walley: To ask the Secretary of State for Social Security if he will now reply to the invitation of the hon. Member for Stoke on Trent, North to visit young people under 25 years old from Stoke on Trent, North, highlighted in Channel 4's "Dispatches" programme, who have been adversely affected by changes in benefit payments which came into force on 10 April.

Mr. Peter Lloyd: I wrote to the hon. Member today.

Child Fostering Allowance

Mr. Kirkwood: To ask the Secretary of State for Social Security whether the income available to a family by means of a permanent child fostering allowance is taken into account in assessing the family's entitlement to community charge rebate; and if he will make a statement.

Mr. Peter Lloyd: Paragraph 24 of schedule 3 of the Housing Benefit (Community Charge Rebates) (Scotland) Regulations 1988 requires such income to be disregarded in full.

Disabled People and Deaf People

Mr. Kirkwood: To ask the Secretary of State for Social Security what was the amount of money given under section 64 of the Health Services and Public Health Act 1968 to *(a)* all organisations working with and for disabled people and *(b)* all organisations working with and for deaf people, for each year from 1980 to the latest available date.

Mr. Freeman: I have been asked to reply.

I shall let the hon. Member have such information as can be obtained as soon as possible.

AGRICULTURE, FISHERIES AND FOOD

Grain (Price)

Mr. Ralph Howell: To ask the Minister of Agriculture, Fisheries and Food what was the tonnage and average price of grain exported from the United Kingdom *(a)* generally and *(b)* separately for each country to which grain was exported in 1986, 1987 and 1988.

Mr. Ryder: The total quantity and average price of grain exported from the United Kingdom in the calendar years 1986 to 1988 were as follows:

	Quantity (tonnes)[1]	*Average price (£/tonne)*[2]
1986	8,148,941	108·18
1987	7,238,589	72·41
1988	4,750,249	74·51

Wheat and barley represented over 95 per cent. of total United Kingdom grain exports in each of the calendar years 1986 to 1988. The quantity and price of these two grains exported to individual countries were as follows:

Commodity and Country	*Quantity (tonnes)*[1]			*Average Price (£/tonne)*[2]		
	1986	*1987*	*1988*	*1986*	*1987*	*1988*

[3] Customs heading 041.2: Unmilled wheat (including spelt) and meslin, excluding durum wheat.
[4] Customs heading 043: Unmilled barley.

Source:

United Kingdom Overseas Trade Statistics. (A "—" signifies that exports to a country were not separately identified in the published Overseas Trade Statistics for the year in question and are included under "Other" for that year).

Mr. Ralph Howell: To ask the Minister of Agriculture, Fisheries and Food what was the total tonnage and average price of imported grain from each country which exported grain to the United Kingdom in each of the years 1986, 1987 and 1988.

Mr. Ryder: Wheat, barley and maize together represented over 95 per cent. of total United Kingdom grain imports in each of the calendar years 1986 to 1988. The quantity and price of these three grains imported from individual countries were as follows:

Commodity and country	*Quantity (tonnes)*[1]			*Average price (£/tonne)*[2]		
	1986	*1987*	*1988*	*1986*	*1987*	*1988*

Sheep and Single Ewe Premiums

Mr. Steel To ask the Minister of Agriculture, Fisheries and Food when he now expects to announce the end of the variable sheep premium and the choice of base year for calculation of the replacement single ewe premium.

Mr. Donald Thompson: Proposals to phase out the sheep variable premium scheme and replace it with a single ewe premium form part of a package of proposals by the EC Commission for a review of the sheepmeat regime. Discussion on these proposals have made little headway.

Cow Subsidy

Mr. Steel: To ask the Minister of Agriculture, Fisheries and Food whether he will consider raising the cow subsidy from £34 to £46 per head as the permitted maximum within the European Community.

Mr. Donald Thompson: The Government are currently considering what rate of suckler cow premium should apply in the United Kingdom and an announcement will be made before the start of the 1989 scheme year on 15 June.

EC (Abattoirs)

Mr. Steel: To ask the Minister of Agriculture, Fisheries and Food when he expects European Community Ministers to achieve common standards for abattoirs throughout the Community.

Mr. Donald Thompson: I expect the Council of Ministers to apply a single set of rules to slaughterhouses throughout the European Communiity by 31 December 1992.

Beef Regime

Mr. Steel: To ask the Minister of Agriculture, Fisheries and Food whether he will monitor the new beef regime, starting in April and in particular the effect of the £28 headage payment on male cattle to establish the effect on the quality of beef thus being produced.

Mr. Donald Thompson: We shall be monitoring closely the number of animals on which beef special premium is paid and comparing this data with data on slaughterings of male animals to monitor the effects of the headage limit. There are no quality standards attaching to this premium, but the Meat and Livestock Commission will continue to report deadweight prices on a sample basis. These reports classify the carcases reported on according to the EC carcase classification grid and will thus give us some indication of whether overall standards are rising or falling. I am confident, however, that in the absence of a national quality specification set by the beef variable premium scheme, the market will in fact pay a premium for the quality of beef which it wants and that producers will respond to the signals given by the market place.

Game

Mr. Goodlad: To ask the Minister of Agriculture, Fisheries and Food what consultations he has had with his European Economic Community counterparts on the draft game meat regulations directive; and if he will make a statement.

Mr. Donald Thompson: None. I understand that the European Commission are working on a text but no proposal has yet been made to the Council of Ministers.

Animal Welfare

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food when he expects to receive the European Economic Community Commission's proposals for new regulations on the welfare of animals in transit.

Mr. Donald Thompson: I understand that the Commission expects to present its proposals to the Council shortly.

Badgers

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food which institutions are currently researching the development of a tuberculosis test for live badgers; what such work his Department is funding; and when he expects field trials for such a test to commence.

Mr. Donald Thompson: Ministry funded work on the development of a live test for tuberculosis in badgers,

which is suitable for field use, is being carried out at the central veterinary laboratory. It is too early to predict when field trials might commence.

Porcine Somatotropin

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food on how many occasions field trials have been authorised for porcine somatotropin.

Mr. Donald Thompson: On one occasion; the ATC issued has since expired.

Bovine Somatotropin

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food when a product licence application in respect to bovine somatotropin was submitted to the European Economic Community committee on veterinary medicinal products; and whether it has made any recommendations.

Mr. Donald Thompson: Two applications for product licences for BST products have been referred to the Committee for Veterinary Medicinal Products, in September and November 1987. The committee has not yet adopted an opinion on either.

Food Destruction

Mr. Cohen: To ask the Minister of Agriculture, Fisheries and Food, further to his answer to the hon. Member for Leyton, 16 March, *Official Report*, column *352*, if he will list each food item, and the quantity of it, destroyed during 1988 under the European Community arrangements in all the Community countries.

Mr. Ryder: The latest figures relating to fruit and vegetables withdrawn from the market are for the 1986-87 season and are set out in EC Commission working documents. From these it is possible to derive the following figures for produce which became unfit for consumption before reaching its destination:

Tonnes

	Belgium	*Germany*	*Greece*	*France*	*Ireland*	*Italy*	*Netherlands*	*United Kingdom*	*Spain*
Cauliflowers	258	4,824	—	58,910	—	45,274	—	19,669	—
Tomatoes	20	—	80,305	23,520	194	513,127	—	—	—
Aubergines	—	—	—	452	—	92	—	—	—
Peaches	—	—	165,194	18,751	—	99,078	—	—	—
Apricots	—	—	12	420	—	2	—	—	—
Lemons	—	—	23,769	—	—	422,724	—	—	19,841
Pears	527	—	956	861	—	34	—	32	—
Apples	3,681	—	80,949	15,247	86	331	—	4,535	—
Mandarins	—	—	9,596	—	—	189,625	—	—	—
Oranges	—	—	243,099	998	—	395,330	—	—	—

Figures for the various ends to which fish withdrawn from the market is put in each member state are not available, but the majority is used for animal feed.

Ammonia Gas

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food whether he is investigating methods of reducing and controlling emissions of ammonia gas from agricultural systems; and if he will make a statement.

Mr. Ryder: Yes. Ammonia is released from animal urine and faeces. Research is being done to understand the mechanisms of ammonia release and to devise systems of farm waste treatment and application to land that will minimise volatilisation and losses.

Vaccination

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food (1) what discussions he has had with Hoechst about the use of vaccines to control clostridia and pasteurella and the potential link with the deaths of sheep and lambs; and if he will make a statement;

(2) if he will make a statement about the results of his investigations into the use of vaccines to control clostridia and pasteurella and the potential link with the deaths of sheep and lambs.

Mr. Donald Thompson: My officials have met Hoechst representatives and discussed the nature of the data required for a thorough investigation of suspected adverse reactions in sheep to vaccines against clostridia and pasteurella. My Department is still receiving reports, all of which will need to be investigated in detail before reliable conclusions can be reached on this matter. These vaccines have been very widely used in the national flock for many years and the reports so far received concern a small percentage of ewes vaccinated. We shall be looking particularly carefully at the nutritional levels in ewes, following the mild winter, and at the incidence of other diseases in the flocks affected.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what information his Department possesses about the effectiveness of vaccination schemes against foot and mouth disease and clinical swine fever.

Mr. Donald Thompson: The role of vaccines has been carefully assessed at frequent intervals. Vaccination can be an effective means of controlling foot and mouth disease and classical swine fever where there are significant disease problems. When the number of cases has been reduced eradication by a slaughter policy is a better and ultimately cheaper option than routine vaccination.

Cattle (Slaughter)

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will state the total number of *(a)*, dairy cattle and *(b)* all cattle slaughtered for human consumption in Britain during 1988; and how many of these were slaughtered at European Economic Community export-approved slaughterhouses.

Mr. Donald Thompson: It is provisionally estimated that 3·4 million cattle and calves were slaughtered in the

United Kingdom in 1988, 1·8 million of which were in EC export-approved slaughterhouses. Dairy cattle slaughtered are not separately distinguished.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he will introduce a scheme of compulsory veterinary ante-mortem inspection of all bovines submitted for slaughter to European Economic Community export approved and non-export approved slaughterhouses; and if he will make a statement.

Mr. Donald Thompson: The carcases of all animals slaughtered for human consumption are inspected post mortem. In EC export-approved slaughterhouses, an inspection of animals prior to slaughter is also required. I plan to introduce ante mortem inspection of animals in non-EC export-approved slaughterhouses by 1 January 1991.

Veterinary Product Licencer

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he is currently reviewing existing veterinary product licences approved for the United Kingdom; what action he is taking to ensure products imported from the European Economic Community will continue to meet British standards; and if he will make a statement.

Mr. Donald Thompson: All veterinary product licences are being reviewed to ensure that they conform to up-to-date standards of safety, quality and efficacy. Imports from both EC and other countries, except under emergency provisions, are permitted only in accordance with a product licence issued on the criteria mentioned and following a satisfactory inspection of the manufacturing premises overseas.

Animal Diseases

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will list those animal diseases which are currently notifiable and indicate the number of confirmed cases of each disease in England and Wales for each of the last three years.

Mr. Donald Thompson: The number of confirmed cases of notifiable diseases over the last three years in England and Wales is as follows:

Disease	*Number of cases* 1986	1987	1988
African horse sickness	—	—	—
African swine fever	—	—	—
Anthrax	9	4	3
Aujeszky's disease	6	6	5
Bovine spongiform encephalopathy[1]	—	—	2,136
Brucella melitensis in cattle	—	—	—
Cattle plague in ruminants and swine	—	—	—
Classical swine fever	10	1	—
Contagious equine metritis[2]	—	—	—
Dourine in horses, asses, mules and zebras	—	—	—
Enzootic bovine leukosis	1	1	1
Epizootic lymphangitis in horses, asses and mules	—	—	—
Equine encephalomyelitis	—	—	—
Equine infectious anaemia	—	—	—
Foot and mouth disease in ruminants and swine	—	—	—
Fowl pest (fowl plague, Newcastle disease and paramyxovirus) poultry of all kinds	—	—	—
Glanders and farcy in horses, asses and mules	—	—	—
Paramyxovirus in pigeons	276	251	205
Pleuro-pneumonia in cattle	—	—	—
Rabies	—	—	—
Sheep pox	—	—	—
Sheep scab	55	37	35
Swine vesicular disease	—	—	—
Warble fly	34	8	4
Teschen disease of pigs	—	—	—
Tuberculosis in cattle (certain forms)	—	—	—

[1] Notifiable since 21 June 1988.
[2] Notifiable since 20 May 1987.

Foot and Mouth Disease

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food which member states of the European Economic Community operate schemes of compulsory vaccination of livestock against foot and mouth disease; and if it is his policy to retain quarantine periods in respect of live animals imported from these countries.

Mr. Donald Thompson: I refer the hon. Member to the answers given to him on 11 April at column *439*.

Bovine Spongiform Encephalopathy

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he will introduce restrictions on the movement of offspring of animals which have been confirmed as suffering from bovine spongiform encephalopathy; and if he will make a statement.

Mr. Donald Thompson: I have no plans to introduce such measures.

Veterinary Checks

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what is his response to the European Commission proposal to replace veterinary checks on animal health and animal products at national frontiers by checks in the country of origin; and if he will make a statement.

Mr. Donald Thompson: I refer the hon. Member to the explanatory memorandum concerning draft instrument 8062/88 which was deposited in the Library on 7 November 1988.

Interest Rates

Mr. Cox: To ask the Minister of Agriculture, Fisheries and Food what recent discussions he has had with the National Farmers Union on the recent increase in interest rates; and if he will make a statement.

Mr. Donald Thompson: I have had no recent discussions with the National Farmers Union on interest rates. Policy on interest rates is, of course, the responsibility of my right hon. Friend the Chancellor of the Exchequer, who has made it clear that interest rates are set at an appropriate level to maintain downward pressure on inflation.

Sheepmeat

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what representations he

has received concerning the sheepmeat stabiliser system for the 1988 marketing year, and in particular the base line used for the calculation of the final stabiliser figure for each European Community country; and if he will make a statement.

Mr. Donald Thompson *[holding answer 10 April 1989]:* When the Commission fixed the sheepmeat stabiliser for 1988 it had census figures indicating that, for the Community excluding Great Britain, the reduction in the support level resulting from the stabiliser should be 7 per cent. They chose to adjust this figure downwards to 4 per cent., the same level of reduction as applied to Great Britain. They justified this on the basis that there were anomalies in certain countries' statistics.

We have received a number of representations concerning the application of the stabiliser for 1988. We made clear our objections to the Commission's course of action, particulary in a situation where the Commission has itself been pressing the need for measures to control the rapidly rising cost of the sheep regime.

HEALTH

National Health Service (Staff Training)

Mr. Gordon Brown: To ask the Secretary of State for Health if he will provide an estimate of the annual expenditure of the National Health Service in England on training of staff, differentiating between medical and non-medical staff.

Mr. Mellor: We do not have centrally comprehensive information on the total expenditure incurred. However, in 1987-88 relevant revenue expenditure amounted to at least £360 million, which includes the total Revenue expenditure of the National Health Service training authority (£5·5 million) and the English national board for nursing, midwifery and health visiting (£90·5 million). Most of the remainder was incurred by regional and district health authorities. While the expenditure of the English national board for nursing, midwifery and health visiting can be attributed to nurse education and training and the summarised accounts of regional and district health authorities identify some £10 million for postgraduate medical and dental education, in general the information available does not differentiate between expenditure incurred on training medical and non-medical staff.

The National Health Service training authority is piloting a set of training activity indicators in a number of health authorities which, among other measures, are designed to identify more precisely expenditure on training on different staff groups.

Overseas Patients

Mr. Galbraith: To ask the Secretary of State for Health what consideration he is giving to the number of overseas patients that can be treated in the self-managing hospitals proposed in the White Paper "Working for Patients".

Mr. Kenneth Clarke: We are considering how treatment of overseas patients in National Health Service hospitals, including self-governing hospitals, might best be administered in the context of the White Paper and associated working papers.

Clinical Grading

Mr. Campbell-Savours: To ask the Secretary of State for Health how many nursing, midwifery and health visiting staff from each of the old grades have been assimiliated to each of the new grades in the recent clinical grading structure for each of the specialty branches of nursing, midwifery and health visiting.

Mr. Mellor: The information requested cannot be derived from the data which are held centrally. The information which is available has already been placed in the Library.

Mr. Hinchliffe: To ask the Secretary of State for Health if he will require health authorities to provide figures on the number of nurse regrading appeals currently outstanding in district health authorities within the Yorkshire region, and the stage in the appeal processes in each district health authority.

Mr. Mellor: No. The processing of appeals under the national agreement is a matter for individual health authorities.

Mr. Hinchliffe: To ask the Secretary of State for Health what arrangements have been made to process nurse re-grading appeals in each of the district health authorities within the Yorkshire region.

Mr. Mellor: Appeals are being dealt with under a long-standing agreement between the management and trades union sides of the General Whitley Council on procedures for settling differences over NHS employees' conditions of service. Detailed arrangements for operating this agreement are for local decision, and we collect no information centrally.

Toxic Waste (Doncaster)

Mr. Redmond: To ask the Secretary of State for Health how many representations to date he has received from residents living in or near Doncaster metropolitan borough council concerning the proposed toxic waste site at Kirk Sandell by Leigh Environmental and the environmental implications for this populated area; and if he will make a statement.

Mr. Freeman: One representation has been received to date. Responsibility for the licensing of toxic waste disposal sites lies with the local authority, under powers granted by my right hon. Friend the Secretary of State for the Environment. Sites must be registered with Her Majesty's inspectorate of pollution, which is responsible for subsequent monitoring and advice on discharges from the site. The Department of Health will advise the Department of the Environment on possible health effects of discharged chemicals if they are asked to do so.

Male Circumcision

Mr. Andrew F. Bennett: To ask the Secretary of State for Health what was the cost to the National Health Service of male circumcision operations in the last 10 years for which figures are available; and what was the cost of comparable operations in the private sector.

Mr. Mellor: We do not collect this information centrally.

GOS Forms

Mrs. Wise: To ask the Secretary of State for Health (1) what quantity of form GOS 2 (R), National Health Service repair and replacement of spectacles voucher application, was printed with *(a)* words indicating or implying that full-time students under 19 years would be eligible for free repairs without family practitioner committee approval and *(b)* prescription details requiring left eye before right; and if he will make a statement outlining what advice he has given to opticians and ophthalmic medical practitioners regarding these errors;

(2) what quantity of form GOS (V), National Health Service spectacle voucher applications, has been printed requiring left eye to be entered before right; and what advice he has given to opticians and ophthalmic medical practitioners as to how to deal with this error;

(3) what quantity of form GOS (P), patient's prescription/statement, was printed showing left eye first, right eye second, if he will make a statement as to what advice he has given to opticians and ophthalmic medical practitioners as to how to deal with this error; and how the advice has been conveyed;

(4) what was the cost of the new forms relating to eye examinations which were printed with errors, GOS(P), GOS2(R) and GOS(V); and who will bear the cost of any mistakes or confusion which arise as a consequence of these printing errors;

(5) on what date family practitioner committees received the forms which were needed by opticians for use on 1 April;

(6) whether he intends to continue to use forms GOS(ST)A and GOS(P) in their present design which makes it impossible to use carbon paper for information required to be duplicated on each form.

Mr. Mellor: The revised GOS forms were delivered to family practitioner committees on Monday 19 March.

A total of 150,000 copies of forms GOS(P), GOS(V) and GOS2(R) were printed transposing left and right eye prescription details. FPCs were advised of this on 31 March in a letter which asked them to inform contractors to amend the forms manually until reprinted versions were available. Two million forms GOS2(R) were printed stating that students could have repairs made without reference to the FPC. A health circular and family practitioner notice has been issued advising health authorities and FPCs of this error.

The design of forms GOS(ST) A and GOS(P) will be revised as soon as possible.

Information on the cost of printing forms GOS(P), GOS2(R) and GOS(V) is not currently available. The cost of reprinting will be met by the Department.

Optometrists

Mrs. Wise: To ask the Secretary of State for Health what representations he has had as a result of his two week consultation on his proposed exemption of optometrists from the requirement to examine for disease as well as refraction; and which bodies supported his proposal and which opposed it.

Mr. Mellor: The Department has received comments to date from 17 bodies and individuals. The great majority are opposed to the proposal.

Air Ionisers

Mr. Allen: To ask the Secretary of State for Health how his Department studied the health effects of domestic air ionisers; and if he will make a statement.

Mr. Freeman: The Department's expert independent advisory committee on the medical aspects of contamination of air and soil reviewed the research into the effects of air ionisers. This includes a presentation to the committee by researchers. The committee advised the Department that the evidence presented did not satisfy them that the use of domestic air ionisers had demonstrable health effects. Results of studies on the health effects of ionised air published subsequently in the scientific literature supports that opinion.

Schizophrenia

Mr. Goodlad: To ask the Secretary of State for Health how much his Department spent on research into schizophrenia in each of the last two years; and what proportion each figure was of expenditure on the National Health Service research programme.

Mr. Freeman: In 1988-89, £1,307,900 was made available from the Department of Health and Social Security for directly commissioned health, personal social services and social security research programmes for research into mental illness, much of which will be relevant to sufferers from schizophrenia. In 1987-88 the comparable sum was £1,267,000. Expressed as a percentage of the health, personal social services and social security research budget the figures are 8·2 per cent. and 9·3 per cent. respectively.

In 1986 a specific research initiative on schizophrenia was started consisting of seven new research studies. It is hoped that the results of these projects will provide valuable information on the pattern of care of schizophrenia patients.

Mr. Goodlad: To ask the Secretary of State for Health (1) what is the current annual cost per patient to the National Health Service in the Mersey health region of the care and treatment of patients with a main diagnosis of schizophrenia psychoses;

(2) how much was spent in the Mersey health region in the last year on the care and treatment of patients suffering from schizophrenia psychoses; and what percentage that figure represented of total expenditure on *(a)* mental and *(b)* all health services.

Mr. Freeman: Information relating specifically to the cost of treating patients suffering from schizophrenia psychoses in the Mersey region is not collected centrally.

Anti-psychotic Drugs

Mr. Vaz: To ask the Secretary of State for Health how many prescriptions were written for anti-psychotic drugs in each year since 1985; and how many were written for *(a)* prochlorperazine, *(b)* thioridazine, *(c)* chlorpromazine hydrochloride and *(d)* trifluoperazine.

Mr. Mellor: We have no information centrally about the number of prescriptions written by doctors. Official statistics are based on the prescriptions dispensed by community pharmacists. The information about the drugs requested is therefore as follows:

(,000)

England	1985	1986	1987
All anti-psychotic drugs	4,430	4,436	4,409
Prochlorperazine	2,288	2,214	2,147
Thioridazine	597	623	657
Chlorpromazine HCl	542	532	513
Trifluoperazine	486	471	479

Tardive Dyskinesia

Mr. Vaz: To ask the Secretary of State for Health if he will take steps to provide the public with information on the causes and dangers of tardive dyskinesia.

Mr. Freeman: No. It is for doctors to provide information to their patients about possible adverse reactions associated with prescribed medicines.

Paddington Chest Clinic

Mr. Wheeler: To ask the Secretary of State for Health what is the present ownership of property known as the Paddington chest clinic, Newton road, London, W2; when the property was sold and to whom; and whether the property was placed on the open market for sale by tender upon the advice of a professional valuer.

Mr. Freeman: The sale of property in the Paddington area is the responsibility of Parkside health authority.

Midwives

Mr. Redmond: To ask the Secretary of State for Health if he will list by country the percentage of home delivery training that is given to trainee midwives in the European Economic Community member states: and if he will make a statement.

Mr. Mellor: We do not hold information centrally on the percentage of home delivery training given to student midwives either in this country or in the European Community. The aim of midwifery education in England is to encompass antenatal, perinatal and postnatal care, as well as delivery, in both hospital and community setting in an integrated fashion.

Mr. Redmond: To ask the Secretary of State for Health when he last had consultations with the Association of Radical Midwives; what subjects were discussed; and if he will make a statement.

Mr. Mellor: We have had no consultations with the Association of Radical Midwives. Our usual contacts with the midwifery profession are with the Royal College of Midwives and the statutory bodies for nursing, midwifery and health visiting.

Prescription Charges

Mr. Gale: To ask the Secretary of State for Health if he has estimates for the extra revenue that would be generated through the extension of prescription charges to those reaching retirement age throughout the current year while exempting those on income support; and if he has further estimates for the additional revenue that would be generated if such a policy was projected over the next five years.

Mr. Mellor: The information needed to make these estimates is not available.

Mr. Gale: To ask the Secretary of State for Health what would be the extra annual revenue generated by the extension of prescription charges to all those over retirement age, exempting only those in receipt of income support.

Mr. Mellor: I estimate that the additional annual revenue would be in excess of £200 million.

Hospital Formularies

Mr. Gale: To ask the Secretary of State for Health what incentives are contained within the existing hospital formularies system for the development in the United Kingdom of new and improved drugs.

Mr. Mellor: The existence of hospital formularies is, in itself, an incentive for the development of safer and more effective medicines. Hospital formularies are subject to ongoing review. Drug companies, bearing this in mind, will therefore work towards the production of medicines which meet criteria for hospital use and demonstrate advantages over existing products, to warrant their inclusion in the formularies.

Mr. Gale: To ask the Secretary of State for Health what plans he has to make funds available for the compilation of local drug formularies.

Mr. Mellor: Extra funds have been made available to FPCs from 1989-90 to enable them to carry out their increased responsibilities, as announced in the White Paper "Promoting Better Health". These responsibilities include encouraging the development of local drug formularies.

Mr. Gale: To ask the Secretary of State for Health what the effect of European Community directives will be upon the prospects for the introduction of a national United Kingdom formularly for drugs.

Mr. Mellor: We have no plans to introduce a national formulary. We do however wish to see the continued development of voluntary, local formularies as part of the effort by doctors to achieve more effective and economic prescribing. Such formularies will not be affected by the European Community directives.

Modern Drugs

Mr. Gale: To ask the Secretary of State for Health when his Department last carried out cost/benefit studies on the potential savings to be made through the greater use of modern drugs instead of expensive hospital care; and what conclusions he has drawn from those studies.

Mr. Mellor: The Department has not itself commissioned any such research, but we are aware of some useful studies on this topic.

Generic Medicines

Mr. Gale: To ask the Secretary of State for Health what proposals he intends to make to increase the information available to general practitioners through improvements to the labelling of generic medicines.

Mr. Mellor: The information put on medicine labels is that essential to tell patients how to use their medicines.

Since most GPs never see labels, they are not generally a practicable way to provide doctors with information about drugs.

Kidney Donor Cards

Mr. Alfred Morris: To ask the Secretary of State for Health what is his current advice concerning the advisability of people in HIV high risk groups carrying kidney donor cards; and if he will list any medical conditions which render carrying such cards inadvisable.

Mr. Mellor: On 2 March 1987 the Department's chief medical officer wrote to all doctors to remind them of the precautions needed to prevent the transmission of HIV through the transplant of infected tissue or organs. He made it clear that it was essential that blood from the donor is tested and found negative for HIV antibodies before the organ or tissue is transplanted and that inquiries should also be made to exclude donors most likely to have been exposed to the AIDS virus. I do not propose at present to issue a list of contra-indications to organ donation because assessment of the medical suitability of a potential donor is a matter for the doctors concerned, and is undertaken at the time of donation.

Ethnic Minorities

Mr. Cohen: To ask the Secretary of State for Health when he intends to respond to the National Association of Health Authorities ' report entitled "Action Not Words: a Strategy to Improve Health Services for Black and Minority Ethnic Groups;" if he plans to take any action to encourage implementation of its proposals and guiding principles and objectives by health authorities; and if he will make a statement.

Mr. Mellor: I refer the hon. Member to my reply to the hon. Members for Brent, South (Mr. Boateng) and for Birmingham, Ladywood (Ms. Short) on 9 February 1989 at columns *800-1*.

Hospitals (Site Value)

Ms. Harman: To ask the Secretary of State for Health what is the most recently calculated site value for each of the hospitals with over 250 beds.

Mr. Freeman: The valuation of the NHS estate does not provide site values in terms of bed numbers and to obtain the information by a special exercise would incur disproportionate cost.

Hormone Replacement Therapy

Mr. Michael Morris: To ask the Secretary of State for Health what advice he has received on the use of hormone replacement therapy for the prevention of stroke and fractures of the femur in elderly women National Health Service patients.

Mr. Freeman: I am advised that hormone replacement therapy (HRT) prevents bone loss in post-menopausal women and therefore reduces the risk of fractures. There is also evidence that HRT may provide additional protection against heart disease and strokes. Since there may be risks as well as benefits of such treatment for some people, the individual patient's suitability for HRT should be a matter for the clinical judgment of their doctor. The Medical Research Council has set up a specialist group to look at the further research required into HRT.

Glaucoma

Mr. Michael Morris: To ask the Secretary of State for Health what advice he has received from his Department's consultant adviser on ophthalmology on screening programmes for the early detection of glaucoma in National Health Service patients.

Mr. Freeman: Any advice given to the consultant adviser to the chief medical officer is confidential.

Cancer Screening

Mr. Michael Morris: To ask the Secretary of State for Health what measures he proposes to introduce to encourage family doctors to screen National Health Service patients for cervical and breast cancers.

Mr. Freeman: Guidance to health authorities on cervical cancer screening was contained in HC(88)1 of January 1988. Breast cancer screening was covered by draft circular DA(87)14 of March 1987 and the letter EL(88)P/48 of April 1988. Copies of these are in the Library.

The cervical cancer screening service is provided largely through GPs, whereas breast cancer screening is available through static centres and mobile units provided by health authorities. In both programmes GPs are involved in the issuing of invitations to eligible women.

To encourage GPs to achieve higher levels of cover, the item of service payment for cervical cancer screening is to be replaced by target payments. Such payments will be made for achieving or helping to achieve (for example with the family planning clinic) cover of 80 per cent. of the relevant practice population. By this means we believe that a significant increase will be achieved in the numbers of women screened and therefore in the numbers of cases of early detection and successful treatment of conditions which otherwise might have developed into cervical cancer.

In the case of breast cancer screening we would expect GPs to be involved in discussions on arrangements for the follow-up and treatment of any of their patients who have screen-detected abnormalities. Resource material for primary care teams, including a practical guide for GPs, has been developed by the Cancer Research Campaign. These information packs are being distributed free of charge to every GP practice in the country three months prior to eligible women in the practice being invited for screening.

Health Screening

Mr. Michael Morris: To ask the Secretary of State for Health (1) what measures his Department proposes as a follow-up to the "Look After Your Heart!" campaign; and if he proposes to ask all family doctors to undertake screening programmes among National Health Service patients to detect and treat risk factors for coronary artery disease;

(2) what measures his Department is planning to encourage family doctors to undertake screening programmes to detect patients requiring treatment for mild to moderate hypertension.

Mr. Mellor: The "Look After Your Heart!" campaign is a continuing one with two main aims. First, to raise awareness of the risk factors associated with coronary

heart disease. Secondly, to help people make the necessary lifestyle changes in key areas such as nutrition, smoking, alcohol consumption and exercise. Work continues on both fronts. Under changes to general practitioners' terms of service proposed in the document "A New Contract" which was sent to all GPs on 23 February, it will be a requirement that GPs offer patients regular check-ups. These check-ups will include measurement of blood pressure. We believe that this important development will provide an opportunity for GPs to advise patients, particularly those at risk, of measures to avoid developing high blood pressure. Whenever hypertension is identified they will be able at an early stage to take whatever action is appropriate to control the situation. We have also asked the standing medical advisory committee to advise on the cost-effectiveness of wider cholesterol testing in the prevention and treatment of heart disease.

Mr. Michael Morris: To ask the Secretary of State for Health what measures his Department proposes to encourage special screening and treatment programmes to detect and treat National Health Service patients suffering from diabetes mellitus.

Mr. Freeman: Provisions of screening and treatment programmes for National Health Service patients suffering from diabetes mellitus is a matter for individual health authorities. Under changes to general practitioner terms of service proposed in the document "A New Contract", which was sent to all general practitioners on 23 February, it will be a requirement that general practitioners offer patients regular check ups. These check ups will include a urine test which, amongst other things, will provide an indication of whether further investigations are necessary to determine whether or not a patient is suffering from diabetes mellitus. The early identification of disease is an essential part of the package of changes to general practice set out in the White Paper "Promoting Better Health".

Cook-chill Food

Mr. Hinchliffe: To ask the Secretary of State for Health (1), pursuant to his answer to the hon. Member for Wakefield on 7 April, *Official Report*, columns *303-4*, if he will give the reference for the press reports on cook-chill food which he refers to as biased and inaccurate;

(2) if, pursuant to his answer to the hon. Member for Wakefield on 7 April, *Official Report*, columns *303-4*, he will seek a report from the Wakefield district health authority as to when it received representations from the hon. Member for Wakefield and which representations did not relate to cook-chill food at Clayton hospital.

Mr. Kenneth Clarke: It is for the district health authority to follow up local complaints. But my hon. Friend the Parliamentary Under-Secretary of State for Health is writing to the hon. Member about his request for cook-chill to be suspended, and he will enclose with that letter a copy of the article referred to and a copy of the unit general manager's subsequent letter to the editor of the newspaper concerned setting out the true position.

Residential Care

Mr. Hinchliffe: To ask the Secretary of State for Health what is his policy on the installation of electronic monitoring equipment in residential homes for the elderly.

Mr. Mellor: The installation of such equipment is a matter for the local authority concerned together with the proprietors of independent sector homes. We would hope that any equipment installed would be consistent with the human dignity of residents, a homely atmosphere and the necessary human contact betwen residents and staff.

Mr. Hinchliffe: To ask the Secretary of State for Health if it is his intention to introduce a system of care tests to ensure that elderly persons do not enter residential care unnecessarily.

Mr. Mellor: We are considering the case for introducing a system for assessment of need for residential care as part of our wider examination of community care following Sir Roy Griffiths' report. We hope to be able to bring forward our proposals on community care in the near future.

Foster Parents

Mr. Hinchliffe: To ask the Secretary of State for Health what guidance he has issued to local authorities and voluntary organisations regarding insurance procedures for foster parents.

Mr. Mellor: Regulation 3 of the Boarding Out of Children (Foster Placement) Regulations requires local authorities and voluntary organisations to include with notices of approval to foster parents information on the agency's arrangements for meeting any legal liabilities of a foster parent arising by reason of the placement. The regulations come into force on 1 June 1989. The accompanying handbook of guidance suggests a number of different arrangements for meeting claims by or against foster parents in respect of damage, loss or injury or legal defence costs.

Apnoea

Sir Michael McNair-Wilson: To ask the Secretary of State for Health how the condition known as apnoea is categorised.

Mr. Freeman: Apnoea simply means without breath. It can be normal, as with deglutition apnoea which occurs in swallowing, or abnormal, as a result of a number of medical conditions. It may occur on a temporary basis as a consequence of treatment, for example during the administration of an anaesthetic.

Birmingham Family Practitioner Committee

Mr. Terry Davis: To ask the Secretary of State for Health when he received a request from the Birmingham family practitioner committee to approve an out-of-time investigation into allegations involving one or more doctors in Birmingham, following an article in *The Sunday Times* on 22 November 1987; how many doctors are the subject of this request; and what reply has been sent to the Birmingham family practitioner committee.

Mr. Mellor *[holding answer 10 April 1989]:* An application relating to one doctor was received on 3 March 1989. A reply will be issued shortly.

Artificial Limbs and Appliances

Mr. Alfred Morris: To ask the Secretary of State for Health if he has any plans to review the provision to

Parliament of sufficient information to monitor the development of the artificial limb and appliance services, in view of his refusal to provide substantive replies to parliamentary questions relating to services provided by the Disablement Services Authority; and if he will make a statement.

Mr. Mellor *[holding answer 12 April 1989]:* Questions relating to services provided by the Disabled Services Authority (DSA) should be addressed to the Disablement Services Authority. The Secretary of State has referred most parliamentary questions relating to the artificial limb and appliance service accordingly. Hon. and right hon. Members who have been so referred have received full and detailed information of the progress made by the DSA in implementing its statutory functions. The authority also publishes an annual report which is available in the Library of the House. The Secretary of State has no plans for reviewing these arrangements.

Mr. Alfred Morris: To ask the Secretary of State for Health what date he expects to transfer the responsibility for the artificial limb and appliance services from the Disablement Services Authority to health authorities; what wil be his policy on providing information concerning the services in reply to parliamentary questions; and if he will make a statement.

Mr. Mellor *[holding answe 12 April 1989]:* The Disablement Services Authority will transfer responsibility for the artificial limb and appliance service (ALAS) to NHS health authorities on 1 April 1991. Until then, the Secretary of State will continue to refer questions relating to the ALAS to the Disablement Services Authority which he is confident will continue to provide, direct to hon. and right hon. Members, full and detailed information concerning developments in the services it administers.

HOME DEPARTMENT

Free TV Licences

13. **Mr. Vaz:** To ask the Secretary of State for the Home Department if he now has any proposals to introduce free television licences for pensioners; and if he will make a statement.

Mr. Renton: We have no plans to do so.

Plastic Bullets

14. **Mr. Archer:** To ask the Secretary of State for the Home Department if he intends to approve the provision of the new Arwen Ace plastic bullet gun to police forces in England and Wales.

26. **Mr. Flannery:** To ask the Secretary of State for the Home Department if he intends to approve the provision of the new Arwen Ace plastic bullet gun to police forces in England and Wales.

46. **Mrs. Mahon:** To ask the Secretary of State for the Home Department when he intends to announce his decision on the provision of the new Arwen Ace plastic bullet gun to police forces in England and Wales.

59. **Mr. Cousins:** To ask the Secretary of State for the Home Department if he intends to approve the provision of the new Arwen Ace plastic bullet gun to police forces in England and Wales.

Mr. Turner: To ask the Secretary of State for the Home Department if he intends to approve the provision of the new Arwen Ace plastic bullet gun to police forces in England and Wales.

Mr. Douglas Hogg: Equipment for use in situations of serious public disorder is kept under review. No decision has been taken to replace the currently authorised baton round equipment but a number of baton round dischargers, including the Arwen Ace, are being considered as possible replacements.

Drug Traffickers

15. **Mr. Ian Bruce:** To ask the Secretary of State for the Home Department what progress he has made in securing closer international co-operation on confiscation of drug traffickers' assets.

Mr. Hurd: We have signed bilateral agreements with the United States of America, Canada, the Bahamas, Australia and Switzerland, and have completed substantive negotiations with Spain and Sweden. Other bilateral discussions are in progress, and, in the forthcoming meeting of Ministers of the Council of Europe's Pompidou Group, we shall be discussing how to strengthen co-operation in this area.

30. **Mr. Colin Shepherd:** To ask the Secretary of State for the Home Department how many reciprocal agreements he has now secured with other countries with regard to the tracing and seizure of drug traffickers and the freezing or confiscation of their illegally derived assets.

Mr. John Patten: We have signed bilateral agreements with five Governments and completed substantive negotiations with two others. We have played an active part in the adoption of a new United Nations convention against drug trafficking, and in work towards a new Council of European convention on the confiscation of criminal proceeds.

34. **Mr. Dykes:** To ask the Secretary of State for the Home Department if he has any plans to seek to improve the prevailing level of co-operation between European countries, including the United Kingdom, on drug trafficking prevention, detection and the concomitant prosecution of offenders.

Mr. Douglas Hogg: A suitable framework for such co-operation exists in the United Nations convention against illicit traffic in narcotic drugs and psychotropic substances, adopted in December in Vienna. We take every opportunity to encourage our European partners to sign and ratify the convention at the earliest date possible and meanwhile to implement its provisions to the fullest extent permitted by existing legislation. In all our contacts we lay particular stress on the value of international co-operation in tracing, freezing and confiscating drug traffickers' assets.

Police Fingerprint Service

16. **Mr. David Evans:** To ask the Secretary of State for the Home Department what improvements have been achieved in the efficiency of the police fingerprint service since the publication of the Audit Commission report on the subject in October 1988.

38. **Mr. Irvine:** To ask the Secretary of State for the Home Department what steps he is taking to improve the efficiency of the police fingerprinting service.

Mr. Douglas Hogg: In February 1988, the Home Office and the Association of Chief Police Officers set up a group of police officers, forensic scientists and fingerprint experts to undertake a general review of the work of the scientific support services in police forces, including fingerprint services.

The group has made a number of recommendations on the reorganisation of fingerprint departments and improved training for fingerprint experts. These recommendations, which take into account the findings of the Audit Commission, are currently being considered by the Association of Chief Police Officers.

Remand Centres

17. **Mr. Pike:** To ask the Secretary of State for the Home Department whether he proposes to meet the union representatives from remand centres to discuss his proposals for the future of remand centres.

Mr. Douglas Hogg: Neither my right hon. Friend nor I have immediate plans for such a meeting, but prison service management meets trade union representatives regularly to discuss developments in the service. Changes affecting individual establishments are also the subject of local consultation.

25. **Mr. Steinberg:** To ask the Secretary of State for the Home Department if his Department will provide the training for staff employed in private remand centres.

Mr. Douglas Hogg: It remains to be decided how the training of staff for any private remand centres would be provided, but whatever the arrangements, we would have to be satisfied that adequate training was given.

Right to Silence

18. **Mr. Riddick:** To ask the Secretary of State for the Home Department what representations he has received requesting the abolition of a suspect's right to silence; and if he will make a statement.

Mr. John Patten: We have received a number of suggestions that the right to silence should be modified. My right hon. Friend set up last year a working group to consider what changes in the law were necessary. We are now awaiting its report.

Neighbourhood Watch

19. **Mr. Cohen:** To ask the Secretary of State for the Home Department how many neighbourhood watch schemes previously established in London are now defunct or disbanded.

Mr. John Patten: The figures collected by the Metropolitan police do not distinguish between those schemes which have failed and those which have temporarily disbanded. Between January 1987 and the end of December 1988 487 schemes are recorded as having failed. During the same period some 2,400 new schemes were set up.

AIDS

20. **Mr. Nicholas Winterton:** To ask the Secretary of State for the Home Department what measures he is taking to help counter the spread of AIDS in prisons.

Mr. Douglas Hogg: High priority is given to measures to prevent the transmission of HIV infection in prison. The main plank of the prevention strategy is education. Our latest initiative is a new package of education materials, including a video film, entitled "AIDS Inside and Out." Other measures include medical inquiry and examination at the reception stage, counselling of individual prisoners, and limited regime restrictions for prisoners identified as HIV antibody positive.

Robbery

21. **Dr. Twinn:** To ask the Secretary of State for the Home Department if he will list the latest figures for robbery in England and Wales; and if he will make a statement.

Mr. John Patten: The provisional figure for the number of robberies recorded by the police in England and Wales in 1988 is 31,437, a decrease of 3·7 per cent. on the figure for 1987. The clear-up rate increased from 21 per cent. to 23 per cent. over the same period.

33. **Mr. Janman:** To ask the Secretary of State for the Home Department what are the latest national figures available for robbery; and if he will make a statement.

Mr. John Patten: The information requested is published in table 1 of Home Office statistical bulletin 7/89, a copy of which is in the Library.

Junior Crime Prevention Panels

22. **Mr. David Davis:** To ask the Secretary of State for the Home Department how many junior crime prevention panels have now been established in England and Wales.

77. **Mr. David Nicholson:** To ask the Secretary of State for the Home Department what is the number of junior crime prevention panels in operation.

79. **Dr. Goodson-Wickes:** To ask the Secretary of State for the Home Department what is the number of junior crime prevention panels in operation.

Mr. John Patten: At the end of March 1989 there were 165 junior crime prevention panels in England and Wales and others are being set up.

Safer Cities Programme

23. **Mr. Patrick Thompson:** To ask the Secretary of State for the Home Department what progress has been made in the safer cities programme.

Mr. John Patten: Good progress has been made in establishing the first nine of the 20 crime prevention projects which will comprise the safer cities programme. Bradford and Wolverhampton projects are already fully operational and Nottingham staff will be taking up post this month. Grant application in support of local schemes have been received and approved for Bradford and Nottingham projects. Five additional areas have recently been invited to join in the programme (Bristol, Hull, Salford, Sunderland and Wirral) of which four have already agreed to participate.

42. **Mr. Lewis:** To ask the Secretary of State for the Home Department what plans he has to increase funding available for the safe city programme.

Mr. John Patten: Financial planning for the safer cities initiative already takes account of the scheduled growth of the programme. Nine projects were set up in 1988-89, a further seven will be established in 1989-90 and four more in 1990-91. A sum of £4·2 million is available for the current financial year. A decision as to whether further expenditure on the programe is called for will be taken in the light of the success of projects now under way.

DNA Testing

24. **Mr. Illsley:** To ask the Secretary of State for the Home Department what representations he has received about the introduction of DNA testing for the purposes of the immigration rules; and if he will make a statement.

32. **Mr. Martlew:** To ask the Secretary of State for the Home Department what representations he has received about the introduction of DNA testing for the purposes of the immigration rules; and if he will make a statement.

Mr. Renton: I refer the hon. Members to the answer that I gave earlier today to a similar question from the hon. Member for Bradford, West (Mr. Madden).

Mr. Faulds: To ask the Secretary of State for the Home Department whether he will now consider, following the advice tendered by the United Kingdom immigrants advisory service, that those applicants who pass DNA tests should be allowed entry into Britain on the grounds that, although now over the age of 18 years, their original applications were made, and refused, when they were under age.

Mr. Renton: A person who makes a fresh application for entry clearance when he is 18 years of age or older is normally expected to meet the requirements set out at paragraphs 51 and 52 of the immigration rules. However, my right hon. Friend is considering whether, and in what circumstances, it might be appropriate to exercise discretion in favour of over-age reapplicants who do not qualify for admission under the rules. We hope to be in a position to announce our conclusions before long.

Violent Crime

27. **Dr. Kim Howells:** To ask the Secretary of State for the Home Department what action he proposes to take to tackle the current levels of violent crime.

73. **Mr. Sheerman:** To ask the Secretary of State for the Home Department what steps he is taking to reduce the levels of violent crime in the inner-city areas.

76. **Ms. Quin:** To ask the Secretary of State for the Home Department what action he intends to take to ensure greater safety of women from violent crime.

Mr. John Patten: By strengthening the police, and by fostering the safer cities programme in some urban high crime areas, we hope to increase the safety of all citizens. Simple precautions that members of the public can take to reduce the risk of attack are given in the Home Office crime prevention handbook "Practical Ways to Crack Crime."

39. **Mr. Hardy:** To ask the Secretary of State for the Home Department how many crimes of violence were recorded in *(a)* 1979 and *(b)* 1988.

Mr. John Patten: The information requested for 1979-87 is published in Table 2.1 of "Criminal statistics, England and Wales, 1987", Cm. 498; and for 1988 in table 1 of the Home Office statistical bulletin 7/89. Copies of these publications are in the Library.

Latchmere House (Detainees)

28. **Mr. Allen McKay:** To ask the Secretary of State for the Home Department what proposals he has to transfer detainees from Latchmere house to Haslar in Gosport; and if he will make a statement.

Mr. Douglas Hogg: I refer the hon. Member to the replies given to questions from the hon. Member for Bradford, West (Mr. Madden) on 13 March at col. 9 and the hon. Member for Edinburgh, Central (Mr. Darling) on 5 April at col. *220*.

Broadcasting Transmission Systems

29. **Mr. Worthington:** To ask the Secretary of State for the Home Department whether he will publish in full the consultants' report on broadcasting transmission systems.

Mr. Renton: We have yet to decide how the results of the study should be made public. Parts of it will be commercially confidential.

Magistrates Clerks

31. **Mr. Lofthouse:** To ask the Secretary of State for the Home Department what plans he has to improve the recruitment of magistrates clerks.

Mr. John Patten: We shall shortly be discussing with representatives of magistrates courts committees what steps relating to pay and other matters they can take as employers of courts staff to improve the present shortage of court clerks. We have already approved the establishment of 25 additional trainee posts this year. We plan to authorise more, and to make provision for training accordingly. We also plan to issue by the summer new recruitment publicity material for the magistrates courts service.

Community Volunteers

35. **Mr. Jim Marshall:** To ask the Secretary of State for the Home Department in which areas he proposes to run private schemes for community volunteers; and over what period.

72. **Mr. Eastham:** To ask the Secretary of State for the Home Department what funding for the proposed community volunteer schemes will come from existing police authority budgets; and what additional funds will be made specifically available.

53. **Mr. Sean Hughes:** To ask the Secretary of State for the Home Department what proposals he has received for the creation of community volunteers.

Mr. John Patten: I refer the hon. Members to the reply that I gave to the hon. Member for Cardiff, West (Mr. Morgan) earlier today.

Miscarriages of Justice

36. Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department if he will review procedures for re-referral of possible miscarriages of justice to the Court of Appeal.

Mr. John Patten: We see no present need to review the procedure.

Crime Statistics

37. **Mr. John Greenway:** To ask the Secretary of State for the Home Department if he will make a statement on the figures for reported crime in North Yorkshire for 1988.

47. **Mr. Bevan:** To ask the Secretary of State for the Home Department what are the latest crime figures for the West Midlands.

49. **Mr. Ashby:** To ask the Secretary of State for the Home Department what are the latest crime figures for Leicestershire.

51. **Mr. Leigh:** To ask the Secretary of State for the Home Department what are the latest crime figures for Lincolnshire.

82. **Mr. Paice:** To ask the Secretary of State for the Home Department if he will make a statement on the figures for reported crime in Cambridgeshire for 1988.

68. **Mr. Andrew Mitchell:** To ask the Secretary of State for the Home Department what are the latest crime figures for Nottinghamshire.

67. **Mr. Sumberg:** To ask the Secretary of State for the Home Department what are the latest crime figures for Greater Manchester.

60. **Mr. Ian Taylor:** To ask the Secretary of State for the Home Department if he will make a statement on the figures for reported crime in Surrey for 1988.

Mr. John Patten: Information is published in table 7 of Home Office statistical bulletin 7/89, a copy of which is in the Library. My right hon. Friend has also sent some further details of the figures for their local police force area to all right hon. and hon. Members for constituencies in England and Wales and placed copies of those further details in the Library.

Commissioner of Police of the Metropolis

40. **Mr. Adley:** To ask the Secretary of State for the Home Department if he will arrange to meet the Commissioner of Police of the Metropolis to discuss the problems caused to his force by working in London; and if he will make a statement.

Mr. Douglas Hogg: The Commissioner and my right hon. Friend meet regularly to discuss policing issues including the particular problems caused by working in London, especially the recruitment and retention of officers and civil staff. My right hon. Friend supports the commissioner's efforts to overcome them.

Broadcasting White Paper

41. **Mr. Grocott:** To ask the Secretary of State for the Home Department whether he has any plans to meet the general advisory committee of the Independent Broadcasting Authority to discuss the White Paper on Broadcasting.

Mr. Renton: Neither my right hon. Friend nor I have immediate plans to do so, but we have had several meetings with the IBA and have now received the IBA's response to the White Paper.

Private Security Industry

43. **Mr. McKelvey:** To ask the Secretary of State for the Home Department what steps he is taking to impose controls on the private security industry.

Mr. John Patten: I refer the hon. Member to the reply that I gave to questions from the hon. Members for Clwyd, South-West (Mr. Jones) and for Walsall, South (Mr. George) on 15 December 1988 at column *716*.

Caldy Island, Pembrokeshire

44. **Mr. Nicholas Bennett:** To ask the Secretary of State for the Home Department if he will make a statement on the progress being made to restore the franchise in respect of European and parliamentary elections to the residents of Caldy Island, Pembrokeshire.

Mr. Douglas Hogg: I understand that residents of Caldey Island are included in the register of electors for south Pembrokeshire published and effective from 16 February 1989. Ballot papers should, therefore, be available to the residents for all elections held this year, as in previous years. Nevertheless, I recognise that legislative action needs to be taken to regularise the position of Caldey Island. My right hon. Friend the Secretary of State for Wales is considering the available options as a matter of urgency.

Prison Suicides

45. **Mr. Hinchliffe:** To ask the Secretary of State for the Home Department what steps he is taking to reduce the number of suicides in Her Majesty's prisons.

65. **Mr. Maclennan:** To ask the Secretary of State for the Home Department if he will make a statement on the adequacy of the prison service suicide prevention procedures.

Mr. Douglas Hogg: The prison service's strategy for the prevention of inmate suicides has two main elements: to identify inmates who may be at risk of suicide, by means of constant staff vigilance, particularly when the inmate is first received into custody; and to prevent such inmates from actually killing themselves, both by reducing the physical opportunities for suicide in prison and by offering medical and social support to the suicidal inmate. Initiatives such as enhanced staff training in suicide prevention awareness, better cell design, and work on the development of CCTV for the monitoring of suicidal inmates, all contribute to this strategy. While we do not expect to alter the main thrust of our strategy, we are considering in the light of recent experience whether any modifications to our procedures may be helpful.

Police Cars (High-speed Chases)

48. **Sir Michael McNair-Wilson:** To ask the Secretary of State for the Home Department what discussions he has had with chief constables about the use of police cars in high-speed chases of those believed to have committed criminal offences.

Mr. Douglas Hogg: My right hon. Friend met the Commissioner of Police of the Metropolis on 20 March to discuss a range of London policing matters, including police car chases.

Fear of Crime

50. **Mr. James Lamond:** To ask the Secretary of State for the Home Department when he expects to receive the report of the working party on the fear of crime chaired by Mr. Michael Grade.

Mr. John Patten: I hope that the working group will present its report to the Home Office standing conference on crime prevention on 11 December.

52. **Mr. David Young:** To ask the Secretary of State for the Home Department whether he will list the members of his working party on crime chaired by Mr. Michael Grade.

Mr. John Patten: The appointment of members to the independent working group on the fear of crime is a matter for Mr. Grade, and has yet to be completed.

54. **Ms. Primarolo:** To ask the Secretary of State for the Home Department what budget has been allocated to the working party on the fear of crime chaired by Mr. Michael Grade.

Mr. John Patten: The sum of £3,000 has been allocated in this financial year to support crime prevention working groups, including that chaired by Mr. Grade. The Home Office will also provide administrative and secretarial support for Mr. Grade's working group and will meet the cost of publishing the working group's report.

62. **Ms. Abbott:** To ask the Secretary of State for the Home Department what recent surveys he has made of fear of crime among women.

Mr. John Patten: Questions about fear of crime were included in the British crime survey, in a recent international survey conducted by telephone, and in local surveys on housing estates. In each survey care was taken to provide a representative sample of both men and women.

Public Interest Defence

Mr. Dalyell: To ask the Secretary of State for the Home Department how many representations he has received on the need for a public interest defence to be incorporated in Official Secrets legislation.

Mr. Hurd: From the publication of our White Paper on the reform of secion 2 of the Official Secrets Act 1911 on 29 June 1988 up to 4 April 1989 I have received representations in support of a public interest defence from 30 organisations, including 11 from the branches of two national organisations, and from 113 individuals.

Women Prisoners

Mr. Corbyn: To ask the Secretary of State for the Home Department what steps his Department is taking to reduce the numbers of women with infants imprisoned for non-violent offences.

Mr. John Patten: The Court of Appeal has made it clear that custody should be used only when a court considers it absolutely necessary. Last July, the Government published proposals for punishing in the community more offenders convicted of less serious and non-violent offences; we are considering how to take matters forward in the light of the responses to those proposals. Meanwhile, the national standards for community service orders, which came into effect on 1 April, asked probation areas to ensure that community service placements are available for women offenders, including those who are pregnant, and offenders with young children. We are also revising the handbook "The Sentence of the Court" which reflects the Court of Appeal's guidance on the use of custody, and the new edition will refer specifically to women offenders with family responsibilities.

Mrs. Mahon: To ask the Secretary of State for the Home Department which prisons allow women prisoners the right to seek pregnancy advice and counselling independent of the prison.

Mr. Douglas Hogg: Prison medical officers have statutory responsibility for all aspects of the health care of prisoners. In the exercise of that responsibility they make extensive use of the specialist consultancy, treatment and counselling services of the National Health Service and other outside agencies. Whether such help is called upon in a particular case is a matter for the clinical judgment of the medical officer concerned.

Mrs. Mahon: To ask the Secretary of State for the Home Department how many pregnant women were released from prison before their confinement in each year from 1979 to 1988.

Mr. Douglas Hogg: The number of pregnant women released by the exercise of the royal prerogative, between 1979 and 1988 is provided in the table. Information on pregnant women released on completion of their sentences is not available and could be obtained only at disproportionate cost.

Pregnant inmates released by royal prerogative

	Number
1979	3
1980	5
1981	3
1982	1
1983	6
1984	8
1985	8
1986	6
1987	15
1988	9

Mrs. Mahon: To ask the Secretary of State for the Home Department what is his policy on the carrying out of a full social inquiry report on pregnant women and mothers of dependent children before sentencing.

Mr. John Patten: Home Office policy on social inquiry reports is set out in Home Office circular 92/1986. This states that a social inquiry report should inter alia contain information about the defendant's personality and character including the family situation. I would expect social inquiry reports written on pregnant women and mothers of dependent children to draw attention to those facts without fail and to make recommendations that take account of them in order to help the courts decide on a suitable disposal.

Drink-Related Crime

57. **Mr. Atkinson:** To ask the Secretary of State for the Home Department what his estimate is of the percentage of crimes by under-21-year-olds which are drink-related.

Mr. John Patten: Of the people under 21 convicted in 1987, the latest year for which full figures are available, 8 per cent. were convicted of drunkenness or drink-driving offences. No reliable estimate can be made of the extent to which the offences of which the remaining 92 per cent. convicted were alcohol related.

Special Constables (Metropolitan Area)

58. **Mr. Tony Banks:** To ask the Secretary of State for the Home Department what percentage of special constables in the Metropolitan police are *(a)* from ethnic minorities, and *(b)* women.

Mr. Douglas Hogg: I understand from the commissioner that, of the 1,419 members of the Metropolitan special constabulary of 14 March 1989, 9 per cent. (134) were from ethnic minorities and 32 per cent. (460) were women.

Transfrontier Broadcasting

61. **Mr. Burt:** To ask the Secretary of State for the Home Department what progress he is making in negotiations to establish a new European convention on standards of taste and decency in transfrontier broadcasting.

Mr. Renton: Agreement on the final text of the Council of Europe convention on transfrontier television was reached on 15 March. We hope that a decision to open the convention for signature will be taken shortly.

Co-operation Against Crime

63. **Mr. Batiste:** To ask the Secretary of State for the Home Department what his Department is doing to promote greater European co-operation against crime.

Mr. John Patten: I refer the hon. Member to the reply I gave to questions from my hon. Friends the Members for Dover (Mr. Shaw) and for Ludlow (Mr. Gill) on 2 February, column *384*.

Passports

64. **Mr. Butterfill:** To ask the Secretary of State for the Home Department what are the average times taken to process non-urgent passport applications at major passport offices; and what were the comparable times one year ago.

Mr. Renton: The current processing times for straightforward non-urgent postal applications at the six United Kingdom passport offices are shown in the table below, together with those of a year ago. Urgent applications are given priority, and are not normally subject to delay.

Average time between receipt of application and issue of passport (working days)

Passport office	*9 April 1989*	*10 April 1988*
London	21	55
Glasgow	33	28
Peterborough	26	27
Newport	33	17
Liverpool	42	13
Belfast	4	3

Metropolitan Police (Efficiency)

66. **Mr. Gerald Bowden:** To ask the Secretary of State for the Home Department what steps is he taking to promote greater efficiency in the Metropolitan police.

Mr. Douglas Hogg: I refer my hon. Friend to the reply I gave him on 2 February at column *386*.

Burglary

69. **Mr. Mans:** To ask the Secretary of State for the Home Department what are the latest national figures for burglary; and if he will make a statement.

Mr. John Patten: The information requested is published in table 1 of Home Office statistical bulletin 7/89, a copy of which is in the Library.

Association of Chief Police Officers

70. **Dr. Michael Clark:** To ask the Secretary of State for the Home Department when he last met the Association of Chief Police Officers; and what matters were discussed.

Mr. Douglas Hogg: My right hon. Friend has regular discussions with chief officers of police in the course of meetings, visits and conferences. He has not had any recent formal meetings with representatives of the Association of Chief Police Officers, but will be attending the ACOP drugs conference on 20 and 21 April.

Firearms Consultative Committee

71. **Mr. Colvin:** To ask the Secretary of State for the Home Department when he will publish the names of the chairman and members of the firearms consultative committee.

Mr. Douglas Hogg: We are not yet able to announce appointments but we regard it as important to have the committee in place as soon as possible.

Local Authorities (Crime Prevention)

74. **Mr. Flynn:** To ask the Secretary of State for the Home Department what steps he is taking more fully to involve elected local authorities in creating safer environments for their citizens.

Mr. John Patten: We have welcomed the support local authorities have given the safer cities programme and encouraged their direct involvement in those areas where projects have already been established. We shall continue to seek local authority involvement in the programme as further projects are set up. We have also involved seven local authorities in the two year experiment to test byelaws which prohibit alcohol consumption in particular public places.

78. **Mr. Buckley:** To ask the Secretary of State for the Home Department what representations he has received concerning the imposition of a duty on all local authorities to undertake crime prevention work.

Mr. John Patten: We have no plans to impose a duty on local authorities to undertake crime prevention work and we have received no representations on this matter.

Charities

75. **Mr. Boswell:** To ask the Secretary of State for the Home Department when he hopes to complete his review of the law on charities.

Mr. John Patten: We hope shortly to publish a White Paper setting out our proposals for legislation in the light of Sir Philip Woodfield's efficiency scrutiny of the supervision of charities.

Police Establishments (Civilians)

80. **Mr. Favell:** To ask the Secretary of State for the Home Department what are the numbers of civilians currently employed in police establishments.

Mr. Douglas Hogg: On 31 December 1988 there were 39,201 full-time and 6,297 part-time civilian staff employed by the police service in England and Wales.

Armley Prison (Leeds)

81. **Mr. Bradley:** To ask the Secretary of State for the Home Department on what date he expects the publication of the full report by the deputy director general of prisons on Armley prison, Leeds.

Mr. Douglas Hogg: I refer the hon. Member to the reply I gave to a question from the hon. Member for Caithness and Sutherland (Mr. Maclennan) on 10 April at column *325*.

Dog Registration Scheme

Dame Peggy Fenner: To ask the Secretary of State for the Home Department whether he has received the Royal Society of Prevention of Cruelty to Animal's proposals for a dog registration scheme; and if he will make a statement.

Mrs. Virginia Bottomley: I have been asked to reply. The RSPCA sent to the Department its proposals for a dog registration scheme on 3 December 1987. We have no plans to introduce such a scheme.

Sapphire Investigations Bureau

Mr. Cohen: To ask the Secretary of State for the Home Department what contracts his Department has placed over the past 10 years with the Sapphire Investigations Bureau.

Mr. Hurd: Records are readily available only from April 1984. They include no contracts placed with, nor payments made to Sapphire Investigations Bureau by or on behalf of my Department during that period.

Horse Racing

Mr. Tim Smith: To ask the Secretary of State for the Home Department if he has received the feasibility study into the privatisation of the Horserace Totalisator Board; and when he intends to make a statement on the inquiry into the long-term funding of British racing.

Mr. John Patten: I understand that Lloyds merchant bank has completed its work on the feasibility study on the privatisation, and my right hon. Friend expects to receive it soon. As my right hon. Friend explained in reply on 22 March to a question from my hon. Friend the Member for Langbaurgh (Mr. Holt) at columns *600-1* he will announce his conclusion on the possibility of an inquiry into the long-term funding of racing when he has considered that advice.

Pompidou Group

Mr. Rathbone: To ask the Secretary of State for the Home Department when next the Pompidou Group of Ministers is planning to meet; and what he will be discussing with them.

Mr. Hurd: The next ministerial meeting will take place in London on 18 and 19 May. I hope it will give a powerful encouragement to efforts throughout Europe to pass legislation on the confiscation of drugs traffickers' assets and to establish a network of reciprocal agreements. We shall also be discussing AIDS and drug misuse, which is a major problem in a number of European countries, and the growing threat to Europe posed by cocaine.

Wapping Dispute

Mr. Tony Banks: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to the number of police officers deployed on public order duties outside the News International plant at Wapping on 24 January 1987; and what were the ranks from commander downwards of those employed, the length of the tours of duty of police officers on that date, and the number of divisions within the Metropolitan district from which officers were drawn.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that 1,018 officers were deployed. Their ranks were as follows:

	Number
Superintendent	1
Chief Inspector	2
Inspector	42
Sergeant	102
Constable	871

A commander and a chief superintendent were initially in charge of police operations; a deputy assistant commissioner subsequently took charge. The average tour of duty was 8·8 hours. No central record was kept of the number of divisions from which officers were drawn.

Prisons (Child Care)

Mrs. Mahon: To ask the Secretary of State for the Home Department what agencies are allowed to enter prisons to inspect and monitor the arrangements for child care provision.

Mr. Douglas Hogg: Health visitors from the local area health authority regularly visit the three mother and baby units and provide child care advice to inmate mothers. Arrangements for a Department of Health team to inspect the units and report periodically on matters such as child care practice are being considered.

Imprisonment (Dependent Children)

Mrs. Mahon: To ask the Secretary of State for the Home Department what research is currently being carried

out into the effects of the imprisonment of a parent who has care of a child on the long-term development of the child.

Mr. Douglas Hogg: None. Research commissioned by the Home Office into the physical and psychological development of babies in prison, compared with those not subjected to this experience, has recently been published by the university of Sussex. We are not aware of any current research into the long-term effects of imprisonment on prisoners' families.

War Crimes Inquiry

Mr. Alex Carlile: To ask the Secretary of State for the Home Department when he expects the war crimes inquiry to submit its report to him on the presence of alleged Nazi war criminals in the United Kingdom

Mr. John Patten: I understand that the inquiry hopes to submit its report to my right hon. Friend in May.

Crimes Against the Person

Mr. David Shaw: To ask the Secretary of State for the Home Department what are the latest figures for the clearing-up of serious crimes against the person; and if he will make a statement.

Mr. Hurd: The provisional clear-up rate for offences of violence against the person and sexual offences recorded by the police in England and Wales in 1988 was 75 per cent. This is the same figure as that for 1987. The police rightly give high priority to detecting these types of crime.

"Broadcasting in the '90s"

Mr. Dunnachie: To ask the Secretary of State for the Home Department, in view of the White Paper, "Broadcasting in the '90s," whether he will take steps to protect the rights of charities to continue to have air time allocated for the purpose of making appeals.

Mr. Renton: There is at present no requirement on the broadcasters to allocate air time to charities for the purpose of making appeals. We shall be considering the general question of positive programme requirements in the light of the responses to the White Paper.

Pub Bombings (Demonstration)

Mr. Mullin: To ask the Secretary of State for the Home Department (1) why relatives of the six persons convicted of the Birmingham pub bombings were not permitted to display a banner saying, in English and Russian, "Justice for the Birmingham Six," near the Guildhall during the visit of President Gorbachev;

(2) if he will call for a report from the Commissioner of the City of London police as to the basis on which a demonstration by relatives and friends of the persons convicted of the Guildford and Woolwich bombings near the Guildhall during the visit by President Gorbachev was broken up;

(3) if he will call for a report from the commissioner of the City of London police as to how many persons were arrested or detained during a demonstration by relatives and friends of the persons convicted of the Guildford and Woolwich pub bombings near the Guildhall, during the visit of President Gorbachev; and why.

Mr. Douglas Hogg: I understand from the Commissioner of Police for the City of London that a crowd of several hundred were present to see the arrival of President Gorbachev at the Guildhall. A group was chanting and produced a number of banners which obstructed the view of others. The reaction of the rest of the crowd, and the ensuing arguments and jostling, led the police to direct the demonstrators to move on. They did so but resumed their disruptive behaviour nearby. Further police requests to desist were met with abuse and nine arrests were made in order to prevent a breach of the peace. Those concerned were subsequently released without charge.

Mr. Mullin: To ask the Secretary of State for the Home Department why relatives of the six persons convicted of the Birmingham pub bombings were not permitted to display in Whitehall a banner saying, in English and Russian, "Justice for the Birmingham Six," during the visit of President Gorbachev to Downing Street.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that to prevent the occasion of the visit turning into a demonstration, which might infringe sessional orders or lead to a breach of the peace, the police did not allow the display of any banners which required two or more people to hold them aloft.

"Women, Children and Custody"

Mr. Vaz: To ask the Secretary of State for the Home Department whether he has received the National Association of Probation Officers' report entitled "Women, Children and Custody", dated March 1989; and if he will make a statement.

Mr. John Patten: We have received the report. Policies on the treatment of offenders are kept under review.

Mrs. Riffat Iqbal

Mr. Madden: To ask the Secretary of State for the Home Department when Mrs. Riffat Iqbal, ref: IMP A421556 and KA55157, applied to the post in Karachi to enter the United Kingdom; when the application was referred to him; and when he expects a decision will be taken on this application.

Mr. Renton: Riffat Iqbal applied for entry clearance as a fiancee at the British Consulate-General, Karachi on 10 December 1987. The entry clearance officer was informed on 2 February 1988 that she had married the sponsor on 10 January 1988 in Pakistan. Mrs. Iqbal was interviewed by the entry clearance officer on 3 July 1988; following further inquiries, the application was referred to the Home Office for a decision on 8 March 1989. The decision to refuse Mrs. Iqbal's application is to be sent to the entry clearance officer in Karachi today; Mrs. Iqbal will be informed of this decision and of her right of appeal to the independent appellate authorities once the papers are received there.

Pet Animals (Protection)

Mr. Ron Davies: To ask the Secretary of State for the Home Department if the Government will now sign the European convention for the protection of pet animals; and if he will make a statement.

Mr. Douglas Hogg: I refer the hon. Member to the reply I gave to questions from the hon. Member for Liverpool, Mossley Hill (Mr. Alton) on 1 December at column *1*.

Naturalisation

Mr. Teddy Taylor: To ask the Secretary of State for the Home Department what are the procedures for the revocation of the granting of naturalisation if evidence becomes available that recommendations given in support of the application are unfounded.

Mr. Renton: In circumstances prescribed in section 40 of the British Nationality Act 1981, the Home Secretary may deprive a person of British citizenship obtained by naturalisation or registration if citizenship was obtained by fraud, false representations or the concealment of material fact, provided he is satisfied that it is not conducive to the public good that that person should continue to be a British citizen.

Hosni E Farhat

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department what consideration was given to the case of Hosni E. Farhat in reaching the decision to ban the operations of Libyan Arab Airlines from the United Kingdom in October 1986.

Mr. Hurd: None. The case of Farhat, who was sentenced in 1981, was not relevant to the decision, taken in 1986, to terminate flights to the United Kingdom by Libyan Arab Airlines.

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department (1) if he will make a statement regarding the recommended minimum length of sentence to be served in the case of Hosni E. Farhat;

(2) whether the decision regarding the recommended minimum length of sentence to be served, in the case of Hosni E. Farhat, was made by the Home Secretary.

Mr. Douglas Hogg: The date of the first formal review by the local review committee of a life sentence prisoner's case is determined by the Secretary of State in the light of advice by the trial judge and the Lord Chief Justice on the period of detention necessary to satisfy the requirements of retribution and deterrence in his case, and is normally set three years before the expiry date of that period. Following the judgment of the Divisional Court on 2 March 1987 in R. *v.* Secretary of State for the Home Department ex parte Handscomb and others, the date of the first review in cases where a life sentence is imposed at the discretion of the court rather than as the mandatory penalty for murder is fixed strictly in accordance with the judiciary's advice. The date of the first review in Mr. Farhat's case, which had then already been set, was reviewed following the judgment but there was no reason to change it. His case is due to be reviewed in accordance with these arrangements in 1998, when he will have been detained for 17 years.

HOUSE OF COMMONS

Members' Letter Board

Mr. Allen: To ask the Lord President of the Council on whose authority the limit of six letters allowed to be placed by any hon. Member on the Members' letter board at any one time was established; what are the reasons behind this limitation; and if he will review this limitation with a view to its abolition.

Mr. Wakeham: The limit of six letters which right hon. and hon. Members may place on the letter board each day is approved by the Services Committee. Should any greater number be permitted, the handling of urgent mail would be significantly delayed.

Mr. Allen: To ask the Lord President of the Council, if he will estimate the cost incurred by the House of hon. Members having to use franked envelopes to communicate with colleagues where they have reached their limit of six unfranked letters on the Members' letter board; and if he will make a statement.

Mr. Wakeham: It is not possible to estimate this cost.

Members' Secretaries

Mr. Shersby: To ask the Lord President of the Council what is the procedure for hon. Members' private secretaries to claim redundancy payments in the event of the death of the hon. Member by whom they are employed; if he has any plans to change the present arrangements; and if he will make a statement.

Mr. Wakeham: On learning of the death of a Member, the Fees Office, having first established that an employee of a late Member is entitled to a statutory redundancy payment under the Employment Protection Consolidation Act 1978, prepare the appropriate documentation in draft which is then forwarded to the peronal representative of the deceased Member (who is legally liable for any redundancy payments due) for factual certification and signature. On receipt of the completed certificates, payment is made by the Fees Office to the employees direct.

I am not aware of any unnecessary administrative delay in settling outstanding redundancy payment claims, or of an alternative method whereby payments might be expedited.

Mr. Shersby: To ask the Lord President of the Council if he will arrange for the terms and conditions of employment of hon. Members' private secretaries to be reviewed by the Top Salaries Review Body with a view to them being employed by the House and paid a salary specified by the hon. Member for whom they work.

Mr. Wakeham: No. The Top Salaries Review Board last reviewed the office costs allowance, which is payable to Members in respect of certain expenses incurred in carrying out their parliamentary duties including secretarial assistance, in 1987. I see no need for a further review at this stage.

Written Answers to Questions

Friday 14 April 1989

OVERSEAS DEVELOPMENT

Tanzania

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with other aid Ministers to seek to reschedule overseas debts in Tanzania.

Mr. Chris Patten: In 1979 Britain wrote off all aid debts owed by Tanzania, amounting to some £3·4 million. We have continued to urge others to follow this example for Tanzania and other low-income African countries undertaking programmes of structural adjustment. Tanzania has also benefited from concessional rescheduling of its official debt in the Paris Club, following the agreement reached last summer at the Toronto summit on the basis of the initiative launched by my right hon. Friend the Chancellor of the Exchequer.

Sri Lanka

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what are the present aid projects funded by his Department in Sri Lanka.

Mr. Chris Patten: Our grant aid is largely concentrated on transport, power, natural resources and education. In Colombo we are funding two major projects, to rebuild two main roads and to improve the power distribution network. We are preparing a forestry project. Under our training programme more than 200 Sri Lankans were in Britain last year. From our £20 million relief and reconstruction grant, which is mainly for the north and east, we are providing railway track, double-decker buses, lorries and trucks and finance for the rehabilitation programmes of the Save the Children Fund and Oxfam. Under the aid and trade provision, we are helping to finance the Samanalawewa hydro-electric project, the supply of potable water to three districts and the provision of 600 bus bodies.

Privatisation

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) which officials of the Overseas Development Administration have met during the course of 1988 with researchers at the Adam Smith institute, to discuss the possibility of Britain supplying aid and assistance for the privatisation of industries in the developing world; and if he will make a statement;

(2) from whom he has sought advice on matters relating to the possibility of offering British privatisation expertise to Third world nations.

Mr. Chris Patten: There was a range of contacts between officials and outside bodies, including the Adam Smith Institute, concerned with the development of the private sector overseas, including privatisation.

WALES

M4

Mr. John Morris: To ask the Secretary of State for Wales when work was last commenced on a new section of the M4 motorway; what has been the increase in traffic on the Baglan-Lonlas area since that time; and if he will reconsider his start dates for this new section of the M4, in particular the new bridge and the connecting road to Baglan.

Mr. Wyn Roberts: Work on the most recent section of the M4, the Bridgend northern bypass, started in 1978 and was completed in 1981. Traffic volumes on the A48 between Baglan and Lonlas have increased by some 50 per cent. since 1978 but are still within the design capacity of the road.

The programme set out in "Roads in Wales 1989" for completing the Baglan-Lonlas section by mid 1994 is the most practical one. The Earlswood to Lonlas scheme is planned to start in the current financial year.

Capital Expenditure

Mr. Rogers: To ask the Secretary of State for Wales what was the total *(a)* central Government and *(b)* local government capital expenditures in each year from 1979-80 to 1987-88, expressed in cash and in real terms, taking 1979-80 as 100.

Mr. Grist: Gross central Government and local authority capital expenditure within my responsibility for the years 1979-80 to 1987-88, taking 1979-80 as 100, is estimated to have been as follows:

	1979-80 £ million	*1980-81* £ million	*1981-82* £ million	*1982-83* £ million	*1983-84* £ million	*1984-85* £ million	*1985-86* £ million	*1986-87* £ million	*1987-88* £ million
(a) Central Government									
(i) Cash terms	100	150	170	187	181	161	173	177	166
(ii) Real terms	100	127	131	134	124	105	107	106	95
(b) Local Government									
(i) Cash terms	*100*	*107*	*107*	*132*	*161*	*145*	*138*	*173*	*195*
(ii) Real terms	*100*	*90*	*82*	*95*	*110*	*95*	*85*	*104*	*111*

The real terms figures have been derived by excluding the effect of general inflation as measured by the gross domestic product deflators at market prices.

For consistency with later years, the figures for central Government expenditure up to 1984-85 have been adjusted to include regional development grant expenditure in Wales. Prior to November 1984, this expenditure was the responsibility of the Department of Trade and Industry.

Council House Sales

Mr. Ron Davies: To ask the Secretary of State for Wales if he will publish a table showing the average cost of council houses sold in Wales regardless of discount, for each year since 1979 to date, and the average monthly cost over each year of the same period of repayment per £1,000 borrowed of mortgages provided by local authorities.

Mr. Grist: The average market price of local authority dwellings sold is given in the following table:

	£
[1]1980	11,012
1981	13,868
1982	13,521
1983	14,562
1984	15,272
1985	16,348
1986	17,448
1987	18,746
1988	20,115

[1] Based on sales from April to December 1980.

The average monthly cost of repayment per £1,000 borrowed of mortgages provided by local authorities is not centrally available.

"Roads in Wales 1989"

Mr. Gareth Wardell: To ask the Secretary of State for Wales if he will make it his policy to publish, "Roads in Wales 1989", by the end of April.

Mr. Wyn Roberts: "Roads in Wales 1989" was published on 10 April. Copies have been placed in the Library of the House.

River Dee Crossing

Mr. Barry Jones: To ask the Secretary of State for Wales when he expects the start of the new crossing of the river Dee north of Queensferry, as referred to in "Roads in Wales 1989", and if he will make a statement.

Mr. Wyn Roberts: This is a matter for Clwyd county council.

Council Housing Sales

Mr. Anderson: To ask the Secretary of State for Wales, at the latest available date, what was the average selling price after discount of a local authority unit of accommodation; and what is the average cost of building a new local authority unit of accommodation.

Mr. Grist: The average selling price after discount of local authority dwellings sold during 1988 was £9,883. The average cost of building a new local authority unit of accommodation during the same period is estimated to have been £35,450.

Planning Appeal (Clydach)

Mr. Gareth Wardell: To ask the Secretary of State for Wales if his Inspector has now decided the outcome of the appeal by I. G. Hale, application number 2/2/89/0082/03, relating to the forecourt walls adjoining Ramsay road, and Sunnybank, in the village of Clydach.

Mr. Ian Grist: This application has not come before my right hon. Friend on appeal. I understand that it was approved by Lliw Valley borough council on 16 March 1989.

NFU-FUW (Merger)

Mr. Ron Davies: To ask the Secretary of State for Wales if he will make a report on the progress he has achieved in his initiative to bring about the merger of the National Farmers Union and the Farmers Union of Wales.

Mr. Peter Walker: As I have previously observed to the hon. Gentleman, the future relationship of the FUW and the NFU in Wales is a matter for those unions and progress towards any merger can be measured only by them.

Farmers Union of Wales

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list the dates during 1988 when he met representatives of the Farmers Union of Wales; and what subjects were discussed.

Mr. Peter Walker: During 1988 I met representatives of the Farmers Union of Wales on four occasions. Dates and details of subjects discussed are as follows:

10 February 1988—To discuss a wide range of agricultural subjects including extensification, stabilisers and milk quotas.

10 May 1988—Speech to the FUW annual general meeting about sheepmeat regime and general matters of interest to the agriculture industry.

19 July 1988—At the Royal Welsh show to discuss general subjects of current interest to the agriculture sector.

20 October 1988—To discuss hill livestock compensatory review.

National Farmers Union

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list the dates during 1988 when he met representatives of the National Farmers Union; and what subjects were discussed.

Mr. Peter Walker: During 1988 I met representatives of the National Farmers Union (Wales) on five occasions. Dates and details of subjects discussed are as follows:

30 March 1988—To discuss a range of agricultural issues.

19 July 1988—At the Royal Welsh show to discuss general subjects of current interest to the agriculture sector.

27 October 1988—To discuss hill livestock compensatory allowances review with the NFU (Wales).

27 October 1988—To discuss the HLCA review.

8 December 1988—To discuss a range of agricultural issues.

School Meals

Mr. Dobson: To ask the Secretary of State for Wales if he will give for each education authority and for Wales as a whole the 1988 figures for the percentage of schoolchildren *(a)* taking purchased school meals, *(b)* taking free school meals and *(c)* taking school meals in total.

Mr. Wyn Roberts: The information in respect of 1988 is in the following table:

Percentage of schoolchildren present: Taking school meals

	Purchased	*Free*	*Total*
Clwyd	35·6	10·7	46·3
Dyfed	51·3	12·5	63·8
Gwent	39·0	16·3	55·3
Gwynedd	43·0	13·8	58·8
Mid Glamorgan	34·4	17·5	51·9
Powys	50·8	5·4	56·2
South Glamorgan	25·6	16·5	42·1
West Glamorgan	33·6	15·6	49·2
Wales	37·4	14·6	52·0

Hospital Waiting Lists

Mr. Dobson: To ask the Secretary of State for Wales if he will give for September 1988 for each health district and for Wales in total the waiting list figures for *(a)* urgent in-patients, *(b)* non-urgent in-patients, *(c)* urgent in-patients waiting a month or more, *(d)* non-urgent in-patients waiting a year of more, *(e)* out-patients and *(f)* out-patients waiting three months or more.

Mr. Grist: Comprehensive information about waiting lists at 30 September 1988 will be published in Welsh Hospital Waiting List Bulletin 1989, No. 1, during the week beginning 15 May 1989.

Local Development Projects

Dr. Thomas: To ask the Secretary of State for Wales what local development projects have been undertaken in Wales; and what are their costs.

Mr. Peter Walker *[holding answer 11 April 1989]:* The following list gives details of local development projects since the initiative began in Wales in November 1986:

	Contractor	*Description*	*Cost £ ('000)*
1.	British Coal Enterprise, Cardiff	Small Firms' Training Needs	18
2.	Cambrian Manpower Development Unit, Aberystwyth	Environmental Training Needs in Industry in Wales	5
3.	Cardiff Bay Development Corporation	Training Study of South Glamorgan Labour Market	18·775
4.	Cardiff Chamber of Commerce	Cardiff Training Development Project	25
5.	Carmarthen College of Technology and Art	Organic Farming	46·7
6.	Nature Conservancy Council	Environmental Manpower Project	12
7.	People and Work Unit, Newport	Small Businesses	30
8.	Swansea College of Further Education	Learning Skills for Adults	20
9.	Swansea College of Further Education	Learning Skills for the Unemployed	25·224
10.	Welsh Joint Education Committee	Tourism	20
11.	Gwent Local Employer Network	Consultancy Survey	7·9
12.	Cardiff Chamber of Commerce II	Dissemination of Good Practices from 1st LDP	13·9
13.	People and Work Unit Newport	Training Needs of Business for Community Benefit	28·2
14.	Cardiff Media City	Identification of Training Needs in Media	10

EDUCATION AND SCIENCE

School Meals

Mr. Dobson: To ask the Secretary of State for Education and Science if he will give from the 1988 census the latest figures for uptake of school meals, giving for each education authority the percentage of children taking *(a)* purchased meals, *(b)* free meals and *(c)* meals in total.

Mr. Butcher: The figures are given in the table. They relate to maintained primary, secondary and special schools and are based on the numbers of pupils present in schools on the day in October 1988 on which the survey was carried out.

The full results of the survey are contained in the Chartered Institute of Public Finance and Accountancy publication "School Meals Statistics at October 1988" which will shortly be available in the Library.

Number of pupils

Local education authority	*Taking paid meals*	*Taking free meals*	*Percentage Taking meals in total*
ILEA	39·3	28·6	68·0
Barking and Dagenham	28·9	10·2	39·1
Barnet	51·0	8·0	59·0
Bexley	25·6	5·9	31·5
Brent	n/a	n/a	n/a
Bromley	33·2	5·7	38·9
Croydon	36·9	8·4	45·3
Ealing	32·3	12·7	45·1
Enfield	32·0	8·2	40·2
Haringey	33·6	19·5	53·1

NORTHERN IRELAND

Employee Share Ownership

Mr. Ian Taylor: To ask the Secretary of State for Northern Ireland what discussions have taken place as to the feasibility of introducing an employee share ownership scheme in any future privatisation that his Department may sponsor.

Mr. Viggers: On 22 March 1989, heads of agreement were approved for the sale of Harland and Wolff plc to a management-employee buy-out team backed by Mr. Olsen. Employees of Harland and Wolff plc will have an opportunity to acquire shares in the new company. The Government have to date had no discussions on the feasibility of introducing an employee share ownership scheme in the context of the privatisations of Short Brothers plc and Northern Ireland Electricity.

Firearms

Mr. William Ross: To ask the Secretary of State for Northern Ireland, if he will publish a table in the *Official Report* to show how many privately held *(a)* shotguns, *(b)* ·22 rifles, *(c)* rifles of larger calibre, *(d)* hand-guns, *(e)* air and gas-operated weapons and *(f)* antique firearms, have been lost or stolen each year from 1976 to the latest available date; how many of each such category were subsequently recovered; and how many in each category are known to have been used in criminal, including terrorist, activity or as much of such information as is available to him.

Mr. Ian Stewart *[holding answer 23 March 1989]:* Information is not readily available in the form requested. However, such information as is available is contained in the following tables.

Table 1
Firearms stolen from civilians

Year	*Shotguns*	*Rifles*[1]	*Pistols/ revolvers*	*Antiques*	*Air weapons*
1976	128	23	8	1	18
1977	53	8	8	—	7
1978	35	3	3	—	3
1979	34	3	2	—	7
1980	38	7	—	2	8
1981	69	7	8	2	13
1982	60	9	13	2	5

365	30	41	—	31

Rating Reform

Mr. Sillars: To ask the Secretary of State for Northern Ireland what plans the Government have to introduce a poll tax in Northern Ireland; and if he will make a statement.

Mr. Ian Stewart *[holding answer 10 April 1989]:* The Green Paper of January 1986 "Paying for Local Government", which formed the basis for the Great Britain reforms, made it clear that the proposals did not apply to Northern Ireland. This reflected the fact that local government arrangements in Northern Ireland are significantly different from those in the rest of the United Kingdom and we have no present plans to replace the existing system.

PRIME MINISTER

Council of Europe (Delegation)

Mr. Page: To ask the Prime Minister if she will announce the composition of the United Kingdom delegation for the 41st session of the Parliamentary Assembly of the Council of Europe.

The Prime Minister: The 41st Session Parliamentary Assembly of the Council of Europe will be opened in Strasbourg on 8 May 1989. The delegation from the United Kingdom for the session will consist of 11 Members of the Conservative party, six Members of the Labour party and one Member of the Social and Liberal Democrats party. I have also appointed a number of substitute delegates.

The appointments of representatives and substitutes have been made on the basis of nominations by the leaders of those parties concerned.

The same delegation will be representing the United Kingdom Parliament at the assembly of the Western European Union, which next meets in Paris on 5 June.

Representatives from the Government Benches will be:
My hon. Friend the Member for Hampstead and Highgate (Sir Geoffrey Finsberg—who will act as leader of both delegations
The hon. Members for:
Warwick and Leamington (Sir Dudley Smith)
Southampton, Test (Mr. Hill) (Government Whip)
Twickenham (Mr. Jessel)
Northampton, South (Mr. Morris)
Halesowen and Stourbridge (Sir John Stokes)
Ruislip-Northwood (Mr. Wilkinson)
Ashford (Mr. Speed)
Streatham (Sir William Shelton)
Medway (Dame Peggy Fenner)
and the Earl of Kinnoull
Representatives from the Labour party will be:
The hon. Members for:
Neath (Mr. Coleman)
Wallsend (Mr. Garrett)
Wentworth (Mr. Hardy)
Tooting (Mr. Cox)
Liverpool, Riverside (Mr. Parry)
Falkirk, East (Mr. Ewing)
Representatives from the Social and Liberal Democrats party will be:
The hon. Member for Inverness, Nairn and Lochaber (Sir Russell Johnston)
The following substitutes have been appointed to act as necessary on behalf of the delegates
From the Government Benches:
The hon. Members for:
Bournemouth, East (Mr. Atkinson)
Eastwood (Mr. Stewart)
Norfolk North (Mr. Howell)
Thanet, North (Mr. Gale)
Lewes (Mr. Rathbone)
Brighton, Kemptown (Mr. Bowden)
Suffolk Central (Mr. Lord)
Ravensbourne (Mr. Hunt)
Lord Newall
and Lord Rodney
From the Labour party:
The hon. Members for:
Wansbeck (Mr. Thompson)
Manchester, Central (Mr. Litherland)
Don Valley (Mr. Redmond)
Warley, East (Mr. Faulds)
Newham, North-West (Mr. Banks)
Cunninghame, South (Mr. Lambie)
and Lord Kirkhill
From the Social and Liberal Democrats party:
The Lord Mackie of Benshie

EMPLOYMENT

Labour Statistics

Mr. John Marshall: To ask the Secretary of State for Employment what has been the fall in unemployment during the last 12 months for which figures are available; and if he will make a statement.

Mr. Nicholls: In March 1989 the level of unemployment, seasonally adjusted, in the United Kingdom was 1,918,100 compared with 2,453,900 in March 1988—a fall of 535,800 or 21·8 per cent. on a consistent basis.

Mr. Adley: To ask the Secretary of State for Employment which areas he now considers to have a labour shortage.

Mr. Cope: Thanks to the very strong growth in employment, unemployment rates have been falling since July 1986. By March 1989 there were 48 travel-to-work area with unemployment rates below 4 per cent. and 16 travel-to-work areas below 3 per cent.

As unemployment has fallen, some shortages of labour have appeared. Occupations most in demand are in higher level skills such as professional engineers, computer specialists and managers and in craft skills.

Construction Industry Training Board

Mr. Ernie Ross: To ask the Secretary of State for Employment if he will provide a breakdown of the £55 million surplus of the construction industry training board; what information he has as to what this sum will be spent on; why the board has £74 million invested in financial institutions; on what authority the board makes such investments; and when this authority was last reviewed.

Mr. Nicholls: The latest available accounts are for the financial year ending 31 March 1988. Detailed information is included in the 1987-88 annual report, a copy of which is available in the Library of the House.

Section 17(5) of the Industrial Training Act 1982 permits a board to invest any money in a manner approved by the Training Commission. The latest advice was given to all industry training boards in October 1986 when certain categories of investment were given general approval by the commission.

The board will need to draw substantially upon its accumulated fund in order to finance training commitments already entered into and its planned increase in training effort to meet skill shortages which prevail in the industry.

European Social Fund (Cornwall)

Mr. Matthew Taylor: To ask the Secretary of State for Employment what technical queries he received from the European Commission regarding the European social fund applications for 1989 by Cornwall county council; what steps were taken to answer those technical queries; and if he will make a statement.

Mr. Cope: My Department was advised by the European Commission that Cornwall county council's 1989 European social fund applications, in common with over 150 other UK applications, were being rejected

because the Commission considered that the expenditure costs quoted were too high and not sufficiently justified for the type of training being given.

Officials from my Department made representations to the Commission on behalf of all the applicants so affected, but have not so far been successful in changing the Commission's decision.

Because of the difficulties that the rejection to these applications is causing Cornwall county council, my Department has written again to the European Commission with a request that the social fund applications be reviewed.

Training Managers

Mr. Meacher: To ask the Secretary of State for Employment if he will list the largest 100 companies which have contracted directly as training managers under the employment training scheme.

Mr. Nicholls *[holding answer 12 April 1989]:* This information is not available in the form requested. Organisations are contracted as training managers by their capability to provide and meet employment training standards, and not by their size. I am sending the hon. Member a list of all private sector firms acting as training managers as at 20 February 1989 and am also arranging for a copy to be placed in the Library.

Visual Display Units

Sir John Farr: To ask the Secretary of State for Employment in view of the steadily increasing use of visual displays units, when he expects to recommend standards to be introduced, especially with regard to the adoption of the ALARA principle of keeping radiation exposure as low as reasonably achievable.

Mr. Nicholls *[holding answer 12 April 1989]:* The introduction of such standards for VDUs is unnecessary as these machines do not pose a radiation risk. I hope that national and international standards on some ergonomic aspects of VDUs will be published within a year.

HOME DEPARTMENT

Glasgow Passport Office

Mr. Maclennan: To ask the Secretary of State for the Home Department what is the current average waiting time at Glasgow passport office between the receipt of *(a)* an application for a passport and *(b)* an application for renewal of an existing passport and the issue of the new passport.

Mr. Renton: Straightforward non-urgent postal applications of all types are being processed at the Glasgow passport office in an average of 33 working days. Urgent applications are given priority and are processed in accordance with travellers' requirements.

Newchurch Hospital

Mr. Hoyle: To ask the Secretary of State for the Home Department when the survey into the possible use of Newchurch hospital, as a prison, took place; and what conclusions were reached.

Mr. Douglas Hogg: Newchurch hospital is not being considered as a possible site for a prison establishment and no such survey has been made.

Horse Racing

Mr. Hinchliffe: To ask the Secretary of State for the Home Department if, following the deaths of four horses and injury to others at Aintree racecourse on 8 April, he will consider instituting proceedings against the racecourse authorities under the provisions of the Protection of Animals Act 1911.

Mr. Douglas Hogg: No. The prosecution of offenses is not the responsibility of my right hon. Friend. If the hon. Member believes he has evidence that an offence has been committed, he should communicate it to the chief officer of police concerned.

Prison Officers

Mrs. Wise: To ask the Secretary of State for the Home Department whether new applicants are being accepted for work as prison officers in the north-west of England.

Mr. Douglas Hogg: No. For the time being, the prison service in England and Wales is recruiting only for posts in London and the south-east. All applicants are therefore invited to confirm that they are willing and able to work at any establishment in that area.

Satellite Information Services

Mr. Hanley: To ask the Secretary of State for the Home Department what is the increased percentage stake in Satellite Information Services which has been recently announced for the Horserace Totalisator Board; and on what terms it will be allocated.

Mr. John Patten: I understand that the board may increase its shareholding in Satellite Information Services from 5 to 6 per cent. and will be entitled to purchase these additional shares at the same price per share as that achieved for those shares in the company which are to be made available in a private placing.

Firearms Consultative Committee

Mr. Goodlad: To ask the Secretary of State for the Home Department when he expects to announce the membership of the Firearms consultative committee.

Mr. Douglas Hogg: I refer my hon. Friend to the reply given to a question from my hon. Friend the Member for Romsey and Waterside (Mr. Colvin) yesterday.

Lindholme Prison (Use of Body Belts)

Mr. Redmond: To ask the Secretary of State for the Home Department if he will make a statement on the use of a body belt on an inmate at Lindholme prison in 1987.

Mr. Douglas Hogg: A governor may order an inmate in a prison service establishment to be put under restraint in a body belt where this is necessary to prevent the inmate from injuring himself or others, damaging property or creating a disturbance. The prison medical officer must be informed whenever a governor orders an inmate to be put under restraint.

On the one occasion in 1987 when a body belt was used at Lindholme prison, the inmate had attempted to commit suicide. His behaviour was aggressive and unpredictable and he was placed in a body belt for his own protection, with the full knowledge and agreement of the medical officer. The body belt was removed after 2 hours 20 minutes prior to his transfer to Leeds prison hospital for observation.

Mr. Redmond: To ask the Secretary of State for the Home Department on how many occasions body belts have been used on inmates of Lindholme prison since 1987; what category of prisoner was involved in each case; and for how long the device was applied on each occasion.

Mr. Douglas Hogg: Body belts were used to restrain prisoners at Lindholme prison on one occasion in 1987 and twice in 1988. The prisoners were all in category C and were kept in body belts for an average of 1 hour 45 minutes.

Prostitution

Mr. Cox: To ask the Secretary of State for the Home Department (1) how many men have been convicted at South West London magistrates court for kerb-crawling activities in the Bedford Hill area of Wandsworth during the last three years;

(2) how many people have been convicted at South West London magistrates court in each of the last three years for living off the immoral earnings of prostitutes;

(3) how many convictions there have been at South West London magistrates court of women convicted of soliciting for prostitution in the Bedford hill district of Wandsworth during the last three years.

Mr. John Patten: The information held centrally, which may be incomplete, is given in the table. It is not possible to identify separately those offences which occurred in the Bedford hill area of Wandsworth. Information for 1985 and 1986 was provided in a reply given to a question from the hon. Member on 12 November 1987 at column *206*.

Persons found guilty of offences relating to prostitution at South Western magistrates court

Offence	*1987*
Kerb-crawling	—
Soliciting for prostitution	399
Living on earnings of prostitution	—

Immigration

Mr. Cohen: To ask the Secretary of State for the Home Department if he will provide a list, broken down by port of entry, of the number of occasions since the latest immigration guidelines were introduced that hon. Members have made representations to immigration officials to change their decision to refuse entry and the number of times the immigration officials have agreed to do so.

Mr. Renton: The information is not available in the form requested. The available information about requests to immigration officers to defer removal following refusal of leave to enter was contained in my reply to the hon. Member for Islington, North (Mr. Corbyn) on 15 March at column *231*.

Rates (Non-payment)

Mr. Allen: To ask the Secretary of State for the Home Department how many people in the area including Nottingham *(a)* were imprisoned, *(b)* had attachments to earnings, and *(c)* had distraint warrants issued for non-payments of rates in each of the years from 1979.

Mr. Douglas Hogg: Estimates of numbers of rate defaulters committed to custody by courts in Nottinghamshire are given in the table below; provision of information for other years would involve disproportionate cost. Information on attachment of earnings orders and distraint warrants is not recorded centrally.

Committals to custody for non-payment of rates by courts in Nottinghamshire

	Estimated number
1979	20
1983	20
1987	10
1988	5

Tamil Refugees

Mr. Cox: To ask the Secretary of State for the Home Department what is the current number of applications at his Department from Tamils from Sri Lanka seeking to be granted refugee status in the United Kingdom; and if he will make a statement.

Mr. Renton: No distinction is made in statistical records between Tamils and other Sri Lankans. For the latest available information, I refer the hon. Member to the reply given to him on 11 January 1989 at column *683*.

Attempted Murder

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department what has been the average recommended minimum length of sentence to be served, in cases of attempted murder in each year since 1979.

Mr. John Patten: The information is not collected centrally.

Disabled Persons (Voting)

Mr. Cox: To ask the Secretary of State for the Home Department what discussions he is having with election returning officers in the United Kingdom to ensure that access is possible for disabled people at all polling stations in their areas.

Mr. Douglas Hogg: None at this time. Section 18 of the Representation of the People Act 1983, as amended by the Representation of the People Act 1985, places a particular obligation on district and London borough councils to designate as polling places, so far as is reasonable and practicable, only places which are accessible to disabled voters. This requirement is supplemented by Home Office guidance to returning officers, which states that the long-term objective should be to have polling stations which are all capable of easy access by disabled people, and that the Treasury will provide grants towards the cost of portable ramps so that wheelchairs can enter polling stations easily.

Children (Employment)

Mr. Archer: To ask the Secretary of State for the Home Department if, pursuant to the answer of 16 February, *Official Report*, columns *327-38*, he will place in the Library anonymised summaries of the convictions for officers in connection with the employment of children in *(a)* non-industrial, *(b)* industrial and *(c)* agricultural undertakings for the most recent year for which figures are available; and if he will make it his policy to make such summaries available in future years.

Mr. John Patten *[holding answer 10 April 1989]:* The available information relates to prosecutions in 1987 under sections 18, 19, 20 of the Children and Young Persons Act 1933 notified to the Home Office. There were eight such prosecutions and eight convictions, all leading to fines and no other disposals. Equivalent figures for 1988 will become available later in the year and can be made available on request.

HOUSE OF COMMONS

Late Night Sittings (Costs)

Mr. Allen: To ask the Lord President of the Council what estimate he has made of the costs of keeping the House open for sittings which go beyond 10 pm.

Mr. Wakeham: When a sitting of the House goes beyond 10 pm a wide diversity of costs are incurred. Information on these costs is either not held centrally or not separately identifiable. The information requested, therefore, could be provided only at disproportionate cost.

NATIONAL FINANCE

European Monetary System

Mr. Meale: To ask the Chancellor of the Exchequer on how many occasions there have been major currency realignments within the exchange rate mechanism of the European monetary system; and if he will give the relevant dates and adjustments.

Mr. Lilley: There have been 11 realignments of the currencies in the exchange rate mechanism of the European monetary system since its inception in 1979. Details are set out in the Commission booklet, "The EMS: Ten Years of Progress in European Monetary Co-operation", a copy of which is available in the Library of the House.

Alcohol

Mr. Gardiner: To ask the Chancellor of the Exchequer what are the latest estimated receipts in 1988-89 and 1989-90 from excise duties and value added tax on spirits, beer, wine, made-wine, cider, perry and low-duty alcohol products, respectively.

Mr. Lilley *[holding answer 13 April 1989]:* The information is as follows:

	1988-89[1]			*1989-90*[2]		
	Excise duties £ billion	*VAT £ billion*	*Total receipts £ billion*	*Excise duties £ billion*	*VAT £ billion*	*Total receipts £ billion*
Spirits	1·6	0·6	2·2	1·7	0·7	2·3
Beer	2·1	1·3	3·4	2·1	1·4	3·5
Wine	0·7	0·5	1·2	0·8	0·5	1·3
Made wine	0·1	[3]—	0·1	0·1	[3]—	0·1
Cider and perry	0·1	0·1	0·1	0·1	0·1	0·1
TOTALS	4·5	2·4	7·0	4·7	2·6	7·3

[1] Latest estimates.
[2] Forecasts.
[3] Below £50 million.
Note: Separate figures are not available for low duty alcohol products.
Individual items may not add up to totals due to rounding.

FOREIGN AND COMMONWEALTH AFFAIRS

Libya

Mr. Andrew F. Bennett: To ask the Secretary of State for Foreign and Commonwealth Affairs how many United Kingdom citizens are *(a)* currently serving sentences and *(b)* awaiting sentencing in Libyan prisons.

Mr. Eggar: There are no British nationals known to be currently detained in Libya.

USSR (Cultural Co-operation)

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he is having with the Government of the Union of Soviet Socialist Republics wih a view to a greater exchange of cultural co-operation between Great Britain and the Union of Soviet Socialist Republics.

Mr. Waldegrave: Anglo-Soviet cultural exchanges have developed considerably in recent years. During Mr. Gorbachev's recent visit we agreed to start negotiations on a new, more wide-ranging cultural agreement, which we hope to sign next year. The agreement will set out the basic principles of our co-operation and will in due course lead to the establishment of cultural centres in London and Moscow, with guaranteed free and unimpeded public access.

Tourism (Eastern Europe)

Mr. Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what information his Department has as to what agreements exist for tourism between Britain and countries in eastern Europe; and if he will make a statement.

Mr. Waldegrave: There are no agreements at Government level on tourism between Britain and

countries in eastern Europe. The Vienna concluding document, which those countries have accepted, calls for improvement of the infrastructure of tourism, removal of restrictive measures that hinder its development, and the encouragement of individual travel. Her Majesty's Government attach importance to the fulfilment of these provisions.

Human Rights (Tibet)

Mr. Fraser: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations have been made to the Government of China about the abuse of human rights in Tibet.

Mr. Eggar: I refer the hon. Member to the answer that I gave on 22 March to the right hon. Member for Tweeddale, Ettrick and Lauderdale (Mr. Steel) at column *621*.

Immigration

Mr. Madden: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will arrange for the British post in Bombay to issue a visit visa to Mrs. Sakina Najmuddin Badruddin so that she can join her family in paying respects to her father who died in the United Kingdom last December;

(2) when Mr. Latifa Begum, who was born on 7 March 1955, and her four children, applied to the British post in New Delhi for entry clearance to enter the United Kingdom; and when they will be interviewed;

(3) why Mrs. Zaffar Iqbal Raja, ref. V 431489, was refused a visa by the British post inIslamabad to visit the United Kingdom; what is Mr. Raja's occupation and family circumstances; and if he will reconsider Mr. Raja's application.

Mr. Eggar: In accordance with the recent guidelines on the handling of representations by Members of Parliament in immigration cases, issued to Members on 14 December 1988, I have referred the question to the correspondence unit of migration and visa department of the Foreign and Commonwealth Office. The hon. Member will receive a reply from the unit in due course.

SOCIAL SECURITY

Old Age Expenditure Programmes

Mr. Pawsey: To ask the Secretary of State for Social Security if he will publish in the *Official Report* a list showing expenditure on programmes for old age as a proportion of gross domestic product at market prices, for European Community member states, for each year since 1983.

Mr. Peter Lloyd: The most recent information is as follows:

	1983	*1984*	*1985*
Belgium	7·8	7·8	—
Denmark	10·2	10·2	10·1
Federal Republic of Germany	8·0	7·8	—
Greece	—	—	—
Spain	—	—	—
France	9·1	—	—
Ireland	5·7	5·6	5·5
Italy	7·7	7·7	7·6
Luxembourg	6·7	—	—
Netherlands	8·8	—	—
Portugal	—	—	—
United Kingdom	9·5	9·6	—

Source: Eurostat.
Note: Social protection expenditure for old age comprises state pension, occupational pensions, income related benefits and public expenditure on residential care..

Social Security Act 1988

Mr. Pike: To ask the Secretary of State for Social Security if he will publish in percentage terms the number of applications to him under the hardship clause of the Social Security Act 1988 *(a)* submitted through each Department of Social Security local office and *(b)* submitted on a Department of Social Security regional basis, which are successful in their intent; and if he will make a statement.

Mr. Peter Lloyd: The information requested has been placed in the Library.

Family Credit

Mr. McCrindle: To ask the Secretary of State for Social Security when the television-based advertising campaign for family credit will be launched; and if he will make a statement.

Mr. Peter Lloyd: The family credit television campaign started yesterday and will run throughout Great Britain for eight weeks until 7 June. This phase of the campaign will cost 2·3 million. In addition, an outdoor campaign on posters and bus sides will commence throughout Great Britain on 1 May for two months until the end of June. The total cost of this aspect of the campaign will be £1·3 million. A further £1 million has been allocated for other promotional activities during the remainder of this financial year. These will include providing adequate supplies of leaflets and posters in sub-post offices, community and health centres and other places used frequently by mothers with children.

The campaign emphasises working families' eligibility for family credit, including those with take-home pay levels as high as £175 per week in some cases. It sets out to dispel misconceptions about ineligibility for family credit because of home ownership, self-employment and lone parent status, and points out that it is a weekly tax-free payment and not a loan.

We have already arranged for a copy of the advertising research on which the campaign is based to be placed in the Library.

Young Persons (Benefits)

Mr. McCrindle: To ask the Secretary of State for Social Security for what period 16 and 17-year-olds estranged from their parents will be able to claim income support; and if he will make a statement.

Mr. Peter Lloyd: Regulations have yet to be made, but we intend that 16 and 17-year-olds who are estranged from their parents will be eligible to receive income support during the same period as the child benefit extension period—that is, until the end of the calendar year for

summer school leavers and for 12 weeks in the case of those leaving at Christmas or Easter. During that time the guarantee of an offer of a YTS place will be met. Once eligibility for income support on this basis runs out, the "severe hardship" provision will be available where necessary. Those not required to be available for work or training will continue to be eligible for income support at all times.

Housing Benefit

Mr. Atkinson: To ask the Secretary of State for Social Security how he proposes that the housing benefit will reflect the community charge in 1990; and if he will make a statement.

Mr. Peter Lloyd: From April 1990, help for people on low income in paying the community charge will be provided through a community charge benefit scheme. This will be separate from the housing benefit scheme, though the rules of the two schemes will be aligned as closely as is possible. The local authority associations and the Social Security Advisory Committee are now being consulted on draft Community Charge Benefits (General) Regulations.

Rating Reform

Mr. Sillars: To ask the Secretary of State for Social Security if he will place in the Library a copy of the memorandum from his Department to which reference is made in the *Evening Times* article of 10 April, a copy of which has been sent to him.

Mr. Peter Lloyd: No. The document referred to was only interim advice. Full instructions to local offices will be issued in the near future and I will arrange for a copy of these to be placed in the Library.

Mr. Sillars: To ask the Secretary of State for Social Security whether under S.I. No. 507 (S.59) any deduction for poll tax payments from persons on income support can be made by his Department without its first having received a specific request, naming an individual or couple, from the levying authority.

Mr. Peter Lloyd: No. The levying authority must first have obtained a summary warrant in respect of the debt.

Mr. Sillars: To ask the Secretary of State for Social Security what is his policy on imposing deductions of poll tax payments from persons on income support before appeals have been dealt with by a tribunal.

Mr. Peter Lloyd: If an appeal is made, deductions will continue pending the tribunal's decision.

Mr. Sillars: To ask the Secretary of State for Social Security whether the spokeswoman referred to in the article printed in the *Evening Times*, a copy of which has been sent to him, had his authority to state that a person on income support could be left with 10p of an income due to deductions arising from non-payment of the poll tax; and if he will provide an example of how this can happen.

Mr. Peter Lloyd: The provision for 10p to remain in payment is in regulation 2 of the Community Charges (Deductions from Income Support) (Scotland) Regulations (SI 1989 No. 507) and derives from the provision in paragraph 2 of schedule 9 to the Social Security (Claims and Payments) Regulations 1987 (SI 1987 No. 1968) dealing with other deductions from income support for debts to third parties. Its purpose is to avoid extinguishment of entitlement. For example, the deduction for a single person will be £1·75p a week. If the person's income support is less than £1·85p per week because of other income, the deduction for community charge arrears could not be made.

Mr. Sillars: To ask the Secretary of State for Social Security what is the maximum weekly deduction for non-payment of the poll tax from *(a)* a single person aged 18 years, *(b)* a single person aged 25 years, and *(c)* a married couple, all receiving full income support and without savings, and assuming they have no other deductions for housing and fuel.

Mr. Peter Lloyd: The information requested is as follows:

(a) and *(b)* £1·75p a week; *(c)* £2·75p a week if both partners are debtors to the levying authority.

Mr. Sillars: To ask the Secretary of State for Social Security whether the powers of his Department to deduct sums from income support where the recipient has failed to pay his or her poll tax are subject to a time to pay direction under the Debtor (Scotland) Act 1987.

Mr. Peter Lloyd: No. In terms of the Debtors (Scotland) Act 1987 (as amended by the Abolition of Domestic Rates Etc. (Scotland) Act 1987) section 1(5)(ee), the court cannot make a time direction in an action by or on behalf of a levying authority for the payment of any community charge.

DEFENCE

RAF (Front-line Aircraft)

Mr. Allan Rogers: To ask the Secretary of State for Defence what proportion of the Royal Air Force's front-line aircraft is not fully operational.

Mr. Archie Hamilton: It has been the policy of successive Governments not to provide detailed information about the operational readiness of elements of the armed forces. All Royal Air Force aircraft assigned to operational duties are fully manned and equipped and thus able to undertake their designated missions.

US Competitive Strategies Doctrine

Mr. Martyn Jones: To ask the Secretary of State for Defence what discussions he has had with his *(a)* Belgian, *(b)* Canadian, *(c)* Danish, *(d)* French, *(e)* Greek, *(f)* Norwegian, *(g)* Spanish and *(h)* West German counterparts regarding the United States' new competitive strategies doctrine.

Mr. Archie Hamilton: None.

Near Miss (Somerset)

Mr. David Nicholson: To ask the Secretary of State for Defence what reports he has received of an alleged near miss by two low-flying military aircraft over Cannington, Somerset, on Friday 7 April; and if he will make a statement.

Mr. Neubert: There has been no report of an alleged airmiss involving military aircraft over Cannington, Somerset, on Friday 7 April.

TRANSPORT

M40 (Southern Extension)

Mr. Baldry: To ask the Secretary of State for Transport if he will make a statement as to the tender process and timings he intents to adopt for the southern section of the M40 extension.

Mr. Peter Bottomley: We plan to invite competitive tenders later this month and to expedite our normal arrangements for their submission and evaluation. Subject to the outcome and to the satisfactory completion of the statutory procedures this should enable construction to start this summer.

The contract will include provision for a bonus for early completion and a charge for late completion in relation to the contractor's own tendered period. This should ensure completion of the M40 as soon as practicable.

Roads (Investment)

Mr. Pawsey: To ask the Secretary of State for Transport what was the amount of road investment in the United Kingdom, France and West Germany for each of the last five years.

Mr. Peter Bottomley: The information readily available is as follows:

Capital expenditure on road infrastructure
National currency—millions

	United Kingdom	*Federal Republic of Germany*	*France*
1983	1,425	13,550	26,900
1984	1,570	13,450	28,800
1985	1,678	13,250	35,700
1986	1,801	14,500	37,800
1987	1,871	—	—

Exchange rates taken from CSO "Economic Trends"

	DM	*FF*
1983	3·870	11·5471
1984	3·791	11·6349
1985	3·784	11·5494
1986	3·193	10·1569
1987	—	—

Sterling— millions

	United Kingdom	*Federal Republic of Germany*	*France*
1983	1,425	3,501	2,330
1984	1,570	3,548	2,475
1985	1,678	3,502	3,091
1986	1,801	4,555	3,722
1987	1,871	—	—

The information for the United Kingdom and West Germany comes from the latest ECMT publication "Statistical Trends in Transport". That for France was obtained from the statistical office of the French Transport Ministry in November 1988. ECMT is currently collecting the relevant information for 1987—it should be available in the autumn.

Railway Stations (Staff and Information)

Mr. Dunnachie: To ask the Secretary of State for Transport what representations has he received from commuters about lack of staff and information at British Rail stations; whether he has any plans to alter the quality of service objectives set for British Rail to take account of these representations; and if he will make a statement.

Mr. Portillo *[holding answer 13 April 1989]:* We regularly receive representations on all aspects of the quality of service of British Rail. There are already quality of service objectives covering train enquiry bureaux and queuing times at ticket offices. Staffing matters generally are the responsibility of the British Railways Board and we have no plans to introduce objectives to cover staffing levels at stations.

Trains (Overcrowding)

Mr. Dunnachie: To ask the Secretary of State for Transport whether he has any plans to change British Rail's quality of service objectives to seek a reduction in overcrowding on trains; and if he will make a statement.

Mr. Portillo *[holding answer 13 April 1989]:* We are discussing with BR new quality of service objectives for the provincial sector. We shall be reviewing BR's other quality of service standards in setting new objectives for the period from 1990 to 1993.

The Government have approved increasing levels of investment to reduce overcrowding and to meet the agreed quality of service objectives on all passenger sectors.

British Rail (Service Objectives)

Mr. Dunnachie: To ask the Secretary of State for Transport if he will make a statement on the extent to which British Rail is meeting the quality of service objectives set by him with regard to train punctuality and cancellations.

Mr. Portillo *[holding answer 13 April 1989]:* The results available to the Department for the first three quarters of the financial year 1988-89 are as follows:

Percentage

	Punctuality			Reliability	
	Objective	Within in minutes of timetable	Attainment	Objective (services to run)	Attainment
Inter City	90·0	10	87·3	99·5	99·0
Network SouthEast	90·0	5	91·3	99·0	98·7
Provincial	85·0 to 97·0	5	[1]90·0	98·5	99·0

[1] On average.

Trains (Cleaning)

Mr. Dunnachie: To ask the Secretary of State for Transport if he has any plans to change British Rail's quality of service objectives to take account of the need for improved standards of cleaning on British Rail trains; and if he will make a statement.

Mr. Portillo *[holding answer 13 April 1989]* We have no plans to change British Rail's carriage cleaning objectives. BR is making every effort to achieve the standards that have already been agreed.

AGRICULTURE, FISHERIES AND FOOD

Edible Dormice

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what was the estimated cost to his Department of administering his scheme to control the numbers of edible dormice.

Mr. Ryder: Licences to trap edible dormice are issued as a small part of my Department's general licensing responsibilities under the Widlife and Countryside Act 1981. There is no specific scheme of control. The administrative cost of issuing licences in 1989 is estimated at £80.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what is his assessment of the damage inflicted to the commercial timber industry by the six edible dormice, the destruction of which he authorised in 1988.

Mr. Ryder: Damage to commercial woodland by edible dormice is assessed by local Ministry biologists. The dormice strip off bark, mainly from larch trees. Such damage occurs in very localised areas but can considerably reduce the long-term value of the stands of trees affected. The success of control varies markedly from year to year but actual trapping occurs only when damage becomes apparent and local Ministry staff have been notified.

European Monetary System

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food whether he has made any assessment of the impact on British agriculture of Britain becoming a member of the European monetary system; and if he will make a statement.

Mr. MacGregor: The United Kingdom is already a member of the European monetary system (EMS). Were we to join the exchange rate mechanism (ERM) of the EMS, within what is known as narrow-band divergence limits, there would be implications for the monetary compensatory amounts (MCAs) applied to trade in agricultural products.

Currently MCAs applied in the United Kingdom can vary weekly if sterling's market exchange rate varies. If we joined the ERM, our MCAs would become fixed, changing only at EMS realignments or following changes in the "green rates" which apply to the conversion of ECU prices into sterling. The green rates themselves would not be directly affected by membership of the ERM, and changes to them would continue to be subject to decisions by the Council. Joining the ERM would not, in itself, affect our CAP support level, expressed in sterling, either way.

Bovine Spongiform Encephalopathy

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) on how many occasions during 1988 cattle submitted for slaughter at European Economic Community export approved slaughterhouses were identified by ante-mortem veterinary inspections as bovine spongiform encephalopathy suspect; and in how many of these cases bovine spongiform encephalopathy subsequently was confirmed by post-mortem inspection.

(2) how many cattle entered for slaughter at non-EEC export approved slaughterhouses during 1988 were found, on inspection, to be infected with bovine spongiform encephalopathy;

Mr. Donald Thompson *[holding answer 13 April 1989]:* We consider this monitoring very important indeed. It is essential that no animals slip through. There has been no evidence of negligence. Thorough inspection has resulted in 63 suspect cases of BSE, 40 of which were subsequently confirmed, being reported from markets and slaughterhouse from 21 June 1988, when the disease was made notifiable, to the end of the year. During this period a total of 2,186 cases were confirmed.

Sheep Dipping

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on his proposals for compulsory sheep dipping in 1989.

Mr. Donald Thompson *[holding answer 7 April 1989]:* The Government have examined the arrangements for controlling sheep scab with a view to securing effective regulation while avoiding unnecessary burdens on the industry.

It has been decided that there will be a single compulsory national dip in the autumn of 1989 and a further dip in the autumn of 1990. A system of movement controls will be introduced following this autumn's dip and arrangements for 1991 onwards will be decided in the light of the effectiveness of the new measures. The dates of the compulsory dip will be announced after consultation with the industry.

HEALTH

Meningitis

Mr. Redmond: To ask the Secretary of State for Health if he will list by year for the last 10 years and to date for 1989, the number of cases of meningitis treated in the Trent regional health authority, the years in which there were clusters, the number of fatal cases and the number of cases involving children under five years and of school age.

Mr. Freeman: The information is not available in the precise form requested. In particular, data on clustering of cases within a local authority area are not available, since addresses are not noted on the infectious disease notification reports sent by regional health authorities to the OPCS.

The tables show the nearest equivalent readily available data.

Table A

Number of cases of (a) all forms of meningitis (b) meningococcal meningitis notified in Trent Regional Health Authority, 1979-89[1] all ages and selected age-groups.

Notifications

	1979	1980	1981	1982	1983	1984	1985	1986	1987	1988	[1]1989

[2] These data are taken from the Hospital in-patient inquiry, a 10 per cent. sample of NHS non-psychiatric in-patient records. The last data year for this study was 1985.

Mental Health

Mr. Goodlad: To ask the Secretary of State for Health (1) what information his Department collects on the movement of people after discharge from mental illness hospitals;

(2) what information is collected by his Department about people who have been discharged from mental illness hospitals.

Mr. Goodlad: To ask the Secretary of State for the Environment what information he has about the mental health history of the boarders in each local authority area in England and Wales; and if he will make a statement.

Mr. Freeman: I have been asked to reply.

Since 1 April 1987, annual figures are collected about the intended destination of patients on completion of a duration of stay within National Health Service hospitals and units in a district health authority in England. The destinations recorded are:

1. Usual place of residence, other than those institutions noted below (including patients with no fixed abode);
2. Temporary place of residence, when usually resident elsewhere (eg hotels, residential educational institutions);
3. Penal establishment, court or police station;
4. Special hospitals;
5. National Health Service hospital outside district—general ward/younger physically disabled;
6. National Health Service hospital outside district—maternity/neonates ward;
7. National Health Service hospital outside district—mentally ill/handicapped ward;
8. Local authority residential accommodation (including foster care);
9. Deaths;

10. Other, including non-National Health Service hospital or nursing home.

The annual figures are not linked to individual patients and will include data on the same patient when admitted more than once during the year.

Certain statistics are collected about those for whom residential provision is made in the community. Those mentally ill people whose accommodation costs are met in whole or in part by local authority social services departments are counted at 31 March each year by sex, broad age band, and by whether they are in local authority homes, registered care homes or other accommodation. These statistics do not distinguish those who have at any time been resident patients in mental illness hospitals.

In March 1987 and March 1988, all local authority staffed homes and registered care homes catering for mentally ill people were asked to provide details of individual residents admitted during the previous year, including whether their most recent previous accommodation had been in a hospital or other NHS establishment.

The adequacy of current statistics about mentally ill people will be reviewed during the coming year as part of the Department's information systems strategy.

Statistics about local authority and other provision in Wales are the responsibility of my right hon. Friend the Secretary of State for Wales.

Mr. Goodlad: To ask the Secretary of State for Health how many people with a main diagnosis of schizophrenia psychosis were discharged from mental illness hospitals in each of the last three years; and how many of them were taken into local authority residential care in the same year.

Mr. Freeman: The table shows the number of discharges, excluding deaths and transfers, with a primary diagnosis of schizophrenia from National Health Service mental illness hospitals and units in England for the latest three years for which information is available. The figures are for discharges, and not individual patients, since the same patient may be discharged more than once during the year.

Discharges[1] from mental illness hospitals and units, with a diagnosis of schizophrenia[2], England 1984-86

Year	*Numbers*
1984	23,879
1985	24,091
1986	23,975

[1] Excludes deaths and transfers to other hospitals.
[2] 9th Revision, International Classification of Diseases, 295.0-295.9.

Information is not collected by diagnosis on the numbers of people entering into care, or taking up accommodation, provided by the local authorities.

Mr. Goodlad To ask the Secretary of State for Health how many people discharged from hospital following a main diagnosis of schizophrenia psychosis and subsequently taken by the police under section to hospital have been refused admission in each health region in each of the last three years.

Mr. Freeman: This information is not centrally available.

Mr. Goodlad: To ask the Secretary of State for Health what information his Department collects about admission under section and refusals of admissions under section to mental illness hospitals; and if he will make a statement.

Mr. Freeman: From 1987 information has been collected centrally about the number of patients detained, within each district health authority, under each of the following sections of the Mental Health Act, 1983: section 2, 3, 4, 35, 36, 37/41, 37, 37(4), 38, 44, 46, 47/49, 47, 48/49, 48, 135 and 136. This information is available correlated to the mental category and sex of patient. Comparable information is available for earlier years and is contained in the Department's statistical note 1/88, a copy of which is in the Library. No information is centrally available on the refusal of hospitals to admit patients under sections of the Act.

Mr. Goodlad: To ask the Secretary of State for Health how many people discharged from mental illness hospitals after a main diagnosis of schizophrenia psychosis having been proved vulnerable boarders subsequently became voluntary boarders in each of the last two years in each health region.

Mr. Freeman: The information requested is not available centrally.

Mr. Goodlad: To ask the Secretary of State for Health how many residential places in the community are currently available for those discharged from mental hospitals in each health region; what is the current rate of occupancy; and what are the projected figures for the next two years.

Mr. Freeman: Information on residential places specifically for people discharged from mental hospitals is not available. The estimated numbers of places in local authority, voluntary and private homes and hostels for mentally ill people in each health region in England, in the latest year for which figures are available, are given in the table. Neither occupancy rates nor projected figures for subsequent years are available centrally.

Numbers of places in local authority, voluntary and private homes in health regions in England—Places available at 31 March 1987

Health region	*Number*
Northern	482
Yorkshire	778
Trent	821
East Anglian	382
North West Thames	770
North East Thames	678
South East Thames	1,160
South West Thames	627
Wessex	473
Oxford	394
South Western	495
West Midlands	982
Mersey	464
North Western	662

Mr. Goodlad: To ask the Secretary of State for Health how many mental illness beds there were in each health region in each of the last five years; what was the rate of occupancy; and what is the planned number of beds in each health region in the current year.

Mr. Freeman: The table shows the number of staffed beds in mental illness hospitals and units, and their

occupancy rate, for 1982-1986. Since 1987-88, the first year of Korner data, information has been collected on "daily available beds", and is available in the booklet "Summary of KHO3 pt 2 Wards open overnight". A copy has been placed in the Library. The figures for occupied bed days for 1987-88 are not yet available and so a rate of occupancy cannot be calculated. The information about planned number of beds for 1988-89 is still being processed.

Region	1982		1983		1984		1985		1986

Ambulance Calls (Kidsgrove)

Ms. Walley: To ask the Secretary of State for Health if he will direct extra resources to be made available to the North Staffordshire district health authority to enable the response to ambulance calls from Kidsgrove to meet the Occon standard.

Mr. Freeman: The allocation of resources to the Staffordshire ambulance service is the responsibility of the West Midlands regional health authority which has this year increased its allocation to the service by £403,000 to £6,229,000. I understand that the Staffordshire ambulance service has commissioned a full review of its services to identify areas for improvement.

Kreutzfeldt-Jakob Dementia

Mr. Ron Davies: To ask the Secretary of State for Health whether he now has any plans to introduce reporting procedures in respect of Kreutzfeldt-Jakob dementia.

Mr. Freeman: The chief medical officer is discussing with the Medical Research Council and the medical profession the most effective way of monitoring the incidence of Kreutzfeldt-Jakob disease.

Mental Health Act 1983

Mr. Vaz: To ask the Secretary of State for Health since the introduction of the Mental Health Act 1983, how many people have been removed from the United Kingdom under section 86; and if he has any plans to review the operation of this section of the Act.

Mr. Douglas Hogg: I have been asked to reply.

Two patients detained under the Act have been removed under this provision. There are no plans to review its operation.

SCOTLAND

Highland Health Board (Meeting)

Mr. Galbraith: To ask the Secretary of State for Scotland who attended the meeting between his Department and the chairman and general manager of Highland health board; what was the purpose of that meeting; and if he will place a copy of any minutes taken of the meeting in the Library.

Mr. Michael Forsyth: An informal meeting between the chairman and general manager of Highland health board and myself was held on 24 February to discuss matters of common interest. An official of the Scottish Home and Health Department was in attendance. No formal record of the meeting was made.

Ambulance Drivers (Overtime Ban)

Mr. Ron Brown: To ask the Secretary of State for Health if he has received any recent representations from the trades union movement about the overtime ban by Edinburgh's ambulance drivers; and if he will make a statement.

Mr. Michael Forsyth: No representations have been received from the trades union movement. The unofficial overtime ban ended on 27 March 1989 following a ballot of the membership.

Animal Diseases Research Association

Mr. Ron Brown: To ask the Secretary of State for Scotland if he has received any recent representations from the Animal Diseases Research Association about a reduction in research funding at its Edinburgh base; and if he will make a statement.

Mr. Michael Forsyth: The president of the association wrote to my right hon. and learned Friend on 28 February drawing attention to the alleged effects on work at the Moredun Research Institute of reductions in Government funding of near-market research.

The position is that a programme of Government-funded research for 1989-90 amounting to £2.558 million has been agreed with the institute's director, based on his recommendations on scientific priorities taking account of the Government's policy to phase out public support of near-market R and D. Additional resources will be directed towards molecular biological and immunological work, which offers the best opportunities for faster progress in animal disease control and prevention. Other work of lower scientific priority will be terminated or reduced. The allocation of recurrent expenditure for 1989-90 compares with the allocation of £2.596 million in 1988-89. In addition, the institute received £0.166 million from the DAFS increased flexibility scheme, and will be eligible to enter further bids in 1989-90.

Community Psychiatric Nurses

Mr. Goodlad: To ask the Secretary of State for Scotland how many community psychiatric nurses there have been in Scotland in each of the last three years.

Mr. Michael Forsyth: Arrangements have been made to collect this information for the first time this year. Data will relate to 31 March 1989 and should be available by early summer.

Schizophrenia

Mr. Goodlad: To ask the Secretary of State for Scotland what are the figures for research into mental disorders funded by the Scottish Home and Health Department in 1988-89 and 1989-90; and, of these amounts, how much are for projects specifically related to schizophrenia.

Mr. Michael Forsyth: Outturn figures for the financial year 1988-89 are not yet available. Estimated expenditure is £105,615, of which £25,245 is for projects related to schizophrenia. Estimated expenditure in the financial year 1989-90 is £106,911 and £51,121 respectively.

Mental Health

Mr. Goodlad: To ask the Secretary of State for Scotland (1) what information he has about the mental health history of homeless people in Scotland; and if he will make a statement;

(2) what information he has about the mental health history of the homeless people in Scotland in each local authority area; and if he will make a statement.

Mr. Michael Forsyth: Information about the mental health history of homeless people in Scotland is not collected. It is the policy of my right hon. and learned Friend that people should not be discharged from mental illness hospitals unless proper support facilities are available for them in the community.

Mr. Goodlad: To ask the Secretary of State for Scotland what information is collected by his Department about people who have been discharged from mental illness hospitals in Scotland.

Mr. Michael Forsyth: Information is collected under the following headings:

Occupational condition on discharge (fitness for employment etc.)
Disposal on discharge (eg to home, hostel etc.)
Arrangements for after-care.

Mr. Goodlad: To ask the Secretary of State for Scotland how many mental illness beds there were in Scotland in each of the last five years; what was the rate of occupancy; and what is the planned number for the current year.

Mr. Michael Forsyth: The information available is as follows:

Average available staffed beds and percentage occupancy for mental illness[1]

Year	*Average available staffed beds*	*Occupancy per cent.*
1984	13,054	85·2
1985	12,551	83·5
1986	12,191	83·2
1987	11,683	83·9
1988	10,155	82·6

[1] Excluding the specialties psychogeriatrics, child psychiatry, adolescent psychiatry.

Forward information for the current year is not available centrally.

New Towns Document (SDA Response)

Mr. Ingram: To ask the Secretary of State for Scotland why the Scottish Development Agency asked for its response to the consultation document "The Scottish New Towns—Maintaining the Momentum" to be treated in confidence.

Mr. Lang: Many communications between the agency and Ministers must of necessity be in confidence. After consultation with the agency, however, I am pleased to make the agency's views available on the same open basis as the other responses to the consultation document.

Rating Reform

Mr. Sillars: To ask the Secretary of State for Scotland if he has any plans to introduce imprisonment as a penalty for non-payment of the poll tax.

Mr. Lang: No. The existing procedures which apply in Scotland are adequate to ensure collection of the community charges.

Rating Reform

Mr. Sillars: To ask the Secretary of State for Scotland if his Department had any hand in providing information to the *Evening Times* for its article published on 10 April, a copy of which has been sent to him.

Mr. Lang: No. The Scottish Office was not approached in connection with the article.

Mrs. Fyfe: To ask the Secretary of State for Scotland what directions he has issued to poll tax registrars on when to choose freezing of bank accounts as a method of enforcing either fines for non-registration or for non-payment of the poll tax.

Mr. Lang: Individual levying authorities are responsible for deciding when to take steps to recover civil penalties due for offences relating to community charges registration and arrears of community charges, and the means by which they do so. My right hon. and learned Friend has issued no instructions on these matters.

Health Boards (Membership)

Mr. Maclennan: To ask the Secretary of State for Scotland what consideraion he gives to district representation in the appointment of members of a health board.

Mr. Michael Forsyth: Members are not appointed to represent particular areas or interest, but the Secretary of State tries to ensure a suitable range of experience, expertise and background in the membership of any board. In doing this he takes the area of residence into account as one relevant factor.

Animal Pests and Diseases

Mr. Ron Davies: To ask the Secretary of State for Scotland if he will estimate the annual loss to the British forestry industry from damage from animal pests and diseases, respectively, and also the annual costs in *(a)* preventive measures and *(b)* remedial measures.

Lord James Douglas-Hamilton: It is not possible to provide an accurate assessment of the financial loss from damage from animal pests and diseases as much of this is of a long-term nature. Records of expenditure on the protection of Forestry Commission woodlands are available, but no information is held on the expenditure in privately owned woodlands.

Health Boards (Membership)

Mr. Galbraith: To ask the Secretary of State for Scotland if he will list those members of health boards whose appointment terminates on 31 March and those whose appointment arises on that date giving for each the nominating body.

Mr. Michael Forsyth *[holding answer 23 March 1989]:* The information requested is as follows.

Health Board	*Nominating body (where appropriate)*
ARGYLL AND CLYDE	
Appointment ended	
Mrs. E. M. Cockburn	Russell Fairgrieve Esq.
Dr. R. Erskine	British Medical Association
J. H. Gillougley	Paisley Chamber of Commerce
Rev. J. Young	Renfrew Local Health Council
Appointed	
N. M. Faccenda	Scottish Conservative Party
AYRSHIRE AND ARRAN	
Appointment ended	
Mrs. A. M. Campbell	Scottish Society for the Mentally Handicapped
T. Dickie JP	Health Board
Mrs. M. W. Gallie	Mr. John Corrie

Rev. J. A. Macdonald	Health Board
Dr. J. W. Robertson	Health Board

ENVIRONMENT

Rating Reform

Mr. Allen: To ask the Secretary of State for the Environment how many severely mentally impaired adults he estimates will qualify to be exempt from the poll tax *(a)* in Nottingham and *(b)* in England and Wales.

Mr. Gummer: The Government have no plans to introduce a poll tax. We estimate that around 55,000 adults in England will qualify for exemption from the community charge on grounds of severe mental impairment. Figures are not available on a local basis.

Mr. Allen: To ask the Secretary of State for the Environment what is his latest estimate of the poll tax bill for each person in Nottingham; when this estimate was made; and when he expects to update it.

Mr. Gummer: The Government have no plans to introduce a poll tax. I have made no estimates of future community charge levels. Illustrative figures were placed in the Library on 23 June 1988 showing community charges based on 1988-89 local authority budgets. Figures based on the 1989-90 rate support grant settlement were placed in the Library on 1 March. Illustrative 1989-90 figures based on expenditure returns will be provided in due course.

Mr. Allen: To ask the Secretary of State for the Environment what discussions he has had since 1 April with poll tax levying authorities.

Mr. Gummer: The Government have no plans to introduce a poll tax. Both Ministers and officials at this Department have frequent discussions with charging authorities. For example, since 1 April I have visited Wolverhampton and Dudley district councils and the London borough of Islington.

Mr. Redmond: To ask the Secretary of State for the Environment if he will list those European Economic Community member countries that have a community charge tax; and if he will make a statement.

Mr. Allen: To ask the Secretary of State for the Environment if he will list information available to him on any countries which finance their local government from a poll tax, also expressing this as a percentage of world nations.

Mr. Gummer: I refer the hon. Members to annex K of the Green Paper "Paying for Local Government" (Cm.9714) which comments on international comparisons, and to the updated version of figure K3, which was published in the Official Report on 24 June 1988 at column *744*.

Mr. Allen: To ask the Secretary of State for the Environment what percentage of single pensioners will be adversely affected by the introduction of the community charge; and what percentage of pensioners will be adversely affected by the community charge *(a)* in Nottingham and *(b)* in England and Wales.

Mr. Gummer: Tables showing the impact of the community charge on pensioners in England were placed in the Library on 28 February 1988.

These figures based on an analysis of family expenditure survey data show that 75 per cent. of single pensioners, and 83 per cent. of single pensioner households, will pay less when the community charge is fully in place. Overall, 69 per cent. of pensioner households are expected to pay less.

I have no separate estimates for Nottingham.

Mr. Allen: To ask the Secretary of State for the Environment what is the total number of staff now working in local authority units specifically to register people for poll tax *(a)* in Nottingham and *(b)* in England and Wales; and what is the total wage bill for each category.

Mr. Gummer: The Government have no plans to introduce a poll tax. As far as the community charge is concerned, the information sought by the hon. Member is not available centrally. A summary of the available information on community charge implementation, including staffing levels, was placed in the Library on 10 April.

Mr. Alex Carlile: To ask the Secretary of State for the Environment if he will provide an estimate of the amount of additional paper which will be required to provide for forms connected with the collection of the community charge, as compared with the old rating system; and if he will make a statement.

Mr. Gummer *[holding answer 12 April 1989]:* No reliable estimates are available of the quantities of paper required to service the collection of domestic rates or of community charges. Since there will be twice the number of chargepayers as ratepayers, it would not be surprising if the volume increased.

I should imagine that the volume would be very much higher if we were to replace rates with the complexity of a local income tax, and higher still if that were combined with capital value rating, which I understand to be the Opposition's proposal for rates reform.

Babbington Pit

Mr. Allen: To ask the Secretary of State for the Environment if he will take steps to preserve the former Babbington pit headstocks, Nottingham, in their present form on the current or a nearby site.

Mrs. Virginia Bottomley: I have asked our statutory advisers in English Heritage to assess whether there is a case for listing the headstocks as a building of special architectural or historic interest. I will write to the hon. Member when I have received their advice.

Olympic Games

Mr. Teddy Taylor: To ask the Secretary of State for the Environment if he was consulted by the President of the European Economic Community Commission before the announcement on 4 April by the president of his proposals that the United Kingdom team at the Olympic Games in 1992 should bear European Economic Community insignia and substitute an European Economic Community tune in place of the United Kingdom national anthem; and if he will make a statement.

Mr. Moynihan: The President of the Commission of the European Communities did not consult my Department about his announcement on 4 April about the 1992 Olympic Games. His proposals are for the British Olympic Association to consider. I understand that it is opposed to them.

Loughborough and Angell Town Estates

Mr. Fraser: To ask the Secretary of State for the Environment whether he is willing favourably to consider estate action schemes for the Angell Town and Loughborough estates in Lambeth.

Mr. Trippier: Lambeth's application under the estate action initiative in support of the first phase of improvement works to the Angell Town estate was received too late to be considered for resources this year. Applications for future phases will be treated on their merits. No application has been made in respect of the Loughborough estate.

Leasehold Contracts

Mr. Atkinson: To ask the Secretary of State for the Environment if he has any plans to introduce legislation to ensure that leasehold contracts include full details of the leaseholder's commitment to insurance and maintenance; and if he will make a statement.

Mr. Trippier: No. These are matters for negotiation between the individual freeholder and leaseholder when a contract is drawn up or assigned. The Landlord and Tenant Acts 1985 and 1987 give significant rights to residential leaseholders in relation to both insurance and maintenance arrangements.

Drought (Contingency Plans)

Mrs. Clwyd: To ask the Secretary of State for the Environment whether his Department received reports from the water authorities concerning levels of winter rainfall; whether he expects the shortage to continue into the summer as a drought; and whether his Department has made contingency plans for a drought this summer.

Mr. Howard: We have been receiving regular reports from the water industry on regional rainfall and the state of water resources. Heavier than average rainfall over the last two months has greatly improved the situation; areas of potential shortage of water supply this summer are now relatively small and confined to parts of the south east. Responsibility for taking action in the event of drought rests with the water undertakers.

Council Housing (Allocation)

Mr. Tony Banks: To ask the Secretary of State for the Environment (1) what information he has on the proportion of *(a)* councils and *(b)* housing associations which publish their criteria for allocation of property; and whether any guidance has been issued to them on this point;

(2) what information he has on the proportion of *(a)* councils and *(b)* housing associations which have clear allocation policies according to need; and whether he has issued any guidance to them on this point.

Mr. Trippier: The information is not held centrally, but section 106 of the Housing Act 1985 requires local housing authorities and housing associations to publish their allocation rules. There has been no recent guidance to councils on this subject, but the tenants' guarantee, issued in January this year by the Housing Corporation, provides advice to registered housing associations on policies and procedures for allocation of their accommodation.

Strategic Planning (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what arrangements for consultation he has made in respect of his draft strategic planning guidance for London with *(a)* the general public, *(b)* London borough councils, *(c)* voluntary and community groups, *(d)* the business community and *(e)* other public and private bodies.

Mr. Chope: Copies of the draft guidance were sent to London Members, the London borough councils and some 180 organisations with an interest in London wide planning matters. The Department has publicised the consultation and to date has sent more than 350 copies of the draft guidance to members of the public, voluntary and community groups, businesses and others on request. A list of those commenting on the guidance will be placed in the House of Commons Library when consultation is completed.

Local Authority Housing (Capital Programme)

Mr. Tony Banks: To ask the Secretary of State for the Environment what estimates have been made by his Department for the availability of resources for local authorities' housing capital programmes including non-prescribed capital receipts under both the current and the proposed capital finance regime proposed by the Local Government and Housing Bill 1989 in the years 1987-88, 1988-89 and 1989-90, tabulated by non-metropolitan authorities, metropolitan authorities, inner London boroughs and outer London boroughs.

Mrs. Virginia Bottomley: The table shows housing capital allocations for the years requested. It also shows the prescribed proportion of housing capital receipts and the amount, for each class of authority, by which cash-backed housing capital receipts in aggregate exceed the prescribed proportion of housing capital receips for 1987-88. Information on the availability of capital receipts by class of authority for 1988-89 and 1989-90 is not available.

The capital finance regime proposed in the Local Government and Housing Bill will apply to 1990-91 and subsequent financial years. Provision for housing capital expenditure in 1990-91 and 1991-92 was made in table 9.1 of the "The Government's Expenditure Plans 1989-90 to 1991-92 Chapters 9 and 10" (Cm. 609).

£ million

	Housing capital allocations[1]	*Prescribed proportion of housing capital receipts*	*Excess of cash backed housing receipts over prescribed proportion of housing receipts*
1987-88			
Shire districts	592	1,400	3,130
Metropolitan districts	377	300	270
Inner London boroughs	264	230	170
Outer London boroughs	146	320	580
1988-89			
Shire districts	500	n/a	n/a
Metropolitan districts	350	n/a	n/a
Inner London boroughs	265	n/a	n/a
Outer London boroughs	149	n/a	n/a
1989-90			
Shire districts	361	n/a	n/a
Metropolitan districts	249	n/a	n/a
Inner London boroughs	184	n/a	n/a
Outer London boroughs	106	n/a	n/a

[1]Provisional. For 1989-90 £208 million housing allocations have not yet been issued.

Mr. Tony Banks: To ask the Secretary of State for the Environment to what extent the utilisation of non-prescribed capital receipts currently used by local authorities to fund part of their housing capital programme will be taken into account when assessing the level of Exchequer subsidy to housing revenue accounts for 1990-91 and in subsequent years.

Mr. Trippier: An allowance will be made in the calculation of housing revenue account subsidy for local authorities' revenue expenditure on maintenance. We believe that, under the present system, some authorities also use some of their capital receipts on what would normally count as items of revenue spending, and we shall be consulting the local authority associations on whether to reflect this in the subsidy calculation under the new system, and if so, to what extent.

LRB (Portraits)

Mr. Tony Banks: To ask the Secretary of State for the Environment if, pursuant to his reply of 7 April, *Official Report*, columns *299-300*, he will give details of the portraits transferred from the London residuary body to the City of London.

Mrs. Virginia Bottomley: The entire collection of portraits of London county council and Greater London council chairmen, and portraits of prominent members of those councils and of the Metropolitan Board of Works are the subject of the transfer.

Middlesex Guildhall Collection

Mr. Tony Banks: To ask the Secretary of State for the Environment on what criteria Harrow was chosen as the potential recipient of items from the Middlesex Guildhall collection currently in the possession of the London residuary body; which other London boroughs showed an interest; and if other boroughs were notified of the possible availability of the collection.

Mrs. Virginia Bottomley: The London borough of Harrow was chosen because of the strength of its connection with the former Middlesex county council. No other borough was made aware of the availability of the Middlesex Guildhall collection for transfer, or showed an interest in acquiring it.

Lieu of Tax

Mr. Baldry: To ask the Secretary of State for the Environment whether he has accepted any land in lieu of tax in the last financial year.

Mr. Ridley: An offer of 18·91 acres at Oxey Mead, Yarnton, Oxfordshire was accepted in lieu of capital transfer tax. The amount of tax satisfied was £15,640. The land, part of a site of special scientific interest, has been allocated to the Berkshire, Buckinghamshire and Oxfordshire Naturalists Trust.

Parent Registers

Mr. Blunkett: To ask the Secretary of State for the Environment if he will make a statement on the availability to community charge registration officers of the parent registers presently being compiled by local education authorities.

Mr. Gummer *[holding answer 12 April 1989]:* There is no requirement on local education authorities to compile parent registers. Registers containing the names of everyone known to be a parent of a registered pupil are required to be kept by schools, and access to them by officers of local education authorities is limited by regulations. Regulations on the community charge require local authorities to supply information about individuals to community charges registration officers only where it is within their possession or control. That information must be limited to names, addresses, and periods of residence.

Housing Stock

Mr. Tony Banks: To ask the Secretary of State for the Environment what information he has as to the average percentage of the housing stock of *(a)* councils, *(b)* housing associations and *(c)* private landlords vacant for more than three months at the last recorded date.

Mr. Trippier *[holding answer 13 April 1989]:* The available information is provided by local authorities in their housing investment programme return (HIP 1). It is recorded in the "Housing Needs Appraisal: HIP 1 for 1988, Grossed for England", a copy of which is in the Library.

The return shows the number of local authority dwellings which had been empty for more than six months at 1 April but it does not provide any further breakdown of those empty for six months or less; nor does it show the length of vacancy for dwellings in other sectors.

Planning Guidance (London)

Mr. Tony Banks: To ask the Secretary of State for the Environment what policies and proposals is his planning guidance for London are designed to meet the special problems and needs of (i) women and (ii) ethnic communities.

Mr. Chope *[holding answer 13 April 1989]:* Ethnicity and gender are not relevant to land use planning.

House of Commons (Health and Safety)

Ms. Walley: To ask the Secretary of State for the Environment for how many more weeks the stairway leading to the Official Reporters' gallery will be in breach of health and safety regulations, were they to apply; and if he will now replace the two out-of-order light bulbs.

Mr. Chope *[holding answer 13 April 1989]:* Redecoration work on the Lady Members' staircase was restricted to weekends in order to maintain normal access. This inevitably prolonged the work, but it has now been completed and the area cleared. The light bulbs have been checked and are now in full working order.

INDEX TO THE

PARLIAMENTARY DEBATES

OFFICIAL REPORT

SIXTH SERIES **VOLUME 150**

SESSION 1988–89

4th April–14th April 1989

SCOPE OF THE INDEX, ARRANGEMENT AND ABBREVIATIONS

This index is derived from the House of Commons Library's Parliamentary On-Line Information System (POLIS), and the subject terms used are based on those used in POLIS. There are often changes in column numbering, etc, between the daily part or weekly Hansard (which simply collects together the daily parts without revision) and the bound volume. The index for the bound volume is revised to take account of these changes.

Scope and arrangement of the Index

Oral and Written Parliamentary Questions are indexed under subject headings and the names of Members asking and Ministers replying to them. Questions are not listed under the names of Departments replying. Departmental listings can be arrived at indirectly by looking under the names of the Minister(s) of that Department. There are, however, the headings 'Northern Ireland', 'Scotland', and 'Wales' under which one can find not only most Questions answered by the Northern Ireland Office, Scottish Office, Welsh Office but also Questions about these areas of the United Kingdom which are answered by other Departments. Ministerial statements are indexed under subject headings, under 'Ministerial statements' and the names of Ministers making them and Members speaking on them. General debates are indexed under broad subject headings and under the names of all Members and Ministers taking part. Debates on legislation (Bills, Orders, Regulations etc.) are indexed under the name of the Bill, Statutory Instrument etc, under subject headings and under the names of those taking part.

Rulings and Statements by Mr. Speaker and his deputies are brought together under the heading Speaker's rulings and statements.

Other contributions by Mr. Speaker and his deputies appear under the heading Speaker.

Opposition Day Debates, Estimates Day Debates and Standing Order No. 10 applications are listed under those respective headings and under subject headings too.

The date of each item except Parliamentary Questions is inserted immediately before the reference.

Members' names are given in the form by which they prefer to be known and are printed in bold italics. Under their names, entries are arranged under one of the two headings *Debates etc* (to include interventions on statements, points of order and so on) or *Questions*.

Abbreviations

Bills 1R = first reading, 2R = second reading, Money res = money resolution, Com = Committee stage, Rep = Report stage, 3R = third reading, amendt/amendts = amendment/amendments, * = matter taken formally, without debate.

Column numbers followed by the letter W refer to Written Questions. These appear at the end of each daily part or volume with their own sequence of column numbers printed in italics.
